### eneral Appraisers Draw Distinction Between Different Classes of Belt Buckles.

A distinction in relation to belt buckles as made last week in a decision reached the Board of United States General Appraisers, New York, on the protest of B. lumanthal & Co., from an assessment of uty by the Collector at New York. A porton of the buckles and clasps were made of eel and other metal in imitation of gold nd silver. As to these buckles the Board, llowing the Schiff case, sustained the prost and the duty was fixed at 45 per cent. nder Par. 193 of the Tariff Law.

Another class of buckles was made of eel and imitation gold or silver, more or ss elaborately enameled. Some of these ere made wholly of steel and cheap imitaons of precious metals with slight enamng, and the Board inclined to the opinn that the duty on such products should 45 per cent., but following the decision Judge Coxe in the case of Bader against e United States, classified all these arties as jewelry, dutiable at 60 per cent. nder Par. 434, the protest being overruled this respect.

The third class comprised buckles elaboately ornamented and composed of base etal made in imitation of gold and oxide silver, set with imitations of diaonds and other precious stones. The oard agreed that these buckles should be assified as jewelry, subject to the 60 per nt. duty.

### A Thief but No Liar.

MANY tales have been told of the "finest," but the ingenuity of a ewark "cop" on trial for neglect of duty is ard to beat.

A jewelry shop had been entered and a ay of jewels carried off under the very es of the officer. On trial the following nversation took place between the Police ommissioner and the accused:

"Why didn't you see the man?"

"I did see him, your Honor, and asked m what he was doing hanging around."

"What did he say?"

"He said he was lookin' into the location. he was goin' in for jewelry business."

"Well, he did. He robbed the store."

"Well, your Honor, even if he was a ief, he was no liar."—*New York Sun.*

## *ELSIE BEE'S FASHIONS.*

**NOVELTIES SEEN IN A LADY'S RAMBLES AMONG TH JEWELERS.**

AN effect of unstudied grace is a distinctive feature in some of the new and costly corsage ornaments, necklace and the like in which diamond flower and leaf work is skillfully employed.

*

Burmese gold is used in very *chic* chain bracelets jewelled with opals.

*

Belt pins, after the style of automobile hatpins, are desirable little articles.

*

Among the latest designs in earrings are square stones, as an emerald, faceted and bordered with diamonds.

*

Tiny festoons in green tourmalines pointed with pearls, on a finely chased band of gold, are among new tops of amber-back combs.

*

Designs of sporting character show horses' heads in Roman gold, and a saddle and snaffle bit on oval sleeve links of antique gold.

*

Very tall glass candlesticks are fitted with slender flower-like globes, and some are dangled with old-fashioned prisms without the globe.

*

A pretty little snake in green enamel and gold coiled around gold bonbon tongs make a unique decoration. Some glass bonbon dishes are on slender stems with the cup ornamented with peacock feathers in gold and enamels.

*

Extremely attractive models exploit a new effect in costly rings—namely, that of surrounding a choice stone, as a cabochon ruby, or faceted emerald, with a row of diamonds, a row of rubies, or emeralds, and an outer row of pearls.

*

Very dainty bracelets for little girls are of gold wire or narrow bands; some gold link bracelets in fancy patterns, plain or jeweled, are furnished with a padlock and key. Small gypsy rings in Roman gold are set with two diamonds and a ruby or sapphire, or a diamond and pearl.

*

Tops of umbrella handles *de luxe* rival those of costly parasols. Malachite lapis-lazuli, onyx, in different colors, carnelian and crystals, both carved and cut, figure among the latest expressions of this class. Other tops show partridge-wood or snake-wood ornamented with a design in pierced gold or silver.

*

New and charming designs are displayed in the necklaces and pendants upon which Dame Fashion has bestowed her favor. The festoon effect in flexible diamond leaf-work connected with tied diamond bows set with pearls, or perhaps emeralds or rubies, furnish a sugestive example of a refined and pleasing style in this line. Elegant diamond bar pins have a pendant heart in diamond or pearl pavé work.

## Further Details of the Bankruptcy o David H. Kahn, Erie, Pa.

PITTSBURG, Pa., Aug. 30.—David Heima Kahn, 1129 State St., Erie, Pa., who file a petition in voluntary bankruptcy in th United States District Court in this city, a stated in the last issue of THE CIRCULAR WEEKLY, has assets of $1,607, with liabi ties of $3,297.43. There is not a very lon list of creditors, but a number of firm are interested for good sized amounts.

It is stated here that four or five week ago Mr. Kahn took into partnership Jaco Greenburg, formerly of Buffalo, and tha at the time of the filing of the petition, s far as known, these men were doing bus ness as partners, though the petition is file by Mr. Kahn alone. Mr. Davis, of S Davis & Co., who is a creditor for a sma amount, said to-day that this feature of th matter is to be investigated, because th action here is not quite understood. A note was given to Greenburg for $30( which is included in the schedule of liab ities, and it is stated in the petition tha this note was given by Kahn to Greenbur in part, for the payment of the store. Ver little is known about the firm here, so fa as could be learned.

A full list of the creditors schedule with the amounts of their claims, follows Sigler Bros.' Co., $907.50; John C. Lowe $101.40; East Palestine Pottery Co., $35 L. A. Eppenstein & Co., $69; Marcus Va entine & Co., $93; Hatch & Co., $22; Leo Hirsch, $28; Seigel, Rothschild & Co $76; N. Newberger & Co., $32; E. Harri & Co., $166; Joseph W. Stern & Co., $65 S. Davis & Co., $21; Limoges China Co $50; Lindenbaum Jewelry Co., $30; Na tional Jewelry Case Co., $43; Carl Strauss $12; Block Bros., $110; W. Bingham & Co., $85; Louis L. Gray & Co., $208; Hipp Didishein & Bro., $250; William L. Gi bert Clock Co., $24; M. S. Benedict Mfg Co., $96; Henderson & Co., $46; Abram Bros., $94; Deutsch Jewelry Co., $108; Mr Gallup, $9; Epp Bros., $65; Lawrie Bros $35; P. Galinski, $35; Warner Bros., $35 Solomon Loeb, $39.

The date of the note given to Greenbur is not stated, except that it was given i the Spring of this year. Kahn gives hi place of residence as 1106 State St., Erie The attorneys in the case are Benson & Brooks, Erie.

The Court has taken no action on the petition on account of Judge Buffington being absent from the city. He will return this week.

---

King Leopold II recently visited the World's Fair of Liége, where he was re ceived at the stand of the Antwerp diamond merchants by Mr. Ryzinger, president of the section of jewelers, who presented to the King L. Coetermans, Genera Consul of Persia and president of honor of the exhibitors; Mr. Coetermans presented to the King Mr. Michaux, president of the collective exhibitors. Princess Clementin seemed interested in the splendid exhibit of diamonds. The other exhibitors presented by Mr. Michaux were: Messrs. A. A Adler, Coetermans-Henrichs, A. Dreyfus, M Feher, S. Himmelblau, Maurice Polak F. Ries, M. Ryzieger and M. Y. Fol kowsky.

## Missing Books of Harry Levinsohn ported Found and His Bankruptcy Examination Continues.

In the bankruptcy proceedings aga t Harry Levinsohn, wholesale jeweler at Maiden Lane, New York, there was other hearing, last Thursday, at which nouncement was made of the discovery Levinsohn's missing books. Mr. Levins and his bookkeeper were questio sharply in relation to the disapp ance of the books and their covery; also the possibility that the counts are not now in as complete co tion as they should be. Before the hea opened in United States Commissi Alexander's office, Attorney Joel M made a statement to the other lawyers ab the books. He said that since the last sion he had made a determined sea which had resulted in the books being fo and that they would be turned over to receiver in the morning. Leonard Bron appeared for the receiver, and the Jewel Association and Board of Trade was re sented by A. H. Gleason.

Moses Feinberg was sworn first, and swered questions to which he had pr ously refused to give replies. He enun ated the several books which he had in the business, and said that he made the entries. He said that no portion the books or accounts had been destro and that all of them were in existence. reply to questions he said that when bankruptcy proceedings were threatened Levinsohn told him to take the books Lawyer Marx. The witness took the bo over to the lawyer's office, but Mr. M not being there at the time, the witness taken the books to his own home. In a or so, the witness said, he went out of t and supposed somebody else would take books to the lawyer. When he came bac the city he did not recollect at first that had left the books in his house, but under the impression that they were in lawyer's office, until the discussion ar and his recollection was stirred.

Mr. Feinberg said that the books wo not give a cash or capital account, so t it would be impossible to tell from th how much money Mr. Levinsohn withdr from the business. When Mr. Levins made cash sales the transactions were recorded in the books. The witness s that the books would show all that was standing, but it would not be possible determine from them the condition of business at any time. The banking done with the State Bank on Grand since June, and before that month with Bank of the Metropolis. The check bo on the State Bank were available, the w ness said, but he did not know that eit the pass book or the check book of the B of the Metropolis is to be found now.

Mr. Levinsohn was sworn, and his te mony corroborated that of his bookkee as to the disappearance and recovery of books. He said that he supposed while discussion was in progress that the bo were in his lawyer's possession, as he sent them there. The witness said he co not tell from his books how much merch dise he had bought, and the books wo not show the discounting of notes or otl transactions in relation to bills receivat Adjournment was then taken until Sept

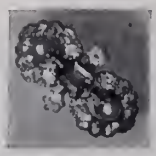
## Death of Thomas W. Kavanagh.

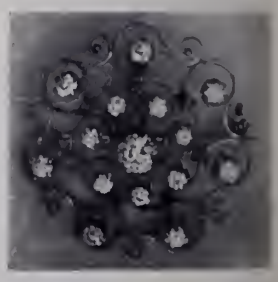
By the death, under peculiarly lamental circumstances, of Thomas W. Kavanag Aug. 29, at the building, at the corner Broadway and 19th St., New York, the Go ham Mfg. Co. lost a valuable e ployee, the period of whose first assoc tion with the concern dates back ma years. In view of the various erronec statements which have appeared, as to t causes which led to this sad event, the f lowing authoritative statement has be given out:

About the year 1877, Thomas W. Ka anagh began his career, when yet a b with Theodore B. Starr, but in 1885 became connected with the Gorham M Co., taking a position in the leath goods department. Shortly after th he was transferred to the establishment Spaulding & Co., Chicago, where the ent charge of the leather goods departme was entrusted to him. So marked was l success that, in a very short time, he h gained the entire confidence of the fir by whom he has always been held in hi regard.

In May, of this year, Mr. Kavanagh c cided to accept what appeared to him to a very favorable offer, made to him by leading department store of New Yo Leaving his family temporarily in Chicag he came to New York and assumed l new duties. Finding it, however, impo sible to adapt himself to the departme stor 's methods, he only remained a fe weeks. The Gorham Mfg. Co. imme ately evinced its appreciation of his val by offering him an excellent position its retail department, at the same sala he had enjoyed in Chicago.

To his wife and family in Chicago his d votion was unbounded. Indeed, it is beyo all doubt that it was the necessarily te porary separation from them, coupled wi his sense of disappointment at having be induced by so serious a misapprehensio to leave his Chicago home, that preye upon his sensitive nature and develope the attack of dementia which led to committing suicide.





It may be added that the Gorha Mfg. Co. took entire charge of th funeral arrangements and superintended th sending of the body to Chicago for inte ment.

### Suspected Jewelry Thief Assaults Superintendent of Pittsburg, Pa., Detectives.

PITTSBURG, Pa., Sept. 1.—Edward Johnston, a colored man, believed to be a jewelry thief, who said Chicago was his home made a murderous assault upon Superintendent of Detectives Thomas A. McQuaide in the latter's office, in the Public Safety building, this afternoon shortly after 1 o'clock. Johnston had been arrested in a pawnshop in Wylie Ave., while attempting to pawn about $1,000 worth of jewelry.

While the chief detective was examining the prisoner the assault was made. All of the pockets of the man had been searched in quest of jewelry and four watches had been found. When McQuaide stooped over to take off the negro's shoes the latter leaned forward and grabbed a knife lying on McQuaide's desk. The knife had once been a dirk, but had been sharpened down to use as a paper cutter. The superintendent immediately saw that an attempt was to be made on his life, and a lively tussle followed. McQuaide grappled with the man and successfully held the arm holding the knife until assistance arrived. He was badly shaken up, and for a time it was feared that he would have to be sent to a hospital.

When the office door was opened by the detectives who came to assist Mr. McQuaide, the negro made a dart out the passageway and was compelled to run the gauntlet. He was captured, however, though it required four men to hold him. Mr. McQuaide was finally successful in his search, for in the man's shoes were found a number of rings set with diamonds, emeralds and other gems.

The local detectives had warned the pawnbrokers to be on the lookout for this man, and when Johnston appeared at the Wylie Ave. shop word was sent to headquarters and Policeman Thomas Costello arrested Johnston. It is not known as yet where he got the jewelry, but an investigation is being made to see if any jewelry store has been robbed. Little is known of Johnston here.

### Death of Hugh Oppenheimer.

KANSAS CITY, Mo., Aug. 30.—Word was received in this city Tuesday, of last week, of the death at Stamford, Conn., of Hugh Oppenheimer, a former jewelry jobber of this city. The body was brought here for burial.

With his cousin, Herman Oppenheimer, Mr. Oppenheimer began his business career in 1880. The partnership continued for 15 years. Herman Oppenheimer retired in 1895. From that time until 1902 Mr. Oppenheimer conducted the business himself, retiring in favor of Woodbury, Marks & Warner. Ill health caused his retirement and removal to Stamford.

Charles Gundlach, a retail jeweler of Johnstown, Pa., has the sympathy of the trade on the recent untimely death of his 12-year-old son, Earl. The boy met his death by coming in contact with a 60-inch circular saw in Union Valley, near Conemaugh, to which place he had gone for a few days' visit. The boy's face and skull were horribly gashed.

### Further Proceedings Against the Merchants' Supply Co., Columbus, O.

COLUMBUS, O., Aug. 31.—The Merchan Supply Co., of 166 and 168 3d St., again which a petition in involuntary bankrupt was filed Aug. 26, before Judge Thomps at Cincinnati, was taken in charge Wedn day, by Receiver E. C. Ellis, and from l preliminary observations he says there not much left for creditors. He estima that the stock on hand, consisting mostly clocks and jewelry, is worth probal $5,000, and though he refuses to estim the liabilities, it is thought by those in position to know, that they will run to $4 000 or $50,000. The receiver contented hi self with saying the condition of the bu ness was "simply the worst he ever saw."

Suit for $3,464.87 was brought last we in Clark County by Thos. J. Hartley, stockholder and until July 1 general ma ager of the company. Judgment was co fessed. The Cincinnati suit in Unit States Court was brought by Putna Hooker Co., of Cincinnati, and the Bent & Gering Furniture Co. and the Parke burg Supply Co.; West Virginia corpo tions. Their claims are $2,807.02, $707 and $394.05, respectively. Their petition force the company into bankruptcy w followed by one to appoint a receiver, a Attorney Ellis, of Columbus, was nam and placed under $25,000 bond.

As told last week, the company was corporated May 5, 1904, with a capital sto of $25,000, by Thomas and John Hartl Thomas G. Lisle, John C. Chester a Frank Harvey. May 20, 1905, the capi stock was increased to $100,000. No ann report was ever made to the Secretary State, but the receiver has been inform that Thomas Hartley, the first preside was succeeded by A. C. Featherstone, w was president, secretary and treasurer, a by John J. Chester, vice-president. T affairs of the company do not appear to in a good condition, and will be probed the bottom by the receiver.

### Proceedings Continue In Bankruptcy Thos. J. Bradley, Newark, N. J.

NEWARK, N. J., Sept. 4.—Objections claims were made by lawyers represent two sets of creditors at a hearing bef United States Referee in Bankruptcy Edw G. Adams, in this city, Thursday, in bankruptcy matter of Thomas J. Bradl who was until recently in the jewelry bu ness at 372 Broad St. William J. Linil appeared for Mrs. Helen McConville, w has filed a claim for $1,451, and for f other creditors, while Elmer M. Kimba New York, appeared for four large cr itors in that city.

Mr. Kimbark objected to the claim Mrs. McConville, and Referee Adams cided that testimony would have to be tak on that point. Lawyer Linihan exam the New York claims and objected to th of them because the notes were copies stead of the original documents. He w sustained by Referee Adams, and was t in a position to control the election of trustee in bankruptcy. He nominated M McConville. Lawyer Kimbark delayed selection by moving and obtaining an journment until Sept. 6, when he is to p

duce the original notes of the claims wh were disallowed.

Lawyer Linihan declared that the de was a trick played in the hope of gettin more favorable offer of settlement of claims than had yet been made.

Mr. Linihan has been ordered to sh cause why he should not be adjudged gu of contempt of court because of his fusal to testify in the bankruptcy proce ings. Mr. Linihan takes the ground that cannot be compelled to divulge what knows about Bradley and his affairs, such knowledge came into his possess in a confidential way as Bradley's legal viser.

### Package Containing $1,000 Worth Precious Stones Stolen from St Louis, Mo., Jeweler.

ST. LOUIS, Mo., Aug. 30.—A pack containing precious stones valued at o $1,000 mysteriously disappeared Mon from the establishment of H. H. Gerha 3329 Olive St., this city, and thus far efforts to run down the thief or thieves the police have proved futile.

The missing articles include the foll ing: One yellow diamond, 3½ carats; white diamond, 1½ carats; six white monds, each weighing ⅛ carat; two rubies; 36 diamonds, each 1-6 carat, and other separate packages, containing quoises, opals, small white diamonds imitation diamonds.

The stolen property was in a regular je eler's wallet, 8x3x2½ inches in size, and was put in a small box marked "Willi Ewes, Chicago," and placed in the safe. Gerhardt says that he went out shortly fore noon Monday, and spent the grea part of the day downtown on import business. He left the store in charge an employe named Thomas Ferguson. discovered his loss upon returning at P. M., and immediately called in two trol men, who were asked to make an vestigation. Ferguson, in a statement m shortly after the robbery, declared that had the package in his hands at 11 o'clo just after Mr. Gebhardt's departure. replaced it carefully in the safe, he c tends, and then went about his business

Ferguson and another employe nam Richter were in the store during the ent day, and neither can imagine how the th managed to elude them.

### Chas. Zeitler, Portland, Ore., Files V untary Petition in Bankruptcy.

DENVER, Colo., Sept. 1.—A volunt petition in bankruptcy has been filed the United States Court here by Char Zeitler, a jeweler at 752 15th St. Acco ing to a schedule of his assets and liab ties, filed with the petition, his debts are n very heavy.

Mr. Zeitler, who is 45 years old, was f 14 years in the employ of Sam Meyer, of t city, and started in business for himself j four years ago. He carried a stock of abo $1,000, and did a comparatively small bu ness. He is well known and highly thoug of in the jewelry trade, both in this city a the wholesale centers, and his friends ho that his present difficulties will soon be a justed on a basis satisfactory to himself a his creditors.

### Death of Robert B. Smith.

BALTIMORE, Md., Sept. 1.—Robert I Smith, 70 years old, one of the olde jewelers in this city, and a well-known cit zen of Northeast Baltimore, committe suicide at his home, 723 Alsquith St., th morning by shooting himself. He fire three shots, the first of which entered h right breast and passed through his bod coming out of his back and falling upon th floor. The second shot penetrated his for head, while the third shot went wild an struck the ceiling of his bedroom on th second floor, where the deed was commi ted. Coroner Caruthers, of the northeas ern district, viewed the body and gave certificate of suicide.

It was Mr. Smith's second attempt at end ing his life, the first having been made la December. At that time he secured a r volver and cartridges from a dealer on Ha rison St. The dealer's suspicion of M Smith's actions at the time of the purcha led him to place cartridges in the pist which had no caps. A day later the jewe returned to the dealer's store and upbraide him for selling bad cartridges. The deal then took the weapon from him.

Worry over financial reverses, resulti from the Baltimore fire, and grief over th death of John M. Jones, grand secretary the Maryland Lodge of Odd Fellows, a believed to have unbalanced the jeweler mind. He was a prominent Odd Fello and a close friend of the grand secretar Dread of the yellow fever plague in Ne Orleans also preyed upon his mind, he hav ing at one time suffered with the fever.

The deceased conducted a jewelry bus ness at 408 E. Baltimore St. for 30 year He lost money by the fire, and later move his business to N. Gay St. A short tim ago he retired. He was a native of Eng land and came to this country about 35 yea ago. For many years he conducted an ex clusively wholesale jewelry business

### Statistics as to Workers in Cloc Watch, Gold, Silver and Brass Trades.

Fresh data from the Federal Census Bu reau was received this week regarding th allied brass, horological and jewelry indu tries. The new figures tell the number persons over 10 years of age in the Unite States engaged in the three businesses, an subdivided by sex and social conditio The figures follow:

| Single or unknown: | *Brass workers.* | *Clock and watch workers.* | *Gold an silver worker* |
|---|---|---|---|
| Males | 11,630 | 7,474 | 9,245 |
| Females | 788 | 4,304 | 5,819 |
| Total | 12,418 | 11,778 | 15,064 |
| Married: | | | |
| Males | 13,394 | 10,927 | 9,865 |
| Females | 72 | 304 | 315 |
| Total | 13,466 | 11,231 | 10,180 |
| Widowed: | | | |

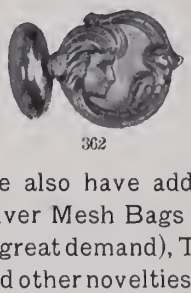
### Death of Capt. George Doty.

DETROIT, Mich., Sept. 1.—Capt. George Doty, aged 90 years, a resident of Detroit since 1825, is dead at his home at 43 Hancock Ave. He came here from New York in 1825, taking up a claim here that was covered by forests. He established the first jewelry store in Michigan in Detroit, and for many years his place was considered the finest establishment of the kind west of New York.

Deceased was the oldest Odd Fellow in Michigan and one of the three old pioneers living here. Capt. Doty is survived by a widow and three daughters.

### Death of Geo. W. Hauenstein.

RED WING, Minn., Aug. 31.—George W. Hauenstein, a prominent jeweler and well known citizen, of this city, was drowned in the Mississippi river here yesterday, in sight of a crowd. A launch race was in progress and Mr. Hauenstein was standing up in a skiff, when a wave struck his craft and capsized it. He uttered a cry for help and sank, the swift current carrying him along under the water, so that the body was not found the same day.



Mr. Hauenstein was about 55 years old. He is survived by a widow and three grown-up children.

## National Monthly Import and Export Statistics.

### New York Creditors of Robt. Castelberg Jr., Expect Their Claims Will Be Settled.

According to reports given out by New York diamond merchants, who advanced goods on consignments to Robert Castelberg, Jr., formerly of the Castelberg National Jewelry Co., Washington, D. C., and Baltimore, Md., his indebtedness to them is likely to paid, at least in part. Several of the creditors paid flying trips last week to Baltimore for the purpose of conferring with Castelberg's father, Jacob Castelberg, B. H. Davis, of B. H. Davis & Co., the largest creditors, was in that city for several days, and gave out a statement that he expected everything to be settled quite satisfactorily. Sol. Lindenborn, another creditor, returned yesterday from Baltimore; Mr. Bonner, of Bonner & Co., was also away from New York for several days. An account of Mr. Castelberg's disappearance was published last week.

As far as a representative of THE CIRCULAR-WEEKLY could learn, by making inquiries yesterday at the office of the New York firms interested, a definite settlement has not yet been made, but there is hope that this will be effected within a few days. There is no claim that the missing man's relatives are legally responsible for the payment of the diamonds which he had with him at the time when he disappeared, so that any payments made by his father or others are understood to be purely voluntary. It is said that the New York creditors, while they were in Baltimore, received assurances on which they base their belief that at least a portion of the indebtedness incurred by the missing man will be paid by his relatives.

Jacob Castelberg, father of the missing man, in an interview published in a Baltimore paper, said that a message had been received a few days before, indicating that Robert was either in Oklahoma or Indian Territory. He said that his son did not have jewelry to the value of $50,000 when he disappeared, as had been reported. At the time that his son went away the total amount of the jewelry which he had on consignment, according to the father's statement, was worth about $25,000, and most of this was afterwards found in the safe of the United States Hotel at Saratoga.

It seems that Castelberg attended the races at Brighton and Sheepshead Bay, selling diamond jewelry at these resorts, and later went to Saratoga with the same purpose in view. He was quite successful in making sales, but was unfortunate in placing bets on the horses, which resulted in losses aggregating $12,000 or $13,000, according to the reports that have been circulated. It is possible that these losses somewhat preyed on his mind, so that he decided to go into seclusion for a time.

---

BALTIMORE, Md., Sept. 4.—The mysterious disappearance of Robert Castelberg, son of Jacob Castelberg, president of the Castelberg National Jewelry Co., of this city, was settled to the satisfaction of all this week when it was announced by Mr. Castelberg that his son had been found and that his business affairs were in good shape. An announcement has been made to the New York creditors of the young man to the effect that they would be paid in full.

## Man and Woman Arrested in Albany, N. Y., for Working Substitution Game on Jewelers.

ALBANY, N. Y., Sept. 2.—The police of this city have in their custody a man and woman charged with larceny, who are believed to be wanted for several jewelry thefts in different sections of the country. The man, who gave his name as John H. Sloan, and the woman who said she was Esther Wright, were arrested on the charge of stealing a $115 diamond ring from the store of W. F. Antemann & Co., 221 N. Pearl St., it being claimed that they obtained the ring by substituting one with a smaller stone in a tray of diamonds shown to them.

JOHN H. SLOAN.

ESTHER WRIGHT.

The prisoners were brought before Judge Scott, and after a conference with their counsel it was announced that Sloan would waive examination and go to the Grand Jury, while Esther Wright was taken back to the House of Shelter until Monday, when she is to be released on bail. The four rings found in the possession of the man and woman when searched were marked as follows: One containing a ¼ carat diamond bears the number 12121, another with a ¾ carat stone is numbered 12096, one with a ⅜ carat diamond is marked 1366, and the fourth having a ½ + 1/16 carat stone is marked with the letters S. F. 879.

A number of jewelers and clerks who were called to headquarters to examine the prisoners failed to identify the rings, though a member of Marston & Scamon, 18 S. Pearl St., recognized the couple as having visited his store Wednesday and looked at diamond rings. The woman visited the Van Heusen Charles Co., 468 Broadway, but was shown only one ring at a time, and took none. James W. Sanders and Charles Bickeman,

Sloan is 23 years old, and is said to be clothing salesman by occupation. Esthe Wright says she is 25.

### Death of William H. Robinson.

WORCESTER, Mass., Sept. 5.—William H Robinson, senior member of the firm o Robinson & Anderson, 375 Main St., die suddenly Sunday night at his home in th city. He had been talking to his daughte when he complained of the heat, and whi the window was being opened he fell fro his chair, dying a few hours later.

William H. Robinson was born in An herst, Oct. 19, 1835. After completing h education he went to Knoxville, Tenn., f a few years and carried on the dry goo business. He then returned to New En land, where he located in Boston, operatin a gentlemen's furnishing store until 186 Seeing possibilities in Worcester, he wen into business in the jewelry trade and lat established the business with which h name has since been connected. In 18 the Robinson-Hilton Co. was incorporate taking over the business, but in 1902 th corporation was dissolved on Mr. Robin son's application and he continued alon until December of last year. In Marc last the present firm was established by M Robinson and H. S. Anderson.

Mr. Robinson is survived by a widow three sons and two daughters.

A man giving his name as Thomas Mitch ell was taken into custody, last week, i Moline, Ill., accused of larceny by H J Peters, a retail jeweler of that place. Mitch ell, it is alleged, entered the jewelry estab lishment and, while examining several watches under the pretence of intending t buy one, slipped one in his pocket. Th jewelry clerk discovered the theft and th watch was recovered.

## Providence.

Among new firms is C. H. Eibel & Co., located at 53 Warren St., for the manufacture of fountain pens.

While the Attleboro jewelers are said to have found that the exclusion policy being followed by the Chinese is affecting them somewhat, the same does not apply locally, to any extent, so far as can be learned.

Among buyers who were in town last week were Joseph Brown, Chicago; T. O. Loveland, Iowa City; Charles Strauss, New York; Mrs. C. J. Walters, Philadelphia; J. D. French, Chicago; W. C. Blair, Boston; James Eastwood, New Glasgow, N. S.

Henry Fletcher, treasurer of the Fletcher, Burrows Co., manufacturing jewelers, 53 Clifford St., was unfortunate enough to receive the attentions of a gang of four burglars last Wednesday night, the quartet taking their time in ransacking his house, at 105 Parade St. They secured loving cups, silverware, clothing, a typewriter and other valuables. Mr. Fletcher and his family are at their summer home, and the house was unoccupied at the time of the visitation. Four men were arrested Thursday night in connection with the robbery, waived examination and were held for the Grand Jury.

The Providence tax list for the year 1905 has just been completed and shows that the city is prospering, a gain of over $14,000,000 in the valuation of the taxable property having been made over last year. The total valuation is $222,391,940, and of this $166,877,600 is real estate and $55,514,340 is personal. Among those affiliated with the jewelry industry, who are reckoned among the heavy taxpayers, being assessed for $50,000 or more, are the following: William Armour, George M. Baker, B. A. Ballou, $83,600; Belcher & Loomis, $100,000; Beverly Land Co., $466,900, Blanchard, Young & Co., $150,000; Boston Store Land Co., $593,680; Browne & Sharpe Mfg. Co., $1,846,420; John M. Buffinton, $55,140, Callender, McAuslan & Troup Co., $845,920; George B. Champlin, $94,220; Champlin Co., $75,000; William O. Cornell, $51,800; Joseph P. Cory, $162,700, George H. Darling estate, $198,400; Michael Fitzgerald, $120,760; Theodore W. Foster & Bro. Co., $170,340; James A. Foster, $117,860; James A. Foster Co., $81,480, Gorham Mfg. Co., $956,260; William C. Green, $57,940; Charles F. Irons, $95,660; H. A. Kirby Co., $100,000; Lederer Realty Corporation, $515,620; Otto C. Lenz, $51,540; William H. Low Estate Co., $729,960; Edwin Lowe Estate Co., $73,100; Manufacturers' Building Co., $344,580; E. C. Ostby, $103,440; Ostby & Barton Co., $324,300; Horace Remington and wife, $58,300; William A. Schofield, $65,440; John Shepard, Jr., $108,000; Shepard Land Co., $223,080; John Shepard, Jr., Real Estate Co., $692,020; Tilden-Thurber Co., $51,900; Union Hardware & Electric Supply Co., $115,000; United Wire & Supply Co., $73,720; Waite-Thresher Co., $50,000; William H. Waite, $180,100; Washington Real Estate Co., $156,680, Dutee Wilcox, $278,480.

## Attleboro.

Dolliver S. Spaulding, of D. S. Spaulding & Co., Mansfield, has returned from a visit in New York.

A. B. Smith, who recently started manufacturing in this city, has removed his home to the suburbs of Boston.

E. A. Fargo, of E. A. Fargo & Co., Taunton, formerly of Attleboro, with Mrs. Fargo, was with the Attleboro colony at Cottage City last week.

Col. Sidney O. Bigney, of S. O. Bigney & Co., was acclaimed as a sure winner in his campaign for the Governor's Council, at a big political clambake, last week.

Willard A. Engley, who recently withdrew from Engley, Wetherell & Co., has returned from an auto tour of Massachusetts, Vermont and New Hampshire.

William C. Tappan, of the D. F. Briggs Co., left last week for Connecticut to watch the performance at the racecourses of the horses owned by himself and his brother, Charles H. Tappan.

The first official news that the Attleboro jewelry manufacturers had of the Chinese boycott now in force has been received in recent letters from Messrs. Keegan & Rosencrantz, the well known Chinese representatives of American manufacturers. In a letter dated from Shanghai, China, July 25, Keegan & Rosencrantz write that the outlook is very black at present, and if there is no improvement within another two weeks they will move on to Manila. Letters conveying the information regarding the boycott have been received by all the firms which the "Irishman and the Je represent. They convey the first auther information that the boycott is a real m ace to the American trade, instead of movement designed perhaps to foster trade along certain lines. Keegan & F senerantz represent a number of jewe firms in Attleboro, Providence, Taunt New York and Philadelphia, including D. F. Briggs Co., C. H. Allen & Co., R & Barton, and others, and the fact that tl regard the situation as almost hopeless present is taken by the trade to mean t there will be a serious falling off in American trade in China.

## North Attleboro.

TRADE CONDITIONS.

Business is very good. A local manufactu jeweler in speaking about the business outl Wednesday, voiced a general sentiment when said: "I expect to make more money this than I made any Fall in the past 10 years. outlook for trade is excellent and I expect th will hardly be able to fill the orders that come i

Several of the local manufacturing jew ers are now obliged to operate a portion their factories at night to fill the ord that are pouring in from the western m kets.

factory in this town until their firm can find a place to locate.

Charles A. Ruggles, of the Mason-Ruggles Co., has returned from a vacation spent at Nahant.

Walter C. Sherman left Wednesday on his first western trip in the interests of the estate of O. M. Draper. Mr. Sherman was accompanied by Manager Hale, who will introduce him to the trade.

Homer Precourst was quite severely injured while at work at the Paye & Baker Mfg. Co.'s factory on Thursday. While watching a stamp fall on a die, a sliver of steel flew up and lodged in the muscles of his right arm.

Thomas Lynch, a well-known polisher, and his wife, observed the 51st anniversary of their marriage Monday. Mr. Lynch was born in Ireland and came to Providence in 1854, where he learned the trade, which trade he has since followed.

## Boston.

J. S. Round & Co., wholesale and retail jewelers, with an instalment branch, now on Kingston St., have leased the store and basement at 46 and 48 Eliot St., extending through to Dix Pl., and will occupy their new quarters shortly.

Albion P. Moore, of Waltham, a well-known employe of the American Waltham Watch Co., died Aug. 30, as a result of a second shock of paralysis, sustained by him on that date. He was 35 years of age.

The Boston Jewelers' Club is planning for a Fall outing this month, on the occ sion of the regular quarterly meeting the organization. It will probably tal the form of a drive to one of the leadi shore resorts, with a shore dinner as t chief feature of the programme.

Carl Lundin, of the telescope conce in Cambridge which succeeded Al Clark & Sons, finished, Aug. 31, the i stallation of the largest telescope own by a private individual. It is a nine-in glass, the finest of its size ever produce it is claimed, and is in an observatory the estate of ex-Gov. E. C. Smith, of Ve mont, at St. Albans, in that State It not a new glass, but has been used Prof. Hussey, of the Lick Observator to whom it was loaned, and it was also, one time, loaned to the Carnegie Institu at Washington.

Francis Stowel, a manufacturer of chem cals, Charlestown, Mass., who was burie last week in Sleepy Hollow Cemetery, w for a number of years in the jewelry trad He was the son of J. J. Stowel, many yea a jeweler, and after the latter's death th deceased served as an apprentice with h uncle, Abel. When 21 years old he starte in the jewelry business in Winter St., th city, and later conducted a jewelry store Concord for 10 years. He quit the jewel business to go in the chemical business 1872. The deceased was a close friend Thoreau, Lowell, Emerson and other li erary lights.

A. Hurley has moved from McCurtai Ind. T., to Chant, Ind. T.

"PRACTICAL COURSE IN ADJUSTING."
Price, $2.50.
All Jobbers or Jewelers' Circular Publishing Co.

## Columbus, O.

L. J. Heid, of Heid & Son, is spending a vacation in Cincinnati.

D. S. Miller, of the Hofman Jewelry Co., has returned from a month's vacation in California.

G. W. Gray, Nelsonville, O., has been employed by the White-Haines Optical Co. as a refractionist.

The Columbus Auction Co., handling clocks, jewelry, notions and other lines, which formerly conducted a business on Spring St., has reopened its store in a new location, at 261 S. High St.

H. A. Bancroft, of the Bancroft Bros. Co., has been very ill since his return from New York, some time ago. He caught cold while in bathing, and after his return home abscesses in both ears developed. It will be several weeks before he will be able to be at work again.

Inroads on the sale of hat pins, breast pins, women's purses, mirrors and like goods, marked with fac-similes of college fraternity pins, pronounced enough last Winter to be noticeable on account of legislation against such practice by the college boys, will become serious this year, it is said, because sentiment against it is growing and legislation by other Greek letter societies is expected. A local manufacturer of such goods has started his salesmen out, and has given them an entirely new line of goods to meet this contingency. Instead of marking the novelties with fac-similes of the badges, the various coats-of-arms of the societies have been substituted. No opposition to this is anticipated.

---

According to the *Diamond Fields Advertiser* of July 29, the Transvaal diamond output in June amounted to 59,962 karats, valued at £70,110.

Word has been received in New York announcing the removal and enlargement of the business of Anton Mader & Co., manufacturers of watch mainsprings, Augsburg-Lechhausen, Germany.

## Toledo, O.

TRADE CONDITIONS.

Toledo jewelers are already preparing for the coming season. They are arranging to display a number of new and unique designs in the line of jewelry, believing that the holiday season will be even better than it was a year ago, although that season was above the average.

J. J. Freeman, 313 Summit St., who had been spending the Summer at a number of resorts in Michigan, has returned to this city greatly benefited by his vacation.

A new clock has been placed in the office of the Board of Education, having been installed by J. George Kapp. The Board of Education is at present considering the question of installing new clocks in a number of public school buildings.

J. George Kapp, 415 Summit St., did good work during the convention of the League of American Municipalities, which was held in this city, last week. As a member of the reception committee he worked overtime showing the delegates about. During the three days the convention was in session Mr. Kapp devoted his entire time to his work on the committee.

St. Mary's Catholic congregation is discussing the advisability of repairing the old clock in the steeple of the church. In lieu of a city clock the timepiece in St. Mary's tower—the highest in the city—did valuable service for a number of years, but it has now been a long time since the clock has been running and the church authorities are thinking of having it repaired. It occupies a commanding situation and can be seen for many blocks on all sides.

---

George W. Clemons, Greenwood, Ind., has just moved his stock into larger premises.

August Zidler, who died recently at Milwaukee, Wis., was buried in Union Cemetery, at that city. He was for many years a jeweler, and for nearly half a century conducted a small store on the north side of Milwaukee. The deceased was 70 years old, and is survived by his two sons and a daughter.

**WATCH CO.**

**2 Maiden Lane - - - - - NEW YORK.**

PRICE LIST AND DISCOUNTS ON APPLICATION.

LAST month we told you about the quantity of adjusted watches we sold. Now we will tell you the cause.

Almost every large retail dealer in Railroad watches is pushing the sale of ***BUNN SPECIALS*** and ***SANGAMOS,*** because, these watches are ***absolutely satisfactory*** and are now the recognized standard for Railroad service.

For the past three years minimum retail selling prices on these grades have been established and maintained, enabling the dealers to make a justifiable profit, and at the same time give their customers perfect watches at reasonable prices.

We sell to a limited number of jobbers, who cooperate with us in protecting the retail dealers against undesirable competition.

If none of these solicits your business, and if you are not familiar with the quality and prices of our watches, write us.

Minimum Retail Selling Prices of R. R. Grades.

**ELK GOODS A SPECIALTY.**

### Gorham Mfg. Co., Formally Opens Its Handsome New Building in New York.

The Gorham Mfg. Co.'s new building at Fifth Ave. and 36th St., New York, was yesterday opened for business. The day before the representatives of the press had an opportunity of inspecting the interior and were pleasantly entertained at luncheon by Manager W. N. Lecato.

So far as is known there is no other instance, modern or ancient, of a building of this size or architectural elaboration exclusively devoted to the sale of the products of one manufacturing establishment. In the Gorham building, Gorham manufactures only are displayed and offered to the public.

In place of the modern "sky-scraper" the building has been confined to a height of eight stories in all, while owing to the skill of McKim, Mead & White, the architects, the general effect is that of a building of even less height. This effect has been gained by the horizontal division of the facade into three parts, an arcaded first story above this, a plain stretch of masonry pierced only with rows of unornamented window openings, and crowning the whole a colonnaded loggia overtopped by a widely overhanging cornice.

The style affected by the architects is a free treatment of the early Florentine renaissance, a character most marked in the lower story, which on the Fifth Ave. front is divided into three bays by round arches springing from massive Ionic columns of polished granite.

In the limestone spandrels between these arches are bas-reliefs emblematic of Art and Industry from the chisel of Andrew O'Connor, the well-known sculptor. A bronze frieze fashioned at the Gorham Co.'s foundry is let into the stone and runs round the building above the first story. The wide cornice of markedly Florentine character is of copper picked out with color and gilded in places.

The principal show-room, which occupies the entire first floor, contains over 10,000 square feet of floor space. The domed and elaborately decorated ceiling is supported by eight columns, around which are disposed show cases of carved mahogany. Upright cases of the same wood are arranged around the walls so as to form separate alcoves for the display of goods to customers, while the staircase rails and newels and the elevator doors and cages are of golden-hued bronze, cast and finished at the Gorham Bronze Foundry.

The second floor, of the same superficial area, is also devoted to the display of goods, the third to the ecclesiastical art department, the fourth to the wholesale business of the firm, the fifth to administrative purposes and the sixth, seventh and eighth to the stock rooms, repair, stationery, engraving and stained-glass window departments.

The larger portion of the basement is occupied by the vaults forming the new storage department. Here will be received and deposited the silverware of such customers as may desire to place it in safe-keeping for any period.

The stone used in the construction of the building is a fine Bedford limestone of a creamy, yellowish-white hue. The columns of the first story arcade are of gold-flake granite from Massachusetts.

The building extends 67 feet on Fifth Ave. and 167 feet on 36th St..

Beginning in 1859 in their Maiden Lane building, the Gorham Mfg. Co. has successively moved to Bond St., Union Sq., Broadway and 19th St. and finally to Fifth Ave. and 36th St. The imposing new edifice, as well as the notable Broadway building, which has for the last 21 years been the Gorham's home, were both—as was also the extensive Providence factory—conceived, planned and carried to successful execution by Edward Holbrook, who has, as president, for so many years directed and controlled the plans of the company.

### Murderers of Detroit (Mich.) Pawnbroker Sentenced to Life Imprisonment.

DETROIT, Mich., Sept. 2.—Frank Weakley, alias Harry Johnson, and Harry Parker were convicted yesterday afternoon of murdering Pawnbroker Joseph Mayer in his store, on the evening of July 27. Judge Phelan immediately sentenced them to life imprisonment in Marquette prison, and the pair left Detroit to-day for their new home.

The crime was a brutal one, the victim being clubbed to death and several thousand dollars worth of diamonds and jewelry and $100 in money taken. The murderers were caught at Cleveland. Johnson confessed in the sweat-box. Each fixes the blame for the crime on the other. The trial lasted five days, and the jury was out four hours.

J. R. Chapman, Oshkosh, Wis., is erecting a handsome dwelling at that place.

## Death of Moses Weis.

Moses Weis, the president of the American Watch Case Co., 9 Maiden Lane, New York, died Wednesday at his home, 114 E. 4th St., New York, of cerebral hemorrhage. As he had been in apparently excellent health until within a few hours of the stroke, his death came as a grievous shock to all who knew him.

Mr Weis was born in Germany 54 years

THE LATE MOSES WEIS.

ago, and when a lad of 16 years he came to the United States. For a time he was employed in a dry goods establishment in Chicago, and then engaged in the jewelry business, continuing in the jobbing line for 16 or 17 years. During a period of 15 years he traveled as a salesman for his house through the middle west, where he was widely known and respected. A little more than 15 years ago Mr. Weis and others established the American Watch Case Co., which has its factory at Leonard and Elm Sts., New York, and its office in Maiden Lane. Within a short time after the company was formed he was chosen president, and he had been at the head of the business since that time. Knowing the trade thoroughly and possessing executive ability, his efforts were largely instrumental in building up the business.

In his personal relations with others, Mr. Weis always revealed a genial temperament, which made for him numerous friends. His was a charitable disposition, and he was always ready to extend a helping hand to others. Only his intimate friends know the extent of his private charities, but it has been remarked that nobody ever saw him refuse an application for aid, although many were made to him in his office. For a number of years he had been active in the Ethical Culture Society, of which he was a trustee. He was a member of the Freundschaft, of the Twenty-four Karat Club, and of the Jewelers' League of New York.

One characteristic of Mr. Weis was his fondness for healthful exercise, as indicated

by his practice of indulging in horseback riding. Nearly every morning found him enjoying a canter in Central Park, and, as he often said, after this, with a cold plunge and breakfast, he was ready for the day's business.

The surviving relatives include his wife and one son of 13 years. The funeral took place Friday, the services being conducted by Dr. Elliott, of the Ethical Culture Society. The interment was in Cypress Hills Cemetery.

## General Appraisers Hand Down Another Important Decision as to What Constitutes Jewelry.

In disposing of the hundreds of cases involving the duties on millinery articles, the Board of General Appraisers, New York, has made several new rulings as to the characteristics which require the classification of the merchandise as jewelry and, last week, in passing on the protest of Dieckerhoff, Raffloer & Co. against an assessment of duty by the Collector at New York, the Board made further distinction sustaining the Collector in part and on other points reversing his action.

General Appraiser Sharretts in his opinion discussed briefly the significance of the term jewelry. He wrote:

In addition to certain ordinary glass head hat pins, belt pins, and millinery ornaments which by judicial determination are not jewelry, these protests relate to the rate of duty applicable under the existing tariff act to ornamental hat pins composed entirely of base metal made to imitate gold or silver or of such metal, set with imitations of precious stones, upon which duty was assessed by the Collector at the rate of 60 per cent. ad valorem under Par. 434, and which are claimed to be dutiable at 45 per cent. ad valorem under Par. 112 or 193. If these ornamental hat pins are commonly known as jewelry, the Collector's decision relating thereto was correct; if they are not so known, the importer's claim is well founded. That some hat pins are jewelry, but not all, will hardly be disputed and it is for the Board to determine in which class do the contested articles fall.

Hat pins, unlike millinery ornaments, are substantially constructed, and although serving a useful as well as a decorative purpose they do not differ in this respect from shirt studs, shirt buttons and watch chains, which, under proper conditions, are typical articles of jewelry. Nor does the common meaning of the term "jewelry" limit articles included thereunder to those made of precious metals. On this point, turning to accepted authorities, we find, among other definitions, the following:

Century: "Jewelry.—* * * * Berlin jewelry, delicate trinkets of *cast-iron* introduced in Prussia during the domination of Napoleon. The manufacture of such jewelry has continued to the present time, and its products have been fashionable.

"Temple Jewelry.—Jewelry of *inexpensive material*, made at the Temple in Paris."

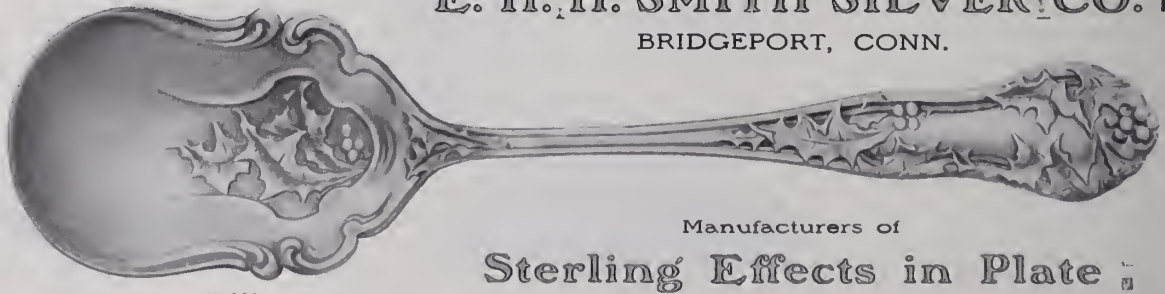
Standard: "Jewelry.—* * * * Berlin jewelry, personal ornaments made of iron, as at Berlin.

"Electric Jewelry.—Articles of jewelry having tiny incandescent lamps instead of gems, the lamps being lighted by small storage batteries carried on the person."

Electric jewelry is made of base metal set with imitations of precious stones. See G. A. 5549 (T. D. 24935).

The further requirements necessary to bring the disputed pins in question within the term "jewelry" as defined by lexicographers, viz., articles of personal adornment, the handiwork of a jeweler, would also seem to be complied with. For purposes of personal adornment the pins in question occupy relatively the same position to the poor as do those composed of precious metals set with gems enjoyed by the rich and which are admittedly jewelry, while the testimony of leading domestic manufacturing jewelers, together with illustrative exhibits of their products identical with the goods upon appeal, shows that such pins are the handiwork of jewelers.

We so find as a fact, and find further on the evidence of manufacturing jewelers and also of the protestants in these cases or their representatives, whose goods are all of the same character and description:



1. That such of the hat, bonnet, or shawl pins as are made entirely of metal in imitation of gold or silver, having enameled or other ornamented heads, or of metal set with imitations of precious stones faceted, or set with pearl ivory paste, or other materials, the mountings ornamented with metal bands, scroll work, or other ornamental designs, are commonly known as jewelry.

2. That the hat, shawl, belt, toilet, or lace pins with black heads, faceted or otherwise, or with so-called plain wax paste or glass heads of various colors, intended to harmonize with the drapery of the apparel to which attached, or with heads imitating round and baroque pearls, all of the foregoing, if not adorned with metal work, are not commonly known as jewelry and are similar to the pins held by the Circuit Court of Appeals in the case of United States v. Schiff (reported in T. D. 26492) to be dutiable at 45 per cent. ad valorem.

3. That the millinery ornaments are similar to those passed upon by the Circuit Court of Appeals in the Schiff case (*supra*).

Based upon these findings and upon the authority of the decision of the United States Circuit Court in Bader v. United States (116 Fed. Rep., 541),

wherein Judge Cox held that ornamental pins similar to those now on appeal were commonly known as jewelry, and of the decision of the Circuit Court of Appeals in the Schiff case (*supra*), we overrule the protests and affirm the Collector's decision relating to the first class of goods marked "S1" on the invoice for identification, and sustain the importer's contention that the merchandise included in Classes 2 and 3 and marked "S2" and "S3," respectively, is dutiable at 45 per cent. ad valorem under Par. 112 or 193 of the present Tariff Act. To this extent the Collector's decision is reversed in each case.

## St. Louis.

Ed. Massa, of the Bauman-Massa Jewelry Co., has returned from a trip through Kansas.

Charles F. Minich, secretary of the E. Maritz Jewelry Co., has gone to Chicago for a short visit.

A. M. Zerweck and wife, of East St. Louis, have returned from a week's vacation, spent in northern Michigan.

Ellsworth Bauman, of the L. Bauman Jewelry Co., spent several days the latter part of the week on the Meramec River.

Mark Eiseman, who travels out of Birmingham for the L. Bauman Jewelry Co., is spending a few days at headquarters here.

T. W. Aekerly, general manager of the Scranton Whetstone & Abrasive Wheel Co., Scranton, Pa., spent several days in St. Louis last week.

A. Kurtzeborn, Jr., of A. Kurtzeborn & Sons, has returned from his vacation trip. The senior member of the firm is expected home next week.

W. K. Bergfeld, of the H. G. Bergfeld Jewelry Co., Globe-Democrat building, has just returned from a successful trip in Southern Illinois. He departs this week for points in Missouri and Kansas.

E. H. Seyfriedt, with Frank W. Baier, and Miss Bessie Craig, a well-known soprano of Fort Worth, Tex., were married recently. Mr. Seyfriedt is a son of W. C. Seyfreidt, a watchmaker of this city.

C. A. White, manager of the John Bolland Jewelry Co., is spending his vacation by indulging in the afternoons in his favorite sport, golf, at the Glen Echo Country Club, one of the most exclusive organizations of St. Louis.

Joseph S. Loftis has been succeeded as manager of the St. Louis branch of Loftis Bros. & Co., in the Carleton building, by F. M. Williamson. Mr. Loftis has gone to Pittsburg, Pa., to take charge of the company's interests lately acquired there. Mr. Williamson was formerly with the Mermod, Jaccard & King Jewelry Co.

Among the visiting jewelers in St. Louis last week were: L. A. Holdener, Belleville, Ill.; L. M. Fry, Chamois, Mich.; O. L. Davis and wife, New Madrid, Mo.; M. F. Kohler, Parsons, Kans.; W. Wright, Webster, Mo.; H. S. Lewis, Hattiesburg, Mo.; Roy G. Rutherford, Mt. Vernon, Ill.; J. F. Stewart, Albion, N. Y.; A. Muecke, Houston, Tex.

## Optical Notes and Briefs.

A. B. Phinney, Bentonville, Ark., recently moved into new quarters.

F. A. Merry, of the Merry Optical Co., Kansas City, Mo., has sold his suburban home for $24,000.

William Marth, with the Bausch & Lomb Optical Co., Rochester, N. Y., is spending his vacation at Lake Placid, in the Adirondack Mountains.

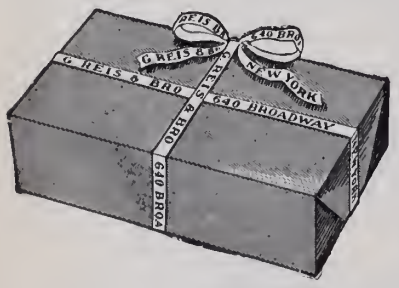
H. F. Wichman & Co., Ltd., of Honolulu, H. I., will open a first-class store in Shanghai, China, in the near future. Mr. Wichman is the leading optician of the Hawaiian Islands.

Frank Mayerle, optician, Oakland, Cal., died at his home in that city, Wednesday evening, after an illness of three days. Mr. Mayerle is survived by his widow and two small children.

P. N. Clark, optician, Manila, was in San Francisco, Cal., buying stock, last week. He secured reservations for the return trip on the trans-Pacific liner *Mongolia*, which left for the Orient, Saturday, Aug. 26.

Dr. Karl Schweiger, a well-known eye specialist of Berlin, died recently, aged 75 years. The deceased, from 1871 to 1900, directed the eye clinic of the University of Berlin, having succeeded in that capacity the celebrated Prof. Graefe.

J. D. Wyman, Burlington, Vt., recently sold his stock and fixtures to the Gilbert Risk Optical Co., and will leave shortly for Los Angeles, Cal., where he will reside permanently. Mr. Wyman's repairing business will be continued by W. E. Morse.



Nicholas Van Kammen has purchased the optical business of C. L. Dresbach, San Mateo, Cal. Mr. Dresbach will retire from business and, accompanied by his wife, will make an extended tour of Europe and the east.

D. E. Kennedy, Cordele, Ga., moved Sept. 1 from his former location, at the corner of 7th St. and Eleventh Ave., into more spacious quarters, two doors above the post-office, at that place. In his new location Mr. Kennedy has a fully equipped optical department.

The Oregon State Board of Examiners in Optometry will hold a meeting in Portland, Ore., Monday, Sept. 25, to examine applicants who wish to practice optometry in the State of Oregon. There were over 200 applicants for licenses, recently, and there are many others who either neglected to apply in time or came into the State after the law was passed.

The Pennsylvania College of Optics is a new institution to be established in Philadelphia, Pa., in the near future. M. J. McEnery, a lawyer representing the incorporators, whose identity he declines to disclose at this time, will apply for a charter Sept. 25. The object of the new optical educational institution will be to give a special course of instruction in the science of optics and the adjusting and fitting of lenses for defective vision. Degrees will be given at the completion of the course, which will be obtainable at a nominal sum. Mr. McEnery says it will be the aim of the college to do away with the selling of spectacles and glasses by street venders.

**THIS IS THE MODERN WAY**

of tying up those little parcels—and the only way that combines daintiness with strength—so essential to jewelry packing. It's strong and silky; comes in many bright tints—1-16 to ¼ inch width. In addition to its obvious advantages over string,

**Reis' Advertising Tape**

carries your name and address, printed plainly, from four to ten times every yard, and provides a novel and forceful way of getting your ad. "home." Strongly endorsed by many successful jewelers.

## New Stores and Enterprises.

E. Ortley is a new jeweler in Lewiston, Idaho.

L. Green has opened a repairing shop in Monroe, Ga.

L. A. Holdener has opened a store at Belleville, Ill.

Jos. M. Wilder recently opened a store at Lovelock, Nev.

Oscar J. Fuchs has just begun business in the Foulke building, Chillicothe, O.

E. F. Warne will shortly open a general store in Bandon, Ore., and will carry a stock of jewelry.

Peter J. Donnelly has completed arrangements to engage in the retail jewelry business in Winsted, Conn.

H. W. McFarland, formerly with J. P. Webster, Logansport, Ind., is about to engage in business on his own account at that place.

Otto Meinhardt, who has been a watchmaker in St. Louis for 40 years, has opened a new jewelry store at 1900 Sullivan Ave., that city.

A new general store has been incorporated at Santa Ana, Cal., which will be called the Main Department Store. It will carry a large stock of jewelry. The capital stock is $50,000.

Wm. J. Eroe, until recently a member of the firm of Hanna & Eroe, of Newcastle, Pa., has completed arrangements to open a store at 129 E. Washington St., that place. He will begin business about Oct. 1.

The G. T. McEneany Co., New York, filed last week a certificate of incorporation at Albany. The concern will carry on an optical business with a capital of $5,000. The directors are: G. T. McEneany, J. B. Sheehan, New York; W. A. Finn, Brooklyn.

A. S. Buffington, Cayucos, Cal., and Fred Freeman, Morro, Cal., have rented the rooms recently vacated by Dr. A. E. Ellis in the Warden Block, where they will engage in the jewelry business. Mr. Buffington, until recently, was employed with the San Luis Jewelry Co., of San Luis Obispo, Cal.

The Wallingford Metal Co. is the name of a new concern which filed articles of incorporation in Wallingford, Conn., Wednesday, to deal in silver, copper, brass and zinc. The incorporators were: Abel Kenworthy, Frank P. Welton and Robert D. Somers, all of Waterbury. The concern will also make German silver articles. The factory will be located in Cherry St

### Clarence C. Markham, Guilford, Conn., Files a Petition in Bankruptcy.

NEW HAVEN, Conn., Sept. 5.—A petition in bankruptcy has been filed in the bankruptcy court by Attorney George E. Beers, of this city, in behalf of Clarence C. Markham, of Guilford. Mr. Markham has no creditors in this city.

The liabilities are placed at $3,561, of which $2,471 is in unsecured claims. The assets amount to $1,102, of which $350 is stock in trade. No date has been set for the preliminary hearing.

Mr. Markham began business in Guilford in 1898, and carried a small stock. His purchases in New York were not large, but his payments were prompt.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

# GORHAM BRONZE

## THE GORHAM BRONZE FOUNDRY

¶ The Gorham Company desires to direct the especial attention of the Trade to the fact that the Gorham Bronze Foundry has for many years ranked high among the most important establishments of this nature in the country.

¶ They are ready at all times to receive and execute commissions for sculptural castings, such as statues, bas-reliefs and portrait busts, as well as architectural bronzes and smaller ornamental pieces.

¶ Memorial tablets of every description are designed and cast by them, suggestive sketches or complete models in wax being submitted when such are desired.

¶ Gorham Bronze, despite its high, artistic finish, is notably moderate in cost.

A TRADE-MARK decision of importance has been rendered by the Commissioner of Patents, wherein it is held that the registration of a trade-mark is prima facie evidence of ownership, and therefore the burden of proof is upon the opposing applicant, in an interference. An applicant for the registration of a trade-mark in interference with a registrant cannot prevail by showing that the registrant has parted with the ownership of the mark, but only by showing that he, the applicant, is the owner. Where the registrant shows that he was the first to adopt and use the trade-mark and the opposing applicant for registration fails to show that he derived title from the registrant, then the decision must be in favor of the registrant.

### Jewelry Failures During August.

COMMERCIAL failures during August kept up the good record established some time ago in that they were much less in number and amount of liabilities than during the corresponding month of 1904. The total failures of August are recorded as 851, with liabilities of $6,140,566, as against 900 failures in August, 1904, with liabilities of $10,500,000. In the jewelry trade an almost equally good showing is made by the dealers in jewelry and clocks, the failures being less than the average for the month, both in number and in amount of liabilities.

A detailed statement of the failures in the jewelry trade during August of the past five years is to be found in a table showing failures by branches of business, compiled for *Dun's Review*. According to this there were but seven failures last month, with liabilities of $51,386, an average of $7,340; while in August, 1904, there were 17 failures, with liabilities of $158,598; in August, 1903, 10 failures, with liabilities of $57,327; in August, 1902, four failures, with liabilities of $70,424, and in August, 1901, 11 failures, with liabilities of $33,794.

### Imports of Precious Stones During August.

PRECIOUS stone importations during August just past were very large, though the increase over previous years, notable in the figures of the past four or five months, was not kept up. Nevertheless the importations show last month to be one of the best Augusts on record, as far as the demand for precious stones is indicated by the amount of importations. According to the figures of Gen. G. W. Mindil, the jewelry examiner at the Public Stores, New York, the total value of the precious stones which passed through his department last month was $2,275,873, and of this the value of the cut precious stones and pearls was $1,815,718, while that of the uncut stones, principally diamonds, was $460,154.

How the figures of last month compare with other Augusts of the last nine years may be seen by the following table:

| *Aug.* | *Cut.* | *Uncut.* | *Total.* |
|---|---|---|---|
| 1905.... | $1,815,718.61 | $460,154.98 | $2,275,873.59 |
| 1904.... | 1,632,937.48 | 388,357.94 | 2,021,295.42 |
| 1903.... | 1,905,995.19 | 377,653.02 | 2,283,648.21 |
| 1902.... | 2,124,078.42 | 205,427.54 | 2,329,505.96 |
| 1901.... | 1,458,208.47 | 398,373.69 | 1,856,532.16 |
| 1900.... | 1,034,470.82 | 256,640.35 | 1,291,111.47 |
| 1899.... | 1,672,364.01 | 534,497.29 | 2,206,861.30 |
| 1898.... | 1,131,805.21 | 589,087.21 | 1,720,892.42 |
| 1897.... | 1,331,035.56 | 720,133.75 | 2,051,169.31 |

### Few Jewelers Among the Exhibitors at the Canadian National Exhibition.

TORONTO, Ont., Aug. 31.—The Canadian National Exhibition, formerly known as the Toronto Industrial Exhibition, was formally opened here, Aug. 29, by Premier Whitney, of the Province of Ontario. The attendance was unusually large, owing to the presence of Prince Louis of Battenberg, Admiral of the British Navy, attended by 300 sailors. A large number of Americans were among the visitors. The display of jewelry and silverware was not equal to that of previous years, there being few exhibitors in these lines.

Ambrose Kent & Sons have a fine display of jewelry, including a well selected assortment of diamond and pearl goods. The principal item is a diamond, opal and pearl necklace, the design being in floral scroll work, valued at $1,500. They also show a large range of electric novelties, including Vienna bronzes and faience designs largely in the form of statuettes and some fancy Parisian art goods. A leading feature of their exhibit is a varied assortment of souvenir goods in silver and enameled colors, showing national and patriotic emblems and heraldic devices. They also exhibit elaborately worked regalia of various secret orders.

The Standard Silver Co., Toronto, makes a handsome showing of sterling silver, the most conspicuous pieces being in the form of trophies and prize cups. A specially noteworthy piece is a large lacrosse trophy, consisting of a huge punch bowl, mounted on an oblong ebony base. The bowl is of copper with trimmings of pewter finish. On the base are two figures of lacrosse players in appropriate attitudes, one on each side of the bowl. Copper shields are attached to each side of the base for the names of winners.

Some novel designs in sterling silver prize cups are shown. One is vase-shaped, about 18 inches high, showing a heavy wreath of raised applied flowers and a similar adornment round the base, with raised leaves radiating from the lower end of the handles. A large umbrella stand, the body of which in satin-gilt and the upper and lower portions in burnished gilt, showing floral designs, is a splendid specimen of Arabesque work. The collection includes a silver cabinet of quartered oak, with brass trimmings finely finished, comprising three drawers and a deck lined with green silk, containing table silverware.

Gowans, Kent & Co. show cut glass in great variety.

Cohen Bros., Ltd., have a display of optical goods.

The Ryrie Bros., Ltd., did not exhibit this year, as they are moving from their old location, 118-124 Yonge St., to their new establishment, at 136-140, a few doors distant, where they will hold a grand opening Sept. 2.

A recent dispatch from Hazleton, Pa., reported that the employes of the Delaware, Susquehanna & Schuylkill Railroad are dissatisfied with the system of inspecting watches which is in vogue on that road, and it is said that the company will be petitioned to allow the men to have a voice in the selection of watch inspectors.

## New York Notes.

TRADE CONDITIONS.

Manufacturers of gold jewelry quite generally say that their business is brisk and satisfactory. They report that the number of out-of-town buyers calling on the New York trade has been, for several weeks, rather large, and the visitors, as Fall approaches, show more and more of a disposition to buy. The traveling men, who have been calling on retail dealers, are said to have met with an encouraging reception, as indicated by the volumes of orders returned to the home offices. Factories, it is understood, are nearly all running full time. In allied lines a similar degree of activity is reported by manufacturers and wholesale dealers, this being especially the case in the optical trade.

Mr. Rice, of Rice & Hochster, returned this week from his vacation.

At Southampton, L. I., the residents are discussing the question whether the clock hands should be painted yellow or black.

Trophies were made by the Gorham Mfg. Co. for the automobile competition, one of the features of the Coney Island Mardi Gras, Labor Day.

From Washington comes the report that the new inkstand made by Tiffany & Co. for Vice-President Fairbanks has been delivered and is much admired. The price, it is said, was $250.

Maurice H. Slager, of Hess & Slager, Jacksonville, Fla., spent the past week in New York, accompanied by Mrs. Slager. They will pass a few days at Saratoga before returning to Jacksonville.

George R. Layng & Son have moved their office and factory from 16 Maiden Lane to 64 Nassau St., where they will have increased facilities for manufacturing as well as convenient show rooms.

Trustees of Hempstead, L. I., recently voted to pay for the electric illumination of the clock tower at night, provided the church authorities would remodel the tower and place glass faces over the dials.

A new firm of opticians is composed of Arthur Frank and Earle T. Connet, who have begun business at 21 Maiden Lane, under the style of Frank & Connet. Both were formerly with Joseph Friedlander & Bro.

Fire in a rubber stamp factory in one of the upper stories in the building at 32 Maiden Lane caused slight damage one night last week to the jewelry factory of Daniel Barnett, into which water ran, and also to the store of Kornes Bros., on the ground floor.

LeRoy Thompson, who for six years was salesman in New York, Pennsylvania and Ohio for F. W. Sackett, New York, on Sept. 1 accepted a position with G. Armeny, 90 Nassau St., New York, and will attend to the concern's jewelry lines in the metropolitan district.

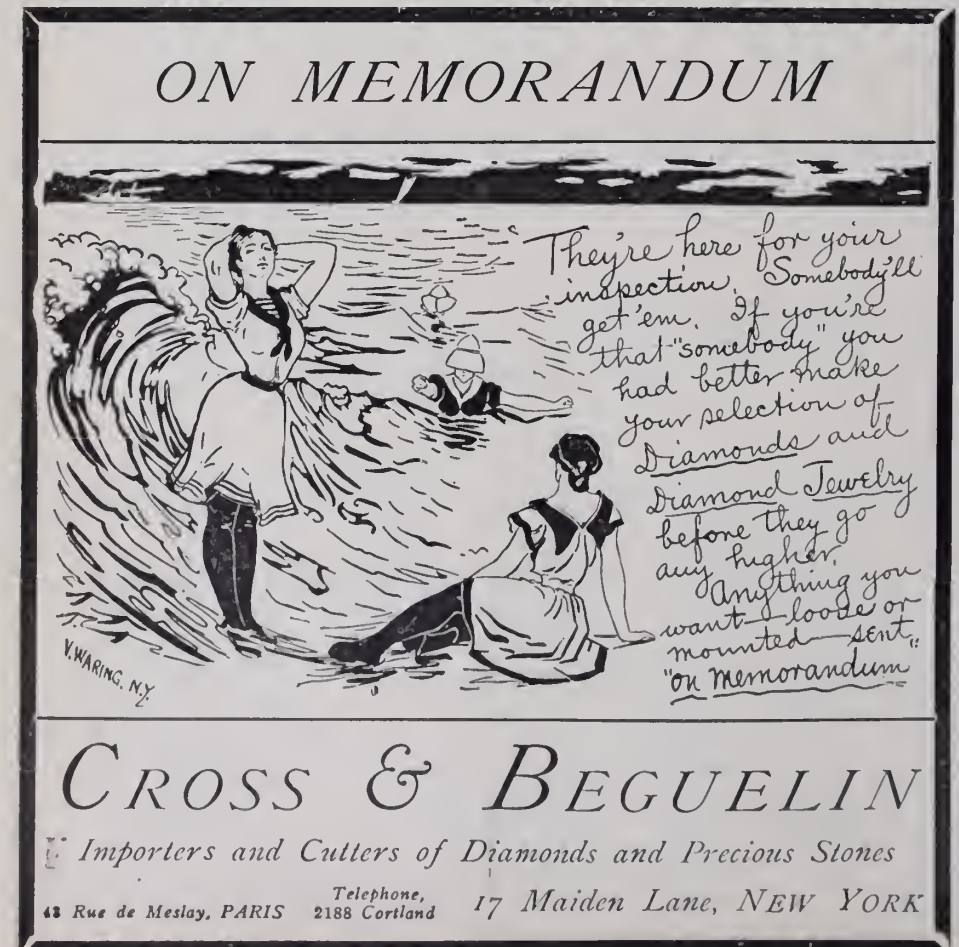
The death is announced of Helene Minlos Ahrenfeldt, widow of the late Charles Ahrenfeldt and the mother of Charles J. Ahrenfeldt, the present head of the firm of Charles Ahrenfeldt & Son, 50 Murray St., New York. Mrs. Ahrenfeldt died Wednesday at Dresden, Germany.

From Santa Fe, N. Mex., comes the report of a trial in progress to determine the title to the turquoise mines, near that city, which have long been in the undisturbed possession of Tiffany & Co., New York. A Mexican claims that the mines are within the limits of a land grant in which he has a interest.

Sympathy of numerous friends is extended to Samuel Heller, of L. Heller & Son in his bereavement due to the death of h little daughter, which occurred last Wednesday after she had made a brave fight durin six weeks of illness. Mr. Heller has gon into the country for a few days.

Frank H. Wells, who was formerly in th jewelry business in Syracuse, N. Y., ma have the custody of his infant daughter. ac cording to a decree made last week by Ju tice Giegerich, New York, in divorce pr ceedings. Mr. Wells is now in Los Angele Cal., and having won the divorce case, it said that he may allow his wife to bring u the child.

Mrs. Bertha Anzelewitz, wife of Abraha Anzelewitz, died Tuesday of last week a her home, 110 Canal St., after a brief i ness, at the age of 49 years. She is survive by her husband and two sons. The funer took place Wednesday, and was largely a tended by sorrowing relatives and friend The interment was in Mt. Zion Cemetery Brooklyn.



The Irons Normandy Co., Atlanta, Ga opened this week a New York office at 1 Maiden Lane, which is in charge of Josep Irons, who has come here from Atlanta fo that purpose. The samples of the factorie represented by this house will be shown i the Maiden Lane office. The opening of th new office is occasioned by the yellow feve quarantine and will give Mr. Irons oppor tunity to meet the southern buyers here.

Le Roy C. Fairchild, residing at 421 W 117th St., has filed a petition in bankruptcy at New York, with liabilities of $41,020 an no assets except a possible interest in th estate of Anna Eliza Grant, which he con siders of no value. The debts were con tracted in this city in 1890, 1896 and 189 for money loaned, carriage hire, clothing dry goods and hotel bills. Mr. Fairchil was formerly in the gold pen business as a member of the Le Roy C. Fairchild Co., and was later a salesman.

Sept. 12 has been selected as the date o which the Jewelers' Bowling League of New York will open its new season, in the same location which gave general satisfaction last year, the Universal Bowling Alleys, 271 Washington St., Brooklyn. The number of clubs will be 15, and while the numerical strength of the League has not been altered, there will be three changes that number of houses having retired to make room for others. All indications point to a repetition of the excellent sport of other years.

Tiffany & Co.'s new building at Fifth Ave. and 37th St. was opened yesterday to the public, and a large number of patrons and their friends called during the day to see and admire the beautiful new home of the jeweler's art. Everything was in readiness for business, the removal from the old building at Union Square having been accomplished without a hitch. Many of the visitors, after viewing the different floors devoted to the various departments, expressed the opinion that in no city in the world is there a finer or more complete jewelry establishment than this.

George Murray, the 21-year-old son of John Murray, who has been for many years bookkeeper for Black, Starr & Frost was

rested last week on complaint of his other, from whom he had taken a quantity jewelry valued at $100. The family lives Flushing, L. I., where the youth was arigned in the police court. The mother id that he had become addicted to drink, d had stolen her jewelry for the purpose obtaining money with which to buy uor. He admitted his guilt, and begged s mother to withdraw the charge, but as e did not think it was advisable for her do so, he was held in $500 bail for the rand Jury.

Max Loeb is in New York, buying for S. oeb, Erie, Pa., and while here makes his eadquarters with Arnstein Bros. & Co., 65 assau St.

Four brooches, costing $200, were taken st Friday from the store of Frederick avlicek, 1456 First Ave., by a well-dressed ung man who had been looking at the ock ostensibly for the purpose of making a urchase. Mr. Pavlicek was not in the ore and his wife showed a number of rooches to the man, who said that he inended to give a present to his fiancee. After xamining the assortment the young man aid that, being puzzled in making a selecion, he would not buy then, but would reurn shortly with the young lady, who could hen have her choice. After he went away Irs. Pavlicek missed the four brooches, vhich were among those shown to the tranger. Notice of the theft was immediately sent to the police.

A new trial has been granted in the suit f L. Mintz, 152 E. 125th St., against the Hartford Fire Insurance Co., growing out f a fire in 1902 at the plaintiff's former lace of business. Mr. Mintz had his inurance divided between the defendant comany and the British North America Co. In a suit against the latter company he was defeated. In the suit against the Hartford Fire Insurance Co., Mr. Mintz seeks to recover about $1,500. The company claimed that there was overvaluation. After the failure of the negotiations between the company and Mr. Mintz, the question went to arbitrators, who made an award in the jeweler's favor. This award the company refused to pay, and on a trial before Judge O'Dwyer in the First Term of the City Court, the jury brought in a verdict for the insurance company. Judge O'Dwyer, on application of Engel, Engel & Oppenheimer, has set aside this verdict, so that the case will be tried again.

W. G. Pollack, of W. G. Pollack & Co., New York, was in Des Moines, Ia., last week on his regular western trip in the interests of his firm. Reporters tried to get him to say whether or not he would be a witness at the second trial of Tom Dennison for complicity in the robbery of which Mr. Pollack was the victim a dozen years ago, but he declined to give out any information at this time. Testimony in Dennison's behalf was taken recently in Omaha by commission, in order to save the witnesses the trouble and expense of another trip to Iowa. Their testimony was designed to show that in committing the robbery Frank Shercliffe has not been associated in any way with Dennison. A letter which Dennison wrote to Shercliffe with reference to payments of money was explained by these witnesses. According to their theory Shercliffe desired a letter indicating his need of money in order to show it to his brother, and thereby influence the latter to make advances out of their father's estate. Dennison signed such a letter, it was explained, simply to accommodate Shercliffe.

## Buffalo, N. Y.

The H. A. Meldrum Co. has made an addition to its store in which the optical department as well as other lines will be housed in the future.

The case of Max Elbe, Niagara Falls, N. Y., who is charged with violating the United States Postal laws, came up before United States Commissioner Tucker last week, and it was posponed to Sept. 12. It was alleged that Elbe conducted a business which was covered by the prohibition against lotteries.

Colonel R. F. Pickert, of the Freeman Jewelry Co., Niagara Falls, is the defendant in a suit brought in the Supreme Court for $10,000, in which the plaintiff is W. F. Moran. The damages are claimed for false imprisonment, Col. Pickert having caused Moran's arrest about a month ago, after the latter had interfered with his sign. Moran was discharged in the police court, and then sued for damages.

The police of this city are looking for a young man who swindled a number of the members of the jewelry trade by means of bogus checks. The young man claimed to be in the jewelry business in Lancaster, N. Y., and among those whom he visited here was A. E. Sipe, from whom he got a ring worth $190; John Avusteth, from whom he got $50; Louis E. Reinsch, $160; King & Eisele, Weed & Co., and Vander Voort Bros. To most of the above firms the young man gave checks in payment of goods purchased, but investigations soon showed that though an account had been kept in the bank of Lancaster in the name he gave, it had been long transferred, and the checks were no good. The police are making a search for the swindler.

## OUR TRAVELING REPRESENTATIVES

**Travelers may consider these columns open for the publication of any items of interest regarding themselves or their confreres.**

J. Herman and Mayo Loeb, of Herman & Loeb, have left on their respective trips west and south, in the interest of their Cincinnati, O., firm.

Traveling salesmen in Louisville, Ky., recently, included: Percy D. Lucas, Frank W. Smith; Lawrence C. May, Moskowitz Bros.; Geo. T. Howard, Towle Mfg. Co.; Jos. Gibson, Geo. R. Calhoun & Co.; Fred Smith, Reeves & Browne; M. L. Barnard, Larter & Sons; W. H. Mills, Gerts, Lumbard & Co.; Thos. E. Rogers, Riker Bros.

The following traveling representatives were in San Francisco, Cal., the past week: Jules Franklin; Mr. Gibson, H. A. Kirby Co.; Jacob Marx, Kossuth-Marx Jewelry Co.; Mortimer Adler, Chas. Adler & Sons; A. Rosenberg, Alling & Co.; G. J. Weil, Electric City Box Co.; Henry Zimmern, Henry Zimmern & Co.; Wm. Moore, F. W. Gesswein Co.

Among representatives visiting the trade in Lancaster, Pa., recently, were: E. Weinman; H. B. Kline, Jonas Koch; J. H. Sylva, New Haven Clock Co.; Harvey P. Day, Edward E. Roberts; Leo Heilbrun, Leo Heilbrun & Bro.; F. Dilsheimer, Ferd Dilsheimer & Co.; Mr. Connor, G. S. Lovell Clock Co.; W. H. Iszard, Middletown Silver Co.; L. Jacobs, Peckham Seamless Ring Mfg. Co.

The following representatives of eastern firms were in Kansas City, Mo., last week: W. S. Sparrow, Stein Bros. & Co.; George Gubbins, Rockford Watch Co.; Walter Marble, Marble, Forrester & Co.; Mr. Kleckner, Theodore W. Foster & Bro. Co.; Max Jacoby, Manchester Mfg. Co.; Leo Jacoby, Providence Stock Co.; Louis Fay, R. F. Simmons Co.; Louis Block, Louis Stein & Co.; George Schwarzkopf, Schwarzkopf & Dorer, Ltd.

Traveling salesmen calling on the trade at Columbus, O., within the past week, included: M. M. Gibbs, J. Hoare & Co.; J. A. Dirksen, E. W. Donath; L. Strauss, H. H. Curtis Co.; H. Perl, Wagner Mfg Co.; G. W. Bleecker, Martin, Copeland & Co.; W. H. Reinhardt, Heeren Bros. & Co.; A. J. Augustin, Dennison Mfg. Co.; C. G. Cushman, Reed & Barton; J. Fred Crane, Mandeville, Carrow & Crane; T. E. Bowne, E. Ira Richards & Co.; Walter S. Noon, Cory Bros. Co.; G. E. Tinker, Wm. B. Durgin Co.; Fred Casper, Mauser Mfg. Co.; Chas. H. Anderson, Allsopp Bros.; Walter R. Shute, Kohn & Co.

The following traveling representatives were in Omaha, Neb., last week: Joseph Rifkin, L. Heller & Son; S. W. Abbey, E. Ira Richards & Co.; Frank Thompson, Derby Silver Co.; F. C. Allen, Sansbury & Nellis; Albert H. Kolker, Elmer A. Rich & Co.; Julius S. Mayer, Mauser Mfg. Co.; F. L. Pettee, Waterbury Clock Co.; Wm. J. McQuillen, Mount & Woodhull; George F. Heidet, C. F. Rumpp & Sons; Mr. Kleckner, Theodore W. Foster & Bro. Co.; W. H. Gregory, Strobel & Crane; H. B. Rogers, Whiteside & Blank; Meyer Lehmann, Ludwig Lehmann; C. M. Beelman, Rochester Stamping Co.; Carl Dominick, H. F. Hahn & Co.; Steve Leubusher, L. Guttmann & Sons.

Among the traveling representatives in St. Louis, Mo., last week, were: Mr. Pierce, T. I. Smith Co.; Charles E. Howes, E. L. Logee & Co.; L. B. Jones, C. A. Marsh & Co.; E. M. Bliss, Bliss Bros. & Co.; George Southwick, Payton & Kelley Co.; Harry B. Kennion, Parks Bros. & Rogers; J. B. Freeman, Freeman, Daughaday & Co.; G. H. Howard, Mason, Howard & Co.; Miles W. Evans, T. G. Hawkes & Co.; S. C. Powell, S. C. Powell & Co.; S. W. Abbey, E. Ira Richards & Co.; S. Englander, Adolf J. Grinberg & Sons; J. H. Thompson, J. B. Bowden & Co.; J. H. Johannot, Rochester Cut Glass Co.; Norman Strauss, Louis Kaufman & Co.; Mr. Dorrence, Simons Bro. & Co.

Among the traveling representatives who, recently, visited the trade in Detroit, Mich., were: H. C. Barnum, Shafer & Douglas; W. F. Keft, Maple City Glass Co.; J. N. Beckwith, Allsopp & Buob; C. B. Bartlett, Whiting Mfg. Co.; Lucien Rockwell, Poole Silver Co.; Walter S. Strauss, Jacob Strauss & Sons; G. W. Bleecker, Martin, Copeland & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; Mr. Mapleson, C. Ray Randall & Co.; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; F. C. Allen, Sansbury & Nellis; G. L. Titus, Codding & Heilborn Co.; A. N. Dorchester, Chapin & Hollister Co.; J. R. Palmer, Schickerling Bros. & Co., F. A. Perry, John Russell Cutlery Co.

Traveling representatives of wholesale firms who visited the trade in Cincinnati, O., last week, included: J. A. Lucas, A. H. Bliss & Co., R. L. Morehead, R. L. Morehead & Co.; J. Schwartzkopf, Schwartzkopf & Co.; Ernest Bliss, Bliss Bros. Co.; George T. Howard, Towle Mfg. Co.; William W. Middlebrook, B. A. Ballou & Co.; William F. Koch, American Morocco Case Co.; Thos. E. Rogers, Riker Bros.; W. R. Eliot, Meriden Cut Glass Co.; L. H. Smith, Bippart, Grossmann & Osborn; Fred Casper, Mauser Mfg. Co.; G. E. Tinker, Wm. B. Durgin Co.; Charles B. Burgess, Frank M. Whiting & Co.; J. Wilmore Fera & Kadison; H. M. Van Bergen, Snow & Westcott; T. E. Bowne, E. Ira Richards & Co.; Percy Lucas, Frank W. Smith; Mr. Glover, Grover Co.; J. Rosenberg, S. K. Grover Co.; C. Morgan Rogers & Bro.; Frank W. Bloomer, E. I. Franklin & Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; Mr. Newhouse, Schultz, Leiss & Co.; Chas. E. Bride, Bride & Tinckler.

The trade in Pittsburg, Pa., was, last week, visited by the following traveling representatives: H. A. Bliss, Krementz & Co.; Charles G. Peckham, J. H. Peckham & Co.; William Huger, Wm. Huger & Co.; Arthur Bradshaw, Meriden Britannia Co.; M. H. Shiman, Shiman Bros. & Co.; Harry C. Adler, Charles Adler's Sons; Jesse Carpenter, Horton, Angell Co.; H. N. Van Bergen, Snow & Westcott; Frank W. Bloomer, E. I. Franklin & Co.; H. A. Allen, C. B. Allen & Co.; F. I. Hussey, E. G. Webster & Son; E. J. Walther, D. F. Briggs Co.; S. C. Corbin, Waterbury Clock Co., Frank L. Carpenter, Dominick & Haff; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; Wm. V. Middlebrook, B. A. Ballou & Co.; J. M. Morrow, American Watch Case Co.; D. A. Davidson, Wallach & Davidson; Wm. F. Koch, American Morocco Case Co.; E. A. Reed, Reed & Barton; John Bailey, M. S. Benedict Mfg. Co.; F. J. Young, Middletown Silver Co.; G. L. Sweet, R. F. Simmons Co.; C. LeB. Snedeker, Rudolph & Snedeker, M. Allen, Allen, Smith & Thurston; J. Rosenberg, S. K. Grover Co.; H. C. Kionka, H. C. Kionka & Bro.; Mr. Weidmann, Engelfried & Weidmann.

# DIAMONDS

WHEN you need mounted diamond pieces, large or small, if you will order of us, stating what you want, and about the prices you want to pay, we will convince you that our stock, both in variety and range of prices, is adequate to supply your wants.

| " | 2 | 102,467 |
| Total | | $385,729 |

John Jenkins was arrested about a week ago, after having completed a sentence of five months, on a charge of larceny preferred against him by Hiram F. Burgess, a retail jeweler of Fairfield, Me.

Anton Schmidt, a middle aged journeyman jeweler of Newark, N. J., launched a queer craft in the Passaic River last week. He calls it a "land and water boat." It is intended to operate as readily upon land as in the water. Immense wheels on either side are for the purpose of carrying it on land, while paddles attached to the wheel spokes, which can be opened at will, are to furnish the propelling force when in the water. The tests made thus far have resulted poorly, but Mr. Schmidt is making alterations and expects that the wagon-boat will yet be a success.

## Pittsburg.

TRADE CONDITIONS.

With the advent of September, the Fall trade has really been ushered in in Pittsburg and Allegheny and business is fairly good. Most dealers have enjoyed an excellent Summer trade. There is a fair demand for the general line of goods and dealers see bright days ahead.

G. W. White, of West, White & Christy, is rusticating at Atlantic City.

A. E. Siviter and family have been spending several weeks at the seashore.

Carl Gillespie left last week for Denver to attend the encampment of the G. A. R.

Orion Reams has returned from a vacation spent at Buffalo and Conneaut Lake

Miss Florence M. Sprague, with Graf & Niemann, left last week for a six weeks' visit to Colorado Springs.

P. C. Gillespie, of Gillespie Bros., has gone to New York to buy goods, and from there he goes to Providence.

C. F. Neimann passed the cigars last week on account of the arrival at his home of Charles Franklin Neimann, Jr.

W. G. Ingham, buyer for the George B. Barrett Co., has returned from Atlantic City, where he spent his vacation.

Abraham Lewis, 207 Fifth Ave., is seriously ill with typhoid fever, and it probably will be six weeks before he will be able to get out of bed.

Samuel Weinhaus, of S. & B. C. Weinhaus, whose serious illness was reported last week, is much improved and is on a fair way to recovery.

It is reported that two new jewelry stores will be opened in the Penn Ave. district, downtown, there being several parties seeking locations at present.

Thomas McFadden, a Civil War veteran, who was formerly in the jewelry business in Pittsburg, died recently at his home in Coraopolis. He was a member of Childs Post 230, G. A. R., Pittsburg, and had been living in Coraopolis about 23 years.

S. E. Dille, trust officer of the Guarantee Title & Trust Co., receiver for Bernard E. Arons, who recently went into bankruptcy says that the indications are that the creditors will get about 15 per cent. on their claims. He has not as yet made his report to the court on behalf of the receiver but expects to do so shortly.

A. A. Gillespie, who is just home from Europe says that without doubt Pittsburg is one of the best towns in the country for selling novelties. He said he paid particular attention to the dress of persons, especially women, while in the East and abroad, and declares that fads have greater runs in this city than any city he knows of.

If a pending deal for the purchase of the block bounded by Fifth Ave., Diamond Sq. and Market St. is consummated three jewelry concerns in Market St. will no doubt soon be hunting new locations. It is stated that the men who have an option on the property in the entire block, which involves the outlay of thousands of dollars, will build a large office building on the site. There has been delay in making the deal on account of the tardiness of the owners of the building, occupied by J. C. Grogan & Co., being unwilling to sell unless they get $300,000 for the corner. Next to Grogan's is the jewelry store of the John M. Roberts & Son Co. and J. R. Reed & Co.'s store is next to the Roberts house.

all three being together and fronting in Market St. Mr. Grogan has a lease on the present location for another year beginning with next April, and the Roberts firm has a lease for several years, as has also the Reed concern.

## Lancaster, Pa.

Parke Clarkson is spending a few weeks in Boston.

Anthony Bruckhart has returned from a trip to England, which country he left with his parents in childhood.

Word was received here last week from Detroit of the death of Monroe B. Harper, a former Lancaster jeweler.

Wilson Porter, a retired watchmaker, formerly of Harrisburg, died here last Wednesday, aged 71 years.

Benjamin Whitson, Memphis, Tenn., greeted his Lancaster friends last week, having stopped *en route* to New York.

Elmer G. McDonnell, who established a jewelry business in Galveston, Tex., 10 years ago, is visiting his old Lancaster home.

Walter Bitner, of the Hamilton Watch Co. jewel department, was married on Thursday to Miss Bessie Brooks, of Highspire, Pa.

Out of town jewelers who visited this city last week included: H. F. Andrews, Strasburg; C. E. Hinkle, Euphrata; H. H. Miller, Mt. Joy; J. M. Kreider, Denver.

Walter Beaver and John Sharp were arrested last week for selling cheap jewelry from house to house. They managed to escape a fine, under a city ordinance, but were compelled to leave Lancaster at once.

The jewelers' Friday half-holiday season ended last week, as did the 5 P. M. closing on other days. Local merchants say that they found their receipts in the long run just as large as usual during this curtailment of working hours in summer, and both employer and employe benefited by the change.

The H. S. Meiskey Co., now located on E. King st., has leased the Steinman Building, at W. Chestnut and Market sts., all of which was until recently occupied by L. C. Reisner & Co., and will occupy the lower part. The upper floors are occupied by the jewelry manufacturing establishment of L. C. Reisner. The change made is necessary to accommodate the increased business of the Meiskey concern, due to their recent expansion.

## Louisville, Ky.

TRADE CONDITIONS.

The jewelers of this city report very good business for this time of the year, and expect continued improvement.

Milton Thalheimer just returned from Asheville, N. C.

Sam Frank left for New York last week, where he is stopping at the Astor House while there.

Albert A. Wolf and family have returned from the East, where they have been combining business and pleasure.

Geo. Wolf & Co. and Geo. Rieger were awarded the contract for furnishing 14 prize cups and pitchers to be given by the Louisville Horse Show Association at its meeting, which commences Oct. 2.

## Philadelphia

George Stout, watchmaker, has resigned his position with H. O. Hurlburt & Sons.

John Martin, with J. E. Caldwell & Co., has been spending his vacation at Atlantic City.

G. A. Lanz, son of Gus Lanz, a prominent Norristown, Pa., jeweler, is ill with typhoid fever.

Fred T. Barry, now of New York, was in this city from Saturday to Tuesday, visiting old acquaintances.

Thomas Campbell, traveling salesman for M. Sickles & Sons, spent part of last week in Atlantic City, on a pleasure trip.

Sig. Wundeman, watchmaker, formerly with B. F. Williams Co., has accepted a position with H. M. Jacobson & Son.

S. Kan, watchmaker, with F. L. Kirkpatrick, 273 S. 11th St., is spending a vacation at his old home, in New Haven, Conn.

C. W. Carey, watchmaker for the trade, 725 Sansom street, spent a few days last week at Atlantic City, with his wife and family.

Edward Sickles, of M. Sickles & Sons, spent the best part of last week at his Atlantic City cottage, where Mrs. Sickles, his wife, is ill.

Jacob Binder, one of the most popular members of the Jewelers' Club, sails tomorrow for a two months' trip to Europe, on business and pleasure.

The old established house of Simons, Bro. & Co., manufacturing jewelers,, is to be incorporated under Pennsylvania laws at Harrisburg next Monday.

Jacob C. Moock, son of Otto T. Moock, manufacturing jeweler, 809 Sansom St., is receiving the condolences of his friends on the death, last week, of a baby boy.

Robert Scott, the watchmaker who was reported to have attempted suicide and who was removed to a hospital unconscious from his room, has completely recovered.

Out of town retailers buying of local jobbers last week included: R. W Quicksall, Mt. Holly, N. J.; John MacPherson, Mauch Chunk, Pa.; H. V. Stratton, Mt. Holly.

A reward of $50 awaits at the watch department of Bailey, Banks & Biddle Co., for the return of a gentleman's gold hunting case watch, lost recently at Beach Haven, N. J.

Walter Sheppard, who has been in busi-

CUTTING WORKS, Cor. Union & Nevins Sts., Brooklyn.

ness with his father on 10th St., near Spring Garden, has accepted a position as watchmaker in the Philadelphia & Reading Railway Co.'s time service department.

The United States Mint in this city remains idle, and will likely not resume coinage for an indefinite period.

J. E. Caldwell & Co. manufactured the $1,000 trophy for the automobile contest at Cape May, last week.

Local papers recently reported the arrest of Samuel Payton, formerly a Wilmington (Del.) jeweler, but no jeweler of that name is known to the trade in Wilmington.

David Shive, an inventor of note, who had made many improvements to clocks, steam motors and other appliances, died at his residence, 1922 Broad St., last week, in his 80th year.

The new store of I. Bedichimer & Co., on Chestnut St., near 11th St., will not be ready for occupancy for some weeks. It is being expensively re-built, to be adapted for a handsome jewelry store.

C. F. Reisner last week made his first trip to this city for the H. S. Meiskey Co., Lancaster, and was given a cordial reception by those who were his friends when he had charge of the branch store here of L. C. Reisner & Co.

James F. Kuhn, with Eli Fulmer, Easton, Pa., stopped off in Philadelphia last week, homeward bound from a coast resort, where he had spent a vacation. H. Linwood Phillips, of Smyrna, Del., also spent a few days here.

Richard Rosenthal, a jeweler at 836 South St., was before Magistrate Eisenbrown, last week, to answer a charge that he had purchased some pieces of jewelry from two negroes who had been arrested for burglary. The negroes claimed they had sold the jewelry for old gold. Rosenthal was held in $800 bail to answer the charge.

By an error, it was stated last week, in the note speaking of the sale of the stock and good will, etc., of the late Henry Euler, that the sale took place Aug. 29, at 716 Sansom St. This is not true, as the sale does not take place until Sept. 12, at 716 Chestnut St., the address of the late Mr. Euler's store. Mr. Euler, who conducted a jobbing business, died last winter, and the estate is now looked after by Chas. Euler.

Victor Binder, 11 S. 9th St., is receiving the congratulations of his friends in the trade upon the timely detection last week of a couple of thieves, who attempted to defraud him of a diamond ring, worth $160, by substituting a paste ring in its place in the tray, while pretending to make a purchase. Mr. Binder recovered his ring, but the scamps escaped before an arrest could be made. The Detective Bureau was notified, and other jewelers have been warned.

EICHBERG & CO.,

IMPORTERS AND CUTTERS OF

DIAMONDS,

65 NASSAU STREET, (Prescott Building.) NEW YORK.

Take Advantage of the Recent Advance in Diamonds

WE WISH TO CALL THE ATTENTION of our customers and the trade in general to the fact that our Mr. F. Goldsmith, who has been purchasing in the European diamond market since May, is about to return. Mr. Goldsmith made heavy purchases previous to the rise in diamonds last week, which advance has been apparent to us for some time past. We are in a position to-day to offer you values greater than you can receive elsewhere.

## Connecticut.

D. E. Morris, Wallingford, left last week for a brief sojourn in Saratoga.

Walter Hubbard, Meriden, returned last week from a short business trip to Boston and vicinity.

John Lynn, Farmington, who had been located in the Agard block, on Main St. since the building was erected, several years ago, has just moved into more commodious quarters in the Lilley block, on Water St.

John E. Weible has been appointed foreman of the clock department of the Waterbury Clock Co., Waterbury, to succeed Geo. M. Beach, who has been made superintendent of the police department of that city.

Col. W. J. Leavenworth and Charles S. Tibbitts, Wallingford, Conn., were among those who attended the complimentary dinner held in honor of Congressman M. D. Sperry, at Momauguin, Monday, of last week.

C. F. Bates, who recently opened a store in the opera house block, Stamford, has just completed for Edwin H. Fox a watch charm made from a casting of the Liberty Bell. The genuineness of the metal is unquestioned.

The Porter & Dyson Co., New Britain, supplied the elaborately designed emblem which was presented last week to Past Great Sachem Wm. Risley by members of the Mattabessett Tribe, I. O. R. M., on the occasion of Mr. Risley's retirement from office.

A cricket game between employes of the International Silver Co., Shelton factory, and the Silver City Plate Co., played Aug. 26, attracted much attention and a large crowd journeyed to Pine Rock to witness the contest. The boys from the International Silver Co.'s shop won by a score of 44 to 32.

The annual reunion of the Tiffany family, of which E. E. Wright, Waterbury, is a member, met at the latter's home, Aug. 30. Among the guests were Nelson Otis Tiffany, of Buffalo, N. Y., who delivered an interesting address; Arthur Mitchell, Flushing, L. I., and Wallace Case, of Barkhamsted.

The Jennings Bros. Mfg. Co., Bridgeport, Aug. 31, secured control of the factory until recently occupied by the Bridgeport Gun Implement Co., at the corner of Harrison and Elm Sts. The company will occupy the building at once and use it in connection with its present plant at Union and Water Sts., for the manufacture of clocks.

News was received in Meriden, last week, of the recent death in Denver, Colo., of Henry E. Osborn, a well-known traveling representative, employed at different times by the Niagara Cut Glass Co., Buffalo, N.Y., Simpson, Hall, Miller & Co., Wallingford, and the Meriden Silver Plate Co., Meriden. Mr. Osborn was later engaged in business for himself in Lancaster, Pa. Death was due to blood-poisoning, which resulted from

n operation performed for the removal f a corn. The deceased was 57 years of ge, and is survived by two daughters. The uneral was held in Waukesha, Wis., of hich place Mr. Osborn had been a resi- ent for several years.

## Rochester.

Philip Present spent several days of last veek in Buffalo looking after alterations nd other details in connection with refit- ing and restocking the Henschel store, which he recently acquired.

M. J. Lindsay, 233 Main St. E., will open new office in the Central building, this veek. C. H. Bingemer, watchmaker, will e associated with Mr. Lindsay in the new ffice Mr. Bingemer was manager of the Jnion jewelry store on South Ave., which vent out of business some time ago. The offices which Mr. Lindsay will now occupy were, until recently, the headquarters of H. R. Wilson, a diamond broker, who has gone out of business.

By photographs published in a recent is- sue of THE CIRCULAR-WEEKLY of William Glich, alias "Lowenthal," who is under ar- rest at Pittsburg on a charge of passing bogus checks on jewelry stores, the prisoner was identified at the store of M. Rosenbloom as the man who about a year ago succeeded n getting away with a valuable diamond ring. Glich or Lowenthal made several vis- its to the Rosenbloom store. He paid for he goods ordered and claimed he was in business. On his last visit he selected a diamond ring to show a prospective cus- tomer. As he did not know whether he would make a sale or not, he said he would leave his check as security. Should he re- turn he would bring back the ring, other- wise the check could be deposited. Glich never returned and the next day it was found that he had given a bogus check, and n assumed name and address.

George Miller, watchmaker, who escaped short time ago from Dane County jail, Visconsin, where he was serving a six months' sentence for larceny, was captured n Madison recently. Miller effected his es- ape from jail by breaking a lock on the asement door with an ax, which he was sing to split wood.

Vol. LI. CHICAGO, WEDNESDAY, SEPTEMBER 6, 1905. No. 6

## Chicago Notes.

Loftis Bros. & Co. have opened a new branch at 220 6th St., Pittsburg, Pa. J. S. Loftis is the manager, and is assisted by H. A. Murray.

The news of the death in New York of Thomas W. Kavanagh, for many years in charge of the leather goods department of Spaulding & Co., was received here with deep regret. Mr. Kavanagh was a member of the Royal League and was secretary of the North Shore Park District for a year. He leaves a widow and four children.

Sol. Hess, of Rettig, Hess & Madsen, who was reported to have lost his trunk containing $10,000 worth of jewelry at Portland, Ore., last week, is continuing his trip on the Pacific Coast after recovering his property. The wrong check was placed on the trunk by a baggage master and it was delivered to another man. Outside of a considerable amount of worry to Mr. Hess no loss was sustained or damage done.

Hugh K. Jordan has sued S. T. A. Loftis, J. S. Loftis, of Loftis Bros. & Co., and Z. B. Waggoner for $20,000. It is declared the defendants were active in pressing a case in which Jordan was accused of perjury. When seen by a Circular-Weekly reporter S. T. A. Loftis said he did not know anything about Mr. Jordan and that Mr. Waggoner, an attorney employed by Loftis Bros Co., was out of town on a vacation.

A. W. Johanson wants to start a retail jewelers' protective association. There have been many robberies here of late and it is believed that an association of retail jewelers all contributing to a common fund used for tracking and prosecuting hold-up men would do much to abate the present evil. Should the trade feel at all interested communications may be addressed to Mr. Johanson at 270 Wells St. or to care of the Chicago office of The Circular-Weekly, 103 State St.

Hoffman, the alleged smuggler, attempted to commit suicide in jail last week. He read an account of the death of a woman whom he believed was his accomplice. His accomplice, however, is alive and is also in jail. She is supposed to be Hoffman's sister-in-law and came from Europe with him. In a false bottom of a trunk found in his room were found silverware and jewelry valued at $1,000. These are supposed to have been stolen from several London hotels where Hoffman and the woman would hire out as domestics. Hoffman, Bohl and the woman are all in jail awaiting the action of the Federal Grand Jury, which meets in October.

Leonard A. Horn, a retail jeweler at 442 N. Clark St., was the victim of a check swindler one day last week. The swindler's methods were peculiar and he certainly worked very hard to make a few dollars. First he came to the store and bought a cheap watch for $1.25, paying cash for it. Next day he came back and said he wanted a better one, so Mr. Horn sold him a $3 watch, taking the first watch in exchange and receiving $1.75 in cash. The next day the stranger wanted a still better watch and bought one for $9. The difference being $6 he tendered a check for $32 and received the watch and $26 in cash. The check was returned N. G It was drawn on the Corn Exchange National Bank, made to the order of Geo. H. Howard and signed H. W. Doane & Co.

Sol. Caro, formerly a traveling salesman for the Madson & Steele Co., in the Masonic Temple, was arrested last week charged with the theft of money and jewelry. Martin Madson, who swore out the warran , told a Circular-Weekly reporter that Caro was employed by the Madson & Steele Co. for nearly two years, that he made long trips to the Pacific Coast carrying his stock with him and made deliveries as soon as the goods were sold. Mr. Madson further said that Mr. Caro's accounts were always in bad shape and that while he reported his collections he failed to remit them. According to Mr. Madson, Caro sold several large bills of jewelry to people who had once been in the jewelry business but who at the time of the sale had been out of business for two or more years. These bills proved to be uncollectable. When the Madson & Steele Co. went into bankruptcy Caro was on the road and on being instructed to send his trunk to the trustee did so but, according to the memorandum of goods carried by him, Mr. Madson says Caro was short about 2,000 pieces of jewelry. Caro is in jail and his case comes up to-day. Bonds were fixed at $6,000. Mr Madson says Caro's shortage is between $12,000 and $15,000.

Joseph Gilhooley and Charles E. Johnson have been arrested as accomplices of William Ely, who held up and robbed A. W. Johanson's jewelry store at 270 Wells St., last week. The men are in jail and their case comes up on Sept. 8. F. E Lindahl failed to identify them as Ely's companions. Mary Ely, wife of the bandit was also arrested and held. All efforts on the part of the police towards making Ely reveal the names of his two accomplices and the place where he is said to have secreted the stolen property have been in vain. Ely has made many conflicting statements. First he denied he had committed the robbery and afterwards said he had committed it and had planned it all alone. The lumber piles where he said he secreted the booty were taken down and searched under Mr Johanson's supervision but nothing was found. In jail Ely told Mr. Johanson that the latter could consider himself very lucky in losing so little ($3,000) for, said Ely, "if my pals had done as good work as I did we would have cleaned out your store." The police say Ely's record is bad. It is believed he was in business as a retail jeweler at Morrison, Ill.

## Detroit.

Edward Rochm, of Rochm & Son, has returned from a 10 days' vacation.

Frank Mathauer, of Mathauer & Koester, is at present in the Upper Peninsula, or Copper Country, of Michigan, in the interests of his firm.

L. J. Liesemer, 77 Michigan Ave., will shortly have a double store at the old location. Workmen are busy tearing down the partition between his old store and the quarters next door.

Henry Piper, for a great many years with D. E. Holland, Lapeer, Mich., will receive $10,000 in cash under the will of the late Julia E. Hackly, of Muskegon, Mich. Mr. Piper is over 70 years of age.

Harry T. Love, Brookville, Pa., has resumed his business duties, after having been confined to his home for several weeks with typhoid fever.

## Omaha.

L. T. Smith, of Lexington, Nebr., has added a new front to his store.

L. A. Borsheim returned home last week from Geneva Lake, Wis.

E. F. Melcher, watchmaker for Henry Copley, has gone on a two weeks' trip to Denver.

W. A. Banks, of Carson & Banks, has gone on a two weeks' vacation to Lake Superior.

Miss Mary Hurst, with Brown & Borsheim, is home from a trip to the northern lakes.

Miss Anna Hoit, with S. W. Lindsay, has returned from a visit to her old home in Papillion, Nebr.

A. H. Harins, Hooper, Nebr., and L. S. Robinson, Glenwood, Ia., were among the buyers here last week.

P. E. Flodman and Mr. Dahlin, who have been bass fishing at Center City, Minn., for the past two weeks, are home.

George W. Ryan, of the Mawhinney & Ryan Co., is entertaining his wife's parents, Mr. and Mrs. C. T. Wilcox, of Milwaukee, Wis.

Charles A. Wolf, with the Shook Mfg. Co., was united in marriage last week to Miss Eva Wise, of this city. His many friends are congratulating him.

All the jewelry stores in Omaha began, Sept. 1, to keep open until 6 o'clock every evening. During the months of July and August they have been closing at 5 o'clock.

Carson & Banks have added new machinery to their plant for the manufacturing of link buttons, signet scarf pins, etc. They have also got the manufacturing agency for the arch crown setting.

B. B. Combs, of T. L. Combs & Co., with his family, has gone to Denver and other Colorado points for a two weeks' vacation. O. E. Furen, with T. L. Combs & Co., has cabled from Stockholm that he will be home about the middle of September.

The town of Seward, Nebr., barely escaped being a scene of lynching last Sunday night, when a crowd of indignant men met and agreed to send James A. Dowding to his doom by the hangman's noose. Dowding as a retail jeweler of Seward, and is charged with a serious offense. The alleged culprit was taken to the outskirts of the town, where the mob had a rope for the purpose of "swinging" the man from the railroad bridge. The authorities were quickly on the scene, and cooler heads decided to allow the law to take its course. The man was then taken to the county jail and next morning given a trial. The defendant, when arraigned, pleaded guilty. The Judge imposed no fine, but gave him six hours to leave the city, under promise never to return. Dowding kept his word and left.

Albert Edholm made the gold medal which was presented to Prof. Liberate, by the management of Krug Park last week. He is also making, for the Union Pacific Railway, 39 gold and silver medals, to be presented to their agents along the line.

## Minneapolis and St. Paul.

Bert Barker, of the Barker Jewelry Co., Minneapolis, is taking a vacation.

W. M. Stone, 14 S. 3d St., Minneapolis, has lately added a large new burglar-proof safe to his store.

Arthur E. Paegel, Minneapolis, went to Dakota on his annual outing at the opening of the hunting season for prairie chickens.

Among the out of town jewelers in the Twin Cities during the past week were: G. H. Newhouse, Pine Island, Minn.; J. Krejci, Silver Lake, Minn.; C. W. Wick, Clark, S. Dak.; F. J. Stebbins, Thief River Falls, Minn.

It is reported that a tenant stands ready to take the lease of the present store occupied by S. Jacobs & Co., Minneapolis, as soon as the latter are able to move into the building at the corner of 6th St., which they bought several months ago, but which is held under a lease for nearly two years yet.

Gus Swedlund has left the Paegel Jewelry Mfg. Co., Minneapolis, and has taken a position with S. Swanson, of the same place. P. Meyer, formerly with Mr. Swanson, has gone to Brainerd, Minn., where he will abandon the jewelry trade and enter the clothing and general merchandise business.

## Kansas City.

TRADE CONDITIONS.

Jobbers expect the heavy trade of the year to begin about Sept. 15. The orders now being filled, which are many, are viewed by the jobbers as "fillers." The start, however, is the best in the history of the trade, and it is expected that the year 1905 will establish a good record.

C. P. Kionka, of Kionka & Stuhl, traveled through Kansas, last week. This week he is at his desk here.

W. H. Haupt, Bartlesville, Ind. T., and his brother, J. C. Haupt, Peabody, Kans., were in Kansas City together last week.

Joseph Hallauer, for a long time head watchmaker for the Jaccard Jewelry Corporation, has gone to Oregon on a personal business trip.

S. L. Rhodes, Ulysses, Nebr., was in this city last week just long enough to please the jobbers with large orders. He said that money is plentiful in Nebraska this year

J. O. Reese, watchmaker, has left the employ of the Harris-Goar Mfg. Co. and gone to California with the intention of engaging in business there. Tony Cross, formerly with J. H. Worth, Leavenworth, Kans., is his successor here.

The Kansas City Polytechnic Institute now has 15 pupils. As many more will be enrolled during this month. On Sept. 1 the institute began to hold night sessions. Lectures by local watchmakers and engravers are a feature of the course.

H. F. Sloane, of the Edwards & Sloane Jewelry Co., returned from New York last week. Leo Ludwig, manager of the company's material department, returned from Wisconsin, and C. E. Vandel, the company's cashier, came in from a farm in Iowa, where he spent his vacation.

Among the out-of-town jewelers in Kansas City last week were the following: J. A Lukens, Bucklin, Kans.; C. A. Clement, Springfield, Mo.; W. W. Whiteside, Liberty, Mo.; D. L. Brown, Glasgow, Mo.; A Hooper, Atchison, Kans.; A. Rosenfield, Leavenworth, Kans.; William P. Niles, St Joseph, Mo.; H. L. Morrison, Pittsburg, Kans.

The Olof Ovren Jewelry Co., Marathon, Ia., has been succeeded by Joseph M. Swanson.

ESTABLISHED 1854. INCORPORATED 1893.

JUERGENS & ANDERSEN CO.,
DIAMONDS,
MAKERS OF FINE JEWELRY,

Joseph Mehmert, 6 Glenn building, has ded a clock department to his business, d arrangements for other improvements e on foot.

J. H. Moore, well known to the trade, is w located at 2 Sinton building, and has rted a retail business, carrying a general e of jewelry.

L. Andrea, connected with Hutchinson os., Shreveport, La., called here last week his way to Battle Creek, Mich., where will stay for a few weeks.

Burt Ganz, of the Gustave Fox Co., 14 4th St., is visiting the Minnesota and wa trade, and L. J. Fox, of this house, s left on his regular western coast trip.

The Homan Mfg. Co. amended its arter Aug. 31, making its capital stock nsist of 2,500 shares of common, and 500 shares of 6 per cent. cumulative preferred stock.

E. Swigart, of E. & J. Swigart, 15 W. h St., as proof of his success at fishing, a disciple of Izaak Walton, brought string of fish from Wisconsin which he vided among the employes of his office, st week.

The Frank Herschede Co. furnished the 20 andsome prizes awarded to the winners in e tri-State open tennis tournament, held ug. 26 to Sept. 4, on the courts of the incinnati Tennis Club, under the auspices the Lawn Tennis Association here.

A. G. Schwab & Bro., after 27 years their present quarters, have leased e third floor of the Harrison building, 1-39 E. 4th St., which will be more commodious and better suited to their business requirements. When fitted up, the ffice will be among the handsomest occuied by wholesale houses of the west. The rm will move about Jan. 1.

Bingaman & Co., 6th and Vine Sts., e offering a reward of $100 in cash for the ecovery of a diamond stud lost Thursday fternoon. The diamond weighs 4½+1/32 arats. It is a perfectly round and very ick stone, with a small table, and has atures that can be identified. It is crystal hite, absolutely perfect and mounted in e skeleton setting platinum lined.

The colored thief who, last week, stole a iamond stud from Henry Korf's store, lain St., was arraigned in the Police ourt later, and was bound over to the rand Jury to answer a charge of larceny. was also shown that he belongs to a and of thieves living in the colored dis- of Cincinnati, and has been called upon answer numerous charges of larceny, preious to this one.

Out of town jewelers who visited the incinnati trade during the past week included: J. D. Ward, Rising Sun, Ind.; M. T. Graham and wife, Ft. Smith, Ark.; Herman A. Rohs, Cynthiana, Ky.; T. Henry McClure, of the B. H. Stief Jewelry Co., Nashville, Tenn.; D. A. Lamb, Wilmington, O.; Ed. Frank, Oshkosh, Wis.; C. H. Creighton, Morrow, O.; Frank Emmerling, Hillsboro, O.; O. C. Beer, Sunman, Ind.; H. C. Reed, Blanchester, O.; Charles Sederberg, Milford, O.; J. A. Simpson, New Richmond, O., and C. A. Gossard, Washington Court House, O.

## Cleveland.

A. R. Kimpton, Oberlin, was married a short time ago to Miss Jessie Paige.

C. M. Wilson, of Salem, stopped off in this city a few hours recently, while on his way to Michigan, where he spent several days fishing.

W. J. Eroe and wife, of New Castle, Pa., were in this city recently as the guests of their son, George Eroe, of the Scribner & Loehr Co

T. B. Phillips and his brother, of Bellaire, O., in camp with the Knights of Pythias at the White City, spent some time among the jobbing houses recently, looking up goods for the Fall trade.

Charles A. Ramp, of the Scribner & Loehr Co., is spending his vacation up the Lakes. C. F. Keim, of the same house, and his wife left recently for the Adirondacks.

The display windows of the Webb C. Ball Watch Co. were decorated with the Knights of Pythias colors recently, in honor of the annual encampment of the Uniform Rank at the White City, near here.

A prominent local wholesaler, just home from the European markets, states that the diamond stock there is much better than it was last year and business on the Continent in a general way shows much improvement since his visit 12 months ago.

Among out-of-town buyers recently in this city were: W. H. Hoyle, Sidney; C. O. Deis, Canal Dover; W. P. Carruthers, Oberlin; W. C. Fisher, Lorain; D. Leonheiser, Huron; G. W. Hewett and wife, Greenville, Pa.; M. M. Wolfe, New Lexington, and E. E. Critz, Elyria.

When Capt. R. E. Burdick, of the Bowler & Burdick Co., returned home from his annual pilgrimage in Europe, a short time ago, he found that he was "grandpa" twice, his daughter, Mrs. R. C. Rathbone, of New York, having presented her husband with twin girls. Capt. Burdick intended to visit his aged mother before returning home, but grew impatient when he learned of the wonderful event in his own family.

L. M. Ratliff, Francesville, Ind., has sold out and moved to Colorado Springs, Colo., where he has taken a position with a large concern.

Thus far no clue has been obtained to the thieves who broke into the store of W. W. Mansfield & Co., Portland, Me. The thieves secured four bracelets, valued at $5.00 each; four vest chains, worth about $4.50 each; 12 souvenir pins, valued in all at $12.00; 12 souvenir knives, valued at 50 cents each, and four necklaces, worth $20. The plunder was secured by breaking the show window. Spots of blood were found extending across the sidewalk.

## Pacific Coast Notes.

W. A. Mosgrove, Angels Camp, Cal., spent a few days in San Andreas, Cal., last week.

M. Saier, Fresno, Cal., has left for a two weeks' vacation, to be spent at Byron Springs, Cal.

W. H. Scribner, Bakersfield, Cal., was a loser in a recent fire which occurred at that city. The extent of his loss is not known.

W. J. Mitchell, Imperial, Cal., has temporarily closed his place of business and has gone to Los Angeles and other Coast towns for a two weeks' vacation.

Mr. Chute, Tulare, Cal., has purchased two houses on M St., near King St., in that city, and very shortly the family will move from the rear of Mr. Chute's place of business into their new home in one of the houses.

Manson & Bay, Redlands, Cal., are planning to make extensive improvements in their store on Orange St. One of their new show cases is to be a floor case. The back, the sides, the top and bottom will be lined with mirrors and lighted by electricity on the inside.

Cohn & Solomon, Los Angeles, Cal., have dissolved partnership, each partner having taken one of the two stores which they have been conducting together. A. B. Cohn and his brother will conduct the store on 3d and Main Sts., while J. B. Solomon will take charge of the business near First and Main Sts.

J. Trinidad, with Greilsammer Bros., Manila, P. I., is in custody as a self-confessed thief. Greilsammer Bros. have been the victims of a gang of which Trinidad was a member. They have lost over 200 watches and only a few have been recovered. The investigation is being continued, however, and it is expected that other important recoveries will be made before long.

S. Spitz, Santa Fe, N. Mex., is improving his establishment at 206 San Francisco St. He has added four new show cases of plate glass, with bases of mahogany. The interior trimmings are of green felt, no other color being visible. Two of the cases are wall cases, also of mahogany and plate glass.

## Pacific Northwest.

John Voss, Woodburn, Ore., is closin out his stock.

Edward Ortley has opened a store at 23 Main St., Lewiston, Idaho.

## San Francisco.

M. K. Giant, Vallejo, Cal., was in this city st week buying goods.

H. B. Oberlin, Fresno, Cal., made a recent rchasing trip to this city.

Harry Fertig, Gilroy, called on the San rancisco jobbing trade last week.

Ben Levy, Newman, recently made a trip San Francisco in his new automobile.

E. A. Fano, formerly of San Diego, has ne into business at 143 Powell St., this y.

Charles Haas, Stockton, Cal., spent last eek in the metropolis purchasing Fall ock.

Peter O. Berg, Heppner, Oreg., made second Fall buying trip to the metropolis st week.

Phil Doll, Oakland, Cal., has taken a posi- on with the Fleissner-Marshall Co. as atchmaker.

John Luckenbach, Los Angeles, spent a w days here recently, making purchases om the jobbers.

H. C. Van Ness, manufacturers' agent, an Francisco, is en route home from a siness trip east.

S. Conradi, Los Angeles, was here last eek, making extensive purchases for his ewly opened annex.

Hammersmith & Field's newly remodeled ore is one of the most artistically designed welry establishments to be found in the est.

Julius Lange, 11 Powell St., and Ed. H. rrestier, of Carrau & Green, will leave on for a few weeks' deer hunt in the erras.

L. Carrau, of Carrau & Green, has just turned from a six-weeks' vacation spent Bartlett Springs. He was accompanied his wife.

Seven of the older employes of Radke & ., who are members of Company B, of the t Regiment, N. G., attended the Non m's ball, given Aug. 26.

C. T. Pomeroy, Salem, Ore., was in San rancisco for a few days last week, accom- nied by his wife, Dr. Pomeroy, who is one the leading physicians of Salem.

D. S. Briggs, with Radke & Co., has now lly recovered from a slight attack of ma- ria, which confined him to his home for veral days last week, and is again filling s accustomed post.

A. E. Springborg, Redlands, Cal., has re- rned to San Francisco after a visit to the wis and Clark Exposition at Portland, reg. After making a few additional selec- ns of Fall goods he will return to Red- nds.

J. J. Bryan, manager of the silverware partment of the W. K. Vanderslice Co., t Sept. 4 for a visit to the east. He goes a delegate to the national convention of e Order of Redmen, which meets at Nash- le, Tenn.

The work of repairing the fire damage to e building at 120 Sutter St., in which the ncipal losers were jewelers, has been be- gun and is progressing rapidly. Several of the jewelers who were obliged to move out will return as soon as the repairs are completed.

Harry Morton, who was for two years a jeweler of San Jose, Cal., has returned to the jewelry business after a year's experience in the newspaper business. He has bought out the A. Steffanoni Co., Oakland, and will fit up the establishment as one of the handsomest jewelry stores on the Pacific coast.

Shreve & Co. have just completed two large silver loving cups for the Inter-State Asssociation, which will be presented to the winners of the Pacific Coast Handicap at Targets and Preliminary Match at Trap Shooting. The event will take place under the auspices of the San Francisco Trap Shooting Association.

San Francisco jewelers are not taking kindly to the advance in the price of watch crystals. They say it is a difficult matter to explain to the customers why they have to pay more for an article this week than they paid for a similar one last week. Many of the jobbers are putting up signs or issuing circulars announcing the advance in price.

J. W. Brown, representing J. B. Whitney, left Sunday morning for the north. He will carry the W. E. Ingraham Co.'s clocks and J. B. Whitney's other manufacturers' lines through the States of Washington and Oregon. Mr. Brown recently returned from a trip in the southern part of the State, and he reports that the trade in that section is satisfied that the fruit interests will bring great returns to southern California this year.

## Indianapolis.

J. H. Reed spent part of last week in Paris, Ill.

A. A. Garner, Lebanon, who was seriously ill, is reported improved.

Charles Mayer and family, who have been spending the Summer in Michigan, will probably return home next week.

Ferd. Mayer, of Charles Mayer & Co., who has been in Europe for three months, is expected home in about a week.

The sympathy of the local merchants is extended to C. K. McCain, Kokomo, Ind., whose father died a short time ago.

Smith T. Nichols, of S. T. Nichols & Co., is slowly recovering his health, although he is not yet able to return to business.

David S. Gribben, of Gray, Gribben & Gray, accompanied by his family, has returned from a two weeks' visit in the southern part of the State.

Augustus Craft and E. M. Craft, of the A. P. Craft Co., have returned from a short fishing trip at Bass Lake, in northern Indiana. They report a number of fine catches.

No trace has been found of the thieves who recently entered the store of A. K. Fisher, on Virginia Ave., and carried off $50 worth of spectacle frames. The trays that held the frames have been found near the Union station.

H. Cohen & Sons have opened their new store at the corner of Pennsylvania and Market Sts. New fixtures and a new stock have been installed. For 36 years the firm was located on S. Illinois St.

The local postoffice has held up the mail of the "Sure Thing Jewelry Novelty Co.," pending an investigation. It is asserted that the firm exists in name only, and that fraud was being practised in securing money from persons who answered its advertisements.

Among the out-of-town jewelers who visited the local jobbers and manufacturers last week were: F. Pennington, Knightstown; J. W. Hudson, Fortville; J. A. Meissen, Cicero; George W. Clemons, Greenwood; Bernard Maier, Edinburg; J. A. Pickett, New Castle; and J. Henry Smith, Greenfield.

G. H. Spofford, Long Prairie, Minn., has left that place.

IF YOU CAN'T FIND IT, WE CAN MAKE IT.

Exact size of special charm recently made for jeweler who could find nothing large enough to suit his customer.

## News Gleanings.

Fletcher Allen, Kosse, Tex., has filed a petition in bankruptcy.

W. F. Harman, Creston, Wash., has sold out to G. K. Birge, Davenport, Wash.

Howard E. Boughton, Eagle Grove, Ia., has moved into new and larger quarters.

B. F. Roark, Rome, Ga., will shortly move into handsomely furnished quarters in the McDonald block.

The Conner Jewelry & Optical Co., Wellington, Kan., has just added a large new safe to its office equipment.

Albert Hartwig, Alexander, Ia., recently moved to Thornton, in the same State, where he will continue business.

The J. H. Nelson Jewelry & Optical Co. has sold out its jewelry business in Colorado City, Colo., to Harry Engle.

In a recent fire in Chapman, Kan., the store of Wm. E. Rollf was destroyed. The greater part of the stock was saved.

The store formerly occupied by Harry O. Sheldon, Bottineau, N. Dak., has been sold to a recently organized banking concern.

E. T. Hensler, Prosser, Wash., has moved his stock from the Nelson Drug Co.'s building into the store of the Angus Drug Co

Walter H. Litchfield, Keene, N. H., recently sold out to Frank F. Stearns and William B. Hills, of the same place. The latter had been employed by Mr. Litchfield as a watchmaker.

A thief recently entered the store of Ira Berry, 11 Exchange St., Portland, Me., and escaped with a small amount of stock. Some of the plunder was subsequently recovered in a local pawnshop.

The authorities of Westfield, Mass., are seeking the whereabouts of a man, who recently visited that place and defrauded several residents by selling cheap jewelry through the agency of school children.

The store of W. A. Gregory, 811 E. Midland St., Bay City, Mich., was damaged by fire recently. The loss amounted to about $1,500. The fire is supposed to have been caused by the explosion of a kerosene lamp which was left burning during the night.

A package of jewelry containing 24 gold and diamond rings owned by Kahn Bros.' Silver Co., Baltimore, Md., which had been lost a short time ago, was found last week, and returned to the concern by Ed. L. Nixon. The firm presented a diamond ring to Mr. Nixon in appreciation of his honesty.

The Moultrie Jewelry Co., Moultrie, Ga., has been reorganized. Benj. Valdalsen has purchased an interest in the business, and will act as manager for the concern. G. G. Mead, who has been connected with the business for several months, has also purchased an interest. It is understood that the firm style will be changed shortly

The store of J. L. Pendley, Buford, Ga., was entered by thieves a short time ago and a large amount of stock which had been left in the show case was stolen. The stolen articles include 28 watches, 25 rings, eight watch chains, three watch cases, three fobs, 12 garnet chains and eight pairs of link cuff buttons. The safe, which had been left unlocked and contained several thousand dollars worth of jewelry, was left untouched. Entrance was gained through an open transom at the rear of the store.

## UNITED STATES PATENTS.

ISSUE OF AUG. 22, 1905.

**97,568.** WATCH-GUARD. Arthur Fishmann, New York. Filed Aug. 26, 1904. Serial No. 222,249.

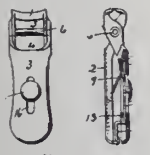
wn resiliency, and a second resilient split ring tached to the free ends of the first-mentioned ng and adapted to hold said ends together.

**97,745.** MICROMETER-GAGE. Charles W. Pitman, Philadelphia, Pa. Filed Dec. 23, 1903. Serial No. 186,269.



In a micrometer-gage, the combination with the easuring-spindle and its directly-actuating sleeve, f an annular feed-collar encircling the sleeve, and

spring-pawl between the coinciding peripheral surfaces of said collar and sleeve, one of said elements being recessed on its periphery to receive the free end of the spring-pawl; whereby the collar and sleeve will be maintained in operative frictional engagement, in the absence of counteracting endwise pressure on the spindle.

**797,937.** FINGER-NAIL TRIMMER. Chapel S. Carter, Ansonia, Conn., assignor to the H. C. Cook Co., Ansonia, Conn. Filed May 15, 1905. Serial No. 260,428.

In a finger-nail trimmer, the combination with two lever members pivotally connected together pliers-wise, one member being provided at its handle end

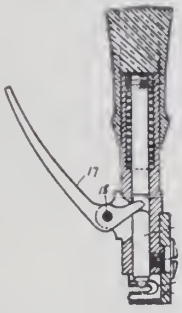
with an inwardly-extending locking-lug; of a movable fastening device mounted in the other member for engagement with the said lug, whereby the two lever members are held in their closed positions.

**797,938.** FINGER-NAIL TRIMMER. Chapel S. Carter, Ansonia, Conn., assignor to the H.

C. Cook Co., Ansonia, Conn. Filed May 15, 1905. Serial No. 260,429.

In a finger-nail trimmer, the combination with two lever members pivoted together pliers-wise, one being provided upon its free or handle end with a rigid outwardly-extending locking-finger; of a movable fastening device applied to the other lever member for engagement with the said finger.

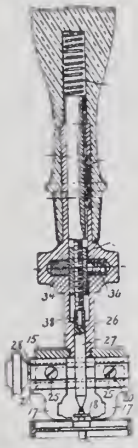
**797,951.** THREAD CUTTING THIMBLE. Walter H. Gay, Richmond, Va. Filed June 7, 1905. Serial No. 264,103.



A thread-cutting thimble comprising a body part having at its lower edge a marginal bead, a sep-

arate pitted cap and a cutter having one end caught and retained between the edge of the pitted cap and the body part, and its other end retained by the marginal bead.

**797,998.** WATCH-ROLLER REMOVER. Emma C. Weissmiller, Lead, S. D., assignor to Kendrick & Davis, Lebanon, N. H. Filed Feb. 8, 1905. Serial No. 244,722.



A watch-roller remover comprising a shank having a longitudinally-movable ejecting-plunger, and

a holder movably engaged with the shank and having a plurality of roller-rests either of which is adapted to be moved into operative relation with the plunger.

**797,999.** WATCH ROLLER AND HAND REMOVER. Lester J. Williams, Lebanon, N. H., assignor to Kendrick & Davis, Lebanon, N. H. Filed Feb. 8, 1905. Serial No. 244,716.

A tool of the character stated, comprising a head having a jaw-guide, and a stud-bearing parallel with the guide and connected therewith by a longi-

tudinal opening, a pair of jaws having shanks fitted to slide in the guide, and pins projecting through said opening into the bearing, a rotary stud journaled in the bearing and having oppositely-arranged continuous oblique grooves engaging said pins and adapted to move the jaws simultaneously in opposite directions, a shank affixed to the head, a plunger movable longitudinally in the shank and between the jaws, and means for projecting and retracting the plunger.

**798,000.** WATCH-ROLLER REMOVER. Lester J. Williams, Lebanon, N. H., assignor to Kendrick & Davis, Lebanon, N. H. Filed March 17, 1905. Serial No. 250,609.

A tool of the character stated, comprising a barrel or body, a roller-seat secured thereto, a double-ended plunger movable in the barrel, a

holder adapted to detachably engage either end of the barrel, said holder being movable with the

plunger in the barrel, and means for moving the holder to project and retract the plunger.

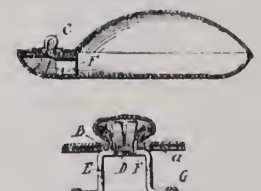
**798,042.** PENDULUM-BEAT ADJUSTER. ALMERON M. LANE, Meriden, Conn. Filed Aug. 24, 1904. Serial No. 221,922.

The combination, with the movement-frame of a timepiece, of a pendulum-beat adjuster consisting of a frame independent of the movement-frame, and composed of united plates; gearing for adjust-

ing said frame in an arcuate path on the movement-frame, and for securing it when adjusted; a pallet carried by the frame; an escapement-wheel mounted in said frame; and a pendulum also carried by said frame.

**798,053.** EYEGLASSES. WALLACE L. BEMIS, Brockton, Mass. Filed Sept. 28, 1904. Serial No. 226,352.

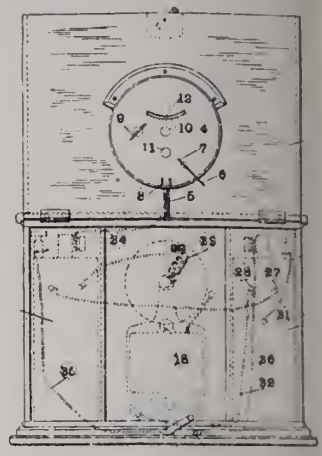
In eyeglasses, the combination with a pair of lenses, a stud secured to each of said lenses and a stud-connecting fitting made from a single piece of metal and comprising a pair of nose-guards each



having two arms arranged approximately at a right angle to each other, an arched nose-bridge extending upward and forward from the points of junction of the two arms of each nose-guard, and a pair of stud-connecting sections bent upward from the lower ends of the pendent arms of said nose-guards.

ISSUE OF AUG. 29, 1905.

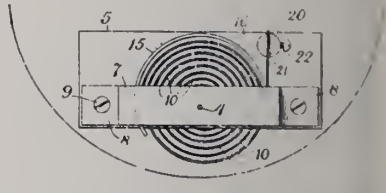
**798,089.** EYEGLASS-CASE FASTENER. MURRAY S. CHISM, Philadelphia, Pa. Filed April 23, 1904. Serial No. 204,531.



In a case-fastener, the combination with a socket, of a flat plate having one edge extended upwardly

to form a shank, the said shank having a split, elastic head comprising a plurality of elastic portions compressible one toward another while passing through the mouth of the socket, each portion of the split head presenting curved surfaces to the mouth of the socket when passing into and out of the socket.

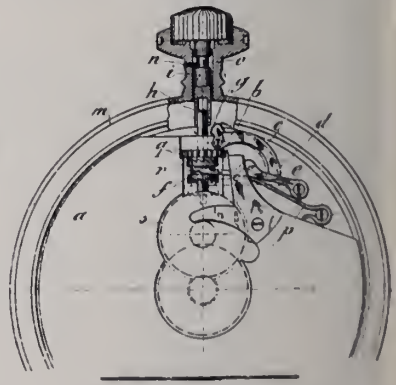
**798,143.** ELECTRIC ALARM-CLOCK. JOSEPH MCCARTHY, St. Louis, Mo. Filed May 5, 1901. Serial No. 206,426.



An electric alarm-clock comprising a case arranged to receive alarm-clock mechanism, an e
tric circuit comprising a source of current, a
cuit-breaking switch and contacts arranged to
connected by the alarm-clock mechanism, an ala

clock mechanism arranged in said case to conn
said contacts, a second circuit in said case co
prising an electric alarm, a third circuit exter
to said case comprising an electric alarm, a
means for throwing said second-mentioned a
third-mentionel circuits separately in series w
said first-mentioned circuit.

**798,211.** THERMOMETER. CHARLES W. PI
NAM, Amesbury, Mass. Filed Oct. 10, 19
Serial No. 227,782.



In a dial-thermometer, the combination with
dial, a pointer and a staff supporting said point

of a spirally-wound lamina connected with sa
staff, a bridge fixed to the rear of said dial a
inclosing said lamina, and an arch partially su
rounding said lamina peripherally.

**798,364.** WINDING AND SETTING MEC
ANISM FOR WATCHES. CHARLES G. PI
RIN, Locle, Switzerland. Filed Oct. 22, 19
Serial No. 229,673.

In combination in winding and setting mechani
for watches, a winding-stem *h*, a sliding pini

thereon, a winding-pinion *q* loosely mounted
the stem *h*, a motion work-wheel *s*, a lever *e* f
shifting the sliding pinion into engagement wi
either the winding-wheel or said wheel *s*, a sprin
for normally keeping the sliding pinion in engag
ment with the winding-pinion *q*, a two-arm leve
*c* having one end engaging with the lever *e* an
its other arm having a nose *g* thereon, said no
lying in close proximity to the upper end of th
stem *h* and a sliding crown-stem having its lowe
end engaging with the stem *h* and being adapte
to be pinched between the said stem and the no
*g*, when pushed downward so as to depress th
other arm of the lever *e* to throw the pinion int
engagement with the wheel *s*.

798,435. BIFOCAL LENS. Benjamin Mayer, Baltimore, Md. Filed March 13, 1905. Serial No. 249,690.

A bifocal lens comprising one piece of glass having an upper distance field, a lower and smaller

near field, and an arched division separating the two fields, but the lens at the curved line of joinder of the upper and lower fields having a uniform thickness through both fields, whereby the said division is practically free from prismatic effects.

## Black Diamond Ornaments of Japan.

(By an Occasional Correspondent.)

THE queerest jewelry I ever saw is in Japan, which country I had occasion to visit last year. One day I was offered a chance to purchase a cane of hard wood, neatly polished and finished, with the top portion set off with some black, glistening gems of the order exhibited in Fig. 1. I examined the glossy black specimens, and discovered them to be coal. But the finishing effect and the general design presented a beautiful appearance, and I bought the cane. After that I looked about for some of the shops in Nagasaki, where the thrifty Japanese jewelers produce ornaments from the coal heaps of the wharves.

It appears that it is a practice of the Japanese coal-workers to save out certain samples of the coal which are suitable to dispose of to the metal-workers. In the course of the day two or three pieces of hard, brittle, glossy black coal are selected. The agent of the jeweler appears on the scene on his regular trip, and for a few pennies buys up the chosen portions. These pieces of coal are bundled together in a sack and taken to the shops of the "black-diamond" workers, so called. This is the term applied by the American tourists to the busy little Japanese workers in metals and coals. Of course, the jewelry thus made is exceedingly inexpensive.

The Japanese metal-worker does not expect to make more than a half a dollar a day. He usually makes cane heads, umbrella heads, artistic corkscrews, neck gems, rings, chains and trinkets in general for the public. Often these are made at his home in his little shop. Then, again, I found several of the workmen engaged together, with a boss to direct them. It is customary for one or more members of the working party to solicit custom frequently. In fact, some one is out all the time with samples.

In Fig. 2 is another form of the black-diamond ornamented cane, while in Fig. 3 is shown the decorated form of corkscrew used by the Japanese. I saw considerable numbers of these ornamented corkscrews purchased by tourists from all lands. The process of attaching the coal bits to the article is not difficult as practiced by the Japanese. There is a base made by grinding and gouging, and this base is furnished with a surfacing of cement stuff, bearing the properties of the elasticity of rubber. Into this ruber-cement composition the particles of coal are pressed and the composition is allowed to harden. When hard, a perfect grip is obtained on the coal, and the pieces will not work loose.

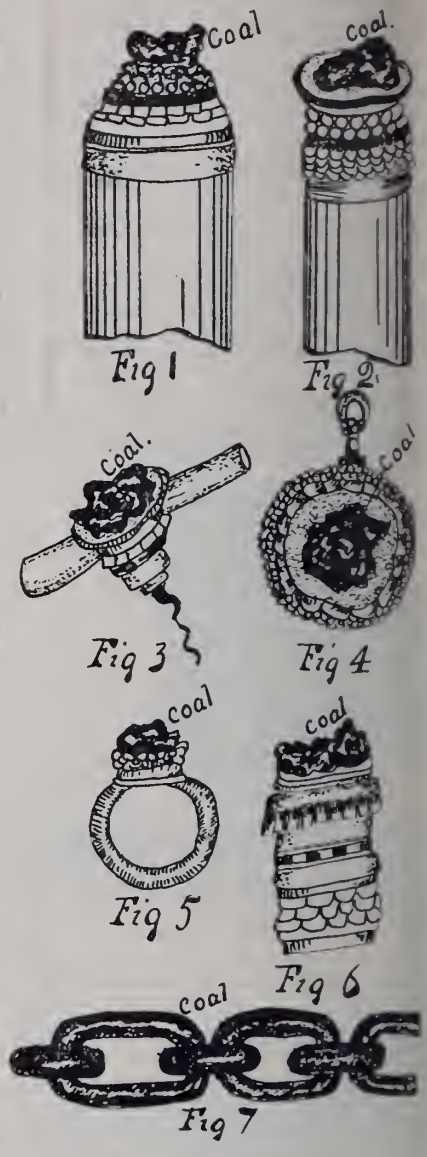

Fig. 4 is a drawing of an ornament intended for use as a charm or like article. It is made to be attached to a chain, to a pencil or to any part of the dress. In Fig.

Fig 10

Fig 11

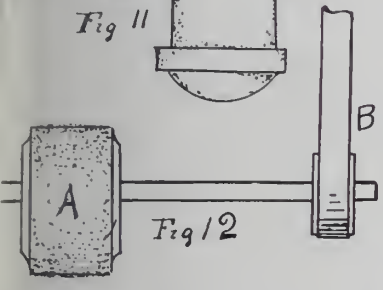

Fig 12

s of a piece of link chain made from solid block of coal. The workman de-ed his spare time for weeks in modeling ut 10 inches of these links. A tourist rchased it for $2. The links were made the plan that the ingenious boy makes links of a chain from a solid stick of od. These black links were given a good ish by being dipped in some native ishing solution for a coating, causing chain to shine brilliantly.

f we were to enter one of the Japanese ps that grind out these coal ornaments, would find tools of the order shown in next sketches. Fig. 8 is a pointed tool steel, with which the details of design in the coal piece are mapped out. The sharp point is used to scratch the design. Fig. 9 is a handy pointed chisel which is used in the work, and Fig. 10 is the ingeniously patterned hooked tool that may be found in practical use on the bench of all the Japanese metal workers. The Japanese use a specially designed hammer for the coal jewelry work, one style of which is shown in Fig. 11. Usually the head is provided with a leather or raw-hide face. Sometimes a lead or other soft metal face is employed.

The natives do a great deal of grinding and rubbing when finishing the coal jewels. The more friction applied, the richer is the gloss. One may find several patterns of emery wheels, buffing wheels and other types of wheels in use. The workmen of this country are not nearly as up-to-date with their merchanical devices as are the soldiers at the front with their modern equipments of war. I found many jewelers and other artisans employed with the crude apparatus used generations ago. The artisan calculates to have a boy or two about the place to turn the cranks for grinding and polishing wheels. Now and then I saw foot-power used. Occasionally I discovered that an engine or electric motor had been installed and power secured from these sources, but the great bulk of this kind of work is done by manual exertion. The design of one of these revolving grinding wheels, is shown in Fig. 12 as customarily mounted. The wheel surface is liberally sprinkled with the emery or other abrasers. The shaft bears in the proper journals. The power is secured by the belt B or by a hand crank or foot treadle, as the case may be. No doubt after the war there will be innovations in the mechanical work in the shops of the artisans, and those of the coal-workers will be supplied with up-to-date contrivances, but at present they are very crude.

In speaking with one of the proprietors of a "black-diamond" shop, I was told that the very hardest of high-grade coals should be selected for this ornamental work. The pieces should be ground down to the proper form and should be liberally polished. Then comes the setting of the coals or piece of coal in position on the article, followed by a final glossing by the use of oils and a soft cloth. This final polish is usually done by hand. Then the jewels are ready for the market. "RETURNED TRAVELER."

## Old Sun and Nocturnal Dials.

Translated expressly for THE JEWELERS' CIRCULAR-WEEKLY from the German of MAX ENGELMANN, in the *Leipziger Uhrmacher Zeitung.*)

(*Continued from issue of Aug.* 30.)

NOCTURNAL DIALS.

N the foregoing descriptions of sun dials mention was made of nocturnal dials in o far as they were combined with sun dials. Nocturnal dials are distinguished as lunar

FIG. 21.

r astral dials. Their construction is earlly always similar to, but not so manold as that of the sun dials. A short decription of the nocturnal timepieces illustrated in the following figures will explain the construction of the principal varieties.

The astrolabium planispherium, an intention of Hipparchus (about 140 B. C.), the most ancient form of astral dial. Till he invention of the telescope this special orm of astrolabe was one of the principal nstruments employed by those of the ancient astronomers who occupied themselves mainly with measurements. The astrolaium planispherium was much used in astern countries, the Arabs being especially noted for the construction of these instruments, as is proved by specimens still existing. It was introduced into the west as early as 1000 A. D., and became a very favorite instrument, as by its aid it was possible to solve quickly and easily almost

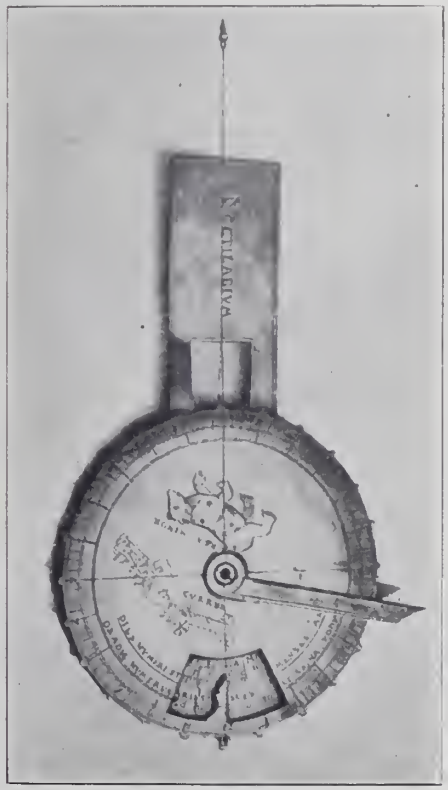

FIG. 22.

all problems connected with the measurement of time.

The disk-shaped instrument (Fig. 21), representing an astrolabium of this kind, is one of the principal ornaments of the collection we have mentioned. It was made in 1568 by Johannes Praetorius, born in Joachimstal, and mathematical instructor to the Emperor Maximilian II. It is an instrument of the most finished workmanship, the bronze disk having a diameter of 394 millimeters. The carved work in front and at the back of the portion just below the point of suspension represents the four elements. With regard to the construction of this instrument the following details may be noted: Quite at the bottom of the inner hollow surface of the disk, the edge of which is divided into four quadrants and 24 hour divisions (each with eight subdivisions) are three interchangeable disks. Each of the six sides of these disks is a planispheric system of intersecting lines corresponding to the degrees and divisions of the northern celestial sphere for one of the latitudes 39 deg., 43 deg.,

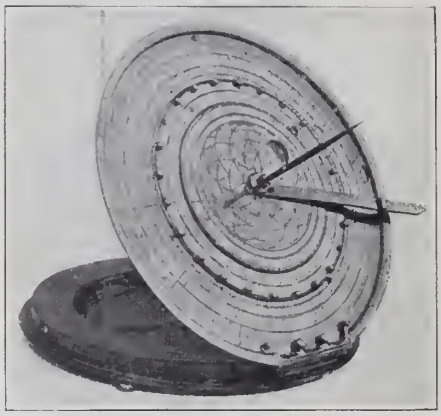

FIG. 23.

46 deg., 49 deg., 52 deg., and 55 deg. Over it is a highly pierced bronze disk covered with leaf-work engraving, the oval and round holes showing the position of about 30 of the brightest fixed stars and the signs of the Zodiac with the degrees. On the disk is a revolving hand with sharp edges. When required for use, the instrument was suspended vertically by its ring. Through two sights adjusted on to the revolving hand, the altitudes and culminations of the stars could be observed and the hour of the night thus found. The position of the sun and the true solar time could be found in the same way. On the back of the instrument is a perpetual calendar ornamented with beautifully engraved work, with directions for finding the golden numbers, dominical letters, feast-days, etc.

The astral dial (Fig. 22), made in 1555 by George Hartmann, Nurenberg, the dis-

coverer of the inclination and declination of the magnetic needle, is constructed to tell the hour of the night from the relative positions of the star ♉ of the great bear and the pole star. A lower disk, firmly fastened to the handle, bears the names of the signs of the Zodiac and their degrees, also the signs of the months with their days. Over it is a revolving hour disk with the 24 hours marked on it. Projecting spikes are inserted for telling the time at night by the touch. The instrument is used in the following manner: The upper disk is turned till the pointer is brought over the day of the observation in the lower calendar disk, and the instrument with the handle held vertically downwards, and placed before the eye in such position that the pole star is visible through the opening in the center. The star ♉ of the great bear or Charles's Wain is then sighted with the

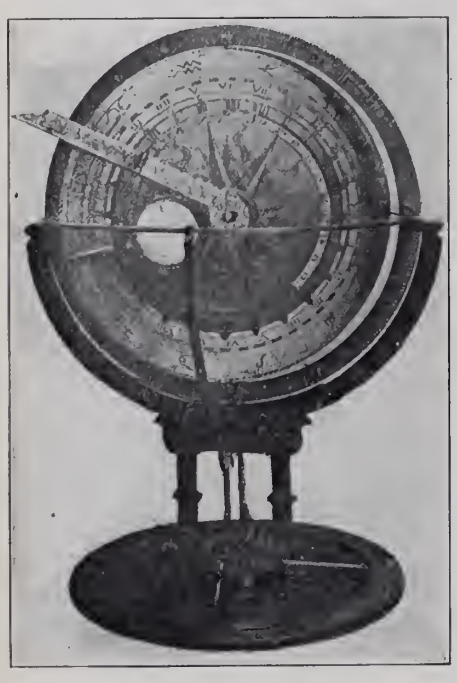

Fig. 24.

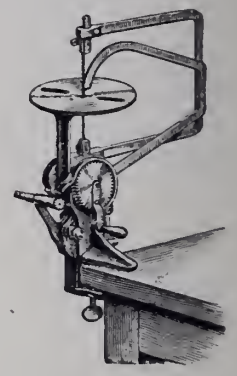
sharp edge of the pointer projecting beyond the disk. The required time is found by feeling the number of spikes from the large spike of the 12th hour to the adjusted pointer. The back of this instrument is a solar quadrant similar in its arrangement to that described under Fig. 4.

A nocturnal dial of historical value is shown in Fig. 23. It was made in 1553 by Christian Heiden, Nurenberg, for Philip Melanchton. The dedication on the edge of the case reads as follows: "Clarissimo viro D. Philippo Melanchtoni praeceptori suo faciebat Christianus Heiden Noribergensis." By using the divisions marked on the edge of each side of the cover and the style gnomon in the center, the instrument may be made to serve the purpose of an upper and lower equatorial sun dial. Next in order on the outside of the cover as we proceed towards the center, we find engraved the directions of the winds, the names of the signs of the Zodiac with their degrees and the signs of the months. The center is arranged as a lunar and astral dial. The lunar dial is arranged in combination with the style gnomon and the equatorial dials in such a way that a revolving disk (*a*) with buttons for telling the time by the touch and the 29½ lunar day divisions (the mean time required by the moon for her journey through the Zodiac) can be adjusted above the Zodiacal signs and the days of the month. Above the 29½ day divisions, another disk (*b*) revolves, marked with 24 hour divisions and showing the lunar phases through a circular opening in its surface. Before determining the time, disk *a* is turned till the point marked 29½ stands in a line with the 12th hour mark of the exterior equinoctial dial plate. Let us hear what Welper in his "Gnomonica" (1708) says concerning the method of using this lunar dial. "If it is desired to ascertain the time on a moonlight night, the age of the moon (the number of days after the new moon) must first be found from the Ephemeris or from a calendar. Then the inner disk (*b*) must be revolved till the 12th hour (the small pointer of disk "*b*" visible in the figure) is directed toward the number showing the day after the new moon. Then the dial is turned to the equinoctial altitude for the day, placed in the meridian line by means of the magnetic needle, and the style passed accurately through the center. Then the shadow will show the required hour on the disk *a* on the outside surface when the moon is above the equator, and on the inside surface when she is below it, as in all equinoctial sun dials." The method of using this instrument as an astral dial is in principle the same as that explained under Fig. 22, except that this dial is arranged for observing the position of the star Capella, as appears from the inscription on the pointer: "Horas nocturnas de prehendes ex motu stellae fixae Alhajot." (Alhajot was the Arabic name for Capella). Around the case for the compass forming the massive base of the instrument, are marked the lines of division for a horizontal dial. The latitudes of 41 places are engraved on the inside of the cover.

In Fig. 24 we have a compound nocturnal dial made by Joshua Habermehl, Regensburg, in 1576, which deserves notice on account of its artistic finish. Resembling an armillary sphere in its general arrangement, it has a planispheric astrolabe at the base similar to the one in Fig. 21. By inserting the star-disk in the cross rings as in the figure, observation of the stars was performed more accurately and conveniently than by the uncertain method of suspending the instrument as in Fig. 21. The front of the instrument shown in the figure is arranged as an equatorial lunar dial, explained under Fig. 23. Of course a style had likewise to be fixed in the center. By using the figures of the outer rim on each side, the instrument could be used either as an upper or lower equatorial dial. The adjusting hand served the purpose of measuring solar altitudes directly. The foot of this timepiece is provided with a compass and contains the formerly accepted indications for the directions of the winds.

THE END.



---

The store of Nutt Bros., Banner's Ferry, Idaho, was recently entered by burglars, and stock valued at several hundred dollars was stolen.

## An Ingeniously Constructed Device for C[u]ting Metal in Various Forms.

A USEFUL tool which has recently b[een] placed upon the market is that ill[us]trated below. It enables an operator to [cut] skeleton fashion, all metals with a sm[all] saw, easily producing the most diffic[ult] curves in perfect form. By means of [an] ingenious construction a carrier may [be] used to cause the saw to rise and desc[end] in a perfect vertical line, which preve[nts] the breaking of the blades.

The pieces of the metal to be opera[ted]

NEW TOOL FOR CUTTING METAL.

on are held on a metal disk by a long le[ver] or several little clamps (dogs).

This machine is also supplied with a dr[ill] stock, which may be called into requisit[ion] by a handy lever, the former being conve[nient] ent for piercing any piece of metal [or] wood. Drills, the necessary saws and [all] other attachments are furnished with t[he] tool.

## A Handy Volume.

GUIDE TO THE ART OF ENGRAVING:- Third Edit[ion] Edited by PAUL HANFF; reviewed and enlarged [by] ROBERT NEUBERT, engraver and teacher of engr[a]ing in Dresden, Germany. 40 pages, octa[vo] Price, 75 cents. Published by Journal der G[o]schmiede Kunst, Leipzig.

THIS volume is the fourth of a number [of] books which are to make up a small l[i]brary for the use and instruction of worki[ng] jewelers. The book contains practical hi[nts] and gives instruction calculated to aid t[he] working jeweler in doing some of his ow[n] engraving when the opportunity offers [it]self.

It is not the author's purpose to cultiv[ate] the art of engraving to any extent, exce[pt] when an enthusiast should develop a ta[ste] for the art; but the instruction impart[ed] covers the whole field in whatever bran[ch] it may present itself. It is sincerely to [be] regretted that these volumes are not tra[n]lated into English, as they would undoul[t]edly be appreciated.

A recent dispatch from Vienna, Austr[ia] says that the municipality has decided th[at] all public clocks shall be regulated by [e]ectricity. The current will be sent by t[he] wireless system from a central station [to] 80 small receiving stations scattered abo[ut] the city and will then be transmitted [by] wire to the clocks. The municipality w[ill] regulate clocks in private houses in th[e] same manner, charging a small fee for th[e] service.

# An Argument for the ELGIN Dealer

The records of the Weather Bureau show a difference of 181 degrees between the extremes of heat and cold in the United States. A watch to be adapted to the use of the traveler must be able to maintain its accuracy under widely varying conditions of temperature. One reason why the

## ELGIN Watch

is pre-eminently the traveler's watch is found in the fact that all Elgin Watches are tested by oven heat and by refrigeration before leaving the factory. Their wonderful timekeeping qualities are undisturbed by extremes of temperature, damp or drought, jar or jolt, or by varying positions.

LOWEST UNITED STATES TEMPERATURE 63° BELOW

HIGHEST UNITED STATES TEMPERATURE 118° ABOVE

The above is one of the many good arguments for the Elgin Watch, all of which help the dealer to sell Elgins.

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

### Another Universal Clock.

BECAUSE of the prominent position occupied by this country among the powers of the world and of our intimate relations with the peoples of the Orient, we are constantly confronted by the complications of time computation. At the first glance the matter seems to be an overwhelming one, but it is in reality a problem quite simple to understand, when once one has become acquainted with its mysteries. This embarrassment has been due, in a large measure, to the lack of appliances and facilities to properly demonstrate the passage of time over the earth's surface in a simple manner without the necessity of profound calculations of distance, time, latitude and longitude.

A system was recently brought out which claims to be able to arrive at the desired ends in a very easy and almost mechanical manner. This system originated with Isaac F. Pheils, of Woodville, O. The system has been adapted to clocks, the most convenient form for educational or commercial purposes; watches for the traveling man who may have occasion to use such information; and to maps, the latter having the advantage of making the mysteries of time-flight quite clear, and answering many of the purposes of the timepieces at a very trifling expenditure of money.

In order to witness the flight of time over the earth's surface, the best possible position for the observer would be at a point directly over the North Pole. Imagining himself in such a position, it is an easy thing to think of the land lay-out at one's feet, with America on one side and Europe and Asia on the other. Carrying the imagination a little farther it is an easy matter to locate in the mind's eye the approximate position of countries, islands and even cities, which lie further south and below the horizon. One side of the sphere will be wrapped in the darkness of midnight and on the other side will be seen the brightness of mid-day, blending into each other at two points. The inventor of the system referred to has therefore made use of a North Pole projection of the world for his purposes.

To show a map of the world on a flat surface, some countries will be more or less distorted very much, but every city or other geographical feature is to be found in its correct position so far as latitude and longitude are concerned. In the center of the map is a revolving dial, co taining the 24 hours of the day. Twel of them are shaded dark to represe night, and the other 12, light, represe ing daylight and corresponding to t movement of the sun. It is only nec sary to know the time at the point observation and to set the dial to corr pond and it will be possible then to a certain the time in any part of the wo by following the latitudinal line from a city or country to the center dial

In the construction of the timepiec the central dial is replaced by a cloc face of the ordinary type, of somewh reduced dimensions. Outside of this a slightly larger revolving dial, with t 24 hours of the day marked thereon a appropriately shaded to represent day a night. The movement of this latter d corresponds at all times to that of t sun, and it will be readily seen that th being once set, will enable one to tell at glance the time at any point of the earth surface, without manipulation or calcul tion of any sort. It is simply necessa to locate on the map the point of whi information is desired and to follow t nearest line to the revolving dial. T time here indicated will comprise the i

PERFECTION · OF · AMERICAN · WATCHES

IN SOME KINDS OF GOODS defects are easily concealed. Not so with the watch. Its qualities as a time keeper soon manifest themselves. The Sun itself is its standard.

The perfection looked for in Watches is like that which characterizes the laws of Nature, and in no human product is that perfection so nearly approximated. And no other nation excels the United States in Watchmaking.

formation wanted. If the meridian time is sought, the investigator will follow the nearest meridian line. If the sun time is wanted, a straight line is followed from the city to the central dial.

In the pocket timepiece, the principle of the map are adhered to, but for the purpose of economizing space, the chief cities, countries and islands of the world are indicated by letter in a circle outside of the regular dial. The smaller and revolving dial is in the center as in the clock and map. Lines are drawn across the face of the watch from the center corresponding to the meridian lines.

On the world dial, as it is called, which is the outer circle on the face of the timepiece, is indicated by dot and initial letter as shown in the illustration, the location of 28 of the principal cities of the world thus in Europe, A indicates Athens; B

MAP CLOCK INDICATING UNIVERSAL TIME.

Berlin; C, Constantinople; Lis., Lisbon St., St. Petersburg. In Asia: B, Bombay; S, Singapore; M, Manila. In Australia: H, Hobart; S, Sydney. In United States: N, New York; W, Washington St., St. Louis; San, San Francisco.

In the illustration on page 96 it will be seen that the new day is 13 hours old and is at that time dawning somewhere in the Atlantic Ocean west of the British Islands. By consulting the map we will find that this line of dawn is directly over the Canary Islands and just touches the west coast of Africa. The old day is therefore 11 hours old. It shows us therefore that the people of Australia, Philippines, Asia and Europe are experiencing Sunday while it is yet Saturday in America. With an acquaintance of the abbreviations on the dial and only a limited knowledge of the corresponding positions of other cities not indicated on the dial, one can

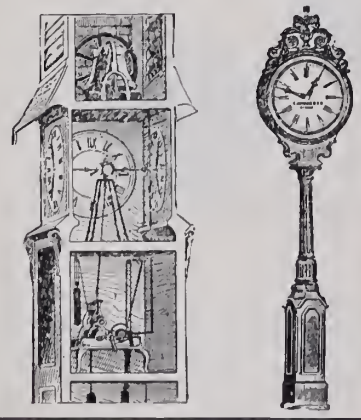
readily arrive at the time in any part of the world.

In further explanation of the accompanying illustration, it may be stated that the hand No. 1 indicates the meridian of Greenwich, which is the prime or starting meridian from which longitude is reckoned. It has also been made the basis of the several standard meridians.

Hand No. 2 points to the 75th meridia west longitude, which is the standard fo eastern standard time in the Unite



States (abbreviated "East" on the dial The figure on the center dial oposite th line always indicates Eastern standa time. Proceeding westward the 90t 105th, and 120th degrees represent the d visions of Central, Mountain and Paci times respectively.

Hand No. 3 points to the 180th degre which is important from the fact that is the International Date line, the poi where the new day is born and the o one dies, or where the calendar d changes. The new day extends from th line westward to 12 midnight on the ce ter dial, and the old day, east from th line to 12 midnight, on the center di When it is Tuesday west of this line 12 midnight, it is Monday east of th line to 12 midnight. The new day is a ways growing longer and the old d shorter.

Continuing on around the clock, han No. 4 points to the 90th meridian, ea longitude, the standard for Calcutta sta dard time, governing a portion of Indi China, Siberia, etc. It is difficult to rea and understand foreign news of the pre ent time without some such aid as thi Such instruments are also of great valu in colleges, telegraph and railroad office newspaper offices and establishments e gaged in international trade. They pa the way for the study of astronomy b showing the time that is just passing a meridian, so that it is easy to determi the meridian the mean sun is just passing

# RECORDS PROVE A CLAIM.

We have recently contracted to furnish a Tower Clock in the new City Hall at Savannah, Ga., and have guaranteed that it will not vary more than 15 seconds in any 30 consecutive days in five years.

Tower and Street Clocks of our manufacture now in use show, after years of constant wear, that they do not vary over 10 seconds per month. Doesn't this marvelous record prove merit?

**SUBJECT:**

## How and Under What Conditions Should Auction Sales be Conducted?

THE auction sale of a jewelry stock should be "the court of last resort," as it were—the final attempt to encourage buying. Desperate cases often require desperate remedies, and the writer classifies an auction sale among the "desperate remedies." The pathway of jewelry auction sales is lined with business corpses and business failures. Few indeed are they who are able, after a sale of this character, to rally to their support a sufficient number of customers to make it worth while to continue in business. There is a good reason for this also. Naturally when a jeweler decides to hold an auction the first ones to flock to his store to get the benefit of the bargains to be offered are his satisfied customers. Now, then, if they find that an article for which they paid $15 is sold by the auctioneer for $5, they are going to feel happy, but if they buy something that looks like a good article for a price apparently one-third of its value and they afterwards find that they have been deceived, what then?

If a man must raise a large amount of money on short notice, doubtless an auction sale offers the most convenient method of doing it. This ofttimes is absolutely necessary. The question then resolves itself into the problem of finding the auctioneer who can best help us to reduce our stock enough to meet our present financial requirements, and who, in addition to this, can leave us with an untarnished reputation. That there are such auctioneers we have all read in their own advertisements in the trade papers. Most auctioneers guarantee a profit over and above their commission as a result of a sale. This profit cannot be made by selling fine goods from the jewelers' stock at prices 25 per cent. below cost, but it can be done by occasionally sacrificing an article of unquestioned reliability, whose maker's name and trade-mark are so well known that every one present realizes that things are going cheap. The seller can make up on other sales. It is not satisfactory to the jeweler to see his goods sacrificed, because he does not want to lose money.

Right here is where he meets his Waterloo and is defeated. The auctioneer suggests the possibilities of enormous profits, to be equally divided, to be made by selling some of his (the auctioneer's) goods. Most jewelers consent, and so we will find that after a sale of this character the city in which it is held will be flooded with plated watch cases, fitted with cheap movements, with an engine on the dial, which some trusting customer has bought on the theory that it is a high grade railroad watch, and for which he has paid a comparatively high price.

At the close of a sale a profit will be shown, but it will be at the expense of the jeweler and his customer. The principal sales have been cheap, trashy goods at unChristianlike prices. At the end of the sale the jeweler finds that he is indebted to the auctioneer for goods furnished and commissions for practically the entire receipts, his financial standing with his creditors remaining comparatively unaltered. Should creditors press their claims, he tries another sale with similar results, and then he is "down and out." The writer knows personally of many who have had this experience and, as history repeats itself, others will doubtless follow.

An auction sale conducted as it is supposed to be, would be an ideal method of encouraging buying, reducing stock and raising money. My idea would be to engage an auctioneer at a fixed price per day to make the sale. Then, as he could figure on no percentage of gross sales, he would not be so anxious to sell goods at any price, no matter at what sacrifice, nor would he be so anxious to run in some of his own goods for the jeweler's (?) profit. It would be far better to sell less and have what is sold come from your own stock, because then you would be reducing your stock as you desire, and the goods, which would be going out to represent your store and yourself, would be such as you could consistently guarantee. Moreover, the jeweler is expected to make good the auctioneer's statements and guarantees, be they what they may.

The jeweler's pathway is not strewn with roses, even under the most favorable circumstances. When conducting business in the fairest possible manner we will have dissatisfied customers, but we should not, if we can possibly avoid it, go into the business of making them so by the wholesale. The writer does not wish to condemn the auctioneers as a class, because they are merely conforming their business to suit the buyer. People visit auction sales because they expect to buy something valuable for very little. Such people will not pay anything like the regular price for regular goods, but if bogus goods are shown them, which resemble the genuine article, and which they can buy for one-fourth the price of the regular article, they jump. As the best class of people will not visit a sale of this character, the auctioneer is obliged to cater to that part of the public that wishes "something for nothing." The principle then is "Do others or they'll do you." The jeweler cannot afford to be a party to this kind of business and should do his best to avoid it.

But if the worst comes and you must hold an auction, rule out any goods except your own. Better lose money on your own goods than to make money on the goods brought by the auctioneer. You need continue the sale only until you have secured the necessary amount of money. Then quit without hesitancy. You have accomplished your purpose, and should rest content. But how many will do that? For a certain length of time after holding a sale a store's regular customers will stay away, because no one wishes his friends to think that the gift which they receive was bought at an auction. If you must have a sale, see that it is conducted according to your wish. Be your own boss. Engage the auctioneer and see that he follows your instructions. Let nothing be sold under false statement. Guarantee nothing that you do not expect to fulfil. In fact, the same methods which tend to make you successful in regular business will also tend to bring about a successful sale. The writer in using the word success wishes it understood that it is used in its broad sense and not merely to signify an exceptional increase in one's finances. A satisfactory sale, to me, means one which is satisfactory to the buyer as well as to the seller, because the buyer, needing the article, has secured what he desired by parting with the money which you are glad to receive.

As the jewelry business more than any other is a matter of confidence, the jeweler cannot afford to risk his good name, which when once lost, cannot be regained. A.T.U.

## Storekeeping Department.

### Economy in Fresh Air.

It was winter, and the superintendent of a large-sized manufacturing works in Pennsylvania was always whining about the inefficiency of his men, writes Geo. P. Pierce in the *American Machinist*. "They are the dopiest, sleepiest, sickliest crowd I ever had ever seen," and it certainly appeared as if he had just claim to use these words, because the men actually were all listless and sleepy. They would start in the morning with a good will, but after a short time would slow down and work as if it hurt them, and the only excuse they could give was: "That tired feeling."

It certainly was not the cold, for although it was bitter cold outside, and any man who went out or came in had to close the door pretty quick, yet the shop was kept almost too warm by means of a long line of steam pipe which ran four times around the room about 10 inches from the ceiling and was heated with live steam. The men used to say that the heat coming down from the coils gave them a headache, but after the superintendent said a few words about "tenderfeet" no more complaints were heard. Men were fired and new ones were tried, but it all came to the same thing; the new man might start with promising brilliancy, but very soon he would be dragging along with the rest.

One day the doctor told the superintendent that he had consumption and sent him to the mountains for a cure, and then the boss got a young man to act as superintendent. The first day the new superintendent came in the shop he looked at the heating arrangements in an astonished sort of way, and asked old Bill how long that thing had been running. "Bout eight years," Bill grunted. Nothing more was said, but in three days a large ventilating fan arrived, and John, the storekeeper, rushed in with the news that it was to be used to force fresh air into the shop. The boys were up to a man. "If that 'fresh' kid was going to blow a blast of ice-cold air across their backs just to raise some fad idea of his, well, there would be trouble, that's all." and much talk followed about "reaching the limit" and worse things.

But there was no trouble, and there was no kick coming. A large radiator was made out of one-inch pipe, which was inclosed in a sheet-iron casing and placed on the roof. One end of this casing was left open and the other was tapered down to a circle where the fan was placed, and then it curved downward to a 14-inch diameter cross-pipe in the shop, which had a lot of distributing branches along it. The exhaust steam from the engine was led into a by-pass valve, so that it could be turned into a new radiator or to the exhaust pipe, or regulated as desired between the two. The storekeeper had charge of this regulation and kept the temperature of the shop about 65 degrees all hr. (It is worked by an automatic arrangement now.)

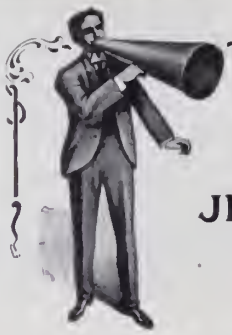
Very soon many improvements were noticed. The men were losing "that tired feeling" and had more energy, some whistling or singing, and they all seemed to work with a good will. The firemen noticed that less coal was needed to keep up the steam pressure, and the storekeeper was pleasantly surprised to see that the cost of production had decreased to a considerable extent.

Some time afterward old Bill was expressing his opinion, and among other things he said: "Well, if any man had told me that that fresh-air fad of the super's would have boosted the shop up like this I would have told that man he was a darn fool, and yet when you figger it out it seems reasonable enough. I wouldn't go back to that old hair-scorcher again for $40 a week," and the other boys nodded their approval.

### When Truth in Business Wins.

IT might be as well said that an apple to be eaten must contain rotten spots as to say that business success is possible only under conditions based on misrepresentation.

Any business that is worthy of life needs no liar back of it to keep it from bankruptcy. Every worthy enterprise exists because it is necessary to society. The more fully and perfectly it can satisfy some human need, the greater it becomes. Primarily, this is the foundation of business, and money is a means to this end. Those who operate such a business and are employed in it are entitled to a reward commensurate with the service rendered.



Every legitimate business is dependent for its continuation and success upon the confidence of those whom it would serve. Permanent confidence must be based upon truthful representation. Whatever success a man or business concern maintains is not because of its lies and trickery, but in spite of them. You and I buy from those who treat us most fairly—those upon whom we can depend.

It is my opinion that any business that will not thrive upon truth is better dead.

It is undisputable, however, that millions of dollars are made by fraud. Great fortunes exist through the practice of it. To the man who will have money and plenty of it; who cares nothing for society nor the individuals who compose it; who regards money as all-powerful; who recognizes no authority not measured by dollars—to this man honesty in business is a joke "good enough for plodders," while falsehood is his most potent instrument.

The whole tangle of whether or not it pays to be honest is easily decided. If you are conducting a legitimate business, and if you depend upon the same people to buy from you month after month, you will succeed only by telling the truth—but tell it attractively. If your ambition demands "big money"—more than your effort or the result of your services deserves; if you deal with one person but once; if you frequently change your field of action—undoubtedly you will favor lying as a first-rate business asset.

Finally, I say, if you are engaged in an enterprise meant to be useful to others, stick to the truth. If your *first* object is the accumulation of money—well, it's *your* funeral.—*Profitable Advertising.*

## WHAT SOME JEWELERS SAY

*Catch phrases, descriptions and arguments which retail jewelers and opticians have used in their newspaper advertisements.*

Six Beautiful Solitaires.—Fine diamonds, clear, white gems, magnificently brilliant and especially appropriate as tokens of love or personal gifts. The mountings, as shown by illustrations, are of hand-wrought gold, and are the very newest and most popular styles. These rings may be had at the prices quoted below (illustrations and prices printed), and other diamond rings at from $10 to $5,000. Come in and let us show them to you. Whether you intend purchasing now or not, we will be pleased to have you call and see our collection of jewelry, watches, silverware, art goods, etc. Largest assortment—finest goods—lowest prices.—Mermod, Jaccard & King, St. Louis, Mo.

Hundreds of Eyes are being overworked in consequence of their application upon works or books. Rest and relief for tired and strained eyes may be obtained and serious trouble—which is sure to be the outcome if the eyes are neglected—may be averted by wearing a pair of our properly fitted glasses. Examination free.—P. J. Smith Co., Cumberland, Md.

Phenomenal Watch Business.—My mid-Summer watch sale now drawing to a close has been an unqualified success. The number of watches disposed of during this sale, marks a new record at this store. My patrons are pleased with their purchases and I am pleased to move the stock, although the profits have been next to nothing. Come to-day, you will never see better values in timekeepers (descriptions and prices printed).—F. L. Nuse, Titusville, Pa.

F. O. E. badges, buttons, charms, fobs and rings. Beautiful address cards, something new. Ladies' Eagle belts, hat pins, stick pins, lockets, etc. A splendid line of Eagle jewelry at the lowest prices.—G. A. Schlechter, Reading, Pa.

A New Broom Sweeps Clean.—So does our new jewelry store sweep everything before it in the jewelry line. The most attractive, the best equipped, the finest illuminated. Cleanest stock, lowest prices.—J. W. Ware, Dunkirk, N. Y.

Watch Buying Opportunities.—To reduce our enormous stock of watches, we are offering some exceptionally good values in fine and popular priced goods. It is our desire to turn into ready cash our entire stock if possible, so as to make a perfectly new start in our new store about October 15. We have every desirable high grade case and movement in a profusion of designs and every size.—Albert Pfeifer & Bro., Little Rock, Ark.

# The Optometrist's Catechism.

*(Continued from issue of July 26, 1905.)*

REFRACTION.

Q.—(586) Why is light bent from the perpendicular when passing obliquely from a denser into a rarer medium, as from glass into air?

A.—In Fig. 40, let W, F, N, T, represent a plane slab of glass and A, A′, A″, a wave passing obliquely downward; the right hand end of the wave gets out of the glass first,

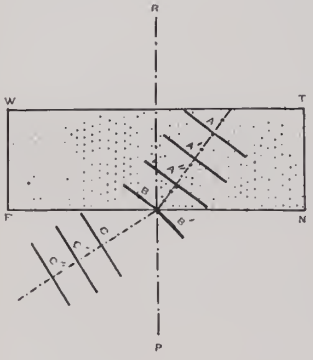

Fig. 40.

and as light travels faster in air than in glass it will naturally get ahead of the part still traveling through the glass, so that when the wave gets half way out the half in the glass will be traveling in a manner shown by B, while the half in the air will have assumed a direction shown by B′, and when the wave gets entirely out of the glass the right hand end will, in this case, have travelled further than the other end, causing the wave, therefore, to assume a new direction, shown by C, C′, C″, tending away from the perpendicular P, R.

Q.—(587) What is a prism?

A.—(a) A prism is a refracting medium, usually of glass, having two surfaces lying in intersecting planes. (b) An optical prism is a piece of glass, or other transparent material, whose two plane surfaces that receive and transmit light, form an angle with each other. (c) An optical prism is a transparent wedge-shaped body. (d) A prism, as applied to optics, is a transparent body of crown glass having three rectangular plane sides, employed for the purpose of bending rays of light.

Q.—(588) What is the apex of a prism?

A.—The thinnest edge of a prism is known as its apex. Strictly speaking, it is the angular end or vertex. The prisms that we use in optometrical practice, however, are not finished off to a sharp edge, as this would make them too weak to mount in a spectacle or eyeglass frame and they have therefore no real apex. In Fig. 41, P represents the apex of the prism P, R, S, and this is a real apex, but had this edge been made blunt by sawing the prism off along the dotted line below P this end would still be the apex.

Q.—(589) What is the base of a prism?

A.—The base is always opposite to and thicker than the apex. In the prisms ordinarily used in optometrical practice the base is the thickest, while the apex is the thinnest part. Usually one considers the bottom of anything its base, but this is not the case in optometrical prisms, because they are employed with bases "up," "down," "in" and "out," that is, with the thick part respectively up toward the eyebrow, down toward the cheek, in toward the nose, or out toward the temple.

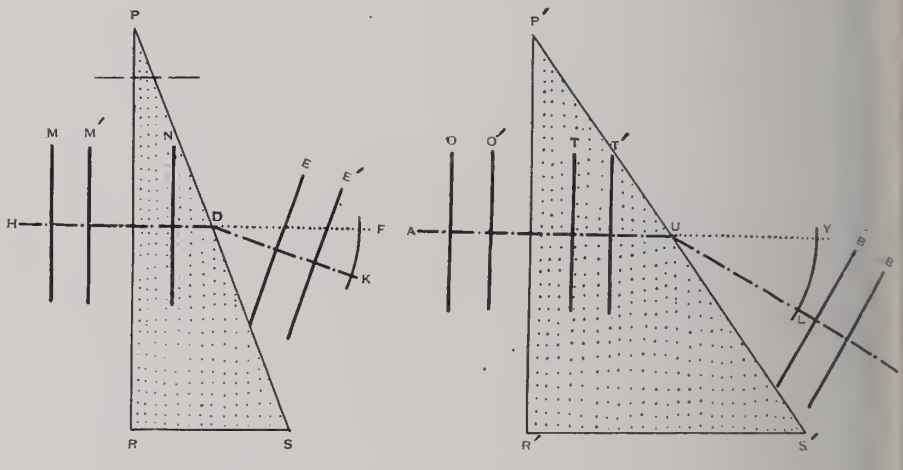

Fig. 41.

Q.—(590) Is a prism a lens?

A.—No. Before a refracting body ca be properly termed a lens it must have least one curved surface, and as the ver nature of a prism excludes curved surfac it can never assume the form of a lens an still be a prism.

Q.—(591) What effect will a prism hav upon light?

A.—Light passing through a prism is al ways deviated from its original course, b always in accordance with certain fixe laws. Thus in Fig. 41, P, R, S, represen a prism and M, M′, a wave of light passin in the direction H, D, toward the prism. A the wave strikes the prism parallel to th face, P, R, it suffers no deviation and co tinues thus on the same course unti passes N, when it swings around to F, b because the upper part of the wave gets ou of the glass first and travels faster, whi the lower portion is still struggling throug the glass, and instead of the wave continu ing in the direction H, D, toward F, it de viates toward K.

P′, R′, S′, represents a prism havi double the bending power of P, R, S. Th wave, O, O′, enters the prism without bein deviated, but upon passing beyond T′, th upper end swings around more rapidly tha the lower, with the result that the wav assumes a new direction, shown by B, B but it will be noted in this case that th deviation is greater than in the former cas due, of course, to the greater power of th prism, whence we may deduct the law th the greater the obliquity of the two sur faces of the prism, the greater will be th deviation of any given wave of light passing through. Thus P, R, S, deviate a wave to K, while P′, R′, S′, deviates

## Optical Department.

nilar wave to W, and a glance at the gles Y, U, L, and F, D, K, shows that e wave, O, is bent by the stronger prism nsiderably more than is the wave M by e weaker.

In the above instances the wave suffered e deviation only; this was because it uck the prism in a manner parallel to e of its plane surfaces. Had the wave uck the face P, R, obliquely, but at the me time in such a manner as to make it rallel to the face, P, S, it would still ve suffered one deviation only. If, how-er, the wave strike neither face parallel will suffer deviation at two points, one

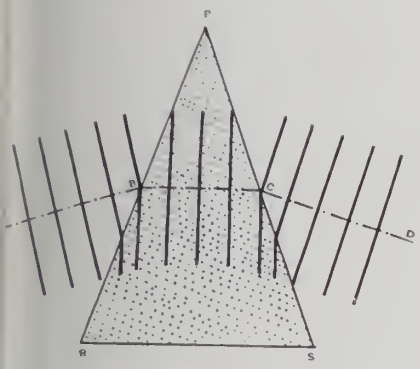

Fig. 42.

pon entering the prism and one upon leav-ig it, as shown in Fig. 42, where P, R, S, presents a prism and A, B, shows the di-ection of the incident wave, which is devi-ted at the first surface, P, R, toward C, nd again at the second surface, P, S, to-ard D. This is because the lower part of ie incident wave strikes the prism first and held up while the upper part swings head, then the upper part gets out of the rism first and swings still further ahead, hile the lower part is coming more slow-through the glass.

If you were running along and tripped gainst a heavy stone, your head would itch forward, while your feet stopped and our body would take a new direction; this erves to demonstrate the action of a prism pon a wave of light, for the prism acts ke the stone and trips up that part of the ave that first strikes it, causing the other art to pitch forward; now if as you fell ome one held your feet your head would wing on until he let go your feet, nd it is thus with the wave, inasmuch as ie glass holds its foot, while its head wings around and its head continues to wing around until the glass lets go its oot, which it does as soon as the wave eaches its other surface and passes out nto the air.

*(To be continued.)*

H. R. Goodell, optician, Memphis, Tenn., as the sympathy of his many friends owing o the recent death of his father, Chas. H. oodell. The deceased was 76 years old.

Wood, horn, iron, silver and gold were ie materials used in the mounting of spec-icles in the 13th century. Elaborate en-raving sometimes adorned those which ere mounted in silver and gold. Spec-icle cases, too, were richly ornamented.

### Is Our Method of Printing Wrong?

THE statement has been made that "books and magazines, as well as newspapers, are printed nowadays after a fashion that is both foolish and unscientific." This statement is due to the investigations made in the psychological department of Columbia University which, it is claimed, have proven that printed words instead of being arranged in horizontal lines, as is now customary, ought to be arranged in some way similar to the following:

| | | | | | |
|---|---|---|---|---|---|
| The | the | parting | The | winds | the |
| curfew | knell | day. | lowing | slowly | lea. |
| tolls | of | | herd | o'er | |

Or the following method may be adopted, it not being absolutely necessary to use the above method to meet the requirements of this recently discovered optical principle:

| | | | | |

## Optical Department.

ture embraced in the pastor's sermon. Johnston was not blind, mentally nor physically. Had he been the latter the gesticulations of the preacher would have been missing and so lacking at least so much interest to the boy's mother. I have practiced optometry now for 15 years, and I am about as modest in making this announcement as our brother optometrist in his exordium, and I know this thought can be more extended and elaborated in the hands of others, who may have read the paper in question, as I am sure all interested in ophthalmology read every little article with profit and pleasure which appears in your journal in this relation.

I hope to hear from others among your readers if they know any instance of physical vision totally obscured where the mental vision was improved thereby, and if mental obscurity does not exist in a violent form, where physical vision is lacking or that the "retaining power" spoken of is really a stimulus to greater thinking and memorizing as clearly set forth in this paper, and why, if this stimulus is all that is lacking, the optometrists with all their aids and glasses fitted on the most perfect principles of ophthalmology, cannot supply this stimulus to the brain of those who have their eyesight, so that they too might benefit by one rehearsal of any lesson or subject, and so memorize it indelibly like the blind classmate at Minnesota University. J. C.

### General and Visual Questions and Answers of the S. M. C. Examination, April 1, 1905.

(Reported by LIONEL LAURENCE, in the *Optician and Photographic Trades Review.*)

(*Continued from issue of June* 14.)

A THIRD class of anisometropia is that in which the one eye is emmetropic or hypermetropic, and the other myopic, then the former is used for distance and the latter for close work, and simultaneous binocular single vision does not obtain, but there is alternating binocular vision.

Q.—(8) A + 6 D. lens is decentered 4.5 mm., what would be the prismatic effect in prism diopters and degrees of prism angle?

A.—If the + 6 D. lens is decentered 4.5 mms., the prismatic effect is:

$$6 \times .45 = 2.7\triangleleft,$$

or $\frac{6 \times .45}{.9} = 3°$ approx. of prism angle.

Q.—(9) On testing a subject you find that with a + 4.5 D.S. the P.R. is 60 cm., and with a + 2.5 D.S. the P.P. is 30 cm.; what is the refractive condition? amplitude of accommodation and age of the subject?

A.—If the P.R. is at 60 cms. with + 4.5 D. lens it is, without the lens, 100/60 = 1.66 — 4.5 = — 2.83 D. If the P.P. is at 30 cms. with a + 2.5 D. lens it is at 100/30 = 3.33 — 2.5 = .83 D.

Then the refractive condition is that of H., of, say, 2.75 D. The amplitude of accommodation = P.P. — P.R.; in this case, .83 — ( — 2.83) =, say, 3.50 D.

And the age of the subject, if the amplitude is 3.50 D., is, approximately, 45.

Q.—(10) Explain the cause of the natural colors of objects, and state how these vary with the intensity of illumination, and why?

A.—The natural color of objects depends on their unequal absorptive properties for different kinds of light, but the color itself is the property of the light which the object receives and not of the object itself. An object is, say, red, because it absorbs all the component parts of white light, with the exception of the red rays which it reflects, so that to the observing eye it appears to be red. The color of objects varies with the intensity of illumination because the less light it receives the less it can reflect. If there be no light all bodies are black, and in a dull light they appear gray.

Q.—(11) An object is placed 9 inches in front of a lens, an image is formed 18 inches behind the lens; what is the focal length of the lens?

A.—The reciprocal of the focal length of a lens is equal to the sum of the reciprocals of any pair of its conjugate foci. If F be the focal length of the lens *a* the distance of the object, and *b* that of the image, then $1/F = 1/a + 1/b$.

In this case $1/F = 1/9 + 1/18 = 1/6$, the focal length is 6 inches; or if the distance of the object $D_1$ and that of the image $D_2$ be expressed in diopters, then we have the power of the lens $D = D_1 + D_2$; in this case 4.5 + 2.25 = + 6.75 and 40/6.75 = 6 inches approximately.

Q.—(12) A boy, aged 10, has vision $\frac{6}{60}$; with a + 3 D.S., he gets $\frac{6}{6}$, with this lens his P.P. is 33 cm.; what is the nature of his defect, and give your reasons?

A.—If the vision of the boy of 10 years is improved by the + 3 D. spherical, the refractive condition is that of absolute hypermetropia, and if the + 3 D. be the strongest with which vision equals 6/6, there are 3 D. hypermetropia manifest. If, now, the P.P. is at 33 cms. with this lens it shows an apparent amplitude of accommodation of 3 diopters, and since at 10 years of age there should be at least 14 D. of accommodation, we can conclude that there is, approximately, 11 D. latent hypermetropia.

For if the P.P., which represents the total refractive power of the eye, be less than that which may be regarded as a minimum for an emmetropic eye, and the accommodative amplitude is not likely to be less than a certain quantity, then the deficiency in the total refraction, as exhibited by the P.P., must be taken as in the static refraction of the eye.

Q.—(13) What do you understand by:
(*a*) The yellow spot.
(*b*) The blind spot.

How could you demonstrate the presence of the latter?

A.—The yellow spot, or macula lutea, is that part of the retina which is most sensitive to light, and on which the image, of an object viewed, must be formed in order to be distinctly seen. In the center of the macular region there is a small depression called the fovea centralis. The blind spot or optic disc is the entrance of the optic nerve into the eye, and since the varic layers of the retina are there absent it p sesses no power to appreciate the influe of light, hence its name.

The presence of the blind spot can be termined by marking on a card two sm crosses, the horizontal distance betwe them being some two or three inches: now, the cross nearer to the nose be look at, by the one eye, the other cross may also seen. At some certain distance fr the eye, found by moving the card to a fro, the latter, however, disappears; at t distance the outlying cross cannot be se because its image would be formed on blind spot, and it reappears if the c be held a little further away or a li nearer to the eye.

Q.—(14) What rule must be observed correcting myopia? And why is it imp ant not to give too high a concave lens?

A.—Myopia is a defect in which, gen ally, the eye is so elongated and the tina is situated beyond the focal dist of the refracting system; it is remedied using a concave lens which renders para rays so divergent that they are brought a focus on the retina. The measure any degree of myopia is the weakest c cave spherical with which best dist vision is obtained; any stronger lens w which vision is clear would only cause commodation to be exerted. Then the c recting lens for distance is that which presses the degree of the defect, and same lens would serve also for close w if the accommodative power were sufficie ly ample.

Since, however, in myopia of medium high degree it is often found that the commodative power is deficient, it is g erally necessary to give, for close wo lenses of rather less power than those wh produce best distant vision; and for c stant wear the "near" lenses are genera the more comfortable to wear, the eyes be left slightly myopic, say, 1 or 2 D. E case has, however, to be dealt with on own merits; the power of the lenses b suited for close work, and all purposes, depends not only on the accommodat power, but also on the condition of t internal and external recti, that is to s on whether the eyes have an excess or deficiency of convergence.

It is important not to give too high concave power, because if it be greater th the degree of myopia, it causes accommo tive power to be brought into action f distance, as well as for near vision, wh frequently it is already in a weakened c dition, and such accommodative action m produce an increase in the defect, becau increased accommodative exertion is acco panied by increased action on the part the internal and external recti, and t strain of these muscles on the globe has tendency to further elongate it. Also h power in concave lenses is frequently u comfortable, not only on account of t muscular actions brought about, but al because they cause objects to appear sma

*[Answers are also solicited from our readers to the questions published on this page.]*

QUESTION No. 1290.—**Dry Batteries.**—*Kindly advise me if I can use dry batteries, and how many; also tell me what is the best solution for removing green from new jewelry.* S. K.

ANSWER:—Dry batteries are very weak and cannot be used advantageously for gilding or making galvanic deposits; they are charged with salammoniac and are principally used for door bells, etc. Green can be removed from jewelry, if not very heavy, by a solution of cyanide, or by mixing two parts sulphuric acid, one part nitric acid and a pinch of saltpeter, dissolved in water. This solution may be reduced by water, to be of just sufficient strength to be effective. Then rinse the articles immediately in rain water and dry in sawdust.

QUESTION No. 1291.—**Potassium Cyanide.**—*Will you kindly let me know what kind of cyanide I should use for cleaning purposes? I have potassium cyanide No. 1, which is white when in lumps, but when I put it in the water it becomes yellow. What is the cause of that? Also tell me how much water I should use in a pound of cyanide. Should the water be distilled?* G. P. T.

ANSWER:—The cyanide used for cleaning should be the potassium cyanide in hard lumps, which should be dissolved in distilled water or pure rain water. The quantity of each, the cyanide and the water, has to be regulated according to circumstances. A trial will define the proper proportion. One-half an ounce of cyanide to one gallon of water would be a good beginning. When the solution is too strong it will act like a caustic. New silver plated ware, when cleansed with a cyanide solution which is too strong will lose its lustre and assume a dull appearance. Old ware very much tarnished can stand a stronger solution. An admixture in either case of some carbonate of lime in an impalpable powder would assist the cleaning process. The cause of the solution of cyanide and water turning yellow is not easy to explain and is rather an unusual phenomenon, which would hardly occur when distilled water and a clean china vessel are used. Spring water containing sulphur or the use of a tin vessel may produce the yellow color.

QUESTION No. 1292.—**Pallet Jewels in Cheap Movements.**—*In the "Standard" watch movement are the pallet jewels interchangeable; that is, would the angle of driving plane be the same in each?* J. W. C.

ANSWER:—The pallets in most all the cheap grades of American watches are said to be interchangeable, but they are seldom strictly so, but may be adapted. The same can be said of the driving planes.

QUESTION No. 1293.—**Silver Lacquer.**—*Kindly let me know in your paper what kind of lacquer should be used for silver so that it will not tarnish.* E. C.

ANSWER:—The proper lacquer for silver is collodion varnish, either as pure collodion or composed of one part of pure castor oil and 32 parts of collodion. Pure castor oil will entirely dissolve in strong grain alcohol, which will serve as a test, in determining whether the castor oil is pure or not. It is said that such varnish, with the addition of castor oil, will keep for years when not exposed to rough usage. Should any white spot appear, the touching with sulphuric ether will cause them to disappear instantly.

QUESTION No. 1294.—**Alcohol Lamp for Repairing Jewelry.**—*I occasionally have use for a blowpipe in making and repairing jewelry, but have no gas at hand. Sometimes I need a small flame and at other times a large flame for annealing and forging. Can you help me out? I don't want a charcoal furnace, as my work would not keep it going.* L. C. B.

ANSWER:—When a blowpipe is to be used for such purpose as you mention, and you do not possess the convenience of a gas flame, an alcohol lamp or two of different sizes will furnish the only substitutes. A piece of prepared charcoal, which can be bought of different sizes and in pieces as large as seven inches long by four inches wide, and about one to one and a half inches in thickness, will be of great assistance in getting a high degree of heat. Smaller pieces of common charcoal may be used as heat reflectors when needed.

QUESTION No. 1295.—**To Bronze Brass or Copper Green.**—*What formula shall I use to bronze copper an antique green?* H. P. P.

ANSWER:—To bronze brass or copper green, dissolve two ounces of nitrate of iron and two ounces of hyposulphite of soda in one pint of water. Immerse the article in the bronze; one part of perchloride of iron and two parts of water will give a pale or dark olive green, according to the length of time immersed.

QUESTION No. 1296.—**Tempering Britannia Metal.**—*How can I temper Britannia metal?*

ANSWER:—Britannia metal can not be tempered very hard, and the tempered metal requires no more heat to melt than the untempered. The tempering is for the sheet britannia; it hardens the outer surfaces so that it will take away the dead, lead-like sound and cause it to appear more like copper or German silver. The tempering is done after the metal has been rolled and blanked out, or while in the flat. A few ways are known to produce the temper. One is to place the flat plates on a steam chest, and let it remain there until thoroughly heated through. Then plunge in water. Another method is to use an oven heated by means of gas and arranged that iron trays, on which the metal is placed, can be put in the oven and withdrawn after it has been subjected to a heat of about 250°. The metal must remain in the oven long enough to allow it to become heated thoroughly. When the metal leaves the oven it should be separated that it will cool as rapidly as possible. In tempering this metal, subject it to as much heat as it will stand without melting.

QUESTION No. 1297.—**London a Great Mart for All Precious Stones.**—*Which is the largest market for precious stones, London or Paris?* A. S.

ANSWER:—London is the greatest mart in the world for all precious stones. Here are brought from the mines of South Africa, from the ocean reefs of Ceylon, from the jungles of Burma, diamonds, pearls and rubies. The finest stones in the world are brought to and sold in London. Wealthy clients from all over the world come to London to buy jewelry. The stocks in the great jewelry shops in Regent and Bond Sts. are estimated at a value of nearly £5,000,000.

QUESTION No. 1298.—**To Fasten Wood to Metals.**—*Will you please give me a recipe for a paste, to fasten wood a pasteboard to metal?* A. L.

ANSWER:—Dissolve 50 grammes of lead acetate together with 5 grammes of alum in a little water. Make a separate solution of 75 grammes of gum arabic in two litres of water; stir in this 500 grammes of flour and heat slowly to boiling, stirring all the while. Let it cool somewhat, and mix with it the solution containing the lead acetate and alum, stirring all well together.

QUESTION No. 1299.—**To Fasten Paper to Smooth Iron.**—*How can I make a paste that will cause paper to adhere to smooth iron?* P. S.

ANSWER:—Over a water bath dissolve 200 grammes of gelatine in 150 grammes of water; while stirring add 50 grammes of acetic acid; 50 grammes of alcohol and 50 grammes of pulverized alum. The spot on which paper is to be pasted should be rubbed with a little fine emery paper.

## The Art of Tempering Copper.

AN exchange of Denver, Colo., recently published a report of an inventor having discovered the art of tempering copper. The account speaks in the most positive and convincing terms. While this report may be of the value of previous ones, may be accepted that the possibility of such an invention exists, which is demonstrated that two very soft metals, gold and platinum, in certain proportions, will produce an alloy of extreme hardness.

Olive oil is one of the most perfectly non-drying of all the oils, resisting both oxidation and evaporation. But it is next to impossible to entirely remove its acid qualities, small traces of which remain after the most thorough treatment. It is also liable to decomposition.

## American Art in Bronze Statues.

SOLDIERS and sailors of St. Lawrence County, N. Y., who died in the Civil ar are honored by a fitting and dignified nument in bronze and marble, which as unveiled Aug. 23. The designs, se-ted from a large number offered in com-tition, were the work of Mrs. Sallie mes Farnham, Great Neck, L. I. "The rit of Liberty" is the title of the de-gns, which were submitted as long ago April 20, 1904.

There is a stone column of Barre gran-on a square, simple base. The figures, st in old bronze of the best workmanship, e wrought out in the delicate sentiment

BRONZE FIGURE OF SOLDIER.

i the artist. The Roman column is sur-nounted by the figure of Victory, which neasures seven feet and weighs 2,000 ounds. At the base of the column are our war eagles, three feet six inches in eight. On the squares of the die are ronze shields, three representing the coat f arms of America, the coat of arms of ne State of New York, the coat of arms of t. Lawrence County. On the fourth is ne nscription: "To the Soldiers and Sail-rs of St. Lawrence County." Bronze tars representing uncertainty occupy each f the four corners of these panels and a ull-size bronze figure of a soldier on uard stands at the base.

The figure of Victory holds in her left hand a wreath and in her right a standard. This is a most gracefully posed figure and the drapery is fitting to the modest form. The pose of the soldier displays the work of a broad-minded artist, as it is a delicate

SOLDIERS' MONUMENT RECENTLY UNVEILED.

matter to produce a design of a soldier strictly in accord with the times.

The exercises of unveiling were conducted by the American Scenic and Historic Preservation Society, of which Walter S. Logan, New York, is president. The committee in charge included Dr. George F. Kunz, of Tiffany & Co., New York.

## THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

**AN INTERESTING BOOKLET ON CHINA.**

HANDSOME booklets containing a brief historical sketch of the potter's art, with an account of the growth of the French porcelain industry, are being sent out by Paroutaud & Watson, 37 Murray St., New York, who represent in this market Societe la Ceramique, J. Pouyat, Limoges. The book is prettily il-

BRONZE FIGURE OF VICTORY—SIDE VIEW.

lustrated with pictures of modern French china shapes and patterns. The writer weaves into his article, in an interesting monner, a tribute to Pouyat china and a description of the upbuilding of the business of this house. Pierre Pouyat, the founder, stood out prominently among the experimenters, workmen and aristocrats identified with the early history of porcelain manufacture in France. In 1743 he was a Consul, and 17 years later he was a manufacturer of faience at St. Yriex. Specimens of the early work of this factory, identified by the imprint "P," are occasionally seen. After the discovery of kaolin in St. Yriex, Mr. Pouyat was

HAWKES
CUT GLASS

Manufactured by

T. G. Hawkes & Co.,

CORNING, N. Y.

among the first to realize its commercial possibilities, and he laid the foundation of the present house by buying tracts containing extensive beds of the much prized clay. Paris being the best market for china, he bought one of the four or five factories, which were then being operated in that city. The productions of this factory, located at La Courtille, included a life-size porcelain bust for which Madame Du Barry, according to her papers, paid about $15,000. The success of M. Pouyat, according to the writer, was largely due to the possession of the desirable grades of kaolin in unlimited supply, the mastery of methods of compounding ingredients, and the fact that he was not content merely to imitate Chinese porcelain, but introduced French characteristics, giving a distinctive national tone to the products.

*

**NOVEL CHIME CLOCKS IN MISSION STYLES.**

CHIME clocks in a variety of handsome mission wood cases are shown at the New York salesrooms of the Regina Co., 11 E. 22d St., New York. These clocks are designed to keep accurate time and to play upon sweet and clear toned bells a wide repertoire of music. The musical compositions are cut on steel discs and transferred to the bells by means of a series of star wheels and felt hammers. Each disc is fitted to produce a group of tunes, and by having an assortment of discs, which are interchangeable, it is possible to obtain an almost unlimited range in the music. The motor has sufficient power to play about 150 tunes with one winding, one being played automatically each hour, as the clock strikes. A starting lever is provided so that music may be played whenever desired, independently of the time. The clock proper is an eight-day movement, power being furnished by weights and the hours and half-hours being struck on cathedral gongs. The figures, hands, weights and chains are all of solid brass. The cases are made in solid, quarter-sawed weathered oak.

*

**AMERICAN FIRMS MAY MAKE TRUE CHINA.**

FOUR of the largest concerns at East Liverpool are said to be interested in the big pottery plant which is being established at Newell, W. Va. The fact that these firms are co-operating in this enterprise is regarded in the trade as an augury of more harmonious action in the trade after this. In the domestic pottery field there has been for some time a degree of independence in price-making which some people look upon as harmful. The developments at Newell may foreshadow a better understanding among the large manufacturers. If this proves to be the case, it may be that it will lead up to the manufacture on a considerable scale of true china. As conditions are now, most of the domestic potters look to the cheaper grade. Their attention has often been called to the increasing consumption of fine imported pottery. Whether or not they will prove their enterprise and skill by attempting to capture a part of the business now going to the manufacturers abroad remains to be seen.

*

Oriental styles from the Royal Bonn factory are shown this season by Geo. F. Bassett & Co., 49 Barclay St. There are vases, jugs, urns and other articles in a variety of sizes. The patterns are of a tapestry character in rich colors, with heavy gold decorations. The figures show the influence of Assyrian ideas in ornamentation. This line of handsome products will be found worthy of attention on the part of buyers from the jewelry trade.

## Forthcoming Trade Exposition in Bavaria.

CONSUL BALDWIN, of Nuremberg, reports that there will be held in that city, from May to October, 1906, a general industrial, trade and art exposition of the Kingdom of Bavaria. The consul writes:

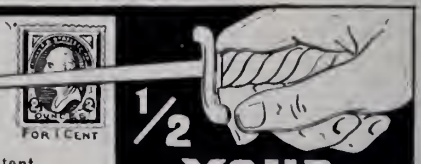
"Similar expositions, but on a smaller scale, have already been held in this city in the years 1882 and 1896, and they have both been attended with great success. The forthcoming exposition will be held in commemoration of the fact that next year will be the 100th anniversary that Bavaria, hitherto an electorate, was raised to a kingdom. It was Napoleon I. who raised Bavaria to the rank of a kingdom, enlarging it at the same time by important additions of territory, thus showing his gratitude to the Bavarians, his allies at that time in his war against Austria.

"The proposed exposition, which will be held under the protectorate of Prince Regent Luitpold, the present ruler of Bavaria, is to give a complete view of all the resources, productions and industries of this kingdom, which at present has a population of 6,500,000 inhabitants and an area of 29,343 square miles. The exposition is about 40 minutes' walk from the center of the city, in a newly laid out public park, with a pretty little lake adjoining it, and will cover an area of 336 acres, of which half is taken up by the aforesaid lake.

"This exposition promises to be a very extensive affair, and may present much to interest our countrymen, as there are many articles of manufacture in which Bavaria excels and which are exported to all parts of the world. Principal among these are toys, lead pencils and bronze powder; then plate and window glass and mirrors, lenses, gold and silver trimmings, gloves, glassware, iron and tile stoves, sewing machines, artistic manufactures in ivory and forged iron, majolica and faience articles, pianos, guitars and zithers, baskets, colored, gold, silver, and pressed paper, papier-maché goods, altar furniture, flags, banners, embroideries, stained and painted glass windows for churches, etc.

"The art department, too, will be of great interest, Munich, the capital of Bavaria, being the great art center of Germany. With the exception of Paris there is no other city in Europe in which so many distinguished painters, both domestic and foreign, reside. Very interesting collective exhibits will be made, as, for instance, furnished rooms, showing wall, ceiling and floor decorations, with furniture, curtains, stoves, mirrors, etc. Then the Bavarian Government, the city of Nuremberg and various other administrations will make collective exhibits of articles and appliances connected with postal, telegraphic, military, educational, sanitary and municipal institutions. Generally speaking, it will be a very interesting exposition and well worth visiting."

## Jeweled Garlands Finding Favor in Some Circles.



MANY fashionable women are preparing to have their tiaras reset into classic wreaths, which clasp about the head, says an exchange. Mrs. John Jacob Astor has had hers remodeled in accordance with London's latest idea, and is adorning her tresses with jeweled garlands that are effective and becoming in the extreme. One in particular has leaves of green translucent enamel, through which diamonds glisten like dewdrops.

Many sensible rich women, however, who are not gifted with Mrs. Astor's statuesque beauty are thinking twice before going to the trouble and expense of having their cherished crowns cut to pieces. Garlands are somewhat trying to those whose profiles are not of the classic type.

Herman Sick, Rich Hill, Mo., moved recently into more commodious quarters in the Jamison building, on Park Ave.

38TH YEAR. NEW YORK AND CHICAGO, WEDNESDAY, SEPTEMBER 13, 1905. VOL. LI. No. 7.

## HANDSOME SILVER SERVICE FOR THE BATTLESHIP "KANSAS."

PROBABLY no silver service ever presented to a boat of the United States Navy was the subject of greater newspaper comment than the gift of the people of the State of Kansas to the battleship of that name. For some time before the contract was finally awarded by Gov. Hoch the papers of Kansas and adjoining States published, almost every day, accounts of the bids being received, interviews with the Governor, letters from subscribers and comments on the subjecjt generally, until there was probably no man, woman or child in the Commonwealth that was not interested, directly or indirectly, in the gift.

As told in a previous issue of THE CIRCULAR-WEEKLY, the contract was finally awarded to Edward Vail & Co., 106 E. Douglas Ave., Wichita, Kan., who submitted designs and estimates on behalf of the Gorham Mfg. Co., New York and Providence, and it is to Mr. Vail we are indebted for the photographs of the drawings from which the cuts used herewith were made.

CENTERPIECE OF SILVER SERVICE TO BE PRESENTED TO THE BATTLESHIP "KANSAS."

LEATHER EBONY

# "Novelty":
## A Study of a Word.

WEBSTER defines "Novelty" as signifying recentness of origin or introduction.

A product may still be a novelty though not of recent origin; it may be a revival recently introduced.

But the most novel of novelties are those which are recent BOTH in origin and introduction.

We originate and introduce our novelties, which really are NOVELTIES.

THE MAGIC TOUCH OF BEAUTY characterizes all our designs. The Brooch shown here is only one out of many designs, all of which are notably impressive and effective. The price of this Brooch is $250. Neither the most nor least expensive, but a fine example of brooch-making.

ALL OUR ENAMEL GOODS are 18 karat. We make hundreds of attractive Brooches in enamel combinations, at prices ranging from $5.00 to $350.

ALL THE POPULAR GEMS are used to add brilliancy and enhance the color effects. Pearls, Rubies, Diamonds, Sapphires, Emeralds, etc. Originality and exclusiveness characterize our designs.

Design No. 2772.

SIMILAR DESIGNS AND EFFECTS are applied to Pendants, Scarf Pins, etc. Our line of Scarf Pins is worthy of the special attention of the trade. Prices from 75c. up.

DESIGNS ARE "EXCLUSIVE" in all the finer pieces. Only one of a kind is made. We are prepared to make such designs to order, submitting water color sketches.

THE IDEAS OF INDIVIDUAL CUSTOMERS are faithfully carried out when desired. If the customer has gems and wishes the same to be effectively mounted, we are prepared to furnish special and original designs therefor, which we agree not to duplicate.

SPECIAL: OUR PATENTED ELK HEAD.

Our Pacific Coast Agents, A. I. HALL & SON, Inc., San Francisco, Cal., carry our full line.

## Recent Customs Decisions and Rulings as to Gems, Jewelry, Novelties and Kindred Lines.

WASHINGTON, D. C., Sept. 6.—A recent decision of the Board of General Appraisers held that certain hat, shawl, belt, tie or lace pins with black heads, faceted or otherwise, are not commonly known as jewelry, and are not therefore dutiable at the rate of 60 per cent. ad valorem under Par. 434 of the Tariff Act, but are properly dutiable at the rate of 45 per cent. ad valorem, either as manufactures of glass or metal under Pars. 112 or 193 of the same act.

The Treasury Department is of the opinion that it can be shown by competent testimony that the articles in quesion are in fact commonly known as jewelry, and has accordingly instructed the Collectors of Customs at New York to file an appeal from the Board's decision in order that the question can be determined by the courts.

As noted briefly in a recent issue of THE CIRCULAR-WEEKLY, the Treasury Department has been advised that the appeal on the part of the Government from the decision of the Board of General Appraisers in the matter of the protest of the Hawaii South Sea Curio Co., was recently decided by the United States District Court for the territory of Hawaii adversely to the Government. The merchandise in suit consisted of cut or pierced Tasmanian shells, permanently strung on a cotton thread six feet in length, knotted at the ends, thus forming a circlet, but not fitted with clasp, snap or other metal device incident and usual to necklaces.

Duties were assessed on the shells as jewelry at the rate of 60 per cent. ad valorem under Par. 434 of the existing Tariff Act. The importers protested, claiming merchandise not to be jewelry, but properly dutiable at the rate of 35 per cent. ad valorem under Par. 450, as manufactures of shell, not specially provided for, which claim was sustained by the Board of General Appraisers and has now been affirmed by the court, said court finding that there was no evidence tending to show that the strung shells were commercially known as jewelry.

No further proceedings will be directed by the Government and the duties exacted in excess will be refunded.

---

Decisions by the Board of United States General Appraisers, New York, were published last week by the Treasury Department as follows:

IMITATION PEARLS.—Protest of Lebolt & Co. against the assessment of duty by the Collector at Chicago. On the authority of G. A. 6088 (T. D. 26551), the Board sustained the importers' contention that certain imitation pearls composed of paste, partly pierced and not capable of being strung, were dutiable as imitation precious stones under Par. 435, Tariff Act of 1897, and affirmed the assessment of duty on certain imitation pearls pierced through, which were found to be beads, under Par. 4[illegible].

IMITATION PEARLS.—Protests of Lee & Bernkopf against the assessment of duty by the Collector at Providence. Certain imitation pearls, classified under Par. 1 Tariff Act of 1897, were held to be dutia[illegible]

der Par. 435, as claimed by the importers. A. 6088 (T. D. 26554) followed.

PINS—JEWELRY.—Protest of Samstag & lder Bros. against the assessment of ty by the Collector at New York. Cern lace and belt pins, classified under Par. 4, Tariff Act of 1897, were held to be tiable under Par. 112, as claimed by the porters. G. A. 5647 (T. D. 25213) fol-wed.

IMITATION PEARLS.—Protests of John F. len against the assessment of duty by Collector at New York. G. A. 6088 D. 26554) followed, relating to imita-n pearls.

STEEL FOB CHAINS—JEWELRY.—Protest of m Wetstein against the assessment of ty by the Collector at New York. Cern ornamental steel fob chains were found be jewelry, dutiable under Par. 434, Tar-Act of 1897, as classified.

CHATELAINE BAGS—BELTS—JEWELRY.—otest of Geo. Borgfeldt & Co. against the sessment of duty by the Collector at New ork. As claimed by the importers, certain telaine bags and so-called elastic belts re found to be dutiable under Par. 193, riff Act of 1897, and not to be jewelry. rtain hat pins were held to be dutiable as sessed under Par. 434.

AMETHYST BALLS—PRECIOUS STONES.—otest of American Express Co. against e assessment of duty by the Collector at w York. On the authority of G. A. 6097 T. D. 26586), certain amethyst balls pierc-and crystal rondelles were found to be tiable under Par. 435, Tariff Act of 1897, precious stones cut but not set, as claimed the importers.

OPAL BALLS.—Protest of Joseph Fran-l's Sons against the assessment of duty the Collector at New York. Protest stained on the authority of G. A. 6097 T. D. 26586), relating to drilled opal balls.

MILLINERY ORNAMENTS.—Protest of Sam-l Schiff & Co. against the assessment of ty by the Collector at New York. Certain illinery ornaments, composed in chief lue of metal or paste, were held not to jewelry. G. A. 5624 (T. D. 25152) fol-wed.

IMITATION PEARLS.—Protests of A. & H. eith against the assessment of duty by the llector at New York. G. A. 6088 (T. D. 554) followed, relating to imitation arls.

PRECIOUS STONES—DRILLED OPALS.—Pro-st of American Express Co. against the sessment of duty by the Collector at New ork. G. A. 6097 (T. D. 26586) followed, lating to drilled opals.

---

O. C. Stegmaier, formerly with F. G. ehrle, of Belleville, Ill., has suceeeded Reichard, Washington, Mo.

Samuel Sproule, a salesman in a jewelry partment of a Philadelphia department ore, was arrested recently in a pawnshop ter he had disposed of a diamond ring. e is said to have confessed to having olen $3,000 worth of gems from the store nce he has taken a position in the jewelry partment last November. Pawnbrokers stified that Sproule would frequently re-ive advances for jewelry and deliberately ar the tickets up in their presence. It was is habit which led finally to his detection.

### Complaint Against Wm. A. Rogers, Ltd. for Using Words "Extra Coin Silver Plate."

In response to a summons, an officer of William A. Rogers, Ltd., 12 Warren St., New York, appeared before Magistrate Breen in the Centre St. Police Court, New York, Thursday, to answer a complaint brought against the corporation under Section 364B of the Penal Code, being a part of the Sterling Silver Law. The complainant was Newton Dexter, New Haven, Conn.

In his affidavit Mr. Dexter said that he had bought at the company's salesrooms, 12 Warren St. a gross of spoons, on the back of each of which was the mark, "Extra Coin Silver Plate." The spoons were sent, according to the affidavit, to Herbert G. Torrey, the Chief Assayer of the United States Assay Office, New York. He assayed several spoons and his report indicated that the quantity of silver in each was 6/1,000. It was charged that the company had violated the law by selling as coin silver spoons which had so slight a fraction of the precious metal in their composition. Gustavus T. Donnell appeared as attorney for the plaintiff. The defendant was represented by Warfield & Duell.

When the case was called there was some verbal sparring between the attorneys. On behalf of the defendant it was claimed that the stamp did not guarantee the spoon to be made of coin silver, but only represented that an extra amount of coin silver was used in the plating or coating of the spoon. Mr. Donnell suggested that the case go to trial in Special Sessions, as there seemed to be no question in regard to the facts, but only an issue in relation to the significance of the words used in the stamp. The Magistrate, having read the section of the Code, said that it required 900/1,000 fine silver in order to constitute coin silver. The mark seemed to him to be a representation that these spoons were of coin silver. After some further talk the defendant waived examination, so that the case will come before the three judges in Special Sessions, probably at an early date.

W. A. Rogers, general manager of the corporation, made the following statement:

"Regarding the goods we put out stamped 'Extra Coin Silver Plate,' that stamp is used on the cheapest grade of goods we manufacture, namely, plated on brass. It is simply absurd to attempt to prevent any one from stamping their goods what they are. These goods are precisely what they are stamped, namely, 'Silver Plated.'

"This trade-mark has been our register mark since June 5, 1897. It is very apparent that this trade-mark we use in no way indicates that the article is 'Coin' or 'Coin Silver,' but rather that it is plated silver as in point of fact it is."

This case recalls a similar prosecution brought a number of years ago against the manager of a "5 and 10 cent" store. The stamp was substantially the same as that in this case, and the defense was also on the construction of the words used, the claim being made that the stamp referred to the quality of the plating, and not to the spoon itself.

The manager of the store was fined $5, which he paid, and the Court gave a warning that on a second offence the maximum fine of $500 would be imposed.

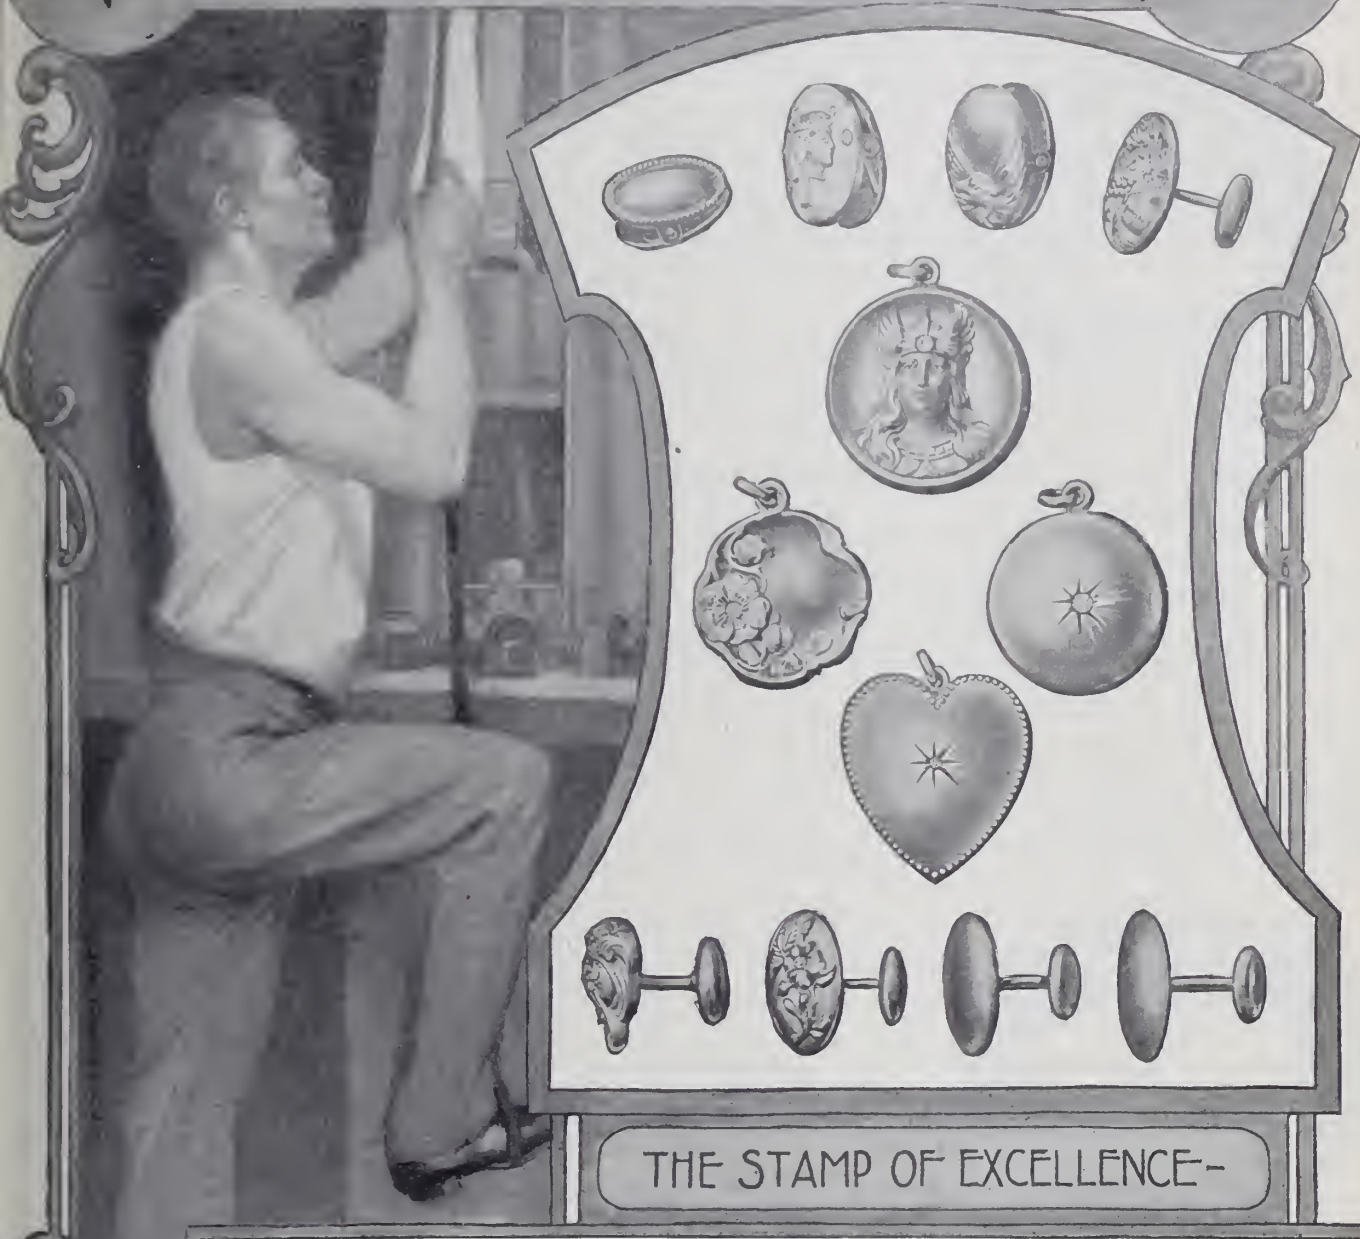
### Burglars Break and Rob Silversmith Window in Maiden Lane.

Burglars operated last Thursday night the store of Geo. W. Shiebler & Co., silve smiths, 5 Maiden Lane, a few doors fro Broadway, New York, in the heart of t wholesale jewelry district, and brok a side light in one of Mr. She ler's show windows. The plate glass this window is of considerable thickne and the robbers, after using a diamond cu ter, must have used a heavy instrume possibly a brick or hammer, to make t hole large enough for them to introdu their arms and draw out a number of piec of sterling silver.

The breaking of the window was appa ently accomplished in the same manner in other similar robberies reported in va ous parts of the city, including upper Bro way and 14th St. By the use of putty, some similar substance, the thieves are e abled to make an opening in the glass the shape and size that they desire witho breaking the remainder of the window T prevents noise from falling glass.

The silverware was arranged on tw pieces of silk spread out in the show wi dow. The robbers probably drew one these sheets outward, thus bringing the s ver within easy reach. About 14 fine piec were taken, the value being about $400 is somewhat surprising to the people in t trade that articles of such large size cou have been carried away at night from th part of the city without attracting the not of policemen or others. Among the goo stolen was a tea set of five pieces, marke with the number 1,737. This set was mad in octagonal shapes, with beaded edges. A other set of only three pieces were in colo nial designs, partly fluted, and were num bered 1,799. Three bread trays were take one being numbered 658, another 6,211, a the third 3,127. One of these trays was oxidized silver, with grape and leaf design and the others were chased silver. Fo large cake baskets, numbered 1,105, 3,31 1,117 and 1,104, were included in the boot



Several policemen guard, or are supposed to guard, the Maiden Lane district night and the Holmes patrolmen, as well as private watchman, also guard the block i which this store is located. This watch man, who has been employed in the distric for many years, is of the opinion that th robbery took place soon after 12 o'clock while he was at the other end of the block

In May last a copper sign with brass le tering was taken from the front of th Shiebler store, and on the same night tw similar signs were taken from the store o the Reed & Barton Co., on the opposit side of the street.

---

At Mason City, Ia., J. H. Lepper has ob tained a five years' lease of the Wilso building, 121 S. Main St., where he w have increased room for his business, wh has outgrown the old quarters. The new store will be renovated and a modern fron introduced, new fixtures will be bought and the stock will be enlarged, so that it will in clude besides jewelry, music, phonographs kodaks and phonographic supplies. A com plete operating room will be fitted up f the examination of the eyes. Mr Lepper expects to move into his new store by Oct. 1.

## South African Geologist Favorably Impressed With Supposed Diamond Fields of Kentucky.

RICHMOND, Va., Sept. 6.—David Drape F. G. S., the South African geologist a expert in diamond fields, who has been i vestigating the section of Kentucky which diamonds are believed to exist, r turned to this city a few days ago quite o timistic as to the future of these supp diamond fields, and left for the Blue R to-day to make investigations in that se tion. To a representative of THE CIR WEEKLY Mr. Draper said:

"I am highly pleased with my visit Kentucky, and the inspection of the K berlite which occurs in that section. Th I cannot positively assert that di will be found there, all evidence is of them existing in the territory. The ge eral is identical in every respect wit in which diamonds are found in S Africa. I saw no diamonds down in Ke tucky, nor was able to prove that any been found, but, though the evidence gems having been picked up is only lege ary, still I cannot believe that it is matter of invention without any basis have advised the owners of the prop to erect machinery and try a large quan of the mineral, say, about 1,000 loads, from what they tell me I think they w do so. After this is done, I think we w be in a better position to judge the val of the fields."

Owing to the illness of one of his Mr. Draper will have to return to Eng land on the *Moltke*, and will sail from Ne York, September 14.

## Decline Noted in Output of the New Premier Diamond Mine in the Transvaal.

Recent correspondence from Johannesburg, South Africa, indicates that the July output of the Premier Mining Co. w 55,590 carats of diamonds, which were tak from 118,018 loads of ground. These fig ures indicate a further decline in the gra of the blue ground. In June 113,208 loa of ground were treated, yielding 57,584 carats. It will be observed that the Ju output shows a decrease of 1,994½ carat although the quantity of ground treated w 4,750 loads greater. The aggregate produc tion of diamonds by this company up to the end of July was 1,510,590 carats.

It is said that a new process for the re covery of diamonds is to be introduced in these mines. The process is the propert of a syndicate in which Messrs Wernher Beit & Co., the Consolidated Gold Fiel and Messrs. Neumann are interested.

A dispatch from London Wednesday sta ed that a flawless diamond weighing 4 carats is reported to have been found in the Premier Mine, Johannesburg.

It was in the Premier Mine that the Cul linan diamond, 3,032 carats, was found in January. One weighing 334 carats wa found the next month.

Mrs. Susie R. Nash, Kingston, N. Y., will shortly move into the store now occupie by James B. Cameron. New quarters are being fitted up for Mr. Cameron at 11 Broadway.

IT doesn't necessarily take a very wise man to understand the "selling" quality of the O. & B. Ring—but he is indeed a wise man who buys this superior product. The O. & B. Fac tory is the propelling force be hind the progressive jobber. Now that September is here and the ma chinery is in operation—he who would "reap the harvest" should know that it is not wisdom, but folly, to delay. Send in your order—THE TIME IS NOW.

## Death of Joseph M. Bates.

ATTLEBORO, Mass., Sept. 7.—Joseph M. Bates, head of the firm of Bates & Bacon and owner of five of the factory buildings which house Attleboro's principal industry, passed away to-day at Cottage City, Mass., in his 73d year. Mr. Bates owed his principal prominence to his enterprise and success in jewelry and kindred lines, but he was also identified with other lines of activity equally important, real estate development and banking being among them.

Mr. Bates was the victim of a supposedly light stroke of paralysis at his jewelry office a little over three weeks ago. He was taken to his home on North Main St., one of the most beautiful estates in the town, and there the decision was reached that change of scene, complete relaxation of his regular interests, and the sea air were needed. He was taken to Cottage City, and nothing in the progress of his malady gave any cause for the least anxiety that it might terminate fatally. In fact, the day before his death friends in Attleboro had received assurance that he was getting along favorably.

Deceased leaves a widow and two sons, Frank M. and Charles R., the latter being associated with him in the firm of Bates & Bacon and being now in charge of the business. His death was preceded by only a few weeks by that of his only daughter, Miss Mary L. Bates, a young woman of ability as a painter, writer and musician.

Mr. Bates' career is justification for the high opinion in which he was held by all those associated with him in business, that he was tireless, determined and resourceful. In many ways he showed a quiet but effective public spirit. He remained social and approachable to his friends, even when wealth and business cares increased, and when responsibilities and added years made his private hours more important to the preservation of his health.

He was born in Wickford, R. I., Aug. 2, 1833, his parents being Benoni P. and Abbie Congdon Bates. His father, coming east from Wisconsin, was a contractor and builder, and was able to give his son only a common school education. At the age of 15 Joseph M. Bates entered a Providence

THE LATE JOSEPH M. BATES.

manufacturing jewelry plant to learn the trade. Shortly after he removed the scene of his activities to Attleboro, and it was only a few weeks before his death that he spoke of that first visit to the town where he was destined to make his mark. He had acquired an electric automobile, and remarked with characteristic matter-of-fact tone to his friends: "That is a different way of getting around than when I came Attleboro. The day I came here I walk from Providence."

Mr. Bates' first venture in Attleboro w a minor interest in Skinner, Viall & C making goods in the so-called "old shut shop" on North Main St., the property the Blackintons, whose name is so close associated with the Attleboro jewel industry. It cradled the ea starts of a dozen succes houses and its career is n yet ended. Business coming slowly to suit the enter young man, he sold his equit entered the new firm of Bates, C ron & Williams. They took qu ters in the big stone factory at A tleboro Falls, which was later ma over into a braid mill. Mr. B by this time had made a m name as a manufacturer of r gold plate bracelets. After t years he sold out his interest, a was taken up by William Sherma the firm going to Mansfield, Ma where it later went out of busine

Mr. Bates resumed business his own account in the "s shop," and later in the Steam P building, erected by a group of cal capitalists. The factory burn down, and Attleboro faced its fir fire crisis, for the effort to reta the industry looked rather hope Mr. Bates rose to the emergen and was instrumental in organiz an association which subscribed t money to rebuild the factory, and continued to be the main structu devoted to this business for ma years. To-day it shelters sever firms, and was narrowly saved fro second destruction in the conflagration May 18, 1898. It was in the shelter of t shop that the firemen took their stand in last but successful effort to check the flame

In 1867 Mr. Bates' business had increase satisfactorily, and he accepted George M Bacon, who died a few years ago, as partner. This was the starting of Bates Bacon, for many years thereafter an increa

There is that "something" about the HB Ring that greatly enhances its "selling quality." Our product is always *first* in the minds of the retail jewelers, and repetition of orders shows that HB Rings are on the "move." If you desire "perpetual Ring business," this fall, and at profits that are interesting—sell the HB Ring. We want to impress upon the trade in general that, with our increased facilities, all orders will receive immediate attention.

## Heintz Brothers

Buffalo
New York

ingly prosperous firm. In 1882 under that same firm name they began the manufacture of watch cases, gathering about them a group of highly skilled engravers and other workmen, who made their product well known throughout the trade. A few years ago this business was sold, and the plant and many of the workers removed to New Jersey.

In 1884 Mr. Bates was moved by the pressure of his business to erect a factory 200 feet long, 35 feet wide and four stories high. For a long time this was the largest shop in the jewelry district. It was burned in 1898, the big fire of that year starting in its basement. When Mr. Bates, then the surviving partner in Bates & Bacon, sold his watch case business he purchased the plant and business of G. A. Dean & Co., chain makers, and for a time did business as the G. A. Dean Co., but later found it advisable to resume the old name of Bates & Bacon, though in a new line, making jewelry of several sorts.

May 18, 1898, gave Mr. Bates his second opportunity to prove that he was a staunch backer of the town's main industry. In the fire which wiped out the shops of 17 large firms there was for a time reason to think the industry was to be removed from here; a number of the important firms affected resumed in Providence, and a few of the firms were too seriously crippled to resume at all. Mr. Bates' loss was especially heavy, for he was owner of the largest buildings destroyed. The massive vault in his own office failed to withstand the flames and crumbled to ashes, its contents being lost. He was deeply affected that night as he watched the fire, but the next morning had recovered his commanding grasp of the situation. He caused to be erected a new shop, which is to-day as much of an advance over his previous ones as each had been over its predecessor. It is occupied by four large firms. He built a new factory for himself on County St., and had since been instrumental in furnishing quarters for others. It is entirely due to Mr. Bates that the town's valuation that year instead of showing a decrease showed an increase, despite the loss of 17 shops.

His contribution to the life of the town is not limited to his success as a manufacturer. In young manhood he was interested in fast horses, and owned and drove animals which are still affectionately remembered for their quality and speed by the lovers of this kingly game.

In 1885 his pride was touched that in the Attleboros there should be but one opera house, and that located in North Attleboro, the rival village to his own district. Moved as much by this pride as by mercenary motives, for the business prospect then was none too alluring, he erected the Bates block, at the juncture of the two main streets, a handsome brick structure containing an opera house bearing his name, and in size and fittings the equal of many in cities of 100,000 and more. Through this block he showed his only large public interest in things religious. A few years ago he was deeply attached, as were scores of the town's leading business men, to a preacher of exceptional merit with whom they became acquainted. An independe church was organized, and Mr. Bates d nated the use of the opera house, and f three years weekly services were held ther

At the time of his death deceased ha served continuously 33 years as president the First National Bank of Attleboro. H was also president of the Attleboro Stea & Electric Co., a large stockholder in t Attleboro *Sun*, and a trustee in the Attl boro Savings & Loan Association. He w interested, though not as a conspicuo leader, in the early development of the di trict trolley service. Besides his fa t r he was a real estate owner on an ext n s scale. He was always keenly interested town affairs, but diffidence kept him fr active participation in town meetings from the acceptance of public office

---

The body of Mr. Bates was conveye from Cottage City to his home by h s Charles R. Bates. Monday the simple of service was held at the house, and w conducted by Rev. Wilson S. Fritch, pa tor of the independent church, of which M Bates had been a generous supporter On the immediate family attended, and the were no flowers from friends. Mr. Bate Masonic brethren at the family's requ took no part.

The Bates & Bacon factory has be closed pending a settlement of Mr Bate affairs.

## The Diamond Markets.

ANTWERP, Sept. 1.—There has been a good demand for polished stones throughout the market during the past week, and more offers than usual have been made on mêlée, small brilliants, roses, and "six faces." It is the general opinion here the beginning of this month business will pick up considerably in all lines.

A strike took place last week among the workmen in the diamond cutting shop of Yanssens & Bolle. The employers had set two apprentices at polishing, whereupon the members of the A.D.B. immediately quit work. The workmen not members of the organization remained.

A large number of foreign buyers were at this market during the past fortnight among those registered at the Diamond Club being Mr. Hackenbrouck, Berlin; Mr. Crier Frankfurt-on-Main; F. Goldschmidt and Mr. Straus, New York; Mr. Faulkenau Prague; Messrs. Mund, André Leviè, Wins Strasburger, M. Slabotzky, Eknayan, Hek ster, Woelffling, Weissberg and Max Me nasché, Paris; Messrs. Jacob Horowitz Lunzer, Infeld, London; Mr. Schettino, Na ples; Mr. Hatsendsohn, St. Petersburg Messrs. Druckman and Grossbard, War saw; Messrs. Samek and S. Schreiber Vienna; Mr. Baron, Chicago; Mr. Monos sohn, St. Petersburg; Mr. H. Straus Hanau; Messrs. Mardirossian and Hojoros sian, Le Clair; Cravero Guido, Torino.

AMSTERDAM, Aug. 30.—The general condition of the diamond trade here is better than last month, and sales are brisk in many lines. Amsterdam roses especially find many buyers in Paris. The demand for mêlée of 75 to 100 guilders per carat is better than it has been for some time.

LONDON, Aug. 30.—Quiet rules the market in precious stones here, this being the normal condition of the trade during August; in fact, little change is expected until about the middle of September, when the Fall season will really commence. The expected peace between Russia and Japan will undoubtedly be a good thing for the trade, and cause an activity in centers that have heretofore been dull.

Pearls continue in demand and many fine foreign lots have been sold to American firms recently.

PARIS, Aug. 30.—Notwithstanding the absence from this city of a number of leading merchants, a distinct improvement is observed in the diamond market of this city and conditions are expected to get even better during September. Colored stones also show improvement in demand, and rubies, sapphires and pearls have been sold in large quantities. In these lines the best business has been done with Italian firms, and the prices have been good, the market being firmer than it has been for some time.

A distinct improvement is seen in the demand from Russia, more diamonds being sold now than since the beginning of the war.

## Louis J. Marks, Pittsburg, Pa., Exonerated of the Charge of Receiving Stolen Goods.

PITTSBURG, Pa., Sept. 7.—Louis J. Marks 208 Fifth Ave., was tried in criminal court yesterday and to-day on a charge of receiving stolen goods and was acquitted. The jury retired this afternoon and brought in its verdict shortly afterward. The case attracted a great deal of attention on account of the prominence of the defendant. Mr Marks was represented by J. Scott Ferguson, one of the most prominent attorneys at the local bar, while Major Robert E Stewart, the District Attorney, handled the prosecution personally for the Commonwealth.

Mr. Marks was charged with receiving a diamond stolen by Charles Harris, alias Miller, who is now serving a sentence in the penitentiary at Milwaukee for swindling jewelers. Harris had stolen diamonds said to be valued at $2,500 from W. S. Pipes, a jewelry broker, Oct. 11, 1904, the theft being told of in THE CIRCULAR-WEEKLY at the time. Harris took Pipes to his room at 1928 Fifth Ave. under the pretense of showing the jewels to his wife, then in an adjoining room. Harris was never seen again by Pipes, and was not heard of until he was arrested in Milwaukee, six months later, for swindling jewelers there. Marks, who had bought in exchange a diamond from Harris, said to be valued at $500, for a smaller stone, a gold watch and $50 in cash, was arrested later on a technical charge of receiving stolen goods.

In his defence the jeweler claimed that he made the exchange in good faith, not suspecting that the diamond had been stolen. According to the testimony brought out, when Detective Oscar J. Siefert traced the stolen diamond to Marks' store, the latter admitted having made the exchange as stated, and then produced the stone, which had been put in a different setting. The detectives took the ring and kept it at Police Headquarters. It was exhibited at the trial, being used in evidence.

In addressing the jury Mr. Ferguson said that merchants cannot be held liable for acts of this kind. If jewelry is bought in good faith in a trade after it has been stolen, there must be some knowledge or understanding between the seller and the buyer as to the real owner of the property, to constitute a crime, such as the one charged. The diamonds which were stolen from Pipes are said to have been secured by Pipes on memorandum from Goddard, Hill & Co. In charging the jury Judge Brown, who tried the case, said that the jury must be satisfied beyond a reasonable doubt that a crime was committed against the Commonwealth, and if not, then a verdict of not guilty should be found.

The jury was evidently satisfied that Mr Marks was not guilty, for it was not long deliberating on the verdict. Mr. Marks, who had maintained from the start that he was innocent of any wrong doing, was heartily congratulated on the result.

At the time the alleged crime was committed Mr. Marks was in business at 252 Fifth Ave., but has since moved to his present location, where he probably pays the highest rent of any jeweler in the city, in proportion to the size of his store.

### Ryrie Bros.' New Store in Toronto, Ont., Robbed of Over $7,000 Worth of Diamonds.

TORONTO, Can., Sept. 8.—An unusually daring robbery of jewelry took place at Ryrie Bros.' new store during the afternoon of Wednesday last, when the place was crowded with purchasers and sightseers. The exact time of the robbery is not known, but it is supposed to have taken place between 4 and 6 o'clock. It was not discovered until about the latter hour, when the staff in placing the more valuable goods in the vault found that a tray of 18 diamond rings, some of which were worth as much as $750, and a pad on which were displayed about 75 stickpins, were missing.

There were no signs of force having been used on the cases nor any trace to show how the theft was accomplished. The detectives are completely baffled. About $7,400 is a conservative estimate of the loss. The rings bear the stamp "Ryrie Bros." on the inside.

The theory of the management as to the way the theft was committed is that a man accompanied by several women entered the store and that the former took off his hat and went boldly behind the cases, where he would appear to be one of the salesmen, and, removing the goods from the cases without any attempt at concealment, showed them to his female confederates, who were posing as customers. The latter then slipped them under their garments and, joined by the pretended clerk, mixed in the crowd and escaped.

### Death of George H. Banister.

PORT DEPOSIT, Md., Sept. 6.—It was with deep regret that the news was received last week from Newark, N. J., to the effect that George H. Banister, for many years a jeweler here, had died some time before at the home of his son in Newark.

Mr. Banister was 76 years old, and had been in the jewelry business for a long time. He came to Port Deposit in 1894, remaining for about a decade. He was a good workman, thoroughly understood the jewelry trade, and had a host of friends in the business world. He is survived by a widow.

### Boston Diamond Dealer Reports Loss of Diamonds Worth $12,000.

BOSTON, Mass., Sept. 9.—Myer Slotopolsky, who has an office at 62 Hanover St., where he deals in diamonds, reported to the police, Tuesday, the loss of a wallet said to contain unset diamonds valued at $12,000. He believes that he was robbed in the Jewelers' building or subsequently on his way therefrom to his office, and his view of the matter is strengthened by the fact that diamond thieves made an attempt to operate at two offices in the Jewelers' building on that day, but were frustrated. No clue to the lost diamonds has been obtained by the police as yet.

Slotopolsky lives at 40 Wolcott St., North Dorchester. He has a desk office and safe in the jewelry store of A. Gordon, next to the American House. He had, he says, 25 or 30 jewels, all unset, in tissue parcels tucked in one of the ordinary diamond brokers' leather wallets, secured by two elastic bands.

On discovering his loss, Slotopolsky notified Police Headquarters. Detectives Rooney, Wolf and McCauley are working on the case. He claimed the gems represented almost his entire capital.

### Harry R. Barney, Steubenville, O., Makes an Assignment.

STEUBENVILLE, O., Sept. 8.—A general assignment for the benefit of the creditors has been filed by Harry R. Barney, a jeweler and optician, who for some time has had a store at 117 N. 4th St., this city. No schedule of his liabilities and assets has yet been made public, but it is generally believed that the former will not amount to more than $5,000.

Barney is about 30 years old and was originally in business in Kansas City, Mo. He located at McDonald, Pa., in September, 1904, and about the first of April this year moved from McDonald to this city.

Joseph L. Miller, optician, 410 Pine St., Williamsport, Pa., recently reported that a man claiming to be his brother and an optician, had been visiting residents in his territory and defrauding them by selling worthless eyeglasses at exorbitant prices.

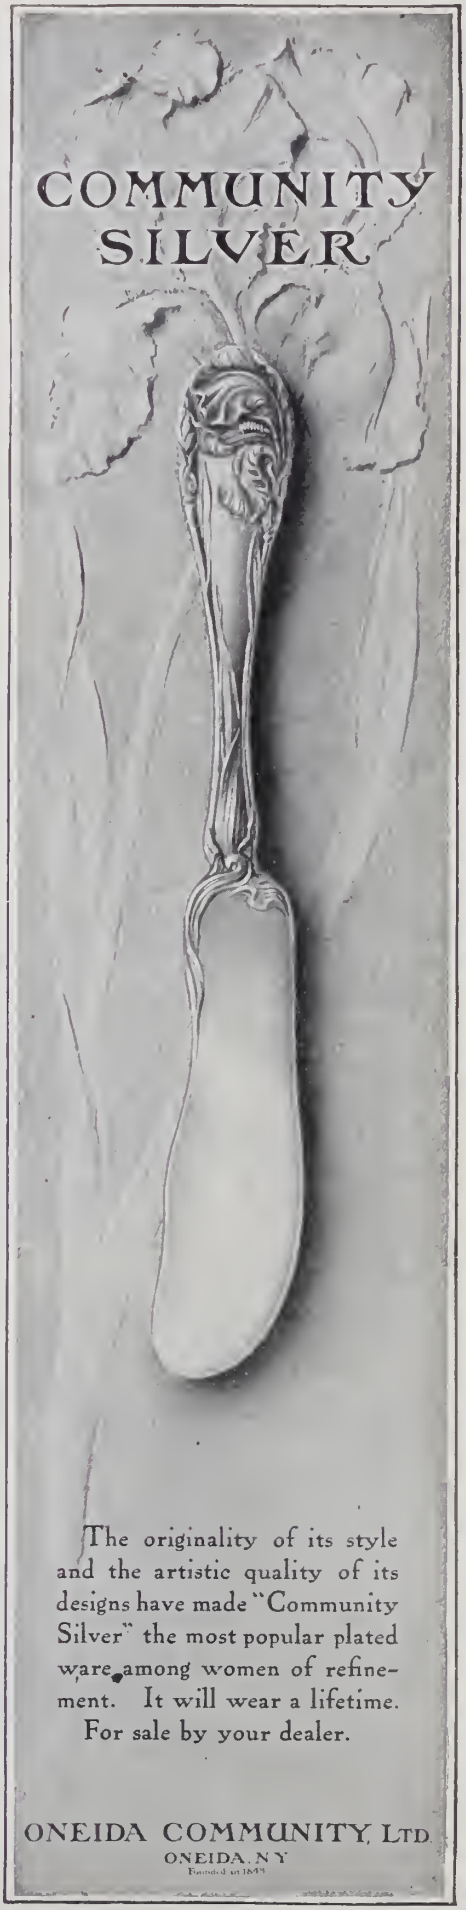
# COMMUNITY SILVER

This is a reduced copy of a full column "Community Silver" advertisement which will appear in the October issue of The Delineator, Ladies' Home Journal, Woman's Home Companion and the other leading ladies' papers.

It will be followed by larger and even more effective ads. in November and December.



The selling value of these advertisements cannot fail to be extraordinary, since they will be seen by more than five million women, and will attract every woman who sees them.

Remember that your profit on "Community Silver" is unusually large, and stock now. Inquire of jobber or write us.

### Boston Police Hold Man Accused of Larceny by the Brothers Cowan.

BOSTON, Mass., Sept. 9.—There are three brothers named Cowan in Boston in the jewelry trade—namely, Henry, Elias A. and Joseph. Each is in business on his own account. Thereby hangs a tale.

In the latter part of August a man who has since been apprehended by the police, and whose name is given as Oscar J. H. May, entered the store of Henry Cowan, in the Jewelers' building, 373 Washington St., third floor, and looked at some diamond rings. He was of odd appearance, having a broken nose and eyes somewhat askew, and was regarded with a suspicion which proved to be well founded. He was observed in the act of palming one of the rings, and was told to drop it and get out. May lost no time in departing. After he had left, word was sent to E. A. Cowan's, on the floor below, to look out for the man in case he put in his appearance there.

May, it seems, headed for the office of Cowan No. 2 at once. He was recognized, however, from the warning given, and was told to clear out, no goods being shown him there.

Joseph Cowan's store is in another building, at 351 Washington St. He was not prepared for the visitor, who called there on the 25th of August, and succeeded, it is alleged, in purloining a $70 ring from the lot spread before him. The loss was not discovered until he had made good his exit.

On Thursday last one of the clerks in E. A. Cowan's notified Joseph Cowan's head salesman that he had just seen May on the other side of the street. Mr. Cowan and the salesman at once started in pursuit of the man. He was overtaken and handed over by them to the police.

May was arraigned and held until Monday for trial, in default of bail. The police meanwhile made every attempt possible to discover his haunts and his companions. He is believed to be one of a gang operating here, a number of similar cases having come to light lately in various lines of trade.

### L. Y. Cowl, Chicago, Offers Creditors a Settlement at 25 Per Cent. Cash.

CHICAGO, Sept. 9.—The following letter, sent out by M. W. Hanchette, attorney for Clapp & Cowl, to the latter's creditors, speaks for itself:

Owing to an unfortunate venture in opening a new store in a modern building at the corner of State and Madison Sts., Chicago, Ill., the trade depression caused by the prolonged strikes which paralyzed business in the city of Chicago, coupled with heavy losses sustained in other directions, compelled me, as you know, to file a voluntary petition in bankruptcy in order that all creditors should be treated fairly.

I desire to continue the business which I have conducted at 68 Washington St., under the name of Clapp & Cowl, for the past 13 years, in order that I may save and preserve the good will of the business which I have established, which is of no value to any one else.

I am offered financial assistance to continue business as a corporation providing a settlement with my creditors can be made.

| | |
|---|---|
| My indebtedness amounts to approximately | $30,000 |
| Stock and fixtures, inventoried at cost price, about | 15,000 |
| A fair appraisement estimate would be about | 7,000 |

I am enabled to offer by the assistance of friend 25 per cent. cash on all provable claims.

The amount offered is more than can be realize by continuing bankruptcy proceedings.

The acceptance of this offer will enable me t continue in business on a sound financial basis.

Regretting the unfortunate circumstances whic have placed me in my present condition, an hoping that you will promptly sign the inclose composition agreement and return the same t your attorneys, I remain, Truly yours,

L. Y. COWL.

The offer is looked upon with favor her and will probably be accepted. The onl serious opposition to it so far comes fro Edward Menkin, a lawyer representing th claim for $1,000 of Max L. Silverberg, diamond dealer. Mr. Silverberg is now Europe and is expected back this wee Mr. Menkin examined Mr. Cowl last wee but nothing of importance was elicited.

Mr. Cowl said his bookkeeping metho were lax and said he took most of t money realized from the pawned jewel to pay to the Hibernia Banking Ass tion.

Wm. B. Drackett, H. J. Roorvart an W. E. Daniel have been appointed appra ers for the estate.

Wm. B. Kimball, formerly of Waukesh Wis., has moved to Tama, Ia., where he wi conduct a retail jewelry business.

A. W. Cornelius, Asbury Park, N. J supplied the clock which was recently pr sented to the library at that place. Th timepiece is one of the designs of Ed. H Willard, an English clockmaker. It has silver disc and gilt rim. On the pendulur case is depicted one of Lord Nelson's se battles.

The new rm will deal in cut glass, which it manuactures in Montreal, also in electroplated are, silverware, etc. The concern has uarters in the Toronto Bank building, St. ames St., Toronto, Ont.

---

The establishment of Samuel Halperin, who conducted auction sales at 115 Washington Ave., S., Minneapolis, Minn., was losed a short time ago, by Mayor D. P. ones in accordance with disciplinary methods which have been adopted by the Mayor. The auctioneer's store was closed pon the complaint of a youth who alleged hat he had been defrauded.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

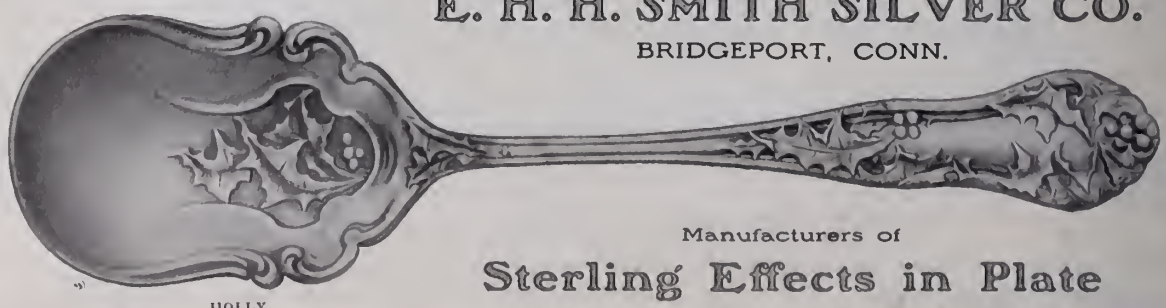
### Death of Jacob Anspach.

Jacob Anspach, the senior member of Anspach Bros., opticians, 595 Broad St., Newark, N. J., one of the victims of the accident which occurred last Monday morning on the Ninth Ave. Elevated Railroad, New York, when one of a train of cars fell from the superstructure to the street, killing 12 and maiming over a score of persons.

Mr. Anspach passed the Summer with his wife and child at Avon. About 10 days ago they closed their Summer house and went to live with Mrs. Anspach's mother at 270 W. 70th St., New York, until the house which they had leased in Belleville Ave., Newark, was ready for occupancy. In the meantime Mr. Anspach went from New York to Newark each day, and he was on his way to the store when he met his death in the ill-fated train.



Mr. Anspach was a member of the Newark Board of Trade, and was held in high esteem by a large number of friends.

O. D. Burt, president of the Kansas City (Kans.) State Bank, and at one time engaged in the retail jewelry business in that city, died recently at St. Margaret's Hospital, of uremic poisoning, aged 66 years.

Jewelers throughout the country are requested to watch out for a gold lapel Elk's button, recently stolen from the Mayor of Greenville, S. C., as it is supposed that it will eventually be offered to some member of the trade by the thief. The button contains the Elk's head with ruby eyes, and has a diamond of five-eighths or three-quarters of a carat, set just above the head. A reward of $25 is offered for the return of the button by the Gilreath-Durham Co., jewelers and silversmiths, Greenville, S. C., who will be pleased to hear immediately from any member of the trade to whom the stolen article may have been or may be offered.

## Boston.

George E. Knapp is enjoying a brief vacation at Old Point Comfort, Va.

E. A. Bigelow, treasurer of the E. Howard Clock Co., is in New York this week on a business trip.

John D. Wyman, Burlington, Vt., who has retired from business, was in Boston recently en route for Los Angeles, Cal.

Fred H. Woodman, who has had an office in the Jewelers' building, will open headquarters at 352 Washington St. next week.

Joseph Cowan started Saturday on a southern trip, and will be away about two months, visiting the principal cities during that time.

Buyers in town during the week included Clarence Foster, of Foster Bros., Greenfield, Mass.; George W. Case, New Bedford, Mass.; M. W. Royal, Gardiner, Me.

J. C. Barlow, Montreal representative of Robbins, Appleton & Co., was in Boston on Thursday, and visited also the factory of the American Waltham Watch Co., at Waltham.

Henry M. Rich, the Boston jewelry auctioneer, has been conducting a clearance sale at Lawrence for A. E. Jacobs, proprietor of the store known as the "Jacobs Diamond Mine."

A meeting of the creditors of Alfred Nathan was held on Saturday, and the matter of the disposal of the stock at private sale was taken up. It is stated that satisfactory arrangements have been made for this method of realizing on the assets.

Reginald C. Robbins, of Robbins, Appleton & Co., who is one of the most expert riders in Boston, took the blue ribbon first prize at the 10th annual Myopia Hunt Club open-air horse show, Labor Day. He rode his thoroughbred "Patrician," and took all the hurdles with ease.

J. C. Donnell, of the Ripley-Howland Mfg. Co., who has been at Saco, Me., for a number of weeks recuperating from the effects of an attack of heart trouble, which suddenly put an end to his business trip last Spring, expects to be able to resume travel in the Southern New England territory shortly.

The members of the Boston Jewelers' Club, accompanied by several guests, making a party of about 20, chartered a yacht for a sail in the harbor, for yesterday afternoon, their destination being the beautiful clubhouse of the Point Shirley Club, where a shore dinner was scheduled as the chief feature of the occasion.

C. H. Schmidt, formerly head clockmaker at A. Stowell & Co.'s establishment, has accepted a similar position with a new department store, which opened on Saturday. He is succeeded at Stowell's by E. C. Schindler, well known in the trade, who was employed with the chronometer house of William Bond & Son and other clock concerns prior to entering the employ of A. Stowell & Co.

A number of Boston dealers are said to have been caught in the failure of W. J. Foss, Machias, Me., who was here shortly before the crash came, and placed some large orders. One dealer who booked an order for goods to the amount of $500 is congratulating himself on his caution which impelled him to hold up the delivery of the merchandise while he investigated the standing of his customer.

Receiver B. P. Gray, of the Preferred Mercantile Co., during the past fortnight has been following up the trail of the Stillingses and their associates in New York, and has succeeded in finding $7,000 in negotiable securities, which he now holds for the benefit of the creditors. Immediately after the Stillings brothers were adjudged in contempt in this commonwealth, Receiver Gray went to New York, and with the assistance of Attorney-General Mayer, started proceedings to have the New York charter forfeited. Robert Ten Eyck, New York, was appointed receiver of the New York company, and the same day B. P. Gray and W. J. Grattan were appointed ancillary receivers in New York of the Boston company.

**For Sale by All Jobbers.**

Write for full Particulars,
Prices, Discounts, Etc.

**Tavannes Watch Co.,**

**2 & 4 Maiden Lane,**
**New York.**

LAST month we told you about the quantity of adjusted watches we sold. Now we will tell you the cause.

Almost every large retail dealer in Railroad watches is pushing the sale of ***BUNN SPECIALS*** and ***SANGAMOS,*** because, these watches are ***absolutely satisfactory*** and are now the recognized standard for Railroad service.

For the past three years minimum retail selling prices on these grades have been established and maintained, enabling the dealers to make a justifiable profit, and at the same time give their customers perfect watches at reasonable prices.

We sell to a limited number of jobbers, who cooperate with us in protecting the retail dealers against undesirable competition.

If none of these solicits your business, and if you are not familiar with the quality and prices of our watches, write us.

Minimum Retail Selling Prices of R. R. Grades.

FITS ANY SIZE OF WRIST.

A simple arrangement of springs makes this bracelet adjustable to any wrist, whatever its size or conformation. It is thus the extreme of

COMFORT, COMELINESS AND SECURITY.

Simple in its parts and strong in construction, it is durable and not liable to get out of order.

## San Francisco.

### TRADE CONDITIONS.

Trade continues to improve in all lines. Th most remarkable activity is noted in the diamon market. Diamonds of all grades are in good d mand and diamond brokers are stocking heavi in anticipation of a continuation of brisk busine during the coming Fall and holiday season. R tailers are also prospering and say that trade in a very healthy condition.

M. Saier, Fresno, Cal., was in this ci last week buying goods from the jobber

Ed. Lewis, with Armer & Weinshen has returned from his regular southern tri

W. J. Brown, representing J. B. Whitne a jobber at 120 Sutter St., is now in Seatt Wash.

Mrs. A. A. Poole, Santa Barbara, w in this city, last week, buying goods for h Fall stock.

Edw. A. Fano, formerly of San Diego, now with Ralph Friedman, at 143 Pow St., this city.

F. H. Solomon, manufacturers' age was here last week on his usual Fall tr along the coast territory.

C. J. Noack, Sacramento, Cal., w among the number of visitors to the S Francisco houses last week.

L. H. Service, Madera, Cal., recent spent a week in this city, during which made large purchases from the jobbers.

Andrew Loge, watchmaker for Geo. Moss & Co., has just returned from pleasant three weeks' vacation in t Sierras.

W. H. Hazell, cashier of the W. K. Va dersliee Co., has returned from a vacati spent mainly at the Lewis and Clark E position at Portland, Ore.

Howard Barbier, of the W. K. Vande sliee Co., will leave for the east in a fe days, combining business and pleasure. H will be absent about two months.

D. S. Briggs and E. Rochat, Jr., wi Radke & Co., will go to Palo Alto in a fe days, to attend the annual battalion e eampment of the First Regiment, N. G.

Leo Aurieh, of Nordman Bros., is enjo ing his regular annual vacation of tw weeks. Albert Cantor, traveling salesm for Nordman Bros., is also taking a we earned vacation.

Edward Feierson, with Carrau & Grec is now hunting deer in the mountains Napa County. He recently sent in one the finest specimens of deer ever secured Napa County. It weighed 140 pounds wh dressed.

Mr. and Mrs. Geo. R. Shreve, of Shre & Co., who have been spending the Sum mer months at their pretty country pla between San Mateo and Burlingame, a expected to return to San Francisco sor time the latter part of September.

Samuel Baker, head sales manager for Andrews, has just returned from a tr north with the Veteran Firemen's excu sion. The trip included a visit to all the leading cities of the Northwest. Th party was given an ovation by firemen every city along the route.

A large number of jewelers of San Fra ciseo have discontinued the practice of se tling bills on "Steamer Day," which is th 13th and 28th of each month, and will the future recognize the first of each mon as collection day. The making of colle tions on "Steamer Day" is a time-honore

# THE NEW SIMMONS CHAIN POSTERETTE

[T is by far the handsomest window poster we've ever put out, nd tells most ttractively a retty story sure o appeal po- ently to all wo- nen and to all nen who are hinking of gifts or women.

In this miniature reproduction in cold black and white, here's no hint of the rich, harmonious warmth of color shown in the posterette itself, which is 11½ x 15 inches, and mounted on a handsome tinted and pebbled mat.

It's an ideal attraction for a jeweler's window — striking, yet wholly refined and artistic. If shown in your window, unquestionably it would draw all eyes— not only to itself, but to whatever goods were displayed with it.

**It will be sent free, postage paid, upon your request**

so secure it without delay; better write at once.

**R. F. SIMMONS COMPANY,** Main Office and Works, **ATTLEBORO, MASS.**
Salesrooms: 9-13 Maiden Lane, New York 103 State Street, Chicago

Trade W&H Mark

THE W. & H. Locket line for the Fall season is not only equal in all respects to past displays, *but a greatdeal better*—each design is a notable creation. There are many reasons for superiority in our product—

We manufacture lockets exclusively; we are backed by fifty years' experience; *we set the locket styles.* The judicious buyer will appreciate these points. No goods genuine without our trade-mark stamped inside.

3 MAIDEN LANE, NEW YORK. **Wightman & Hough Co.,** PROVIDENCE, R. I.

JOHN SCHUMACHER

workmanship and design applied to Jewelry stands for the very highest perfection and desirability.

JOHN SCHUMACHER,

Mfr. of HIGH GRADE DIAMOND MOUNTINGS,

64 Fulton Street, NEW YORK.

custom in San Francisco, dating from the time when there were no railroads running across the Continent and all shipments were made by steamer.

Isaac Mann, Sheldon, Ia., is making a tour of the west. One or two San Francisco jewelers whom he had known in former days are in receipt of pleasant calls from him. Before leaving the coast Mr. Mann intends to pay a visit to the Lewis and Clark Exposition at Portland, Ore.

Julius Auerbach, who represents M. Adelsdorfer on the coast, has been confined to the hospital for about two weeks, where he underwent an operation. The operation prevented him from attending to business for two weeks, but was not of a serious nature and he is expected to return to work this week.

Geo. H. Smith, of the Keystone Watch Case Co.'s agency in the Mutual Savings Bank building, met with an accident a few days ago while out boating on San Francisco Bay, which might have proved rather serious. The craft in which Mr. Smith was boating was a small yawl and was operated by Mr. Smith himself. Some of the rigging became fouled and Mr. Smith went aloft to set it to rights, when a spar to which he was clinging gave way, precipitating him into the water. Beyond a good drenching and severe burns on his hands where the ropes slipped through them as he clutched at them in his efforts to save himself, he was uninjured.

## Trans-Atlantic Voyagers.

TO EUROPE.

F. E. Leimbach, New York, sailed Saturday on the *New York.*

Nicholas Geoffroy, of Geoffroy & Co. New York, sailed last week on the *Caronia.*

On the *Kaiser Wilhelm II.,* sailing yesterday, were Carl Bawo, of Bawo & Dotter New York, with his wife and the Misses Bawo, and Louis E. Kirstein, of E. Kirstein's Sons Co., Rochester, N. Y.

FROM EUROPE.

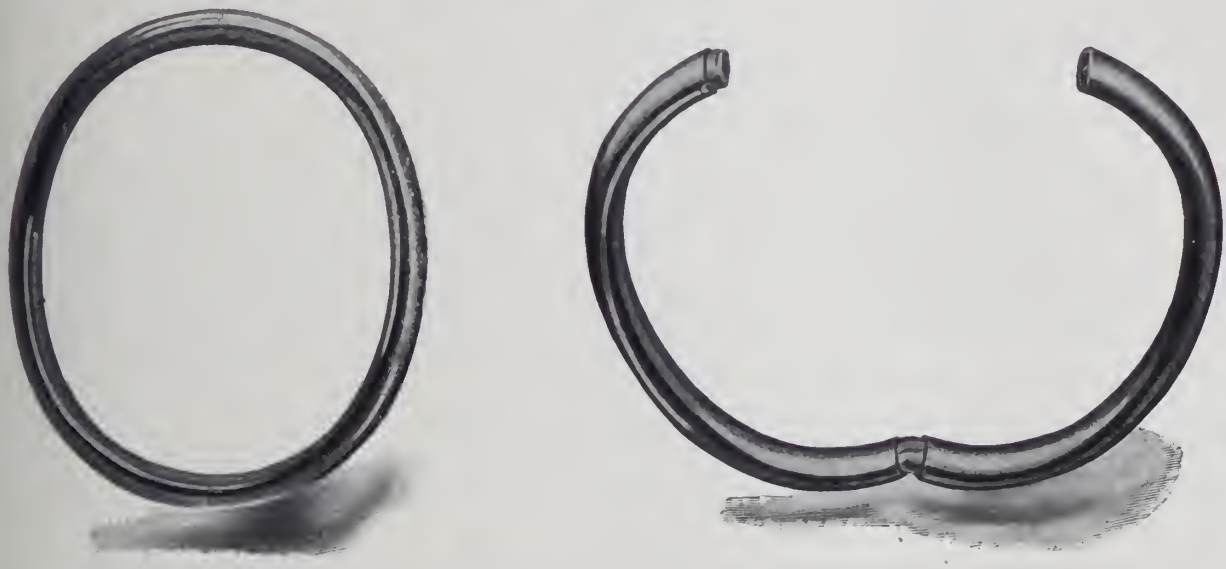
Sigmund Wyler, New York, will return next week.

Ed. Van Dam, New York, returned last week on *La Lorraine.*

Joseph Mayer, of Dreyfus & Mayer, New York, sailed for home Saturday on the *Zeeland.*

H. Untermeyer, of the Untermeyer-Robbins Co., New York, with his wife, returned last week on the *Moltke.*

Returning last week on the *Potsdam* were B. Veit, of B. & L. Veit, New York, and J. Van Wezel, of S. L. Van Wezel, New York.



H. Oppenheimer, Jr., of H. Z. & H Oppenheimer, New York, with his wife and daughter, returned last week on the *Blucher.*

A man giving his name as Thomas Mitchell, recently entered the store of Henry F. Peters, Moline, Ill., and while examining several watches which had been placed upon the show case for his inspection, slipped one valuable time piece in his pocket. The clerk missed the watch and recovered it from the would-be thief, who was taken into custody and held under bail of $500.

# AVERY & BROWN,

**68 Nassau St., New York.**

## Lancaster, Pa.

E. E. Dietrich, Harrisburg, and J. C. Schmidt, Lebanon, visited Lancaster last week.

Percy Bowman has gone to Louisville, Ky., to take a position as watchmaker with a firm of that city.

Harry C. Foehl, formerly with Ezra F. Bowman's Sons, has opened a jewelry repair shop on S. Queen St.

Harry T. Kiehl, head clerk for Louis Weber & Son, is home from a trip of a couple of weeks, spent near Reading.

K. H. Bare, an instructor in watchmaking at the Ezra F. Bowman Technical School, is home from a two weeks' trip to New York and Atlantic City.

Not a single industrial establishment here connected with the jewelry trade but is running along with plenty of orders on hand, and employing its full force of workmen.

B. Lichtenstein has removed his store from the old quarters on N. Queen St. to an adjoining storeroom until extensive improvements have been made to his place of business.

The extension of the Hamilton Watch Co. factory is being pushed as rapidly as possible, as the management desires to get at work on the manufacture of an O size movement at once.

J. A. Currie, optician for S. Kurtz Zook, has gone to Philadelphia for a week. Mr. Zook is about to instal his optical department in more commodious quarters, along with other improvements which he is making to his establishment.

A policeman last week arrested Benjamin Coulter for offering for sale what was suspected to be stolen jewelry. The man's manner excited suspicion and the goods were offered very cheap. At the police station it was learned the fellow was only a clever seller of cheap jewelry. He was given an hour to leave the city.

On the petition of the Fulton National Bank, of Lancaster, the court last week appointed John C. Carter, receiver for the Biehl Mfg. Co., which operates a silver plating plant here, the petitioner averring that law suits are threatened and the company has no funds to meet claims, which statement the company's officers admitted. The company was incorporated in 1903, with a capital of $12,000. Its indebtedness is about $7,000.

Charles E. Simanton, a jeweler of St. Johnsbury, Vt., had trouble last Thursday growing out of the purchase of a $3,000 automobile from George Depew, Washington, N. J. When Mr. Simanton drove out of town in the new machine, Mr. Depew feared that an attempt was being made to evade payment, and the automobile dealer gave chase in another vehicle. After a pursuit of 50 miles, Depew caught up with the jeweler and jumped into the latter's automobile. The report says that there was a lively physical encounter in which the jeweler vanquished his opponent, throwing him out of the car. Mr. Depew then obtained the assistance of officers. The jeweler was again overtaken and placed under arrest on the charges of larceny and assault.

*Little Journeys—No. 5.*

*To the Home of Bags.*

THE cut shows one of Fashion's latest Decrees, a sterling or G. S. bag with perfectly plain frame, fine ring mesh, with or without white kid lining, Roman finish and made in a variety of sizes. We make them also with the frame studded with stones.

The most complete line of bags in the market. Your jobber has them.

## Philadelphia.

Walter Hazelton, with C. H. O'Bryon, has returned from a vacation trip.

H. M. Nesbitt, a manufacturing jeweler of New York, was a visitor to this city last week on business.

Ed. Sickles, of M. Sickles & Sons, has closed his Massachusetts Ave. cottage and reopened his town house.

Mann & Le Jambre, diamond dealers, Sansom St., entered judgment last week against C. C. McKee for $64.30.

J. Klaussman, buyer of the jewelry department of M. Snellenberg & Co.'s store, has returned from a European trip.

M. J. Stout, Summit Hill, Md., stopped off in Philadelphia last week with his family, homeward bound from a vacation trip to Atlantic City.

The first meeting of the Board of Governors of the Jewelers' Club since the Summer vacation period began was held Tuesday.

The entire stock of the estate of the late Henry Euler, wholesaler, 716 Chestnut St., was disposed of at auction at an administrator's sale yesterday, Sept. 12.

James L. Pequignot, in business with his father, Z. J. Pequignot, 1322 Chestnut St., has gone to New Brunswick, Can., on an extended hunting trip for moose and game.

Joseph K. Davison, of J. K. Davison's Sons, 718 Sansom St., is homeward bound from a four months' trip to the Rockies. He is expected to reach this city next week.

Wm. H. Long, J. Warner Hutchins and Fritz Bloch made a deep sea fishing expedition out of sight of land Saturday and Sunday from Longport in Mr. Bloch's yacht and have returned with some wonderful stories of fine "catches."

Emil Zothe, engraver and jeweler, now at 716 Chestnut St., will remove to the store for many years occupied by Wm. H. Doebele at 722 Chestnut St., on or about Sept. 15. Mr. Zothe started in business as a general engraver just 30 years ago this month.

Benjamin Gebhard, manufacturing and wholesale jeweler, has moved from 729 South St. to 735 Sansom St., where he has had extensive alterations made to enable him to meet the requirements of his trade. S. Weintraub, who shared the old quarters with Mr. Gebhard, will continue at the old stand, having relinquished for the time being his intention to move.

J. Burroughs Robertson, of the material department of M. Sickles & Sons, 726 Chestnut St., and well known among watchmakers of this city, is to be married tomorrow in Camden to Miss R. B. Russell, of Baltimore, to whom he has been engaged for some time.

A small package containing jewelry, repair jobs, etc., belonging to Capt. George Bowen, a prominent Bridgeton jeweler, was lost last week on the way to the Bridgeton store from this city. A liberal reward has been offered for the return of the package to M. Sickles & Sons.

Out of town retailers buying here last week included: Howard Fitzsimmons, West Chester, Pa.; H. B. MacFarlan, East Downingtown, Pa.; David H. Krause, North Wales; E. K. Bean, Lansdale, Pa.; Capt. George Bowen, Bridgeton, N. J., and A. M. Kendall, Millville, N. J.

S. Freeman & Co. will sell at auction Friday, Sept. 22, at a trustee's sale of the bankrupt estate of John A. Ross, 17 diamonds, weighing 6⅛ carats, and 48 stones weighing 22 carats. Mr. Ross was formerly in business at 56 N. 13th St., where he is manager now for Wm. H. Windolph, who assumed control of the store.

Richard M. Cooper, in the material business with his son, John S. S. Cooper, 72 Sansom St., under the firm name of Richard M. Cooper & Son, retired from the business last Friday, when the partnership was dissolved. The elder Mr. Cooper will live privately. The business will be conducted under the old firm name by his son to whom all debts are payable and who will meet all claims.

Alterations and improvements have just been completed to the Philadelphia Horological School in readiness for the Fall and Winter terms. The engraving department has been furnished with new desks, the floor space has been increased and some new watchmakers' benches have been added. Among the recent matriculates are the following: Edward Wicks, W. Pittston, Pa.; Ralph Roessler, Marion, Ind. Miss Kathryn Clark, Bristol, Pa.; C. C

## *LETTERS TO THE EDITOR.*

### Watchman Bartels Explains.

NEW YORK, Sept. 11, 1905.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY:

I desire to explain a few things which ought to be known in connection with the recent robberies on Maiden Lane, the details of which have been erroneously reported by the daily press. It appears by the newspapers that there were no watchmen in the vicinity when the robberies were committed. I state positively that I, and my two assistants, were not only on the "Lane," but we were making our rounds of the different offices in the buildings when the thefts occurred. This statement is borne out by the watchman's clock in Oliver Farand's store, which was punched at 12 midnight, exactly 20 minutes before the robbery was discovered by one of my men, and I notified the police.

I want to state positively that I was on the ground, but I must add that it is impossible for three men to cover this district so thoroughly (in the buildings and outside) that one man can be on the street all the time, and I cannot afford to hire three men for the money that I am at present receiving from the jewelers for guarding the district. Very truly, HARRY BARTELS,
Jewelers' Patrol.

## Newark.

Alfred Lutz, Trenton, N. J., slipped from the gangplank into the river, one day last week, as he was returning from an outing of the Park Island Canoe Club. He was rescued without difficulty.

J. Frank Jennings, one of the best-known journeymen jewelers in Newark, was buried Saturday in Succasunna, N. J. He died Wednesday in the house of his sister, 19 Kearney St. The day of his death was the 69th anniversary of his birth. He was a native of Newark and had lived there all his life. As foreman and superintendent of two or three shops in the trade, he spent nearly half a century, retiring from active work about nine years ago because of failing health.

L. Votroubek, Columbus Junction, Ia., has sold his store to Homer Stephens, Keota, Ia.

Mrs. Eleanor Kent McMath, wife of Robert E. McMath, former president of the Board of Public Improvements, died at her home in Webster Groves, a suburb of St. Louis, last week. Prior to her marriage Mrs. McMath was connected in an important capacity with the Eisenstadt Mfg. Co. of St. Louis, and was considered to be one of the most successful business women in St. Louis. She was an active member in the St. Louis Business Women's Club, an organization promoting the welfare of business women. She was married in September, 1901, to Mr. McMath.

## Canada Notes.

O. Roy, Lambrow, Que., was burned out recently.

J. A. Park, Battleford, Man., is moving to North Battleford.

S. D. Burritt, Rochester, N. Y., has been visiting Toronto, Ont.

J. A. Floyd, New Liskeard, Ont., has sold out to James Goodyear.

Mayberry & Phillips, Wetaskiwin, Man., are moving to Lloydminster.

A. C. Stemshorn, Shubencadie, N. S., is absent from home and his business is closed up.

Chas. J. Whiten, Keewatin, Ont., has given a chattel mortgage for $950 to G. E. Whiten.

Jas. H. Tomlin and wife, Toronto, Ont., have given a chattel mortgage for $66 to D. R. McNaught.

Joseph L'Hereux, St. Catherine St., Montreal, was married Sept. 11, at the church of St. Edward.

Alfred Eaves, of Eaves Bros., Montreal, is traveling on business down in the St. Lawrence Gulf.

The Eckhardt Silver Plate Co., Toronto, Ont., has changed its style to the National Silver Plate Co.

Arnold Marchand, Port Elgin, Ont., has judgment obtained against him for $1.44 by W. H. Rowlands.

F. X. St. Hilaire, of Riviere du Loup, Que., was in Montreal last week for the first time in many years.

Wm. Eaves, the oldest jobber in Montreal, is in Quebec on business and for the purpose of revisiting old scenes.

Frank Patterson, who is manager of the watch repairing department of the Smith, Patterson Co., Montreal, is taking a vacation.

John L. Eaves, of Edward Eaves, Ltd., Montreal, has been spending some time at Sixteen Island Lake, in the Laurentian Mountains.

Mrs. I. L. Goldenstein, wife of I. L. Goldenstein, Montreal, has returned home after several weeks passed on the Maine Coast with her son.

The Canadian Government is installing 100 electric clocks in the Dominion Parliament at Ottawa, Ont. The clocks were made in Connecticut.

Harris Michalson, of the firm of I. L. Michalson & Sons, has returned to Montreal after an extensive trip to Europe. M. Michalson is now in the Lower Provinces I. Michalson is visiting customers in Ontario. M. L. Mittenthal is about to start on his journey to Manitoba, the North-West Territories and British Columbia.

The following jewelers were in Toronto during the two weeks of the Canadian National Exhibition, commencing Aug. 28: H. Ball, Thornton, Ont.; J. Bulger., Seaforth, Ont.; F. Clarke, Warkworth, Ont.; A. H. Smith, Tilbury, Ont.; H. Wendt, Clifford, Ont.; H. Urstadt, Waterloo, N. Y.; Geo. Hynds, Acton, Ont.; J. H. Porte, Picton, Ont.; W. W. Porte, Brighton, Ont.; F. Maynard, Campbellford, Ont.; R. Patterson, Kincardine, Ont.; C. E. Locke, Tara, Ont.; R. R. Dowsley, Prescott, Ont.; P. E. Byrne, Beaverton, Ont.; F. S. Chadwick, Simcoe, Ont.; A. M. Ball, Teeswater, Ont.; E. C. Daniels, Orangeville, Ont.; W. H. Roberts, Stratford, Ont.; Geo. A. Shaver,

Arthur, Ont.; N. F. Wilmot, London, Ont.; Jonas House, Welland, Ont.; I. Jenkinson, Lakefield, Ont.; J. T. Clark, Cobourg, Ont.; George R. Redmond, Harrowsmith, Ont.; J. E. Tindale, Woodstock; Savage & Co., Guelph, Ont.; G. W. Warren, Markham, Ont.; Sol. Hadly, Frankford, Ont.; W. S. Frost, Orillia, Ont.; Chas. P. Grill, Hespeler, Ont.; Roger Barker, Leamington, Ont; S. J. Vanstone, Burks Falls, Ont.; M. Boehmer, Berlin, Ont.; W. R. Hinchcliffe, Dunnville, Ont.; G. W. Kribs, Plattsville, Ont.; I. Wurster, Preston, Ont.; Chas. Fox, Walkerton, Ont.; A. N. Pequegnat, Brantford, Ont.; James Pequegnat, Stratford, Ont.; A. Matchett, Creemore, Ont., and E. L. Weiss, Bancroft, Ont.

W. S. Bartley has removed from Listowel, Ont., to Russell, Man.

The Ottawa Jewelry Mfg. Co. has dissolved partnership, J. B. Pollock having retired.

J. P. Park, Battleford, Saskatchewan, has removed to the adjacent town of North Battleford.

A writ has been issued against G. B. Richardson, Humbolt, Man., by Austin & Co. for $141.

One of the most notable events in the jewelry trade of Canada in many years was the opening of the new store of Ryrie Bros., at 136-140 Yonge St., Toronto, Ont., on Saturday, Sept. 2, attracting an immense crowd of visitors. The store front presents a very massive and substantial appearance, and the interior is fitted up with a combined splendor and elegance exceeding anything hitherto seen in the trade of Toronto.

### Recent Decisions by General Appraisers on Imitation Pearls and Belt Pins.

Cases involving the duty on articles of jewelry were decided recently by the Board of United States General Appraisers as follows:

Imitation Pearls.—Protest of Benedict & Warner against the assessment of duty by the Collector at New York. G. A. 6088 (T. D. 26553) followed, relating to imitation pearls.

Belt Pins—Jewelry.—Protest of Dieckerhoff, Raffloer & Co. against the assessment of duty by Collector at New York. Certain small belt or veil pins, classified under Par. 434, tarff act of 1897, were held to be dutiable under Par. 112 or 193, tariff act of 1897, as claimed by the importers.

The auction sale of the stock of C. P. Almroth, Brookfield, Mo., which was to have taken place about a week ago, was stopped by an injunction issued by the United States Court of Hannibal, and brought by the Myers Jewelry Co., of Kansas City, Mo., and other creditors, who have instituted bankruptcy proceedings in the Hannibal Court against Mr. Almroth. The action in bankruptcy was to come up for a hearing on Monday.

---

Two diamond firms have consulted counsel with a view to bringing proceedings against a barber, who is well known in the Maiden Lane district, having for nearly 20 years shaved a number of prominent New York jewelers. Several months ago he called on one of these merchants, saying that he knew where he could sell two diamond rings, and if the gems were entrusted to him he could make a little money for himself. The merchant says that he good naturedly gave the barber two stones and mountings, valued at $95, explaining that these goods could be used as samples, and smaller or larger stones mounted as the buyers might desire. When the merchant, a little later, while he was being shaved, incidentally inquired what had become of the stones the barber said that one of the men, to whom he had expected to make sales, had run away with the gems. The barber was summoned before a magistrate, who, after hearing the testimony, decided that there was no criminal intention on the part of the tonsorial artist, and that the diamond merchant's only recourse was to the civil law. Another firm had a somewhat similar experience. The decision of the magistrate has not been accepted as final, and there may be further developments.

## Fraudulent Imitations of Sheffield Plate.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY:

You will confer a benefit to the trade by republishing this exposure of the fake "Sheffield Plate" clipped from the *Pall Mall Gazette:*

Perhaps of all frauds that of making antique furniture is one of the most successful, so much so that even experts are often deceived. Austrian workmen are particularly clever at this kind of work. "Old" Sheffield plate is another well known fake, and even as you can get your latchkey dipped in silver on the Margate jetty for threepence, so is the faked "old" Sheffield "dipped." The design is first made in copper and then dipped—and, needless to add, shows the copper beneath after a few earnest applications of brush and plate powder. When you think how many years the genuine Sheffield will wear and wash and clean without showing the copper beneath, this seems a particularly wicked and vicious fraud on the collecting public. A partner in a high class firm of Sheffield silver mills once told my friend that they could easily make £5,000 a year more if they lent themselves to copying "old plate," which is now made with the sole intention of cheating the public.

Prior to 1850, an ingot of silver was soldered to an ingot of copper and were rolled out into sheets, from which were made waiters, cake baskets and other articles of hollow ware. The mount, of fruit or flowers, was stamped out of very thin silver, backed with lead and then soldered on the edges or borders of the articles. These goods having a thick surface of silver wore well and would stand wear for a half century or even more—and so gave a great reputation to Sheffield plate.

About 1845 or 1846 the process of electro plating was discovered in England and soon supplanted and displaced the old "close plating" process. Of recent years certain factories in Birmingham, Eng., have copied the old Sheffield patterns in copper and glazing them with not enough silver to last six months or a year. This miserable stuff floods the world and the antique shops masquerading under the name of Sheffield plate.

A few years ago one of our leading jewelers on Fifth Ave., New York, was deceived into importing a lot of this stuff. Upon receiving it they had it tested and found so little silver on it that they paid Rogers & Brother nearly $1,000 for replating it heavily.

Good plate, or nickel silver, is made in this country; in fact for style and quality no better or as good is made elsewhere in the world and he who will pay a fair price for a good article can always get it—but not in department stores. Yours truly,

Glen Ridge, N. J. G. C. W.

### Need of a Federal Law Covering Stamping.

FROM the comments, notices and letters received by this journal from members of the jewelry and kindred trades in all parts of the country it is evident that the movement inaugurated some time ago to introduce into Congress a bill forbidding interstate commerce in articles of gold and silver which shall have been improperly marked, is a subject of vital interest to all branches of the industry and one to which the retailer as well as the wholesaler and manufacturer must give careful attention, as its importance to the trade at large can hardly be dwelt upon too largely.

The bill which THE CIRCULAR-WEEKLY has had drafted and which will be introduced into Congress at the next session, is one that we can heartily recommend to the trade at large for its endorsement, inasmuch as it has not only been carefully drawn to put a stop to the fraudulent and spurious stamping of the precious metals, by which dealers and the public alike are swindled, but it has also been drawn to meet all the constitutional requirements necessary to bring the enactment of such a law within the power of the Federal legislature. To draw an act that will strike against the evil is not a work that requires much trouble or study, but to make this act one which would not be laughed out of the committees in Congress, on the ground of unconstitutionality, was a task exceedingly difficult, and was only accomplished after many years of study of the laws on similar lines which have been declared constitutional by the Supreme Court of the United States. That we have succeeded in having had drafted a perfect statute of this kind, is not claimed in any way by either this journal or the members of the trade who have endorsed the measure, and that slight amendments may have to be made before or after introduction is generally conceded. For this reason jewelers in all branches of the trade are asked to carefully consider the subject and forward any suggestions that they may have to this journal before the Act is finally introduced.

THE CIRCULAR-WEEKLY'S bill is not the only one drafted to meet the evil of fraudulent stamping by national legislation. A most drastic measure has already been put in the hands of Congressman Vreeland, of New York, for introduction into the House of Representatives, and it is announced that the New England Manufacturing Jewelers and Silversmiths' Association has appointed a committee to draft an act with the same purpose in view. This simply shows the vital importance attached to the subject by the trade in general, and it is sincerely to be hoped that before Congress is asked to seriously consider the question, the trade will be united in their support of one of the three bills. THE CIRCULAR-WEEKLY stands ready to give hearty and steadfast support to any measure which the trade at large wants, provided that the bill be of a general character, applying to the whole trade, and drawn in the interest of no clique, faction or particular branch of the industry; and further that it be a measure clearly constitutional on its face—one on lines similar to acts which the Supreme Court has decided are within the jurisdiction of the Federal Government. These qualities we can absolutely claim for our own bill, and for this reason alone it has our approval, but we will give equal support to any other measure having the same qualifications, no matter from whom or from what source it emanates. We consider this purely a fight for honesty and decency in business methods in which all interests and ideas should be made subservient to the one main purpose, that of obtaining just and honest protection to the trade and public as a whole.

### An Interesting Test Case.

A PROSECUTION was begun in New York Thursday under Section 361B of the Penal Code of New York that will be followed with interest by all members of the trade living in States having laws relating to the marking of silver, inasmuch as it will probably force an interpretation of the meaning of the clause relating to the use of the words "coin" or "coin silver," which is almost identical in all the statutes of States having laws on the subject. The complaint alleges that there is a violation of the code by the sale of spoons marked "Extra Coin Silver Plate," which bear a very small proportion of silver, the claim being made that the use of the words, "coin silver" in the mark is a violation of the statute, even when used in conjunction with the words, "extra plate." In this instance the words "coin silver" the first above the second separated the words, "Extra" and "Plate."

In support of this claim the complainant cites a conviction by the Court of Special Sessions of the Peace in New York (the same court in which the present case will come up for trial) of the manager of a store in New York who had sold a spoon bearing a similar mark, some years ago. The defendant in that case was fined $100, the court deciding that the mark was a violation of the law. In that case, however, no attempt was made to get a clear interpretation of the law from one of the appellate courts; the prisoner simply paid the fine and let the case end there. In the present instance there is no doubt that a stiff fight will be made, and the case probably carried to the highest courts of the State, that the statute may be properly interpreted. The defendant will no doubt rely on that clause of the law which provides that the mark or stamp must indicate and denote that the component parts of the article are 900 fine, and will claim that the use of the words "coin silver" in colocation with the other words of the stamp do not indicate such fineness.

Whatever be the outcome of the case it will be watched with interest by all who believe the State "stamping" laws to be important to their craft, because it will probably result in the knowledge of the full scope of the law in its application to forbidden marks when used in conjunction with other words or devices.

About $400 in money and jewelry was stolen from the establishment of Bilow, Rathbone & Co., So. Boardman, Mich., a short time ago by thieves, who dynamited the safe. Bloodhounds were sent out, but the thieves escaped.

## New York Notes.

No difference in the management of the American Watch Case Co., 9 Maiden Lane, will result from the death of Moses Weis, which was chronicled last week.

Mrs. Frances Louis Holmes, widow of the late Wm. Holmes, who was formerly in business in the jewelry trade in Maiden Lane, died last week at her home, 397 Sixth Ave., Brooklyn.

While a squad of policeman were passing one day last week, one of the horses became frightened at a passing automobile and backed into the window of Pickslay & Co.'s store, Fifth Ave. and 27th St., smashing the glass.

Oct. 23 is the day set for taking up the customs calendar in the United States Circuit Court. It is understood that an unusually large number of cases involving the duty on jewelry and kindred lines will be presented.

An action for damages has been brought in behalf of Robert Francis Wilson, by guardian, against the Ansonia Clock Co. It is claimed that the boy, while in the defendant's employ, fell down a stairway and was injured.

By mutual consent the firm of Bent & Kohl, diamond cutters and polishers, at 16 John St., has been dissolved, Daniel Kohl retiring. The business will be continued at the same address by the senior member, Charles H. Bent.

Calvin E. Fritts, a jeweler of Sag Harbor, L. I., has come into possession of a pair of duelling pistols, supposed to have been taken by Commodore Paul Jones, when the *Bon Homme Richard* captured the English frigate *Serapis*, July 23, 1779.

Samuel Hochhaus, with Malliet & Maxwell, New York, has returned to the office after a five weeks' illness at the Mount Sinai Hospital, where he was operated upon for appendicitis. Mr. Hochhaus is now almost fully recovered and expects to start this week on a trip to the cities of the east.

W. E. Cohn, of the Cohn Mfg. Co., 59 Nassau St., recently selected for the company's employ a force of men experienced in the manufacture of side and back combs. After this the concern will concentrate its business in imitation and genuine tortoise shell combs mounted in 10 and 14 karat gold.

In a series of illustrated articles being published in the New York *Evening Mail*, there appeared last week a picture of Wm. Scheer, manufacturing jeweler, 544 Fifth Ave. Besides calling attention to Mr. Scheer's jewelry business the article speaks of his predilection for yatching and fishing, and of the merits of his twin screw yacht, the *Venture*.

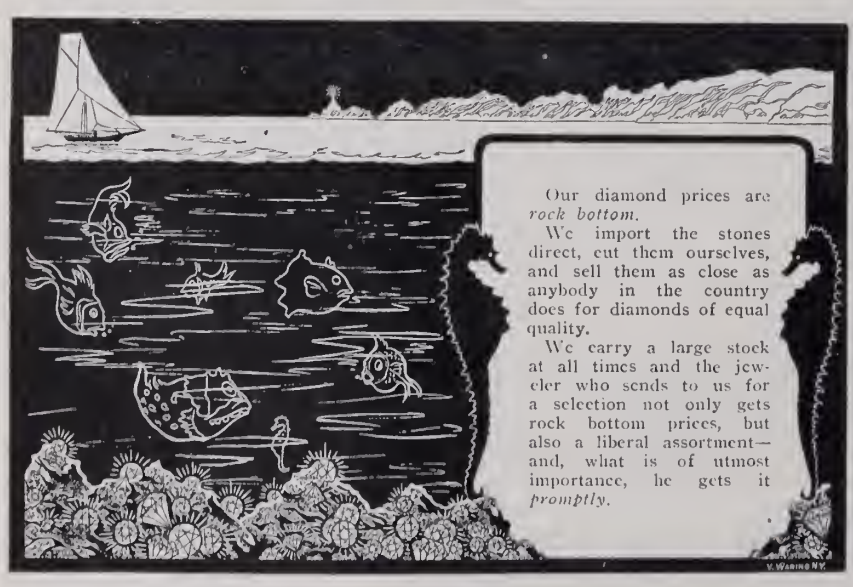
A man who gave the name of Frank Malone, 110 S. 2d St., Brooklyn, and said that he was a diamond merchant, was arrested Saturday night at Coney Island on a charge of intoxication. When he was searched at the station house there were found in his pockets about $1,000 in currency, and 25 diamond rings in which were set about 90 diamonds and other precious stones.

Articles of incorporation were filed last week at Albany by the Datos Diamond Dredging Co., which is to have offices at Warwarsing, in Ulster County, and is to engage in mining operations with the expectation of producing diamonds or precious metals. The authorized capital stock is $8,000,000, and the directors include: M. J. Fenton, W. S. Andrews and W. R. Mitchell, New York.

New York creditors of Robert Castelberg, Jr., have been informed that his relatives in Baltimore now know where he is and assurances have been given that all debts will be paid.

Dr. George F. Kunz, of Tiffany & Co., has received from the State Department at Washington official notice of his appointment as the delegate from the United States to the International Congress for the Study of radiology and ionzation to be held this month in Liege, Belgium. A diploma was also received last week by Dr. Kunz from the United States Government Board, Louisiana Purchase Exposition, in recognition of his services as collaborator in the Interior Department's exhibit in radio-activity.

The Irons Normandy Co., Atlanta, Ga., which recently opened New York salesrooms and offices at 14 Maiden Lane, will also conduct here the New York branch office of Simeon L. & Geo. H. Rogers, Hartford, Conn., manufacturers of plated ware, and also of the Middletown Plate Co., manufacturers of plated hollow ware. Joseph Irons, in charge of the New York office, has associated with him J. W. Ackerman and L. L. Axleby, and the three will call on the trade in the interest of the several houses.



In a political speech made last week by Thomas L. Reynolds, candidate for the Democratic leadership in the 27th district, he took occasion to deny a story that he had tried to pass two "queer" notes supposed to bear the name of the Ansonia Clock Co. He said that he was asked to buy two notes of the company for $50,000, and supposing that they were genuine he had agreed to take them, but that they were never produced, and he never even saw them. Afterward the report that the notes were forged was circulated.

Tiffany & Co., New York, won their contest in the Supreme Court in New Mexico which decided last week in the company's favor the suit involving the title to the celebrated turquoise mine, known as the Chalchuttę mine. Mariano F. Sena claimed a right to the land in a patent dating back to 1728. This is the second time that the courts in the territory have decided against him so that it is not expected that any further question will be raised as to the company's ownership of the mine from which it is said to obtain a large proportion of the turquoises used in its jewelry.

Entering the store of John Spiess, 1403 Broadway, Brooklyn, last Saturday, a well dressed young man asked to see a diamond ring which was in the show window. Mrs. Spiess, who was behind the counter, laid the ring on the show case, whereupon the young man grabbed it and ran. The police were notified but have not yet caught the thief. He is described as a man about 23 years of age, five feet six inches in height, weighing 135 pounds, slim, with light complexion, hair and mustache. He wore a dark suit and a derby hat with a flat brim.

*Importers and Cutters of Diamonds and Precious Stones*

43 Rue de Meslay, PARIS Telephone, 2188 Cortlandt 17 Maiden Lane, NEW YORK

A quarterly dividend of one per cent. on he preferred stock, payable Oct. 2, has been leclared by the International Silver Co.

Under the terms of extension a 10 per ent. dividend is being sent out by the Jew-lers Association and Board of Trade to he creditors of M. F. Smith, Indianapolis, nd.

Sigmund Wyler, 4 W. 28th St., will eturn next week from his trip abroad, dur-ng which he has visited the important cities of Germany, England, France, Italy and Switzerland. At Zurich he met his par-nts, who reside there.

Frank J. Pierce, who has been with the Wosoma Clock Co., in this city, for the last 10 years, has entered the employ of the Ses-sions Clock Co., at the New York office, 37 Maiden Lane, and will call on the jobbing rade in and around New York.

In making the preliminary arrangements r the departure of the members of the Boost Club, as well as the other New York rganizations, for the St. Louis Stationers' Convention, it has been practically decided to leave New York Saturday afternoon, ar-riving at St. Louis Sunday night. Members of the Boost Club, on making known now heir desire, will receive cards entitling hem during their stay in St. Louis to the privileges of the golf links and club house of the Glen Echo Club. All who intend to oin the eastern delegation are requested to notify at once L. E. Waterman, 173 Broad-way, New York.

Jewelry valued at $250 was stolen one night about a week ago from the store of Rudolph Benov, 641 Myrtle Ave., Brook-lyn. The side window was broken, giving an entrance to the thieves who then took six dozen rings, six parlor clocks, and some other articles. The police were notified and a day or two later one of the detectives ar-rested on the street Chas. McKeever, a 12-year old boy who wore an expensive-look-ing ring which was too large for his finger. The boy said that his sister had given him the ring, and when she was seen she said that it had been given to her by Geo. Reilly, 21 years old, of 31 N. Elliott Pl. Reilly was taken to the Police Station where sev-eral other rings were found in his posses-sion. He denied that he stole any of the rings, and said that he had bought from Mr. Benov the one which the McKeever lad was wearing when he was arrested. Reilly's examination was set down in the Myrtle Ave. Court for Sept. 19.

The affairs of James M. Bloomfield, a diamond broker, whose sudden death was announced Aug. 9 in THE CIRCULAR-WEEK-LY, have been practically adjusted without any litigation. For a time there was talk of suits being brought against certain pawn-brokers with whom Mr. Bloomfield pledged quantities of diamonds and other goods. Wm. Kleinschmidt, of Kleinschmidt, How-land & Co., 170 Broadway, took charge of matter on behalf of the several creditors, whose claims aggregated nearly $40,000, the widow being appointed administratrix of the estate at his suggestion. The effects of Mr. Bloomfield, including the pawn tic-kets, were turned over to Mr. Kleinschmidt, who in turn has allowed the several credit-ors, on submitting proper proofs, to obtain the tickets calling for their property. It is understood that the creditors have now re-deemed practically all the property which Mr. Bloomfield pledged, and their losses are not as high as they might otherwise be, as the amounts advanced by the pawnbroker were not nearly up to the full value of the goods.

According to charges made last week by Arthur J. Heaney & Co., pawnbrokers at 214 Atlantic Ave., Brooklyn, jewelry valued upwards of $10,000 was stolen by Mary Drennan, a scrub woman, who was placed under arrest. Her nephew, Michael J. Ryan, 20 years of age, was also arrested at Sheldrake, Sullivan County. Morris Lipp-man, dealer in pawnbrokers' goods at 600 Broadway, New York, was arrested on the charge of receiving a portion of the goods. The specific accusation against Ryan is the theft of a diamond ring valued at $350. Mrs. Drennan, the police say, made a con-fession that Ryan, who had lived at her home until a short time ago, devised a plan of plundering the pawnshop. While she was at work she had opportunities of picking up articles of value, and this pilfer-ing went on for a considerable time, without being discovered. John E. Dooley, the man-ager of the shop, says that recently a man who had pledged a $350 ring called for it, and when it could not be found, an inven-tory was taken which indicated that articles valued above $10,000 were missing. De-tectives questioned Mrs. Drennan and her arrest followed. In the Butler St. Police Court, Brooklyn, Mrs. Drennan was held in $3,000 bail to await the action of the Grand Jury, and Ryan was held in the same amount. Lippman denied that he had any knowledge of the fact that the goods were stolen and was held in $1,500 bail.

L. W. Adler, with L. Adler & Son, 87 Maiden Lane, who met with a peculiar acci-dent while in Philadelphia, about 10 days ago, is back in New York, and again able to attend to business. Mr. Adler went to the barber shop in the Continental Hotel in the Quaker City for the purpose of being shaved. While the barber poised the razor

above his lip, Mr. Adler suddenly sneezed with the result that the sharp razor gashed his nose, severing the cartilage. He was hurriedly taken to the Jefferson Hospital, where two stitches were taken in the nose, and the wound is now healing. Mr. Adler says that before the sneeze he had just time to raise a warning hand which, however, the barber did not heed. Postal cards having the salesman's picture with a mark across the nose have been sent out by him to the trade with the announcement, "They cannot kill me."

J. W. Armbruster, of the Illinois Watch Co., was among the visitors this week at the office of THE CIRCULAR-WEEKLY.

W. S. Ginnel, of Henry Ginnel & Co., 31 Maiden Lane, was one of the passengers on the Bar Harbor express bound for New York, which met with an accident one day last week. The engine became disabled and the train was for a time on a down grade, gaining speed, and beyond control. Fortunately the train came to a stop before any serious damage was done, and most of the passengers who were in the sleepers did not know that anything unusual had happened.

The 50th anniversary of William M. Harker's employment by the house of J. B. Bowden & Co., 1 Maiden Lane, was on Friday remembered by the firm in the gift of a handsome silver loving cup, and on Saturday by his fellow employes with a quiet dinner at a near-by hotel and another silver loving cup. Mr. Harker was a boy of 13 Sept. 10, 1855, when he went into the employ of the Bowden firm, and has remained with the house for half a century, excepting that time when he was fighting in the Civil War. He is now superintendent of the firm's factory. He was born in New York City on Sept. 28, 1841.

Mrs. Louis M. Archard will continue the business of her late husband, Edward T. Archard, at 208 West St., under the old style. James Calderwood, who for 20 years has been watchmaker for the concern, will manage the establishment. Mr. Archard died Aug. 18. He was the son of Edwin Archard, who established the business in 1836, and in 1874 opened the West St. store. In 1895 the son, who had learned the business with his father, opened a store on Columbus Ave., and in 1902 he succeeded his father in business.

A studio-workshop has been opened at 48 W. 22d St., New York, by Heineke & Co., a new firm which will make a specialty of the production of artistic jewelry to special order for the high class trade. The firm is composed of Alfred Heineke, who was until recently designer with Wm. Scheer; Charles Appeldorn, formerly with Tiffany & Co., and more recently with Wm. Scheer, and Hans Brassler, who was recently designer for McTeigue, Manz & Co. As Messrs. Heineke, Appeldorn and Brassler are all expert designers and practic workmen, the combination is regarde in the trade as especially happy and o that will no doubt be a factor in the achiev ment of success by the new firm.

In the store of Bernard Berkowitz, Cooper Sq., a young man called last we to see a diamond ring. The jeweler show several rings selling at $5, and the you man asked to see some of better quali A $50 ring was shown to him, and aft he had looked at it he said that he wou take one of the $5 rings, which he ask the jeweler to put to one side for him, sa ing that he would call for it in the eveni As the young man walked out the jewele wife, who had been watching him, grabb him by the collar and accused him of sli ping the $50 ring on his finger. Mrs. Ber owitz, who is a large woman, held the you man until her husband came to her assi ance. They called a policeman, who plac the young man under arrest, and the $ ring was taken from his finger. He w arraigned the next day before Magistra Finn, to whom he said that he had not i tended to steal the ring, but had paid $5 it, and intended to pay the remainder instalments. The Magistrate ordered t ring returned to the jeweler, and said th the young man could sue to get back t $5, unless the jeweler voluntarily return the amount.

## OUR TRAVELING REPRESENTATIVES.

**Travelers may consider these columns open for the publication of any items of interest regarding themselves or their confreres.**

Traveling representatives in Toronto, Ont., last week, included: J. Cohen, Sloves & Cohen, and F. T. Trebilcock, Trebilcock, Avey & Co.

Traveling representatives who visited San Francisco, Cal., recently, were: R. Rumson, H. F. Barrows Co.; H. F. Tourtellot, Waite, Thresher Co.; K. L. Taylor, Riley, French & Heffron; W. H. Thornton, Powers & Mayer; Mr. Kelckner, Theodore W. Foster & Bro. Co.; Ernest Block, Louis Stern & Co.

Among the traveling representatives who visited Indianapolis, Ind., last week, were: Charles E. Bride, Bride & Tinckler; Leo Heilhrun, Leo Heilrun & Bro.; Joseph Cowan; T. E. Bowne, E. Ira Richards & Co.; Bert Ganz, Gustave Fox Co.; W. H. Warrington, C. G. Alford & Co.; I. Price, Louis Strasburger's Son & Co.; Fred H. England, Frohlichstein & England.

Among the traveling representatives who called on the Louisville, Ky., trade, last week, were the following: Leverett S. Lewis, Jung, Staiger & Klitz; E. E. Field, Roy Watch Case Co.; Mr. Payne, L. Gutmann & Sons; Adolph Rosenthal; Henry McPeters, H. G. McFaddin & Co.; Mr. Wolff, Nat. Wolff & Co.; P. M. Hurley, W. J. Feeley & Co.; Chas. Miller, Weintraub & Co.; L. H. Smith, Bippart, Griscom & Osborn; Chas. E. Bride, Bride & Tinckler; Mr. Wolf, Carlowitz & Co.

Traveling representatives who called on the trade in Omaha, Nebr., last week, were: G. A. Jewett, Hamilton & Hamilton, Jr.; Edwin S. Strauss, Jacob Strauss & Sons; Chas. E. Howes, E. L. Logee & Co.; W. R. Eliot, International Silver Co.; Rud L. Kintz, E. G. Webster & Son; W. F. Neft, Maple City Glass Co.; Walter R. Shute, Kohn & Co.; Max Gluck, H. F. Hahn & Co.; R. A. Wilkinson, J. J. Sommer & Co.; Harry B. Kennion, Parks Bros. & Rogers; Frank W. Collom, J. J. White & Co.; G. W. Cureton, Henry G. Lefort; F. L. Pettee, Waterbury Clock Co.; William A. Lamb, Geo. H. Fuller & Son Co.; E. A. White, Geo. L. Vose & Co.; G. H. Howard, Mason, Howard & Co.; Mr. Melchor, Geneva Optical Co.

The following traveling representatives visited the trade in Lancaster, Pa., recently: E. W. Dellar, William S. Hick's Sons; D. Fox, Lyons Gem Co.; Mr. Claxton, Dennison Mfg. Co.; Robert V. Curran, F. W. Sackett; R. A. Hunken, J. B. Bowden & Co.; M. Scheinman, Rockford Watch Co.; F. C. Bonnan, F. & F. Felger; Thomas M. Schroeder, Schickerling Bros. & Co.; A. C. Wurster, Edward Todd & Co.; A. W. Bogart, Waterbury Clock Co.; Arthur L. Hancock, N. H. White & Co.; C. G. Walker, Pairpoint Corporation; Mr. Wally, Wolfsheim & Sachs; J. E. De Wyngaert, Scofield & De Wyngaert; Fred Crane, Mandeville, Carrow & Crane; Harry Lissauer, Jacobson Bros.; H. T. Day, Edmund E. Robert; Fred O. Peacock, Joseph Tomkinson; L. A. Burt, R. Wallace & Sons Mfg. Co.

The trade at Pittsburg, Pa., was, last week, visited by the following traveling representatives: Wm. Rosenberger, A. Wallach & Co.; J. R. Palmer, Schickerling Bros. & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; F. E. Winship, H. C. Fry Glass Co.; W. H. Shiman, Shiman Bros. & Co.; D. Schwab, Ciner & Sceleman; C. LeB. Snedeker, Rudolph & Snedeker; George L. Jann, C. F. Rumpp & Sons; Frank L. Wood, Ludwig Nissen & Co.; Wade W. Williams, Warren & Williams; Arthur Bradshaw, Meriden Britannia Co.; Donald LeStage, H. D. Merritt Co.; Wm. H. Middlebrook, B. A. Ballou & Co.; J. M. Morrow, American Watch Case Co.; Jesse Carpenter, Horton, Angell Co.; Charles S. Peckham, J. H. Peckham & Co.; Wm. F. McGowan, Chapman & Barden; C. E. Settle, estate of O. M. Draper.

The following representatives of wholesale firms were in Kansas City, Mo., last week: E. J. Walter, B. F. Briggs & Co.; Harry Scofield, Scofield, Melcher & Scofield; Charles Battey, Schofield, Battey & Co.; Fred Brigham, Cheever, Tweedy & Co.; Walter Marble, Bugbee & Niles Co.; W. S. Sparrow, Stern Bros.; Louis Jones, C. A. Marsh & Co.; Louis Fay, R. F. Simmons Co.; William Kl... ney, Theodore W. Foster & Bro. Co.; Frank ... lum, J. J. White & Co.; R. L. Clark, Towle ... ## Awards in Contest for Prize Designs ... Apprentices Workmanship.

SOME TIME ago attention was ca... these columns to the contest inst... by the *Journal der Goldschmiede-Kuns...* Leipsic, Germany, in which prizes were ... fered to jewelers who would furnish ... best drawings of designs, and to jewe... apprentices, who would furnish the ... specimens of workmanship. At the ... annual meeting of the Alliance of Ger... Jewelers, Gold and Silversmiths at Mun... held last month, a committee of the ... competent members of this alliance ... appointed to award the prizes and the ... lowing is the list of the awards as repor... by this committee:

FIRST CLASS—DESIGNS

First prize (100 marks) Motto "... Heinrich Joseph, Berlin.

Second prize (95 marks) Mo... "Auguste," Wilhelm Leitner, Breslau.

Third prize (50 marks) Mo... "Juwel II," Wilhelm Homburg, Hanau-on-Main.

Fourth prize (1 monogram album, v... 41 marks): Motto, "Prag." J. Reim... Hanau-on-Main.

First honorable mention Motto "M... Max Reichelt, Berlin.

Second honorable mention Motto ...

George Bastanier, jeweler, of Pforz-
n.

ND CLASS—APPRENTICES SPECIMENS OF WORKMANSHIP.

rst prize (30 marks): Motto, "Eviva
n," Berthold Fritze with William Pitt,

cond prize (20 marks): Motto, "Hans,"
s Gruhl with Paul Hoch, Berlin.
ird prize (15 marks): Motto, "Noris,"
ed Köhler, Nürnberg, with Wenzel
., Hanau.
rst honorable mention: Motto, "Gold
Platinum," F. Smith with Paul Hoch,
n S.
cond honorable mention: Motto, "Mis-
T Heinze with J. Th. Heinze, Dres-

ne others were also mentioned for
praiseworthy efforts.

pt C F Herrick, mayor of Indepen-
e, Ia., and a pioneer jeweler, died last
k of cancer of the intestines. Mr. Her-
came to Independence in 1856. He
a member of the 11th Illinois regiment
ng the war and afterwards, in 1864, of
46th Iowa infantry, as captain.

B. Andrews, Berwin, Ind. T., acci-
tally dropped a revolver from his pocket
ut a week ago, and the weapon dis-
rged the bullet, striking Mr. Andrews in
thigh and ranging upwards through the
stines. Death resulted a few hours
r. The deceased had conducted a small
ch and jewelry repairing establishment
he above mentioned place. It is believed
his relatives live in Texas.

## News Gleanings.

E. I. Dickinson has sold out his store in Gardiner, Ore., to E. Haskell.

Ferdinand Hirzy, Rhinelander, Wis., has left for his old home in Austria.

E. F. Renaud has succeeded to the business of Jules Renaud & Son, Keokuk, Ia.

The death is reported of I. H. Hart, a jewelry and curio dealer of Manitou, Colo.

Edward Sutter has been succeeded in business in Lewistown, Mont., by Sutter & Sutter.

C. E. Range, Trenton, Mo., has been appointed local watch inspector of the Q. O. & K. C. R. R.

Beinhorn & Meier, Winona, Minn., celebrated the second anniversary of their business career Sept. 2.

Adolph Fox, Lima, O., contemplates closing out his business, at that place, and moving to Philadelphia, Pa.

J. Harry Halt is enlarging his store in Mount Holly, N. J., and making extensive improvements in the interior

Daniel Sharp, Elk Point, S. Dak., has succeeded to the drug business of S. J. Eriksen, in Garretson, S. Dak.

F. D. Wermuth, New Matamoras, W Va., contemplates moving to Sistersville, in the same State, where he intends to continue business.

Fred E. Vaissiere has purchased the jewelry store of the late J. E. Veal, Jr., Rome, Ga., and after making alterations will open for business about Oct. 1.

The large plate glass window in the store of E. F. Starks, Newpoint, Ind., was recently broken by thieves who secured about $100 worth of stock. There is no clue.

Allen Peters, Allentown, Pa., was taken to a local hospital recently, suffering from lacerations and bruises sustained in an automobile accident. His injuries are not serious.

The floor in the store of Oliver P. Davis, Fulton, N. Y., was flooded by water during a severe storm, at that place, a short time ago. No serious damage was done.

The National Board of Fire Underwriters have offered a reward of $250, to stand good for one year, for the detection, conviction and punishment of the person who set fire to the home of John Krank, the Schenectady, N. Y., retail jeweler. The authorities are still conducting an investigation.

Theodore S. Little, East End, Pa., who mysteriously disappeared about two weeks ago, and for whose safety considerable anxiety was felt, was recently located in the west. Before going away, Mr. Little drew all his savings from the bank and also mortgaged his property, taking the proceeds, about $10,000, with him.

The store of M. Goldsmith, Ardmore, Ind. T., was entered a short time ago by thieves who stole a large amount of jewelry and watches. Warrants were subsequently issued for the arrest of the members of a gypsy camp, near Ardmore, but none of the stolen articles was recovered. The prisoners surrendered a promiscuous lot of silverware, valued at several hundred dollars, which the police believe is the result of their depredations.

Chicago.

Telephone:
4079 Central,
Chicago.

Vol. LI. CHICAGO, WEDNESDAY, SEPTEMBER 13, 1905. No. 7

## Chicago Notes.

A. M. Shepard is in the northwest for A. C. Becken.

Chas. E. Howes, with E. L. Logee & Co., is on a trip to Denver.

Chas. A. Garlick visited St. Louis and Kansas City last week.

John Hillinger, of R. J. Hillinger Co., is on a trip to the Pacific Coast.

R. W. Barlow, with C. H. Knights & Co., has returned from a western trip.

A. G. Larsen, with the Julius King Optical Co., is making a northwestern trip.

W. S. Sparrow, local manager of Stern Bros. & Co., visited Kansas City last week.

L. Prigozen, retail jeweler, 604 Milwaukee Ave., is confined to his home by a heavy cold.

M. H. Shiman, of Shiman Bros. & Co., New York, is expected here about the middle of the week.

The case of William L. Ely, arrested for robbing the store of A. W. Johanson, 270 Wells St., has been continued till Sept. 13.

Chas. E. Graves & Co. are closing out their stock of cut glass and say that in future they will discontinue the sale of this ware.

Chicago police are looking for $2,000 worth of jewelry stolen from a Toronto, Can., jewelry store. It is believed the jewelry was brought to this city.

The many friends of Max Noel, of Despres, Bridges & Noel, will be glad to learn that he left the Alexian Brothers' Hospital last week and is now able to attend to business.

Mrs. W. R. Smith, mother of C. T. E. Smith, who travels in the Central Western States for Reed & Barton, died on Sept. 4. Mr. Smith left for his regular trip last week.

C. D. Peacock was recently robbed of three diamond crescents and one of the brooches was pawned with the Harris Co. for $100. The latter firm notified the Pinkertons that the brooch was in their possession.

D. R. Wilson, formerly a prominent politician and jeweler of Shenandoah, Ia., was arrested in Chicago last week on a fugitive warrant and was taken back to Shenandoah. Wilson is accused of committing forgeries to the amount of $40,000.

Lillian M. Rich, wife of Elmer A. Rich, died at her residence, 959 Park Ave., Thursday. Mrs. Rich had been in ill health for some time and had only recently returned from the coast. The interment took place at Rose Hill yesterday afternoon.

An "Elgin Jewelry Co." was recently incorporated at Keokuk Ia., with a capital of $15,000. John Elgin is named as one of the incorporators. The Elgin National Watch Co. has the new concern under investigation and as in the past will take steps to protect the name which it has made famous in case it is clear that the new company infringes on the trade name of the watch product.

The machinery and fixtures of Henry E. Cohen, doing business as Henry E. Cohen & Co., was sold last week to satisfy a chattel mortgage given to secure a loan of $300. Mr. Cohen's liabilities are not heavy. He owes Goldsmith Bros., the refiners, about $150. E. A. Munger, an attorney, has claims against Cohen for $700, divided between the Elmer Rich Co., Alfred H. Smith & Co. and Sam Bernstein.

Edward Menkin, a lawyer, has sent out a letter to the creditors of the Marquardt & Scott Co., bankrupts, giving what he claims is the condition of the estate and ending by offering to buy the claims of the creditors at 15 per cent. of their face value, which amount he thinks is a good offer in view of the expenses yet to come out of the assets at hand. This offer is not looked upon with favor here. It is believed that the estate has enough money to pay 25 per cent. or over and a first dividend will shortly be declared. Mr. Menken represents the claim of Max Silverberg.

A verdict rendered by a jury in Judge Barnes' Court Thursday morning resulted in considerable criticism. Judge Barnes did not attempt to conceal his displeasure and discharged the jurors from further service. The case was that of Frank McCann, who was arrested on suspicion of having robbed the jewelry store of Ernest S. Whitehead, 996 W. Lake St. According to the sworn testimony of the detectives who arrested him, about $200 worth of semi-precious stones was found on McCann's person. The jury brought in a verdict of not guilty.

An interesting controversy growing out of the failure of the defunct Marquardt & Scott Co. has come to light. Jas. W. Clark, who bought the accounts, is seeking to recover from G. W. Luck and Oscar Mehts money claimed to be due on diamond purchases made by the latter, who conducted tailor shops. Luck bought two diamond rings at $195 each on the instalment plan. After making a cash payment, Wm. Renich and Otto H. Marquardt bought some clothes from him. Luck claims that the gentlemen bought more clothes than his debit amounted to, but they did not give him back the mortgage which he signed. He claims they owe him $28. The books of the Marquardt & Scott Co. show Luck owes $45. Mehts bought a ring for $200. His credit shows he paid $130 and owes $70. Mehts says he has paid it up in clothes bought by Marquardt and Renich and that they owe him $80. He did not ask for his mortgage and it was not destroyed. Clark has the mortgage, Renich and Marquardt have the clothes, and Luck and Mehts have a suit on their hands.

## St. Louis.

TRADE CONDITIONS.

St Louis, during the past several weeks, has been filled with visiting merchants, many jewelers being among the number. Liberal purchases have been made, and all of the jobbers report a most satisfactory business.

W. F. Kemper, secretary of the Retail Jewelers' Association, is spending his vacation in Colorado.

Alvin L. Bauman, president of the Bauman Jewelry Co., has returned from a visit to New York.

John Bolland, president of the J. Bolland Jewelry Co., has returned home after an extended trip east.

Miss Beatrice Daly, daughter of J. Daly, of J. F. Daly & Co., has just returned from a visit to Chicago.

S. E. Heffron, with the John Bolland Jewelry Co., has returned from his vacation, spent in Wisconsin.

George R. Stumpf, accompanied by his wife and mother, has returned from a few weeks' trip to California.

J. F. M. Lloyd, Pond Creek, Okla., spent several days in St. Louis last week, on the way to visit relatives in Iowa.

M. Bauman, of the L. Bauman Jewelry Co., and Miss Bauman, have returned from a pleasure trip, spent in Europe. They were absent five months, during which the

nt much of their time in Amsterdam, ris and Antwerp.

A. Kurtzeborn, Sr., of A. Kurtzeborn & ns, 308 N. 6th St., has returned from a cation of nine weeks spent at Battle eek, Mich.

The Retail Jewelers' Association met last ednesday, but only business of a routine ture was transacted. President Herman uch presided.

J. T. Wells, who travels in the west for Bauman-Massa Jewelry Co., spent last ek at headquarters replenishing his stock. reports doing an excellent business.

R. B. Sheridan has resigned his position assistant advertising manager for the ermod, Jaccard & King Jewelry Co., to come advertising manager of the Simmons Co., a Broadway department store.

Among the jewelers who purchased supplies here last week were the following: C. S. Erber, Texarkana, Ark.; Fred Studer, Waco, Tex.; E. H. Sears, Glasgow, Mo.; C. L. Glines, Harrison, Ark.; S. Fuller, of Barefield & Fuller, Trenton, Mo.; George P. Vogt, Montgomery, Mo.; M. Pilcher, Mexico, Mo.; J. C. Faulkner, Russelville, Ark.; S. G. Parker, Newport, Ark.; C. B. Cook, West Point, Miss.; H. Altemueller, of Altemueller & Bro., Washington, Mo.; C. C. Stevenson, Pittsburg, Kan.; A. Swink, Quincy, Ill.

The business of the late Jos. W. H. Meacher, Charleston, S. C., has been discontinued.

## Pacific Northwest.

F. T. Keeler, Skagway, Alaska, has sold out to J. Ikieta.

C. T. Pomeroy, Salem, Ore., has returned home after three weeks spent in San Francisco buying stock.

Jacob Yund, Helena, Mont., is now visiting in Southern California with A. H. Woodward, Whittier.

The jewelry stock included in the estate of E. Andernach at Victoria, B. C., has been closed out at auction.

J. D. Leys, Butte, Mont., donated a handsome silver loving cup to the successful team in the Labor Day baseball game at Butte. The cup was inscribed by the donor with the name of the winners.

## Minneapolis and St. Paul.

TRADE CONDITIONS.

The week of the Minnesota State Fair brought more retail merchants to Minneapolis than have been there in several years. Local jobbers all report a larger list if visitors than usual. It is noted, however, that the volume of individual bills bought, has not been very large, but it seems that there are more numerous purchases of smaller lots of goods. The reports of the outlook are good, and merchants are expecting to do business this Fall on a scale larger than was anticipated a year ago.

Ernest Brunat and Walter Fleck have opened the Twin City Watchmaking and Engraving College, with offices at 404 Dayton block, 710 Nicollet Ave., Minneapolis.

The various jewelers who went hunting last week have all returned, most of them bringing with them a fairly well-filled game bag as evidence of their prowess with the shot gun. The prairie chicken crop this Fall has not been as good as usual.

The sale of a lot of cheap jewelry owned by an Iowa concern has brought several dealers, druggists and jewelers of the Northwest and the Twin Cities, into court recently. The sale is made on a plea of placing one of a few agencies in a city, and what is alleged to be a contract to that effect is signed. Within a short time after there arrives a lot of goods, valued at about $400, which are claimed to have been ordered, and the contract for agency proves to be an order for goods besides. The sale has been attacked several times on the ground that fraudulent representations have entered into the transaction to the extent of vitiating the contract.

Among the retail jewelers who called on the wholesale trade during the past week, were: C. O. Querna, Madison, Minn.; George H. Hopkins, Redfield, S. Dak.; Klemme Jewelry Co., Albert Lea, Minn.; J. Johnston, Estherville, Ia.; R. A. Sturgeon, Canton, Minn.; H. Princen, Minneota, Minn.; L. T. Dillon, Litchfield, Minn.; G. W. Dillon, Manly, Ia.; A. L. Mealey, Delano, Minn.; C. A. Westerbaum, St. James, Minn.; H. J. Heram, Elbow Lake, Minn.; Olson & Fjelstad, Blooming Prairie, Minn.; S. Perlman, Washburn, Wis.; L. A. Freeman, Cloquet, Minn.; J. Geiwitz, La Crosse, Wis.; Peterson & Williams, Cannon Falls, Minn.; George L. Rochat, Ada, Minn.; E. P. Long, St. Cloud, Minn.; Fred Soderberg, Braham, Minn.; Wm. Krohn, Annandale, Minn.; George K. Munro, Grand Forks, N. Dak.; C. W. Slocum, Cando, N. Dak.; I. Bunker, Superior, Wis.; W. W. Beebe, New Richmond, Wis.; C. O. Peterson, Lowry, Minn.; Mr. Torpenning, Chamberlain, S. Dak.; Grant Vickers, Rock Rapids, Ia.; C. W. Wick, Clark, S. Dak.; S. W. Hayward, Centerville, S. Dak.; Delang & Mann, Volga, S. Dak.; A. P. Brobeck, Long Prairie, Minn.; Ingram Bros., Menomonie, Wis.; J. W. Rhodes, Hawley, Minn.; Chas. Swedberg, Hopkins, Minn.; Paul Togstad, Mason City, Ia.; Chas. A. Skoog, Excelsior, Minn.; Chas. Wessalie, Waconia, Minn.; J. B. D. Wagner, Morton, Minn.; A. S. Hymark, Battle Lake, Minn.; Wm. Slade, Alexandria, S. Dak.; L. H. Julsrud, Rushford, Minn.; M. G. Van Loan, Spring Valley, Minn.; Sam Evander, Maddock, N. Dak.; M. A. Brann, Frederic, Wis.; R. S. Swarthout, Pine Island, Minn.; W. S. Blake, Duluth, Minn.; Gus Chellin, Dassel, Minn.; G. A. Lacey, Wahpeton, N. Dak.; E. E. Wheeler, Cando, N. Dak.; Chris Nygaard, Brownton, Minn.; F. W. Estabrook, Blackduck, Minn.; C. A. Lovine, Maple Plaine, Minn.; Swan C. Hilleman, Murdock, Minn.; D. McGruer, Hannah, N. Dak.; E. J. Steuerwald, Two Harbors, Minn.; H. H. Albertson, Ridgeway, Ia.; Bessessen & Steen, Albert Lea, Minn.; H. H. Buck, Goodhue, Minn.; Dr. Bilden, Northwood, N. Dak.; A. G. Rost, St. Peter, Minn.; T. J. Thompson, Barron, Wis.; M. Feinberg, Ironwood, Mich.; A. O. Banks, Michigan, N. Dak.; Wm. F. Baier, Granite Falls, Minn.; A. G. Johnson, Ada, Minn.; Peever-Gorham Mercantile Co., Sisseton, S. Dak.; John Fisher, Milnor, N. Dak.; J. L. Egleston, Wadena, Minn.; Mr. Jacobson, Colfax, Wis.

The Mesa Grande Tourmaline & Gem Co., a corporation whose management is in the hands of prominent business men of Los Angeles, Cal., has begun development work on its tourmaline lands in San Diego, which were recently secured from C. O. McCarroll. H. E. Folkenson and Robert A. Read, who recently returned to Los Angeles from the company's property, brought back with them a number of samples.

## Pacific Coast Notes.

Geo. W. Collis, Pasadena, Cal., is away on his vacation.

Charles F. Schwerer, Pomona, Cal., has added a stationery department.

C. Z. Zilles, Pomona, Cal., was in Los Angeles on business last week.

Benj. C. Crandall, Pasadena, Cal., has just returned from a trip to San Francisco.

Mr. Williams, San Bernardino, Cal., has moved his stock one block further east on Main St.

E. Gerson, Los Angeles, Cal., has renovated his store and added a line of carved ivory stock.

Joseph Zemansky, Sacramento, Cal., has just returned from a trip to the fair at Portland, Ore.

Peter Johnson, Angels Camp, Cal., returned recently from a pleasure trip to Portland, Ore.

Chester Hough, Blue Lake, is spending a week's vacation on Redwood Creek in the hope of capturing some big game.

C. M. Hanf, San Bernardino, is improving his store by putting in a new horseshoe case and other fixtures of modern design.

O. McCarty, Modesto, Cal., is in charge of Fred F. Daunt's jewelry store in Merced while Mr. Daunt is taking his vacation.

H. E. Fox, Albuquerque, N. Mex., left Monday for a visit to Kitchner, B. C. He will return to Albuquerque by way of Portland, Ore., where he will visit the fair.

J. E. Grant, Los Angeles, Cal., who has been confined to the hospital for some time, has recovered his health and resumed his business duties.

C. W. Ernsting, San Diego, Cal., recently purchased the building which he has occupied for some time past. He has added new fixtures and a new cut glass department.

B. Anixter, Point Richmond, Cal., sustained a severe loss in a recent fire at that place. Besides the fire loss, amounting to about $3,000, Mr. Anixter's flat was ransacked by thieves, who took advantage of the excitement and secured money and jewels valued at $500.

ESTABLISHED 1854. INCORPORATED 1893.

JUERGENS & ANDERSEN CO.,
DIAMONDS,
MAKERS OF FINE JEWELRY,
92 TO 98 STATE STREET,
CHICAGO.

23-25 Looijersgracht Amsterdam, Holland.

## Cincinnati.

A. Schemel, Central Ave., with his wife, taking the Lake trip and will make a ort stay at Mackinac.

D. Jacobs, of D. Jacobs & Co., with his mily, has returned from a two months' journ at Atlantic City and other points.

Lindner & Co., Carlisle building, the past eek have increased their office force in der to meet the demands of their growing siness.

C. S. Bennett, bookkeeper for the Frank erschede Co., with Mrs. Bennett, has re- rned from an eastern trip of several eeks' duration.

Herbert Oskamp, of the Oskamp Jew- ry Co., 5th and Vine Sts., is at business gain after a vacation spent at his Summer me in Kentucky.

Adolph G. Wilkining, diamond setter ith his brother, W. H. Wilkining, Linton ilding, has left for St. Louis and is con- mplating locating in the west.

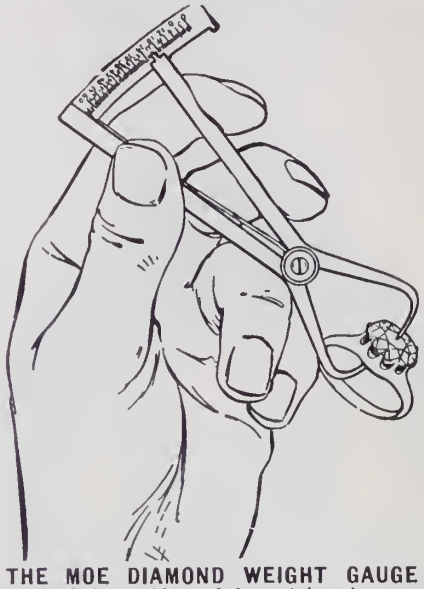
"The History of Ohio and Its Great len," of which Edward Simper, 709 Vine t., is managing, is completed and is re- orted to be meeting with a successful re- ption.

Louis Rauch, Commercial-Tribune build- g, has added Cass Goldberg to his office aff. Frank B. Decker, watchmaker for is house, with his wife, is visiting Old oint Comfort and other eastern points.

Charles Le Roy Harding, alias Le Roy harles Blazer, who was recently tried in incinnati for obtaining goods under false retenses, is now serving a year in the enitentiary at Columbus, O. The past eek word came from Sheriff Boyd, of exas, wanting to know when Texas au- horities should make requisition for Hard- g, as he is wanted in Morgan, Tex., to nswer charges of crimes similar to those ommitted in Cincinnati.

I. N. Pollock, Ashland, Ky., last week otified Cincinnati friends that a burglary ad been committed at his store on the ight of Sept. 4. Mr. Pollock sleeps over is store, but did not hear the thieves, who ained entrance by cutting a panel out of rear door. About $500 worth of stock as taken and the cash drawer was rifled f $3 in pennies, but $10 in currency was overlooked by the robbers in their haste. Police have so far been unable to trace the thieves.

Crowds thronged the handsome store of George H. Newstedt, at his new location at 4th and Race Sts., on the opening day, Sept. 5, and highly praised the establishment. The stock, most of it new for the opening, was shown to a good advantage in rich, up-to-date mahogany and plate glass cases, while large marble pedestals, surmounted with bowls of cut flowers, grace the aisles. Rich, massive wall cases resting against daintily tinted blue walls gave a tone and rich appearance in keeping with the fine stock displayed.



Detectives last week called at the stores of the Frank Herschede Co., 24 E. 4th St., and the Duhme Jewelry Co., 19 W. 4th St., to have the firms identify photographs of John H. Sloan and Esther Wright, illustrations of whom appeared in THE CIRCULAR-WEEKLY, Sept. 6. As told last week, the pair were arrested in Albany, N. Y., for stealing diamond rings by substituting rings with small stones. It was first thought the couple were the same parties who secured diamonds last Spring from the Herschede and Duhme stores, but this is doubtful, as even on a close examination of photographs a clear identification could not be made.

Out of town jewelers who called on the trade here last week included: F. W. Birchard, Tiffin, O.; Ed. A. Krekel, Louisville, Ky.; J. I. Hoke, Ridgeville, Ind.; J. W. Wehrly, Portland, Ind.; C. G. Schlenker, Eaton, O.; B. Sax, Gallipolis, O.; Charles Monson, Carlisle, Ky.; Owen Sherwood, Falmouth, Ky.; Mrs. A. H. Beer, Versailles, Ind.; M. T. Graham, Portsmouth, Ark.; H. A. Rohs, Cynthiana, Ky.; R. J. Timmerman, Batesville, Ind.; Edw. Daunacher, C. H. Thomson & Co., Greensburg, Ind.; G. H. Hansgen, Bethel, O.; Charles G. Sederberg, Milford, O.; Walter T. Eisensnuth, Charleston, W. Va.; A. T. Maupin, Athens, O.; W. I. Carroll, Lebanon, Ky., and Le Pedes Bros., Dayton, O.

The A. P. Craft Co.,

Manufacturing Jewelers,

INDIANAPOLIS, IND.

Emblem Goods. Special Orders.

## Indianapolis.

TRADE CONDITIONS.

The State Fair brought thousands of visitors to this city and trade was brisk during the week, there being a good demand for small jewelry articles and novelties. Local merchants express themselves as being satisfied with the outlook. Manufacturers are working overtime in an effort to keep up with orders. Collections are reported to be satisfactory.

John Brady, with Ikko Matsumoto, has returned from a week's vacation.

Carl L. Rost and Mrs. Rost spent part of last week at the Crawfordsville fair.

Augustus P. Craft, head of the A. P. Craft Co., is confined to his home by illness.

Miss Weaver, daughter of W. S. Weaver, Knightstown, Ind., visited friends in this city last week.

J. H. Reed has returned from a business trip to Paris, Ill., where he formerly owned a retail jewelry store.

The Hoosier Jewelry Co., which was recently incorporated, will open a new store in the Traction and Terminal building about Oct. 15.

While in this city last week, George W. Clemons, Greenwood, Ind., announced that he had moved his stock into larger and better equipped quarters.

Mrs. Julius Walk and daughter, Miss Julia Walk, who have been spending the Summer at Mackinack, has gone to Harbor Springs for a few weeks.

H. Cohen & Sons' new store, at Pennsylvania and Market Sts., is one of the handsomest establishments in the city. It is furnished throughout with mahogany and French plate glass windows.

L. M. Ratliff, formerly of Francesville, Ind., was in this city last week. He announced to his friends that he had sold his jewelry store and had accepted a position with a supply house in Colorado Springs, Colo.

Among the out of town jewelers who visited the local manufacturers and jobbers last week, were: F. Pennington, Knightstown; J. W. Hudson, Fortville; J. A. Meissen, Cicero; George W. Clemons, Greenwood; Bernard Maier, Edinburg; J. A. Pickett, New Castle, and J. Henry Smith Greenfield.

## Omaha.

Joseph P. Frenzer and family have gone to Blue Lake, Ia., on a fishing trip.

J. C. Christianson has taken a position as watchmaker with Fred Brodegaard & Co.

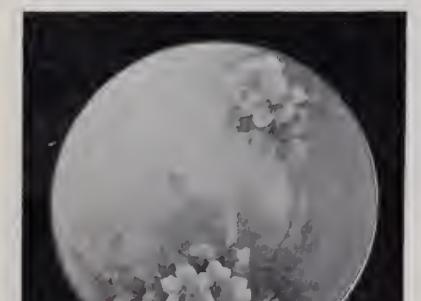
H. Holmes, with Fred Brodegaard & Co., has returned from a vacation spent in Blair, Nebr.

C. L. Shook, of the Shook Mfg. Co., left last week on a six weeks' trip to the Pacific coast.

E. I. Jones, with S. W. Lindsay, visited his old home in Hamburg, Ia., for a few days, last week.

Miss Wilson, cashier for the Mawhinney & Ryan Co., is spending her vacation in the Black Hills.

George Giacommi, accompanied by his mother and sister, is at present sojourning at Blue Lake, Ia.



Mary Groff, Duluth, Minn., and Edward Ring, Hooper, Nebr., have taken position with T. L. Combs & Co.

A. W. Taylor, Oakland, Ia., was a visitor in this city for a couple of days last week while on his way to Denver.

H. E. Butterfield and wife, Hamburg, Ia., spent a few days in Omaha while en route to Seattle and the Pacific coast last week.

William Harthman, Oxford, Nebr., was in this city, last week, buying goods, and selecting a handsome outfit of new fixtures for his store.

J. F. Mawhinney, of the Mawhinney & Ryan Co., accompanied by his wife and

ughter, is home from a two months' stay the Catskill Mts.

Albert Edholm returned, last week, from fishing trip through the wilds of northn Minnesota and Wisconsin. He reports e most enjoyable feature of his trip as a at race with a swimming bear.

The following out of town dealers were this city, purchasing stock, last week: F. Griffin, Tekamah; William Hartman, xford, C. F. Collins, Dunbar; N. G. Hann, Upland; B. Martin, Belden; J. W. rabill, Plattsmouth; F. Temons, Sidney, ; F. A. Shaver, Buffalo, Wyo.

The firm style of the Reichenberg-Smith has been changed to the A. F. Smith o. Negotiations were closed whereby the F. Smith Co. acquired the business of the her concern and L. S. Reichenberg and A. Reichenberg have retired from the rm. A. F. Smith, who has been president the old firm, is president and manager the new concern. Louis and Arthur Metz e interested in the business and ve been made directors. The A. F. Smith o. is one of the largest jewelry firms in e west and under the old name has been business 12 years in Omaha. The business will be enlarged this Fall by the addion of more salesmen. No changes will ke place in the working force of the store. he Reichenberg brothers have not decided hat they will do permanently, but it is rumored that Louis Reichenberg will remain Omaha and go in the real estate business, hile Max will remove to Cincinnati, O. either will engage in the jewelry business. he new firm will occupy the present location for at least a year.

## Rochester.

TRADE CONDITIONS.

Prospects for the Fall season are good. Merchants report a steady increase in business and an exceptionally large sale of watches. Jobbers are busy getting out orders from the road and say their sales are very good. August as a whole was good as several conventions and a large number of weddings brought quite a little business to the retailers here.

F. F. Pulver, of the defunct F. F. Pulver Co., was discharged from bankruptcy by Judge Hazel in Buffalo last week.

When Clarence M. Hall, alias George Moon, alias A. A. King, last Monday reached the prison gates of the Ohio State penitentiary, Columbus, O., where he had completed a year's imprisonment for attempting to swindle a Cleveland jeweler out of a valuable diamond ring, he was promptly re-arrested by Detective McGuire of this city. Hall is wanted here on a charge of grand larceny and forgery. In July, 1904, discharged, Hall entered the jewelry store of R. R. White & Co., on Main St., E., and asked to be shown some diamond rings. He finally selected a solitaire valued at $140, in payment for which he tendered a check drawn on the Fidelity Trust Co. The clerk telephoned to the bank and was told that Hall was a depositor there. The check was accepted and Hall disappeared. Later in the day it was found that the check was worthless. Hall had left a worthless check at the bank also. Hall was identified by a photograph taken since he was arrested at Cleveland.

## Kansas City.

TRADE CONDITIONS.

The jobbers are having a breathing spell for the first time in many weeks. They are now busy getting supplies for the big trade which they expect will begin to flow in beginning Sept. 15. Collections are good. The present demand for diamonds, watches and colored gold novelties is the heaviest the Kansas City jobbers have ever had.

Charles Mott, Gardner, Kan., was a Kansas City visitor last week.

The wife of Harry B. Carswell is visiting relatives in Boston, Mass.

The night classes of the Kansas City Polytechnic Institute will begin Sept. 15.

J. M. Coffman, a Kansas City buyer, has moved his goods from Palo, Mo., to Salisbury, Mo.

Charles A. Thomas, Norborne, Mo., a Kansas City buyer, has sold his business to R. E. Mesher.

C. D. Hunt, Garnett, Kan., was a Kansas City visitor last week, returning from a two weeks' stay in Colorado.

C. M. Weed, entry clerk for the Woodstock-Hoefer Watch & Jewelry Co., is dangerously ill with typhoid fever.

A. S. Fonville, Wichita Falls, Tex., has been added to the list of Kansas City buyers. He replenished stock here last week.

Carl Edwards, formerly order clerk, then traveler for the Edwards & Sloane Jewelry Co., is now a road hustler for a St. Louis jobbing house.

The daughter of Calvin I. Lee, a Mrs. Poinsett, died last week at the family home in Kansas City, Kan., where Mr. Lee is a well-known jeweler.

J. B. Schmelz was fined $50 in Police Court recently on a charge of conducting a pawnshop without a license. He appealed to the Criminal Court.

The W. L. Wilson Jewelry Co. has moved from 8th St., near Grand Ave., to W. 9th St., near Baltimore Ave., opposite the New York Life building.

"The retailers of the southwest are close readers of THE CIRCULAR-WEEKLY," said a jobber, the other day. "We find evidences of that fact in our mail every day."

J. Appeny, a Kansas City retailer who sold his business a year or two ago, to promote a patent belt buckle for machinery shafting, is looking about for a location here.

The trade here has been notified that F. E. Pirtle & Co., Council Grove, Kans., have purchased the stock of I. Newton Nash, at Anthony, Kan. Mr. Pirtle will conduct both stores.

The wife and two daughters of Charles C. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., have returned from an outing which reached from Boston to the woods of Wisconsin.

C. P. Kionka, of Kionka & Stuhl, has left the fringe of the yellow fever belt and started north. Before returning to Kansas City he will "tour" Michigan, Minnesota, Wisconsin and Iowa.

L. T. Brenner has been arrested on a warrant charging him with conducting a pawnshop without a license. One Porter Coontz borrowed $1 on a valuable, and he says he was charged 25 cents a day as interest for the loan.

Five graphophones, with recorders, are now used by the Edwards & Sloane Jewelry Co., for correspondence purposes. "They are time savers and money savers," is the praise bestowed upon them by the firm. The girls who do the typewriting are also pleased with them.

"The corn in Nebraska is 16 feet high and the yield per acre this year will be the largest in the State's history," said Ed. Villmoare, a traveler for the C. B. Norton Jewelry Co., recently. 'The retailers there are preparing for a big business. The trade outlook for them and the jobbers was never better."

Emil Frederick Hornikel, an expert engraver in the employ of the Jaccard Jewelry Corporation, is about to publish a work on engraving. All the engravings will be samples of his work. He has already published and distributed two similar volumes. He came to Kansas City from Chicago three months ago.

## Cleveland.

TRADE CONDITIONS.

Retail jewelers here believe that they will have an excellent business the coming Fall and during the holidays. Some of them are already receiving their holiday stocks, although they must store them for some time before they can be put on sale. Jobbers also report that their men are doing a good business on their first trips and they expect a heavy trade all Fall.

George Bain, of the Sigler Bros. Co., has returned from a vacation of two weeks, which was spent at Muskoka Lake, Mich.

Karl Einig, representing the new Toledo house of the Merrill & Broer Co., was in this city a few days ago, while making a tour of the northern part of the State.

Sydney Y. Ball, of the Webb C. Ball Watch Co., returned from a trip up the lakes a few days ago, where he spent a pleasant vacation. Business then took him to Chicago for a few days.

Iron and steel workers have been on a strike and as a consequence work on the Taylor building and arcade on Euclid Ave., where the Webb C. Ball Watch Co. will locate when completed, has been delayed.

Charles Liebenauer, who has been in business at Euclid Ave. and Doan St. for a number of years, will shortly move to a fine room at the corner of Euclid and Fairmount Aves.

Herbert W. Burdick, of the Bowler & Burdick Co., had an experience last week which he will probably remember for a long time. He went up the lakes with friends on a large freight boat and was caught in the terrible storm which raged over Lake Superior for two or three days. Mr. Burdick would have returned home several days ago, but the boat lost much time and was nearly a week overdue.

The Board of Review is contemplating an increase of about $100,000 to the personal tax return of the jewelers in town. An itemized statement of the separate returns of 17 of the leading dealers has been prepared. Opposite each return the board has set a figure to which they expect to raise the valuation reported. The aggregate tax return for stocks in trade is $214,510, and the board hopes to raise this to $312,500, an increase of $97,990.

Shelton & McMath, Hope, Ark., have dissolved, and the business will be carried on by Sam McMath.

"AN AERIE has just been organized in our city. Send good line of Eagle goods." This from a jeweler with whom we had never dealt. We sent him a large assortment and he sold a lot of emblems, wrote how pleased he was with the selection, and ordered other goods. That's a jeweler satisfied and a customer made. Any Eagles in your city?

## Pittsburg.

William Heeren, of Heeren Bros. & Co., is in New York on business.

The Chessman Optical Co. has a very creditable exhibit at the local exposition.

M. A. Mead & Co., of Chicago, have opened a branch store in the Farmers' Deposit Bank building in Fifth Ave.

John F. Zugsehwert, Carnegie, Pa., accompanied by his wife, has gone to Portland, Ore., to visit the Lewis and Clark Exposition.

William Hoffman is home from Point Chautauqua, where he and Mrs. Hoffman chaperoned a party of 25 young people, having taken a cottage there.

Heeren Bros. & Co. have an exhibit at the Pittsburg Exposition, which opened last week. The exposition is attracting many out-of-town people to this city.

The father of the members of Horovitz Bros., in E. Ohio St., Allegheny, died several days ago. The young men have the sympathy of the trade in their bereavement.

Howard Hall, the thief who was caught in the store of Graf & Niemann several weeks ago, will be arraigned before the Grand Jury this week, and there is little doubt but that a true bill will be found against him.

The Dueber-Hampden companies have a novel display at the Pittsburg Exposition in the shape of a mammoth watch, in which a regular store has been opened up for the display of watches. The exhibit is attracting much attention. A. L. Sackett, the advertising manager for the company, is in charge.

The Watch Case Engravers' Union of Canton, O., led the Labor Day parade in this city, being the only visiting delegation to come here. They came in a special train of 10 coaches. The delegation consisted of 600 persons, 200 of whom took part in the parade. They attracted a great deal of attention.

The following out-of-town merchants visited Pittsburg last week: L. W. Swan, New Castle; E. A. Bloser, New Kensington; Henry Furtwangler, Greensburg; J. W. Caler, Beaver; A. Johnston, Carnegie; Frank Murdock, Ligonier; J. Linnenbrink, Rochester; J. V. Rosendahl, Irwin; R. A. Noble, Wellsville, O.; F. H. Hayes, Washington; P. J. Manson, Jeanette; C. A. File, Mars.

According to telegraphic information received from Dover, Del., a certificate of incorporation was filed there last Friday by the Castleburg Jewelry Co., of Pittsburg, to buy and sell and deal in jewelry, precious stones, etc. The incorporators were John V. Hoffman, Pittsburg; Jacob Hollander, Wilkes-Barre; Joseph Castleburg, Baltimore; E. B. Waples, Wilmington. The capital stock is $50,000.

Charles Spandau, of Spandau Bros., 542 Smithfield St., has just disposed of a business property at 1208 Penn Ave., having a frontage of 25 feet and a depth of 100 feet, for $1,400 a foot front, or $35,000 for the house and lot. It is said that during the last two weeks property has sold in the same block at the rate of $1,750 a foot front. There is considerable movement in realty in that neighborhood. Quite a number of Pittsburg jewelers have made some lucky deals in real estate during the last year.

Edward Johnston, the negro burglar who made a murderous assault on Superintendent of Detectives McQuaide in the latter's office, some days ago, and who was arrested on complaint of a Wylie Ave. pawnbroker and jeweler, has been held in the sum of $1,000 bail to await the action of the Grand Jury. In the meantime, Johnston's record is being looked up, a description of the man having been sent all over the country.

## Connecticut.

Chris. Strobel, a retail jeweler of Waterbury, has been appointed treasurer of the Democratic City Committee, of that place.

Emos A. Osborn recently resigned his position with the New England Watch Co. Waterbury, after a service extending over 25 years.

The stockholders of Landers, Frary & Clark, New Britain, have ratified the action of the directors in increasing the capital stock to $1,000,000.

Wilbur B. Grippen, assistant foreman of the International Silver Co.'s factory at Bridgeport, and Miss L. M. Warner, of Newton, were married last week in Poughkeepsie, N. Y.

Nathan Fenn, one of the oldest and best-known jewelers of Meriden, is critically ill at his home at that place. Mr. Fenn is 82 years of age and is suffering from cancer of the stomach.

Col. Clayton H. Case, New Haven, was in charge of the annual reunion of the 10th Connecticut Volunteer Infantry at Savin Rock Thursday. Col. Case, who is president of the association, conducted the exercises.

During the electrical storm which visited Winsted Wednesday, a bolt struck the house owned by N. A. Ives, with the Wm. L. Gilbert Clock Co., and did damage amounting to about $200. Mrs. Ives was rendered unconscious.

The Gardner & Hall Co. is the style of the business formerly conducted by Robert S. Gardner, optician and jeweler, Derby. The new member is S. W. Hall, of Norwich. A first-class optical department has been added to the establishment.

Harrison P. Miller, a brother of Edward Miller, of Edward Miller & Co., was found dead in bed on Sunday afternoon of last week, at his home in Meriden. He attended church in the morning, and retired for a nap before dinner. Death was due to valvular disease of the heart. The deceased was 80 years of age.

The commission on the silver service for the battleship *Connecticut* met at Hartford Wednesday, and Governor Roberts was chosen chairman, and Henry C. Dwight secretary. It was voted to ask for bids for a service which will meet the ideas suggested by the Secretary of the Navy. The bids must come from Connecticut manufacturers. The appropriation for the service is $5,000.

A. R. Vanderbilt and P. J. Donnelly, who recently purchased the business of S. N. Lincoln, 659 Main St., Winsted, have considerably enlarged the stock and made extensive improvements in the interior of the store. Mr. Vanderbilt is an optician, an

was associated with the A. R. Vanderbilt ewelry Co., of Amsterdam, N. Y., for everal years.

Samuel G. Smith, a well-known watch nd clock repairer of Middletown, is at- ending to his business duties again after a ong illness.

P. J. Donnelly, of the new firm of Van- lerbilt & Donnelly, Winsted, and Miss Cleo Muldowney, were recently married in Cor- nth, N. Y.

The Wallingford Metal Co., which will hortly operate a rolling mill in Walling- ord, will employ about 50 persons. The nill, which is being erected by the concern, will be about 165 feet square. A power ouse and a building for casting will also e erected.

Charged with robbing his cousin, Julius B. Luftig, 159 Front St., Hartford, was re- anded in the City Court Sept. 8, until ext Friday, Sept. 15. The accused has onfessed that he looted the jewelry repair- ng shop of Samuel S. Luftig at 661 Grand Ave., on the night of Sept. 5. He disposed of the plunder in New York and Bridge- port.

Arthur V. Morgan, who carries a line of jewelry in connection with other mer- chandise in Winsted, was recently taken into custody by Chief of Police Wheeler and Officer Joseph Spear on a charge of running a slot machine for several months, contrary to the law. A machine worth about $120 was seized by the authorities and the accused was fined $40 and costs.

A man giving his name as Frank Dickin- son or Davidson, and claiming to represent the "Waterbury Watch Case Co.," was ar- rested a short time ago in Waterbury on a charge of passing fraudulent checks. The accused is about 35 years of age, a fluent talker and apparently well educated. He is about five feet 10 and a half inches tall and has a smooth face and a light complexion. The Philadelphia police, who are seeking the whereabouts of a man who is wanted there for forgery, are inclined to believe that Dickinson may be the man.

Flora A. Melrose has brought suit against the Melrose Silver Co., Hartford, to re- cover possession of a strip of land in the rear of 259 High St. The plaintiff avers that on Aug. 22, 1904, a certain agreement was entered into with the Melrose Silver Co., under which the silver company was to have the right of occupancy of the land in question for nine years from July 1, 1904, at an annual rental of $24, the rent to be paid semi-annually on the first days of Jan- uary and July of each year. It is alleged that failure to pay the rent in accordance with the terms of the agreement made the latter invalid.

F. D. Lantz has sold his stock in Sloan, Ia., to O. A. Lindermeyer.

Bert Andrews, Alexander Allen and George Hays, who were recently arrested on a charge of selling bogus jewelry, were arraigned in the Court of Palmer, Mass., last week, and fined $50 each. They enter- ed an appeal and the bail was fixed at $300 in each case. The men disposed of their wares by employing small children, some of whom were only seven years of age. The children were given pieces of cheap jewelry and instructed to sell it, for which work they were promised a premium.

## Optical Notes and Briefs.

Eben Hardy, optician, Boston, Mass., was a recent visitor to Montreal.

Mr. Thomas, optician, has entered the employ of R. Hemsley, Montreal.

M. M. Cohen, optician, Toronto, Ont., was in Montreal during the past week.

H. O. Vogel, Los Angeles, Cal., is now on his way north on a hunting and fishing trip.

J. Britton, wife and family, have returned to Montreal after a vacation passed at Lindsay, Ont.

D. Davidson, Spokane, Wash., made a business trip to Rockford, Wash., and vi- cinity last week.

J. B. Page, eye specialist, Quebec, passed through Montreal on his way home from New York, last week.

T. Coffin, Jr., son of the manager of the Montreal Optical Co., has been spending a few weeks in Toronto.

L. B. Lawson, of the Lawson Optical Co., Santa Rosa, Cal., is making a trip through the outlying districts of Sonoma County, Cal.

P. Taylor, optician, Whitby, Ont., and wife, passed through Montreal last week after a vacation of two months spent in England.

R. N. Taylor, optician, Montreal, accom- panied by his wife, has returned home after a vacation of six weeks spent at Char- lottetown.

L. M. Swikcrath, of the Swikerath Bros. Optical Co., 7 E. Adams St., Phoenix, Ariz., spent several days of last week at Williams, Ariz., and vicinity.

R. Hemsley, Montreal, is making ex- tensive alterations to his three stores, which he is fitting up with dark rooms and modern optical instruments.

W. D. Fennimore, vice-president of the California Optical Co., San Francisco, Cal., has just returned from a trip into the Monterey Mountains.

The Central Optical Co. has opened a new store in the basement under the Cen- tral Bank, corner Exchange and Main Sts., E., Rochester, N. Y.

A. L. Holling, with the California Optical Co., San Francisco, Cal., has just returned from a delightful camping trip on the upper reaches of the Russian river.

A. W. Biber & Co., Spartansburg, S. C., have purchased the optical stock of R. M. Dorsey, and hereafter will conduct an op- tical department in connection with their regular jewelry business.

Louis E. Kirstein, of E. Kirstein's Sons Co., Rochester, N. Y., sailed yesterday for England and the continent, where he will visit the principal dealers in the large cities in the interests of his firm.

Dr. L. C. Bachand, eye specialist and Coroner of Sherbrooke, Que., met with a painful accident while on a visit to Mon- treal, recently. He was getting on a car which started prematurely and was badly shaken up.

The case of Hayden, formerly with the California Optical Co., San Francisco, Cal., and who was arrested a few weeks ago charged with violating the California Op- tometry law, was not allowed to come to trial. The fine was paid and the case hushed up.

T. F. Butler, traveler and lecturer for the Montreal Optical Co., Montreal, will be married Sept. 21 to Margaret Reynolds, daughter of P. Reynolds, St. James St., Montreal. They will spend their honey- moon in the United States.

The Optical Association of the Province of Quebec held a meeting last week for the election of officers. T. Coffin, of the Mon- treal Optical Co., and J. E. Normandin, of the Canada Optical Co., were elected presi- dents. The attendance was satisfactory and several new members were enrolled.

The following opticians were visitors to Montreal during the past month: W. D. Shanks, Huntingdon; J. E. Gagnon, Que- bec; Dr. Wm. Oliver, Ormstown; A. J. Bergeron, Three Rivers; J. N. White, Coaticook; E. Lamarche, and J. P. Fre- meau,, St. Hyacinthe, and H. R. Cudden, Alexandria.

The Rochester Optical Society held its first meeting of the season last night. The opticians assembled at 6.30 at the Empire Optical Co.'s store, S. Clinton St., Roches- ter, N. Y., and in a body marched to the Masonic Temple, where they enjoyed a ban- quet. The meeting was held later at the offices of Clark & Bowen, Triangle building.

Secretary Sumeriski, of the Rochester Op- tical Society, Rochester, N. Y., is in com- munication with the various optical socie- ties throughout the country with a view to obtaining the scale of prices prevailing in the different cities. The Rochester Optical Society thinks it possible that a uniform price list might be established for all cities having optical societies.

## Providence.

The firm of Miller & Sutton having given up business, the machinery has been purchased by the Star Jewelry Co., 59 Page St.

Among the buyers in town last week were William Sisserson, New York; Miss Pattee, New Haven; J. C. Mizer, Bridgeport; W. R. DeNeill, Boston; W. L. Noble, Pittsburg.

Six gold turners in the employ of the Ostby & Barton Co. decided one day last week that they did not like the man who had been hired as foreman in place of the one who had resigned, and accordingly quit work. The firm found little difficulty in filling their places.

Articles of incorporation of the Providence Jewelry Co. were taken out from the Secretary of State's office last week. According to the articles the company is formed for the purpose of engaging in the business of manufacturing jewelry. The incorporators are J. L. Records, Harry Cutler and Theodore Loveland. The amount of capital stock, as set forth in the articles, is $50,000. The concern is located in this city.

George H. Grant, well known to members of the trade, was one of a party of members of the city government who visited Field's Point last Friday. Mr. Grant, while returning on the boat, was overcome by an attack of acute indigestion and had to be taken home in a carriage. As he has not been in the best of health for some time some alarm was caused by his condition, but at last reports he was fairly comfortable.

Roswell C. Smith, well known in local jewelry circles and chairman of the executive committee of the New England Manufacturing Jewelers and Silversmiths' Association, has decided to withdraw from active participation in politics for a while and will not be a candidate for re-election to the Common Council of Providence this Fall. Mr. Smith has served the Fifth Ward in the Council since 1899. He was anxious to withdraw last year, but his constituents persuaded him to be a candidate once more, but this year Mr. Smith is determined to relinquish his position, business demands encroaching so greatly on his time as to prevent him from giving attention to political matters.

The launch *Carrie,* the property of William A. Schofield, of the firm of Schofield, Battey & Co., manufacturing jewelers, was burned to the water's edge in Green River near Potowomut, last Saturday afternoon. Mr. Schofield, who is summering at Buttonwoods, started out with two others after some oysters. The launch was anchored in the river and the party went ashore in the tender. After being away for some time they started to return and saw smoke issuing from the launch. Hastening aboard they opened a locker, where the fire appeared to be located. As they did so the flames burst out and soon enveloped the launch. The party had to beat a hasty retreat and stood by in a skiff while the launch burned to the water's edge. The damage will amount to about $3,000.

Preparations are being made for observance of the 50th anniversary of the establishment of the firm of Wightman & Hough, makers of lockets. A. Augustus Wightman and Walter S. Hough were the original members of this firm, which in 1856 was located in the Richardson & Hicks building on Friendship St. Twenty men were in the employ of the firm at that time, and now about 200 persons are carried on the payroll during the busy season. Business was suspended during the war, but after its close the firm started in again and went along prosperously until the panic of 1873. The concern survived this blow and in the same year moved to other quarters in the

10. K. SOLID GOLD DIAMOND RINGS.

& S. Owen building. In January, 1893, r. Wightman died and his interest was rchased by Mr. Hough, who, with his n, Edward B. Hough, incorporated the mpany under the style of the Wightman Hough Co. In 1896 the concern moved the Manufacturers' building, where it is present located.

### North Attleboro.

Mrs. Fred White, wife of a prominent welry worker, died Thursday. She was years of age.

George Robson & Co. Thursday added me new machinery to their factory. The ncern recently added a toolmaking de- rtment.

William B. Grandfield, with the Reed & rton Co., Taunton, has started on a 10 ys' trip through New England in the in- rests of the firm.

The Chinese boycott on American goods es not affect local jewelry manufactur- s, as none of them sends goods to the nd of the almond-eyed race.

The A. H. Bliss Co. has been incorporat- l, to deal in jewelry, with a capital of 00,000. The officers are: President, An- ony H. Bliss; treasurer and clerk, Frank . Bliss, both of this town.

Pierre Dooley, for the past 18 years a lorer at the factory of the H. F. Bar- ws Co., died Wednesday after a linger- g illness. He was 51 years of age and a tive of Sydney, Cape Breton.

Fred Cooke, New York salesman for hiting & Davis, has returned to that city ter spending a few days in town. Frank . Kennedy, New York representative of e Paye & Baker Mfg. Co., is the guest his parents here.

A match bowling game between the ams representing the E. I. Franklin Co. op and that representing the George L. aine Co. was rolled Friday night and e latter team was victorious, the score ing 1,272 to 1,266.

### Trade Gossip.

The St. Louis Silver Co., St. Louis, Mo., as just issued a 72-page catalogue, illus- ating many of its designs of quadruple lver plated ware and also of the patented alosico ware.

The Fall line of artistic leather goods anufactured by Louis W. Hraba, is now n exhibition at his office, 29 E. 19th St., ew York. It includes a large assortment new styles and many articles of interest jewelers.

"There Is a Reason" is the title of a nvincingly written booklet 4⅞ x 5⅝ ches, recently issued by the Mermod, Jac- rd & King Jewelry Co., St. Louis, Mo., d New York. Several clean cut illustra- ons of diamonds, jewelry, watches and lverware accompany the text.

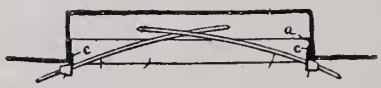
## UNITED STATES PATENTS.

ISSUE OF SEPT. 5, 1905.

**798,655.** FOUNTAIN-PEN. William Bolles, Toledo, O., assignor of one-half to James L. Chase, Toledo, O. Filed Dec. 16, 1903. Serial No. 185,346.

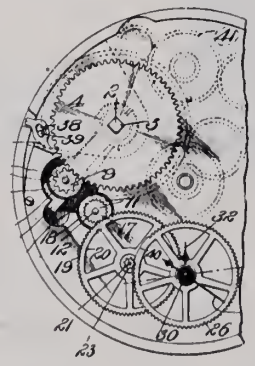


In a fountain-pen, an elastic ink-reservoir pro-

vided with pockets at the ends, and longitudinal bars of stiff material having their ends inserted within the pockets.

**798,707.** HAT-PIN. Edna L. Scott, Portland, Me., assignor to the Scott-Blake Co., Portland, Me. Filed Dec. 5, 1904. Serial No. 235,490.

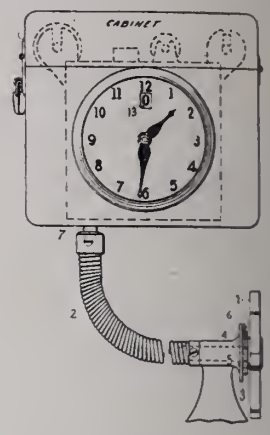
In a hat-fastening device, the combination of a pin-holder having a plate adapted to be secured to the sweat-band and having two recessed sockets



therein terminating in oblong openings and a double-pointed pin adapted to pass through said openings with flattened points, said points being wider than the width of said openings and extending normally across them to prevent the withdrawal of the pin, while the length of said openings is at least as great as the width of the flat points so that they may be withdrawn when twisted at right angles to their normal position.

**798,884.** WATCH-WINDING INDICATOR. Charles E. De Long, South McAlester, Ind. Ter., assignor to Fred McIntyre, South McAlester, Ind. Ter. Filed June 15, 1904. Serial No. 212,724.

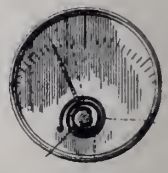
In a winding-indicator for watches, the combination with a barrel-arbor, a ratchet-wheel 4 arranged thereon of a swinging arm frictionally



mounted on said barrel-arbor, a compound gear mounted on said arm, and in constant mesh with said ratchet-wheel 4, a winding-indicator train including a slip-pinion which is in constant mesh with the time-train, whereby the down movement is communicated from the time-train to the winding-indicator train, and means whereby when the watch is wound the compound gear engages the winding-indicator train and moves the same on its up movement, the slip-pinion in said winding-indicator train permitting such reverse drive.

**798,923.** TIME AND DISTANCE RECORDING MECHANISM FOR VEHICLES. Eugene W. Rollins, Roslindale, Mass. Filed July 28, 1904. Serial No. 218,467.

In an instrument of the character described, a mechanism for indicating the travel of a moving vehicle, recording such movement, and indicatin elapsed time thereof embracing a clock-train, wheel having perimetric recesses, a worm-gear ther with provided, means actuated by the movin vehicle to rotate said gear, a rock-shaft, a ro actuated by said rock-shaft and coacting with sai recesses, and a recording device 27, in combinatio



therewith a registering-disk bearing certain fa numerals circumferentially and provided with like series of striking-pins alternately opposite sa numerals, and means to impart counter clockwi rotation to said disk intermittently from said roc shaft.

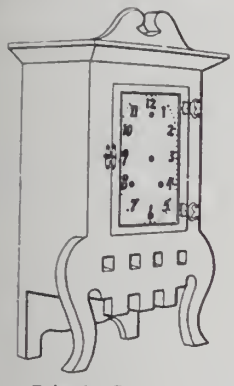
**798,938.** HYGROSCOPE. Henry E. Wetherill Philadelphia, Pa. Filed July 18, 1904. S rial No. 217,021.

In a hygroscope, a hollow supporting-frame, transparent dial-plate thereon, a post mounted said dial-plate and extending within the frame,

spiral metallic band lined on one side with a co tractible material which has been made sensitive moisture, said spiral band being arranged edg wise within the frame and mounted by one end said post, and an indicator carried on the free en of said band, operating to move radially on th surface of the dial-plate.

## DESIGNS.

**37,532.** CLOCK FRAME. Stanley M. Lawso Cincinnati, O. Filed March 22, 1905. Seri



No. 251,514. Term of patent 3½ years.

**37,533.** CLOCK-FRAME. Stanley M. Lawso Cincinnati, O. Filed March 29, 1905. Seri

No. 252,752. Term of patent 3½ years.

,534. CLOCK-CASE. Thomas B. Stephenson, Jr., Bristol, Conn., assignor to the Sessions

Clock Co., Bristol, Conn. Filed June 28, 1905. Serial No. 267,452. Term of patent 7 years.

## TRADE-MARKS.

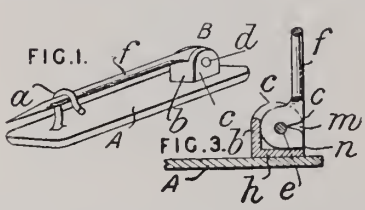
## BRITISH PATENTS.

ISSUE OF AUG. 23, 1905.

(ABRIDGMENTS OF SPECIFICATIONS, 1904, FROM *The Illustrated Official Journal.*)

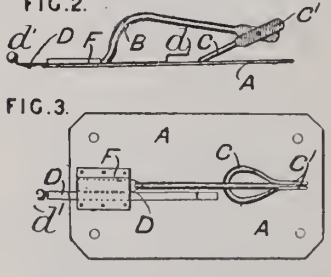
**9,778.** STUDS. S. H. HALL, Meriden, Conn., U. S. April 29. (Date applied for under Patents Act, A.D. 1901, April 30, A.D 1903.)



The stud consists of three parts, the base 1, the tubular portion 4, and the head 3. The tubular portion 4, to which is brazed the part 6 with the

arms 7, 8, is placed over the stem 2 of the base 1 and rests on the shoulder 5; the top of the stem 2 is then turned down, as shown, to secure the two parts, and the head 3 is put on. The stud is placed in the buttonhole by first inserting the head 3 and then each of the arms 7, 8 in turn.

**10,077.** BROOCH PINS, ETC. G. W. DOVER, Cranston, R. I., U. S. May 2. (Date applied for under Patents Act, A.D. 1901, May 20, A.D. 1903.)



The pin *f*, applied to a brooch or the like, is mounted on a plate A, Figs. 1 and 3, and held by

the catch *a*. The base C of the pin, hinged by a pivot *d* extending through its opening and the side walls *c* of the housing B, is in the form of a split ear, having a fold or joint *m* extending vertically from its upper edge to the opening *e*. The forward wall *b* gives the pin tension and support when in the engaged position, while the projection *n* engaging with the base *h* limits its rearward movement.

**10,084.** WATCH PROTECTORS. G. SLATER, Stepney, London. May 3.

Relates to a protector to be fixed in the watch

pocket. A stout piece of bent wire B, Figs. 2 and 3, soldered or otherwise fixed to the plate A, has a metal loop C hinged to it at its free end. The watch is secured by sliding the watch ring along the plate A past the loosely-pivoted loop C, which falls back on to the plate A. A sliding catch D, with a guiding-strip F, has a knob $d^1$ and a raised end *d*, which engages and holds the loop C when pushed forward. The watch is released by disengaging the catch D and raising the loop, by depressing its extension $C^1$. The loop C may be replaced by a straight piece of metal w an obliquely cut end, and the catch D dispens with. Holes are provided in the plate A fastening the guard to the inside of the pocket.

*Complete specifications accepted Aug.* 16, 190 1904.

## National Law Popular.

### welers in All Sections Favor Measure Against False Marking of Gold and Silver.

There is probably, at the present time, no bject of more general interest to the welry trade throughout the United States an the proposition to obtain from Con-ess legislation regulating gold and silver-are, and for that reason the bill drafted in half of THE JEWELERS' CIRCULAR-WEEKLY uch is to be introduced this Winter, s been read with interest and approved manufacturers, wholesalers and retailers every branch of the craft, and in almost States of the Union. This bill, the first aft of which was published in the issue of ly 5, is an act based on the Interstate ommerce and Anti-Lottery laws, and pro-les a penalty for the shipment in interstate mmerce of any article of gold or silver ich shall be improperly marked as to its ality. It is a general belief that if this w be passed, it, in connection with the ws now in the statute books of the prin-l States of the Union, regulating the anufacture and sale of improperly marked ver and gold, will wipe out an evil that at nes has threatened to undermine the sta-ity of the trade by the encouragement unfair competition.

Since the bill was drafted and published mments and letters from subscribers, as ll as newspaper articles from all sections, ve been received by this journal, a few which appear below. Others will be blished in future issues of THE CIRCULAR-EEKLY. Our columns are open to all embers of the trade for a discussion of e subject pro and con.

NEW YORK JEWELERS' COMMENTS.

G. Mford, of C. G. Mford & Co.: "I favor law which requires that stamps on gold or verware shall be true. The manufacturer who s false stamps on his ware should be punished."

rank M. Welch, of Mling & Co.: "I am in vor of the proposed law, because it certainly ll make toward honesty in business methods."

. K. Sloan, of Sloan & Co.: "We stamp all our od that are large enough to be stamped, and believe this course to be good policy. Natu-y I favor any measure that will forbid the e of false stamps which are an injury to legiti-te trade."

Stephen Kent, of Kent & Woodland: "We ve always stamped our products and guarantee t the stamp is correct. I would be pleased to a national law that would make obligatory n all manufacturers, if they use stamps, to have m correct. Such a measure would protect honest nufacturers and dealers."

eopold Stern, of Stern Bros. & Co.: "I am ongly in favor of a national stamping law, of character proposed, as it will promote honest siness methods."

. B. Wood, of Chas. F. Wood & Co.: "You may as strongly as you desire that I am in favor a national stamping law. It is especially need-now because some of the States have stamping vs, and the business men in these States may placed at some disadvantage unless the restric-ns are given a national scope. If the proposed is adopted, the jewelry manufacturers of the ire country will be on an even basis, and there l not be opportunity for any to obtain advan-es by dishonest or questionable marks or mps."

Vm. Barthman: "If the proposed law cannot evaded I am much in favor of it. We retailers ve many instances in which false representations rk to our disadvantage. A customer asks us the price of a certain gold watch, or some er article of jewelry, and we give him a fair ur. He may go to another place and get an er of what seems to him to be the same thing, a price below what the honest product costs us course, the other article is misrepresented in some way, but the customer may not be convinced of this. The honest dealer is, of course, the loser in such a case. Now, if a national stamping law will check such abuses it will certainly be a splendid benefit to the trade. I have read the Act published in THE CIRCULAR-WEEKLY, and as far as I can judge it will accomplish all that we so much desire, but the lawyers can tell better than laymen whether or not there are any loop-holes to be found in it."

C. W. Little, of C. W. Little & Co.: "There should be something that is now lacking to denote quality. Most assuredly we are in favor of a law that would prohibit false stamping of jewelry. Only yesterday a man come in here with a watch stamped 14 karat, having an American movement, and asked us to appraise it for him. He was a mechanic and expected to get about $50 for the watch to help him tide over a crisis in his affairs caused by sickness in his family. The whole out-fit was not worth $3."

George Welsh's Son: "We have often seen the need of a law that would forbid false stamping of gold and silverware. The State laws are quite inadequate. It is easy for manufacturers from other States to ship to New York goods that are fraudulently stamped as to their quality. If there were a national law and goods were offered with-out a stamp, what would be thought of them? Naturally you would say that the manufacturer was ashamed to put on the stamp of quality. The consequence would be that the practice of stamp-ing the quality of gold and silverware would be-come quite general in the legitimate jewelry trade. We favor such a law as is proposed, as we think it would bring about so desirable a situation."

Mr. Howard, of Howard & Co.: "I have not paid any attention to the subject, as the stores which deal in cheaper goods and in silverware and jew-elry that may be improperly marked, do not enter into competition with us in any way. The people who buy our products look for our own stamp upon them, and that is all they ask."

Thomas Kirkpatrick: "I have given little thought to the subject. Our business has not been injured, as far as I know, by sales of goods that are not stamped properly. We carry on our own business in our own way, and pay no attention to what others do."

Mr. Frost, of Black, Starr & Frost: "The bill you mention appeals to me on general principles as a measure that should become a law because it tends to honesty in business methods."

Emil Kohn, of Theo. A. Kohn & Son: "A busi-ness such as ours is, of course, not directly affected by the dishonest practices of which I know com-plaint is made from some quarters. Our patrons come to us because they have confidence in us, and we do not as a rule sell any goods with the manufacturers' stamp, as it is our own guarantee that our customers desire. This is true, I take it, of most of the high grade stores in New York. But, at the same time, I can see that the sale of watch cases, jewelry and silverware with misleal-ing stamps is an annoyance and an injury to many in the trade who are not situated, perhaps, as we are. The weaker concerns and men who are just starting in business, feel most keenly the effects of unfair competition. When the manufacturer puts a misleading stamp on his goods, he does so for the purpose of encouraging retailers in dishonest practices, and the small dealer, trying to build up a business in an honest and legitimate way, is made to suffer temporarily, although in the end he will gain, because honest methods are recog-nized. Everybody in the trade knows of watch cases, that are sold with a mark '18,' which gives the buyer the idea that this is a case made of 18-karat gold although the word 'karat' is not actually used, and the metal is really of a much inferior alloy. I trust that the law will not only prohibit direct falsehoods, but those that are indirect. Be-cause the proposed law would conserve honest business methods, I am strongly in favor of its adoption. This country is behind Europe in the matter of stamps on gold and silverware. In such countries as England and France, a stamp means something, because there is back of it the assur-ance of the Government as to its correctness. In the United States the manufacturer's stamp means little or nothing. A better standard would result from the adoption of such a law as is proposed."

---

PITTSBURG, Pa., Sept. 6.—Pittsburg jew-elers generally are greatly in favor of the law to forbid interstate commerce in arti-cles of gold and silver spuriously marked.

G. B. Barrett, of G. B. Barrett & Co.: "That law is one which should be passed by all means. It is a step which would mean decency and hon-

esty in the jewelry business. I certainly am very strongly in favor of this measure, and am sure that it would be highly beneficial to the legitimate interests of the trade."

Joseph Grafner, of Grafner Bros.: "Such a law should be enacted as proposed. There is nothing now in the laws to prevent a man from stamping goods to suit himself. The law should be made uniform. I am very glad that an effort is to be made to have a national law enacted and glad that such an influential paper as THE CIRCULAR-WEEKLY should take up the matter."

E. W. Hill, of Goddard, Hill & Co.: "It is very proper that the jewelers of this country should have such laws and you may count me as being heartily in favor of it."

C. F. Neimann, of Graff & Neimann: "I have always contended that we should have laws of this character, and I am glad that an effort is at last to be made to have them enacted."

Charles O'Brien, of O'Brien & Co.: "It is certainly a worthy object and should receive the support of all reputable dealers throughout the country."

Mr. White, of West, White & Christy: "We have already requested the Congressman of our district to support such a bill if it is presented. I am in favor of it and so are the other members of the firm."

Every jeweler spoken to favors the bill and it will receive hearty support from the Smoky City merchants.

---

COLUMBUS, O., Sept. 6.—Jewelers here have nothing but favorable comment to offer on THE CIRCULAR-WEEKLY'S bill. It seems to have friends everywhere.

F. R. Cross, of F. R. Cross & Co.: "The law would be a good thing for the honest, honorable wholesaler; it would be a good thing for the honest, honorable retailer, and it would be a good thing for the public. But I doubt its effectiveness unless inspectors are provided to see that its provisions are not violated."

Andrew Morden: "There is such a law in other countries, and there should be one here. I believe conditions are not as bad as they used to be, but the passage of the law is something every jeweler can recommend. In the marking of cases and similar goods it should be most rigidly enforced."

Fred C. Blenkner: "The passing of such a law would be the best thing which could happen for the jewelry business. A 10-karat piece marked 14-karat is no better than burglary. I've found even plated goods marked 14-karat."

J. T. Mathison: "It is all right, and I would like to see it go even farther. How about the unstamped goods, sold for 10-karat, which will assay nearer six-karat? But it will do a great deal of good if passed as it is."

Harry J. Heimberger: "I favor the passage of such a law, and always have favored it. You will find that all jewelers do—that is, all honest jewelers."

Frank M. Deinlein: "It is a good law, and I hope THE CIRCULAR-WEEKLY will succeed in getting it through. I will be glad if it is passed."

E. S. Albaugh, of Albaugh & Pickering: "H is a watch in for repairs—a case marked to w a quarter of a century. It will wear about t years. Here is one stamped "14-karat fine, U. Assay." It is plated. A law to protect the p lic from such frauds as these should be passed all means."

David Vanderbark, of the Vanderbark Jewe Co.: "I think such a law should be passed. It needed for the better protection of the public."

---

TOLEDO, O., Sept. 6.—The sentiment Toledo jewelers relative to the moveme started by THE CIRCULAR-WEEKLY is w expressed by Leon P. Christiancy, the Ma son Ave. jeweler, who said:

"Personally I am heartily in favor of the pr and I believe that there is not a jeweler in Tol but who will do everything in his power to as in securing such legislation. I know that I do anything within reason and I firmly beli that every other jeweler in this city will d same thing. Laws to prevent thieving only w hardship to thieves and robbers, and this law not only not work a hardship to legitimate elers but it will guard the public."

The same sentiment was expressed by L Commlossy, who also conducts a jewelry st re Madison avenue. Said he: "It is certainly a g thing, and would do away with all that fr which has been perpetrated on the public for ye I am heartily in favor of the Act."

Norman E. Hascall, representing the firm o J Freeman & Co.: "I have long felt that a law should be in force in this country. E pean countries have them and they would great benefit to the United States. I should to see some establishment in this country wh would correspond to the 'English Hall' wh would pass on the make-up of gold and silver cles before they are offered to the public."

Lamont Heidtman: "It is all right and ought be enacted. There are lots of things offered sale that are improperly marked and which sold under misrepresentation."

---

SAVANNAH, Ga., Sept. 6.—The jewel here all heartily endorse THE CIRCUL WEEKLY'S bill and will work for its ena ment.

S. E. Theus, of Theus & Co.: "We are in f of the bill and believe it will tend to preve sale of foreign made goods which enter into petition with American made goods of supe quality, and are frequently sold by the ord jewelers without explaining to his custome difference in quality."

A. L. Desbouillons: "I approve the bill and w THE CIRCULAR-WEEKLY success. It is a n needed measure."

Frank Wenn: "I heartily approve of the bill believe it will be a protection to the jeweler well as to his customer in preventing the of snide goods."

C. N. Thomas, of J. & C. N. Thomas: "The is one that has long been needed; we are in fa

ALSO MAKERS OF THE LEADING LINE OF THIMBLES.

it and hope THE CIRCULAR WEEKLY will suc-
d in its efforts."

H. Koch, Jr., with J. H. Koch: "The bill is
that has long been needed, and the effect will
thoroughly beneficial to the entire trade. We
heartily in favor of the measure."

I. Sternberg, of Sternberg & Co.: "We approve
measure and can assure THE CIRCULAR-WEEKLY,
successful, it will have the heartfelt thanks of
legitimate jewelers."

. Van Keuren, of R. Van Keuren & Co.: "We
rtily approve of the bill, and hope it will be
sed. It is a measure which will protect the
est jeweler in the sale of honest goods."

---

ROCHESTER, N. Y., Sept. 7.—The local sen-
ment on THE CIRCULAR-WEEKLY'S bill for-
lding interstate commerce in gold and sil-
r spuriously marked, is very favorable to
measure.

. D. Burritt: "It is a fine thing. It is a bill
t should have been passed long ago and I hope
E CIRCULAR-WEEKLY will meet with success in
hing it. The entire trade should support it."

Philip Present: "I am heartily in favor of such
ill and I trust it will become a law."

Wm. Levison, Morris Rosenbloom & Co.: "The
is a good thing. THE CIRCULAR-WEEKLY should
thanked for trying to bring about such a law.
ertainly approve of it."

. Kopelowitch: "I believe such a law would
of great benefit to the trade. I hope THE CIR-
AR WEEKLY will succeed in having it passed."

TORONTO, Can., Sept. 2.—James Ryrie, of
rie Bros., Ltd., Toronto, when inter-
ewed with regard to the bill to forbid in-
state commerce in improperly marked
ld and silver, said:

The effect upon Canada of such a measure will
ndirect rather than direct. However, anything
ich will do away with the chance for deception
uld be hailed with delight by the legitimate
lers. If it were possible to enact it in that
m I should be glad to see the bill broadened
its scope so as to apply to shipments to
nada, although personally we have no fault
find with the firms with which we have been
ling, as regards the abuse which the bill seeks
rectify. The measure, should it become a law,
l be a great help to manufacturers and dealers
o are trying to conduct their businesses on
timate lines."

Walter J. Barr, manager of the Goldsmiths'
ck Co., Toronto: "No honest manufacturer or
ler will object to the Government being in-
ested in passing legislation that will tend to
vent inferior goods being sold under assumed
nes of one kind or another. The jewelry busi-
s has been made a byword and a reproach for
that is unfair and dishonest, owing to un-
scrupulous manufacturers and merchants making
inferior goods and marketing them on false repre-
sentations. The advanced methods of experts and
inventors render deception easy and tempting.
Buying by mail has attained such proportions as
to render such a step as that taken by THE CIR-
CULAR-WEEKLY necessary in the interests of the
honest dealer. From a moral standpoint, as a
means of encouraging young beginners in business
to adhere to straightforward business methods, it
is wise and well considered. It is a pity that the
Federal Government cannot enact a law compelling
manufacturers to register trade-marks to be used
in connection with a quality stamp."

Ambrose Kent, of Ambrose Kent & Son, Ltd.:
"Such a law is highly desirable in the interests
of honest trade, around which every safeguard
should be thrown. It will be approved by all who
desire to conduct an honest business. I should
strongly favor such an act for Canada to protect
the trade from unprincipled manufacturers and
dealers who foist inferior goods on the public by
deceptive marks and descriptions."

B. Kent, of B. & H. B. Kent: "I decidedly favor
a law of that sort, as a protection against fraud.
So far the trade of Toronto has not suffered
greatly from such practices, but it is certainly ad-
visable to take precautionary measures, especially
in view of the rapid growth of the mail order sys-
tem, which largely increases the facilities for
duping the inexperienced buyer. THE CIRCULAR-
WEEKLY has done well in promoting the measure,
which I hope will be cordially supported by the
trade."

Edward G. Gooderham, managing director of the
Toronto Silver Plate Co.: "I regard this bill as a
necessity. Anything that will protect the honest
manufacturer is to be welcomed. Legitimate manu-
facturers have a right to look for protection of
this kind. The public is practically in the hands
of the manufacturer and the dealer, and in their
interests as much as in that of the trade this
measure should pass. THE CIRCULAR-WEEKLY is
deserving of credit for taking up the matter."

E. M. Trowern, Dominion Secretary of the Re-
tail Merchants' Association of Canada, and sec-
retary of the jewelers' section of the same organ-
ization, said: "A very necessary law, as it will
prevent the complication resulting from varying
legislation in the different States. It now behooves
Canada to pass a similar or a stronger act as soon
as possible, to avoid this country becoming a dump-
ing ground for the spurious goods that cannot be
marketed in the States should this law pass.
Fortunately we can legislate on the subject
without such restrictions as are imposed by the
American Constitution. There should be no diffi-
culty in securing the proposed legislation, which
will not only improve the quality of goods but
raise the standard of morality in the trade. I must
congratulate THE JEWELERS' CIRCULAR-WEEKLY for
pressing the question to an issue. I will certainly
bring the matter up before the jewelers' section of
the association on the first opportunity."

## Handsome Silver Service for the Battleship "Kansas."

(*Continued from page* 1.)

will compose this service is as follows: The punch bowl or center-piece (illustrated on Page 1), which is accompanied by a ladle and 12 cups; the large tray (illustrated below; a four-piece teaset (of which a representative member is depicted on this page; two five-light candelabra, a soup tureen, two covered vegetable dishes, a meat dish, a fish dish, an entré dish, a water pitcher and tray, four bonbon dishes and a cigar box, or 35 pieces in all.

In the scheme of decoration the Kansas flower, the Sunflower, embossed, is used profusely. On one side of the punch bowl, which has a capacity of five gallons, there will be an engraving representing the battleship *Kansas;* in a similar space on the other side there will be an engraving representing the Capitol building. About its base will be clustered the 12 cups and the ladle. The design for the handle of the ladle is a national shield in the national colors.

The sunflower, as well as the seals of the State of Kansas and of the United States Navy, are used in the design of every piece. The entire set weighs 2,000 ounces, and the contract price is $5,000, to be appropriated by the State.

The vessels whose services have been illustrated and described in The Circular-Weekly, and the dates of the issues in which these illustrations and descriptions appeared from time to time are as follows:

## Pendulum Clock Indicating Astronomical Computations.

[Translated for THE JEWELERS' CIRCULAR WEEKLY from the *Deutsche Uhrmacher Zeitung*.]

THE illustrations shown herewith, of an odd-looking clock seem to represen French production. This clock is owned present by a resident of Strassburg, Al e. It has been used as an exhibit in that and is serving for a similar purpose at sent. It is preeminently suited for such urpose, not so much on account of its tivating external appearance as for its istic technical display and the peculiarity its architectural construction. The case sists of a filigree frame, with mirrors ced in the back and in the sides, the ole being of a height of 95 cm. The ex- or protection consists of a mahogany ss-framed closet, of a height of 120 cm. a width of 40 cm.

The clock really consists of a pendulum, lens of which contains the movement. e back of the pendulum disk carries an inary 12-hour dial, with hour and minute d, which are set to mean time. In front two dials as seen in Fig. 1 and Fig. 2; these the upper and the smaller one indi- e. (1) In its outer circle with 12 divis- s the mean time. (2) In its inner circle days of the week and the signs of the responding zodiac. (3) In the middle cle the day of the month.

The lower and larger dial, which is con- cted with the smaller one by ornamented t brackets, shows: (1) In the outer circle 24-hour division, which is traversed daily a hand, the index point of which is namented with a radiant emblem of the n and indicates the correct angular loca- n of the sun. In harmony with the up- dial the sun pointer indicates the time, ich is somewhat in advance of 3 P. M. the upper XII indicates noonday and noonhand which describes one revolution $29\frac{1}{2}$ days, denotes the changes of the on during its progress.

On the left of the lower half of the dial e leap year and the intervening ordinary ars are recorded in regular progression d the dial at present marks the second ar after leap year. On the right, cor- spondingly, the days of the current month recorded. The 27th of February and the approaching month of March are in view. By means of the two curved hands the rising sun (6° 45′) and the setting sun

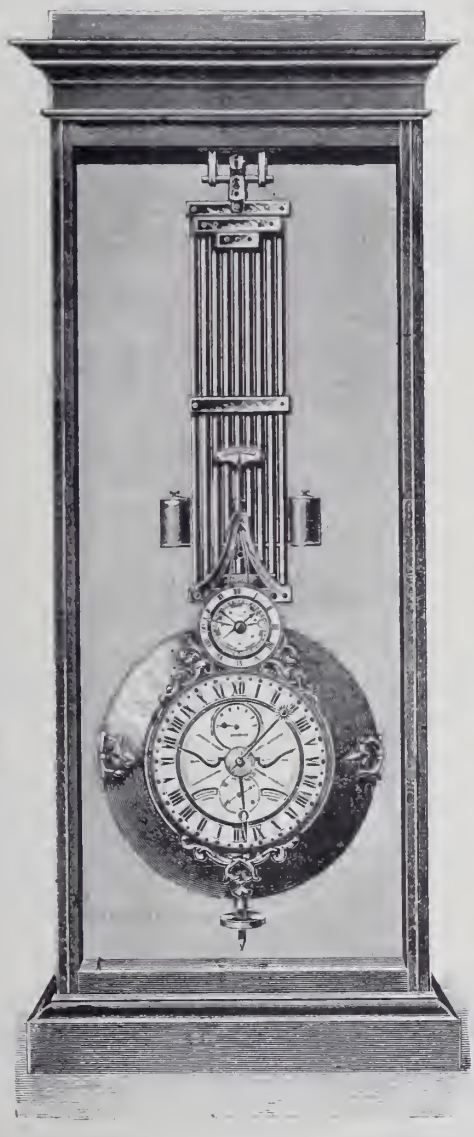

FIG. 1.

(5° 15′) are shown for latitude of Paris or Strassburg in the corresponding season.

When the two curved hands have progressed to their limits above, the Winter solstice (Dec. 23) has been reached. At the time of the Summer solstice (June 24) both hands stand at their lower limits, indicating the rising of the sun at 4 A. M. and the setting of the sun at 8 P. M. At the equinox on March 22 and Sept. 21 the hands stand exactly at 6 o'clock.

The difference between mean time and apparent or solar time in minutes on the small circle marked "Equation" or in the

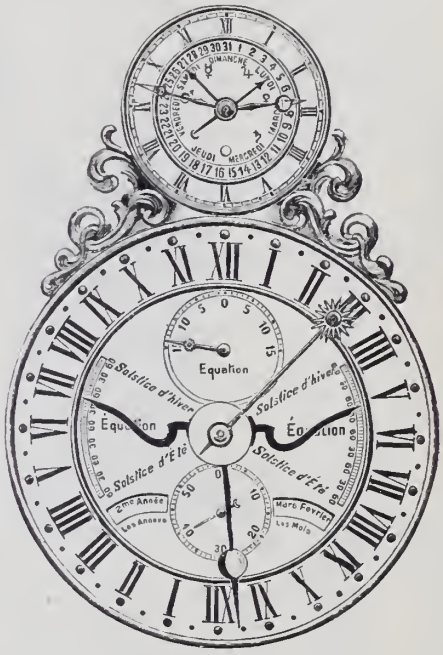

FIG. 2.

middle field of the large dial, is also shown. If the hand stands to the left of zero the number of minutes is to be added, if solar time is to be obtained; and in the contrary case the number of minutes is to be subtracted. The second dial is in the lower part of this larger dial. Special praise is due to the workmanship on the gridiron part of the pendulum. A hand and a circular scale indicate the activity of the compensation. The regulating nut has a recessed space for the deposition of small grains of leaden shot.

Fig. 3 shows in a most excellent manner

the details of the movement. It indicates the winding part, ratchet wheel, etc. The winding is to the left and is done once every four weeks. The motion work is dis-

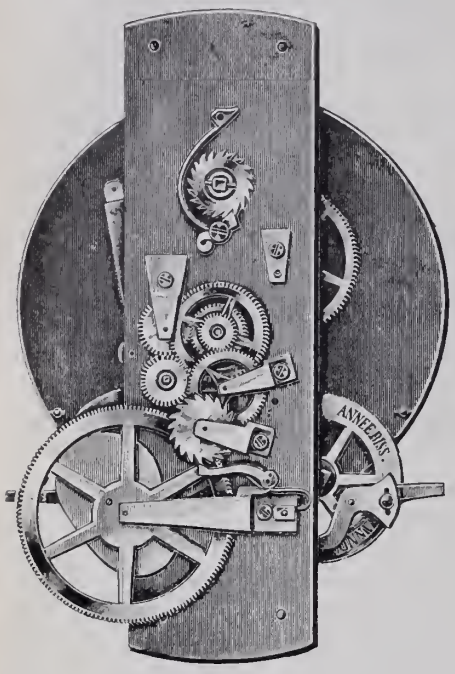

FIG. 3.

tinctly seen with the connecting train for actuating the calendarium. The large wheel on the left with the attached cam turns once every year and regulates the equinox mechanism and the solstices. The wheel on the right governs the indications of the leap year and the intervening ordinary years. The pendulum suspension is of the knife edge kind. A pin escapement imparts the impulse to the pendulum.

The whole movement shows the marks of the most superior workmanship, more particularly in its steel pinions, to which the wheels are attached on brass collets by screws. The escape wheel is of gilt. The dials are silvered in the mat finish, the small one being engraved and the characters being filled with black cement. The characters of the large dial are traced out, monogram fashion, and are richly gilded, projecting from the silvered circle.

This clock was completed in the year 1842 and its freedom from any blemish shows the care with which it has been handled.

---

The Stanley J. Peters Co., Bramwell, W. Va., was incorporated Sept. 1 with a capital of $10,000. The company takes over all the assets and liabilities of Stanley J. Peters and will settle all his accounts as soon as the company's books are opened up. It is the purpose of this company to open a number of branch stores in West Virginia and to greatly increase the stock. Capital paid in at present $4,000; capital subscribed for, about $2,000. The balance will be subscribed for before the first of the year. One branch store will be opened about Oct. 1. The concern is making many improvements in its main office.

IN connection with its large meridian te scope the Paris Observatory has pla in regular service a chronograph wh prints with extreme nicety and neatn

FIG. 1.

the minutes, seconds, and tenths of a ond upon a running strip of paper. P C tier, of Paris, well known to all those v give their attention to astronomy and m anisms of precision, is the creator of device. We are indebted to the Paris servatory, says L. Reverchon in the *Re Internationale de l'Horlogerie*, for the lustrations of this instrument.

Beginning with the general features its construction, we must say that

PERFECTION · OF · AMERICAN · WATCHES

IN SOME KINDS OF GOODS defects are easily concealed. Not so with the watch. Its qualities as a time keeper soon manifest themselves. The Sun itself is its standard.

The perfection looked for in Watches is like that which characterizes the laws of Nature, and in no human product is that perfection so nearly approximated. And no other nation excels the United States in Watchmaking.

loose upon the axis $H\,H^1$, and is made of two toothed wheels soldered together these are the wheels $F\,F$ and $C\,C$. $F$ engages with the pinion $G$ of the fly $L$. The wheel $C\,C$ is driven by a finger $Q$ which forms a part of a lever $M\,I$ mounted upon the smooth wheel $K$ which derives its motion from the axis $H\,H^1$, upon which it is keyed and which causes it to make one complete turn every second of sidereal time. An inclined plane $P\,P$ displaces the arm $N$ each revolution of $I\,K$ in such a manner as to throw the finger $Q$ out of gear with the teeth of the wheel $C\,C$ for a short space of time. The duration of this time is limited by the withdrawal of the locking block $S$, a movement effected precisely at each second by a contact emanating from the seconds pendulum of a synchronizing clock. During this period of repose the wheel $F\,F$ is exposed to the action alone of the fly $L\,L$, which continues its motion by reason of the velocity or momentum acquired during the second just passed. The whole combination regulates in its advance by a very slight lead constitutes a dead-beat escapement of two or three hundredths of a second.

## The Nickel Steel Spring.

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from the French of DR. CH.-ED. GUILLAUME, Associate Director of the International Bureau of Weights and Measures, in *Les Applications des Aciers au Nickel.*)

IT may readily be comprehended that the necessity of furnishing a compensation balance in watches, for which a satisfactory rate at different temperatures is required, introduces in their manufacture a delicate complication which must be represented by an appreciable increase in the cost. It is true that with modern appliances the mechanical production of the balance is not very expensive, and watches are found in quite low prices, provided with a balance apparently compensated, but of which the bi-metallic laminæ are connected at their two extremities with the diametral arm and consequently are of no use for compensation.

A person very slightly familiar with the details of adjustment would undoubtedly be astonished if told that an appearance should be given to the balance for the object for which it was intended and that the effort should be suspended when a single saw cut given to the bi-metallic ring would have assured the advantage of compensation.

The reason is that a balance really designed for compensation ought to be so constructed that the lamina should be quite elastic, which necessitates working the brass after soldering; but the cold hammering often produces energetic tensions which are manifested as soon as the lamina is rendered free at one of its extremities by much deformation, warping it to the one side or the inside. Previously, the balance completely prepared on the lathe, well poised on its regular axis, the lamina being free; it ceased to be so, and was brought back to this condition only by successive retouches of the two laminæ. This delicate work can only be confided to able artisans and is, therefore, comparatively costly.

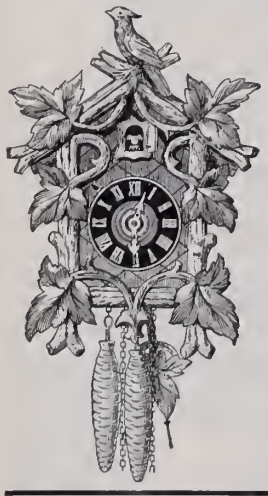
Maiden Lane, New York **SETH THOMAS CLOCK COMPANY** 70 Wabash Ave., Chicago

it were badly done, and if the laminæ were treated roughly, the watch would have different rates in positions, or else the balance would be slowly deformed, in the course of time producing a gradual change in the rate.

It follows that if it is impracticable to so raise the price as to permit of treating the balance in a rational way, it is better that the balance should have only the appearance of being compensated, rather than seek to really give to it a function which it would fulfil imperfectly.

Thus it is explained that if, by a suitable choice of the material of the spring, the variations of its elasticity as a function of the temperature should be materially reduced, the rate of watches of which the price forbids the application of the compensating system might be considerably improved, or even of those in which the balance cannot be compensated with sufficient care. This is the problem undertaken by M. Perret and myself, which is in part solved by the researches which I have previously described.

If, starting with non-magnetic alloys of a proportion of about 25 per cent., we advance to higher percentages, we find the co-efficient of variation of the modulus passing from a value scarcely appreciable to a high positive value, and then falling back again to a value almost negative. We, therefore, have two categories of alloys capable of solving the question.



The method employed in the study of these curious properties dispenses with other theoretical explanations. From a practical viewpoint it will be sufficient to remark that the second coefficient of the formula of variation being important in alloys containing about 28 per cent. of nickel, springs made of this alloy, while capable of annulling on the average the action of temperature on the rate of watches, would impose a material secondary error (middle temperature error). For alloys of the second category, which, for a proportion of about 45 per cent., would furnish the second solution, they would be much more advantageous in this latter respect. But when they have been raised to the temperatures required in the manufacture of springs their elastic limit is considerably lowered, so that the springs become less tractable.

This lowering of the elastic limit seems to have little influence on the rate, for the flections of the ribbon of a vibrating spring are so feeble that the limit is far from being reached. It is rather in the manipulation required in planting the spring that the want of elasticity may be harmful. Now, if the spring be put out of shape, the isochronism of the vibrations and the rate in positions would be immediately affected.

Several chronometers have, however, been adjusted with springs of this class and have given quite satisfactory rates. This result is due, without doubt, to the consummate skillfulness of M. Paul Perret in the pursuit of these investigations, but I do not think that such springs would be readily accepted by adjusters. On the other hand, springs of the first class have rapidly won the favor of watchmakers working on watches of the quality which they are applicable.

Unfortunately, besides the serious secon ary (middle temperature) error of th springs, the rapidity of variation of average coefficient for percentages near t which best meets the conditions sought i shows, by the differences in the rates, presence of the smallest defects of hon geneity in the alloy. Therefore, at least the moment, it is better to avoid us nickel-steel springs in chronometers, and limit their employment to ordinary watch which furnish for them a special field.

Low priced watches, furnished with compensated balance in such a way as obtain, if not perfect compensation, at an important reduction in the action of atmosphere, may be provided with the spring and preserve rates, at least as sa factory, with a reduction in the price, w in the present state of the horological ind try may be regarded as a desideratum. the other hand, the slight difference in p between steel springs and nickel-s springs will allow of obtaining an appr mate compensation for watches w hitherto could not support the increase price rendered necessary by the empl ment of a compensated balance. Con ering that between 0 and 40° C. an o nary watch varies from five to six min in 24 hours, the employment of a nick steel spring is to be regarded as an essen progress, even if it still leaves an error half a minute in the same interval of te perature. It is a result of this charac that ought to be reached in current in

try by selecting, as needed, the metal the balance so that it may correct as w as possible the average error of springs the same kind.

To these advantages obtained in adju ment may be added the condition sought i of the slight sensitiveness to the magne field of the new springs and of all balanc which are likely to be practically associat with them.

Nickel-steel springs possess, therefore, i ordinary watches, quite a number of su qualities as ought to rapidly win the fav of those interested in the improvement the low-priced watch.

### A New Copper-Welding Process.

A REPORT from Consul Shank, of W nipeg, Canada, says that scientific c cles are interested in the discovery of process for welding copper, which has be made by a local blacksmith. It is said process has been thoroughly tested found perfect, and that copper can be we ed to copper or to other metals wit impairing the electrical conductivity other properties of the metal. The pr is said to be very simple and no more d than the welding of steel. The work be done with a forge, blowpipe, or a apparatus which will heat the metal che red.

Patents have been applied for in United States and Canada.

### marks at the Presentation of a Handsome Testimontal to B. P. Jenks.

T the recent presentation by the em- ployes of Goodnow & Jenks, sil- rsmiths, Boston, of a sterling silver tea to Barton Pickering Jenks, who sev- ed his connection with the firm to take presidency of the William B. Durgin .. the presentation speech was made by alter D. Darby, the superintendent, who d:

"here is an old saying that "Everything comes tbose who wait," and we have been waiting eral days for an opportunity to have Mr. ks here to listen to a few words said in his a'f. We know that the time is drawing very se when he will cease to be a member of this n, and after a number of years' association, sever his connection with us. Nevertheless, think it is impossible for him to be entirely arated from us, for in our minds, the associ- ons that have existed for so long, at least be- en the most of us and Mr. Jenks, have been so cordial, so pleasant and so friendly a nature, t it seems to me, that one's memory must en- ly fail if they could forget them.

While I am talking I want to say a few words regard to his father, whom the present Mr. ks succeeded in the business. I knew his her for a great many years. He was a great, hearted man, full of good nature and friend- p toward those with whom he came in contact, d noted for his artistic ability. With a mother t is one of the foremost portrait painters of the sent time, Mr. Jenks comes from a stock he well be proud of.

t is to my mind most fortunate for a man to be plentifully endowed with all the human sympa- es and broad-minded feelings that Mr. Jenks There is not a person here from the young- boy to the oldest man in this place that has a kind word and considerable amount of affec- n for him. We regret that he has to go away d make a break in what has been a sort of ppy family, but as there is no alloyed happi- ss in this world, this break is the alloy in ours. are pleased to know that in leaving here he ll assume an important position, which we hope ll prove to his benefit. We trust he will receive same loyal and able support in his new posi- n that he has here in the past, and that it mean success, but as no words of mine can equately express our feelings, I am glad that a gible, practical and more fitting token of our eem has been provided.

It was suggested that some memento should be en Mr. Jenks, and by a happy thought, it was pro- sed that it be a replica of one of his earliest efforts practical serviceable silverware, but, neverthe- s, one of the best, and one which has stood e test of years, one we all know that he, him- lf, always liked and never tired of. The entire rk has been quietly and secretly done so that a rtune surprise should be a feature, and not only s everyone employed by the firm supplied their ota of the cost, but nearly everyone took a part the actual work, and we all think we have use to be pleased with the result, and I now emoving the cloth which covered the set from ew) have great pleasure in presenting to you in the name of all the employes of Goodnow & Jenks, this copy of the fine old octagon tea set, known to us and to the trade as the No. 500. We hope you may live long to enjoy it, and that we all may live as long in your memory; and we trust that the tide which is said to come in the life of everyone, you are taking at the ebb and that it will lead on to fortune and happiness.

After recovering from his surprise, Mr. Jenks made an impromptu but appropriate speech of acceptance, and his remarks were much appreciated by all who participated.

### A New Process of Die Making.

A NEW process of die making is being introduced to the jewelry and silver trade at the present time by a New Yorker, who claims to be able to produce steel dies which may be used in a press, like dies of soft or hard steel, produced in an ordinary manner. A number of specimens of such dies, said to have been made by this process, which is a secret held by the inventor alone, have been shown to the trade, and it is claimed for the process that it can produce steel dies of any conformation up to seven inches square or seven inches in diameter, in circular, hexagonal, octagonal form or prisms or up to seven inches wide by 10 inches long in quadralateral or eliptical shape, in annealed, unannealed or hardened steel, capable of resisting any excessive pressure, rack and wear and tear.

The inventor claims that these steel dies can be made from actual models, from photographs, drawings, designs, reproductions of designs, or from lettering, monograms, badges, emblems, seals, coats of arms, watch case lid designs, artistic metal medallions, commemorative plates, etc., in brass, silver, gold, or other metals, and also in tortoise shell, leather, celluloid and similar substances. In fact, the inventor is positive and enthusiastic in his assertion of his entire success at reproducing exactly any metal work by a die equal to the finest cut steel die, and claims to have capital necessary to guarantee the success of his work in every way.

Dies and reproductions from these dies shown by him include medallions, old coins, jewelry patterns, and, in fact, practically everything of this character that is used by the jewelry and silverware trades.

PRIZE ESSAY COMPETITION, No. 16.

SUBJECT:

## How and Under What Conditions Should Auction Sales be Conducted?

NOT so many years ago auction sales occurred rarely, when compared with the great number of such sales which are held to-day. The auction sale at that time denoted the failure or retirement of a business man. But year after year the auction sale has been utilized in various ways in connection with business, so that now we may consider them very common. In some parts of the country an auction sale may not interest the public at all, but as a general rule they are well attended and a great many people still go a long distance to attend one of them.

I do not know what the exact cause may be of the great interest displayed in these sales—I suppose the majority would say it is because the merchandise is bought at a sacrifice, but this may not always be the case. It is probably due also to the fact that buyers are privileged to bid or set the price of an article themselves instead of the business man doing this, and they usually think they are buying cheap in this way, when in some cases they may be paying more than the business man would have asked for the same article with his usual percentage and profit added.

Nothing, however, can be said against the auction sale if conducted in the right way and under proper conditions, for the real object of these sales is to dispose of stock quickly and at the same time get the best prices possible, according to value.

To conduct an auction sale so as to receive the best results it is necessary to be scrupulously careful in every detail. First of all see that stock and advertising receive the attention necessary to warrant the conducting of a successful sale. The stock, no matter in what condition it may be, should certainly not be overlooked, for far better prices can be realized when an article is clean, bright and highly polished than when left in a soiled condition. Some business men imagine that an auction sale, when retiring from business, or at any other time, would be foolish, and wasteful if money were spent to clean the old stock of which they desire to dispose. This is a great mistake, for any business man will find that he will be able to sell stock quicker and besides receive better prices, when every article is clean, which goes a great way in making a sale at auction as well as at any other time. Cleanliness has been the success of hundreds of business men of to-day, for in this way they strive to please the eye of the prospective buyer.

The advertising should be thorough and properly handled and worded according to the conditions of the sale, by one who has some knowledge of the art of advertising, with the object of reaching and informing all in surrounding towns, as well as those in the city itself, in which the business man may be located. There are many ways of doing this, e. g., the newspapers, circulars, the mails, signs, etc., and the business man who has not the facilities of handling the advertising himself should seek the advice of someone who does know and who will be able to give him better results from whatever amount the business man wishes to invest in this way for the success of the sale.

The auctioneer, the man on whom a great deal depends in order to conduct the sale as profitably as possible, should be selected, not in haste, but with great care, for he can make the sale a failure or a success. The auctioneer must strive to make the sale as cheerful as possible for those attending, through his wit, humor and experience, so as not to allow the sale to become monotonous to them. Some business men think that any auctioneer will do, for they can save a large amount by securing the services of an all around local auctioneer, who does not ask one-half or one-quarter of the percentage demanded by an experienced jewelry auctioneer. This is certainly a mistake, for one should engage an experienced jewelry auctioneer, one who knows thoroughly all about the different articles sold in connection with the jewelry business, for though he may ask more for his services, the business man will find after the sale, that he has been the cheapest auctioneer after all.

The position of the auctioneer at a sale should be such as to enable him to see the face of each one present; moreover, [illegible] should not be in the way of the clerks, w[illegible] may be constantly moving from one end [illegible] the store to the other, for the purpose [illegible] wrapping articles, or showing differe[illegible] pieces to patrons.

A good auctioneer will see to most [illegible] these things himself, but I mention t[illegible] merely to show the business man that [illegible] great many supposed little things may pro[illegible] quite a time saver in many ways.

Any request to place an article on sa[illegible] at any time, by those whose time is lim[illegible]ed, and who would like to have a chan[illegible] to bid, should be granted at [illegible]on for these persons may not be able to [illegible] tend the sale again, which may sometim[illegible] mean a loss. Do not let it be any troub[illegible] to show the goods on sale, and, as me[illegible]tioned before, if the article is proper[illegible] cleaned it will bring a better price, for [illegible] doubt it will be examined thoroughly [illegible] the customer, and the cleanliness and brigh[illegible]ness of the article will cover many a fl[illegible] which would otherwise be seen at once.

The accommodation of the ladies shou[illegible] be unquestionably attended to, for oft[illegible] they are the best buyers. The sale shou[illegible] be so conducted that every lady may [illegible] tend without the least feeling of uneas[illegible]ness. Smoking and improper langua[illegible] must be prohibited. The room must [illegible] comfortable and well ventilated, so that [illegible] may not become stifling, as is often t[illegible] case at a sale of this kind, where a lar[illegible] number of people are gathered for sever[illegible] hours. Whenever the space will allo[illegible] chairs should be furnished for all tho[illegible] present, and if this is impossible the hall[illegible] at least should be furnished with chairs[illegible]

The reader may think all these litt[illegible] things unnecessary, but if it were po[illegible]sible for them to attend two sales side [illegible] side, one conducted properly and the oth[illegible] without the least thought as to the comf[illegible] of the patrons, it would be no hard propo[illegible]tion to determine which sale was the m[illegible] successful.

H. I. K.

*(To be continued.)*

---

Timely decorations for a show win[illegible] are imitation autumn leaves, which may [illegible] had in all the beautiful tints of the origin[illegible] They may be so arranged as to suggest th[illegible] they are falling. They might also be stre[illegible] about the flat surface of the windows. A apt show card would be: "When the autum[illegible] leaves are falling renew old friendshi[illegible] with an appropriate gift."

## Storekeeping Department.

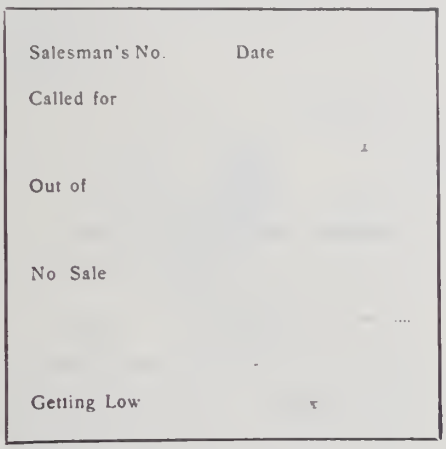
### e Advantages Afforded by Call Slips.

these days of modern business methods no merchant can afford to overlook system that will keep him posted on wants of his customers, says the *Trader Canadian Jeweler*. Some of the larger es have adopted a system whereby y article called for and not in stock is orted. They use what they term "call s" for this purpose. By their use the r is able to keep track of all lines d for that have never been stocked.

a store of moderate size the "call " system might be extended to indicate, goods called for but not kept in stock; nd, goods called for but "out of"; third, s "sold out"; fourth, how many cusers enter the store and fail to find what are looking for; fifth, how many cusers each salesman serves each day; h, the proportion of lost sales each sman has and the reason why the sale lost.

his system would also take the place of old-fashioned and out-of-date "want k," which has ever proven a thorn in flesh of every merchant who has tried se it to lighten his labors. Any merit can install the system at slight exse, and the benefits accruing from its will be sure to amply repay him for little time it takes to keep it up to .

the first place it is necessary to have w thousand (or less) "call slips" print- These should be printed on pink paper, some other color than white, so as to e them distinct from the sales tickets. y should be about three by four inches ize and made up into pads of 50 slips. orm similar to that illustrated herewith ld serve most stores.



ow how to use them to best advantage he next question. The form in itself elf-explanatory. When a customer calls a certain article and does not get it the sman uses one of these slips, giving the son why. It is then sent to the office filed just the same as the sales checks

Every day, or every week, these can gone over and tabulated. It is likely a large number of them may prove ess, so far as the needs of the store are cerned, but those that are useful at all of the utmost importance. From them lines to be reordered can be entered in ant book kept by the merchant's own d. In this method there is no possibility overlooking a line when the traveler s or when a letter order is being made

ow a few words as to the benefits to derived from the use of this system. ides the items mentioned in the second graph of this article the use of this em will make the clerks more attentive the stock, the customer and the sale. y will know that every lost sale will be rded against them and will use their ate t abilities to make sales. That in f s worth a great deal in stores where eral salesmen are employed.

*oods called for but not kept in stock.* s is an important knowledge to the progressive merchant. He may be turning down lines every season that his trade demands. This system will tell him what they are. Then some new fad may turn up and he decides to wait for a demand to be created for it. His "call slips" will soon post him on the demand. How many merchants are there who can explicitly depend upon the sales force to recognize and report a demand for an article not previously stocked? Not many. Some salesmen because they happen to have a call for a certain article once or twice begin to think they are losing half the trade of the store because they havn't got it in stock Others will have call after call for an article and keep "mum" about it. The "call slips" make all these things clear and prove the demand beyond question.

*Goods called for but "out of"* Here is another very important item upon which the merchant should always be informed.

A CONVENIENT FORM OF CALL SLIP.

There is more money in the shape of profits lost to the merchant through being out of lines that have been introduced and staples that should always be in stock than in lines that have never been stocked. The "call slip" is persistent in its demand that these lines be stocked, for every call made for them must be recorded and reported. It is the same with a line that the merchant has decided to discontinue. His stock of that line is sold out, but the demand continues. He soon knows to what extent, and if sufficiently large he can change his mind and restock. A report may come in "sold out of" a certain line just when a letter order is being sent off. It can be included and a saving in express or freight charges made. Where no system of this nature is in use the merchant knows nothing about lines sold out until he has lost many dollars in profits. In some cases the neglect to order some little thing because it was forgotten has cost the store a customer. The profits on the article may not amount to much, but the loss, through the loss of a customer, cannot be computed. "Sizes out of" come under this head also, for no matter how many of an article there may be in stock, if the most called for size is short the number of sales lost must be many.

How many customers enter the store and fail to find what they are looking for? These figures in black and white would surprise some merchants. They are doing a fairly prosperous business and everything seems to be going along smoothly, but tell them the exact number of customers who go to their store and are not suited and they will be loth to credit it. This system will make everything plain along this line.

It must be remembered that not every customer that calls for a certain article will turn around and walk out because it is not in stock. Some will take something else that may serve their purpose. When this is done the "call slip" should be filled out in the regular way and then the word "sold" should be written across the face of the slip to indicate that something else was sold in place of the article asked for. If a sale is lost the merchant wants to know the reason why, because it is either due to his lack of judgment in buying or to the inability of the salesman to make the sale. In every case the reason as far as the salesman can see it should be recorded and the merchant can soon judge from the frequency of certain reasons whether to blame the clerk or himself. When the same reason is given by more than one salesman he can in nearly every case rest assured that he has been at fault in buying the stock in question.

The *proportion of sales each salesman makes and loses.* You've often heard a merchant say, "Jack's a good fellow, clean stock keeper and all that, but he can't hold a candle to Tom when it comes to making a sale." Now the way to prove that is by using these "call slips" for a short time. Their use would make many a merchant change his mind as to the relative merits of his salesmen in that respect. Of course it should be remembered that all salesmen cannot be "crackerjacks," and the poorer salesmen should be taught how best to handle the customer; how best to show the goods; how best to introduce the good points of the article and how best to close the deal.

By means of this system in connection with the sales slips, the number of people who visit the store can readily be told. The per cent. of sales made, the average amount of each sale and other statistics that are useful to the merchant can be figured out from the records at hand.

### Hints for the Advertiser.

IF there's anything in your store you think people ought to buy, tell them so and tell them why.

Write advertising as though you expected it to be believed.

The better a man advertises the more he will be able to advertise.

Don't take chances with public confidence if you already possess it.

If you have nothing at all to say, don't waste good space.

The danger of overadvertising is much less than that of underadvertising.

It is time for the ad writer to look up Autumn adjectives in his scrap book.

Fall and Winter advertising is probably the surest of the year in bringing business.

You need not say all that is true, but do not say anything that is not true, in your advertising.

He who advertises without a definite aim and plan is more lucky than sensible if he makes it pay.—*Advertising World.*

# RETAIL JEWELERS ADVERTISING

*The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.*

THE group of retail jewelers' advertisements on this page show a variety of thoughts for use by the merchant in his local business publicity during the early Fall months.

C. J. Monson, Jr., & Co., New Haven, Conn., in a small card 1½x1¾ inches, ask the residents of their city to leave clocks at the store so that they can be put in order by the time the Summer vacation season is over.

The Castleberg National Jewelry Co., Washington, D. C., makes a strong play for charge accounts, and offers to save customers 25 per cent. The concern also gives prominence to the optical department. This announcement occupied seven inches double column.

Geo. T. Springer, Portland, Me., announces that he is still showing diamonds. The space occupied is three inches single column.

The optical department of Addison Bros., Chelsea, Mass., is prominently put before readers of the local papers, in a four-inch illustrated advertisement.

"A study of studs" is the catch-phrase used by H. J. Bare, Waynesboro, Pa., to attract attention to his five-inch announcement.

## Timely Advertising Advice.

IN the holiday season, the harvest time for the retail jewelry dealer, he puts forth his most strenuous efforts.

In no manner can such efforts be more efficiently made than through the 20th century method of advertising. In these latter days no dealer can hope to secure a living profit through those alone with whom he has a living acquaintance. There is a large market to be secured through advertising. For it is obvious that though individual members of the jewelry craft would benefit, by cutting into the trade of their colleagues, the general market would not be greatly enlarged, and the less fortunate brethren would have to go to the wall.

It has, therefore, become not the least happy function of advertising to *create* a market—that is, to make people feel the want of a great many things which they previously had no idea that they lacked.

It has been generally agreed upon that the retail jeweler must advertise in a more dignified manner than is necessary for the tradesman in other lines. He caters to the higher wants of the community, to their aesthetic tastes and their artistic perceptions. While doing this he need not be austere. No, he should be as suave a courteous and genial in his announcemen as he is in his personal dealings.

The advertisements of the jeweler oug to be couched in elegant, dignified courteous phrases and displayed in t daintiest and neatest of type that can selected. As with all other advertisemen so the consensus of those who are qualifi to speak agree, there should be only two, at most three faces of body type display throughout. Just enough for variety a not enough to detract from the harmony the display. Then let the headline and t name below be of the same kind, the lat perhaps a little larger, the street and to smaller.

As to cuts, let the dealer himself det mine. Only one thing: If he is a dealer a small town and the local publication u a poor quality of paper—a paper that "c sets" or shows through—it would be abs to use a cut or illustration. He should no cut which will not show up to adv tage, and those which will do this, even the better grade of metropolitan dailies, the outline cuts.

As to ornaments and borders, let him a use his own judgment. Let him not se a heavy border. Try to use one that is tinctive, dainty and graceful. Be spar in the use of ornaments. They should of the same character as the border.

If the jeweler have a knowledge and taste for literature, he may add much to attractiveness, strength and grace of his nouncements by the adoption and use of apt quotation. But the great danger here that the quotation may be either dragged by the ears or so frequently used as to cheapened and void of effect.

Let the body of the announcement be general statement, gradually becoming m specific. Headlines are to be commend provided always they are not atrocious p or other attempts at questionable hum Such jokes will surely repel all people good taste, the very class from whic representative jeweler desires to win custom.

It is, as a rule, well to quote a few pri if for no other reason than as an evidence good faith. In a small ad let them be pended in small, unobtrusive type at the of the body of the advertisement, betw that and the dealer's name.

## Advertising Axioms.

A REMARK credited to a well kn advertiser which is very true, is "vertising doesn't jerk; it pulls. It be very gently at first, but the pull is ste It increases day by day and year by y until it exerts an irresistible power.

Here are two points, taken from an change, which are important to both manufacturer and retailer. "In times of pe prepare for war." Business is a co industrial war and this aphorism can made to apply to it by changing it to "in time of dulness prepare for activ which the successful men always d

The ring of honesty can make itself parent in the printed matter of a bus as easily as it can be heard in a pers voice.

## Dynamics of the Ocular Muscles.

By JOHN C. EBERHARDT, Dayton, O.

*(Continued from issue of Aug. 16, 1905.)*

OCULAR CALISTHENICS.

THE enforced activity for any given muscle not only enforces an increased nerve supply, but also augments the circulation, as can be demonstrated by the simplest calisthenic exercise. This being true, the application of intelligently directed exercise to subnormal ocular muscles must be productive of desirable results.

The important question which first presents itself is, how can we determine which part is deficient? In the past, passive or static tests have been largely depended upon to determine imbalances or insufficiencies, although our foremost authorities have emphasized the necessity of determining the efficiency of each individual muscle by the duction tests. As has been frequently said, "we are creatures of habit," and to this the muscles are no exception.

If, therefore, a given muscle has been forced to exert and maintain an excessive effort, the mere disassociation of the eyes, as in the usual Maddox rod or prism tests at 20 feet, will not necessarily suspend the accustomed muscular effort, which explains the phenomenon so perplexing to many operators, where at 20 feet an excessive convergence is revealed by the Maddox rod, whereas at the near point this is converted into inadequate convergence. This is easily explained when the cause is sought, which in this case would be found to be an insufficient efficiency of the converging muscles, necessitating a constant excessive innervation to these muscles, which excessive supply is not entirely neutralized by the disassociation test whereby the desire for fusion is suspended and the overstimulated interni turn inward more or less, thus apparently indicating an esophoric condition, whereas if the duction of the interni were carefully taken they would in all likelihood be found subnormal.

Therefore, the first step in the investigation of the ocular muscles should always be the measurement of their efficiency, the results being carefully recorded. A simple and satisfactory method employed by the writer is as follows:

A trial frame with square cells constructed so as to firmly hold a 10° prism with either base in or out is used. These cells have attached in front a carrier permitting the introduction of a prism bar, which is about one and one-quarter inches wide and eight inches long. It contains eight prisms, bases out, ranging from 1° to 8°. A similar bar also contains eight prisms, bases up, and ranging from 1° to 3½°. These bars have notches filed into their edges to admit of engaging a click attached to the carrier on a frame, so that the prisms can be alternately brought before the eye. The bar containing prisms, bases out, up to 8°, is used in connection with either a 7°, 10° or 15° prism, placed in the cell, base out, and will take the duction of the interni, whereas the bar alone, bases in, is used to measure the externi, the bar with base up enabling the operator to test the efficiency of the vertical muscles.

This frame can be constructed by using any of the less expensive regular trial frames and is essential, for it is also used in the muscle exercises to be hereinafter described. The square prisms are desirable in order to insure the proper position of base of prism.

Recently the writer has constructed a massive metal bar swinging from the wall in front of patient, so arranged that it can be fixed in position, upon which prism carriers slide, admitting of their adjustment before patient's eyes, a level attached enabling operator to adjust accurate horizontal position, and relieving weight on patient's face, whereas a chin and temple rest attached to bar keeps patient in a fixed position. For all preliminary examinations the writer, however, still uses the frame previously described.

In taking the duction of the right interni the 10° prism is placed before the eye, base out, and the patient is caused to fix a light on wall 20 feet away placed at the height of patient's eye. The writer uses for this purpose a frosted electric bulb covered by a black metal hood containing a circular opening about three-quarters of an inch in diameter. The 10° prism displaces light laterally, the desire for fusion causing the eye to turn in; prism bar, bases out, is now inserted over this 10° prism and moved upward, thus gradually adding from 1° to 8° to the 10° already before eye. If all this can be fused the 15° prism is put in place of the 10° and the same procedure followed out, thus producing a total of 23° for each eye. The same method for the externi with bar, only with bases in, is employed, while the bar, with bases up or down, will determine duction of superior or inferior recti.

*(To be continued.)*

F. N. Taylor optician, Hartford, Conn., moved, recently, into more commodious quarters, at 174 Asylum building.

## A Startling Statement Made by a Physicia

PITTSBURG, Pa., Sept. 6, 1905.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY

"It was not until the year 1854 that a attempt was made by the medical profess to accurately measure the eyesight. Dur this year, Alfred Smee, in England, a Eduard Jaeger, in Austria, published a s of test-letters or test-types, for this purpo These tests were convenient, but insu cient."

The foregoing is the opening statem made by Dr. Roosa in his book "Defecti Eyesight," and he is the man that leads t opposition against optometrical legislati claiming that the physician alone should allowed to practice optometry. Thus t presentation of these facts comes at rat an inconvenient time.

But credit must be allowed him for t ing the truth, for it is true that physici have done very little to advance the scie of optics, but are at present excelling retarding progress along these lines.

C. A

## How to Economize Space for an Opti Establishment.

ROCHESTER, N. Y., June 28, 190

*Editor* THE JEWELERS' CIRCULAR-WEEKL

I am about to go into business, and exp to do some optical work. Now my room but 15 feet long, and I would like to h you suggest some way of fitting it out the distance, in that space. I have thou of using a mirror, but I don't know how to place the charts, as I have got use artificial light. Will you suggest way to do it.

E. B

ANSWER:—Place a reversed letter ch over the patient's head and a mirror the other wall directly in front but til up from the bottom until the chart co into view. This gives you a 30-foot ra and the 30-foot type must be used as normal line, normal vision being desig ed in this case as 30-30, that is, the pati if normal, will read the 30-foot line at t 30-foot distance.

You can do very accurate work at feet without a mirror, using the 15-foot l of type as your standard and deduct +.25s from your hyperopic corrections adding —.25 to your myopic corrections distance use. In this case you use the re lar chart in the usual way. Some cha are printed that are so arranged as to used for 10, 15 or 20 feet distances with making any deductions or additions.

# Optical Department.

## Astigmatism and Its Resulting Ills.

a recent address before the county school superintendents of Indiana Dr. J. Hurty, secretary of the State Board of lth, spoke in part as follows on the ect of "Physical Defects of Children as drances to Good School Work":

The greatest of all physical defects," he , "is astigmatism. Fully 70 per cent. of ersons have astigmatism. This is not a s, but a fact established by thousands xaminations. If this defect were cor- ed, harm that now exists to a great de- would not be noticeable.

The child afflicted with astigmatism n reading or writing will tilt his head he left, will raise his right shoulder, project his right leg straight before him, by this position the spine is bent. In young child this will finally produce al curvature, and with this deformity e is induced a feeling of strain or irri- n in the mind, indigestion, nervousness the whole train of ills which bear the -sounding name of neurasthenia."

r. Hurty did not think that the crowding the child with studies produced the ble generally ascribed to it, but that the posture in reading and writing, gener- caused by astigmatism, is responsible. added:

These conditions cause the spine to be- e twisted, more or less, and then fol- neurasthenia. Bad ventilation, which ns the breathing of poisonous air, is a t cause of malnutrition, which is fol- ed by neurasthenia. At the lowest esti- e 20 per cent. of the consumption is ac- ed in the schools. The malposition, eeding from the imperfect eyes of the l, materially cramps the lungs and t. Add bad air to this and we have dmirable preparation for consumption."

conclusion Dr. Hurty urged that as- atism always be corrected without y.

## rious Expressions of a Prescription.

DANVILLE, Va., Aug. 23, 1905.

or THE JEWELERS' CIRCULAR-WEEKLY.

inclose a prescription for cross-cylin- combined with spherical. One is the they read in trial frame and the other ie way they read as sent from the house made them. How should I write the cription when ordering the glasses?

C. B.

AS READ IN TRIAL FRAME.

O. S. + 1.50 S. = + 2.50 C. 90°—R.

## Optometry Examinations Held Abroad.

(Questions and answers of the general examination held recently by the Worshipful Company of Spectacle Makers, London, Eng.)

Q.—1 Give graphic constructions to show accurately (*a*) the actual path of a ray which strikes the horizontal top surface of a piece of glass with an angle of incidence of 60°; (*b*) the path of a ray which comes up through water with an angle of internal incidence of 45°. Take the refractive index of the glass at 1.5 and that of the water as 1⅓?

A.—(*a*) Let A B (Fig. 1) be the surface

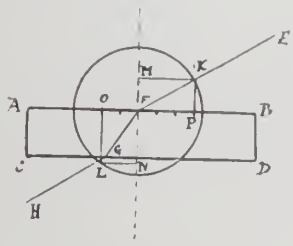

FIG. 1.

of a piece of glass A B D C and let E K F be a ray of light incident at an angle E F M of 60° with the normal M F N. The ray E F is refracted at F towards the normal. The course of the refracted ray is found by dividing on A B the space F P equal to K M, the sine of the angle of incidence, into three equal parts, and marking off on the other side of M F a space F O containing two such parts. At O draw the perpendicular O L and connect F and L. This line F G shows the course of the light ray in the glass. At G the ray is again re-

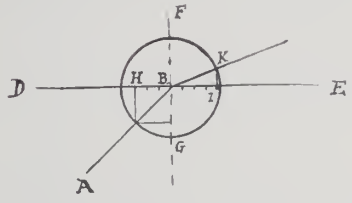

FIG. 2.

fracted in the direction G H away from the normal and in a direction parallel to E F.

(*b*) Let A B be the ray incident on the surface of the water D E. Divide B H, equal to the sine of the angle of incidence, into three parts, and on the other side of the normal F G mark off B I equal to four such parts. Draw the perpendicular K I, and B K being connected shows the path of the refracted ray. (See Fig. 2.)

Q. 2.—It is required to turn a slightly diverging cone of rays through a right angle; give sketches to show how this may be done (*a*) by a plane mirror at 45° to the axis of the cone; (*b*) by a total reflexion prism. The sketches should show the directions, before and after reflexion, of the axis of the cone, and of the two rays that bond its sides. (It will be well to take a cone of not more than 10° or 12° angular width.)

A.—2. (*a*) In Fig. 3 A B is the plane mirror, C E is the axis of the cone of divergent rays, and C F, C G are the two rays that bound its sides. The divergence of the light after reflexion is as if the cone of rays diverged from C.

(*b*) Let D E be the axis of the cone and D F, D G the two bounding rays. The prism employed is right-angled isosceles, and the cone of light is incident so that its axis is perpendicular to one of the sides of the prism which form the right angle. The cone being small, all the rays may be considered perpendicular to the surface, and therefore enter the prism without deviation. The incidence on the second surface is on the hypothenuse side of the prism and is at an angle of 45°. This angle being greater than the critical angle, the light is not refracted by the prism but is reflected, according to the laws of reflection, at a similar angle of 45°; it, therefore, falls perpendicularly on the third surface and emerges at right angles to its original course.

Q.—3. Briefly describe two experiments to show that white light can be decomposed

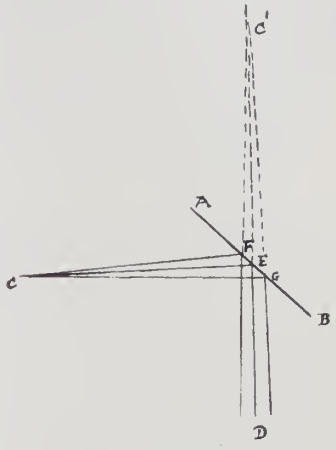

FIG. 3.

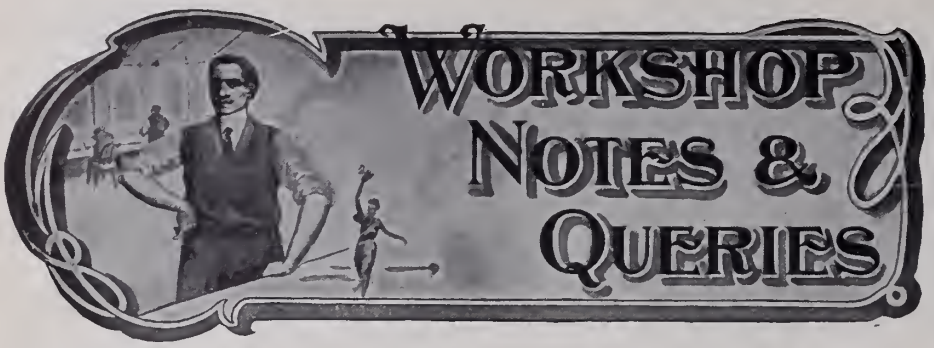

into colors, and two other experiments to show that the colors of the spectrum can be combined into white light.

A.—3. White light can be decomposed in its component colors by passing a parallel beam of light through a prism; the component colors are unequally refracted by the prism so that a spectrum is obtained. Or if white light is allowed to fall on a grating formed by a series of very fine lines ruled on speculum metal, the light is so reflected as to also form a spectrum.

The decomposed light obtained by refraction by a prism can be reformed into white light by employing another prism of similar dispersive power with its base in opposition to that of the first prism. Or the light can be recombined by suitably placing a series of small plane mirrors so inclined that each receives one of the seven spectrum colors, and reflects it in such a manner that all the colors are superposed so as to form white light.

*(To be continued.)*

E. E. Bausch & Son, Rochester, N. Y., had a very attractive window display last week. The Canada cup, which the local yacht *Iroquois* succeeded in defending, had been placed on exhibition, together with several pictures of the competing yachts. The background and sides of the window were decorated with American and Canadian colors. The display attracted much attention.

[*Answers are also solicited from our readers to the questions published on this page.*]

QUESTION No. 1300—**The Soldering Iron for Brass.**—*I recently tried to solder some pieces of brass wire to a large brass knob by means of a blowpipe. I used tin solder, but the solder would not run smooth, so I could not make a good job of it. How can I overcome this difficulty?* *L. B.*

ANSWER:—Large pieces are difficult to solder, for the reason that it requires more heat than can be produced with a blowpipe. To insure a smooth solder joint the brass must be heated hot enough to allow the solder to melt when it is applied to the joint. The soldering iron may be used with tin solder, and if the iron be very hot the solder will run in smooth. This prevents the overheating of the brass pieces and also prevents the latter from discoloring.

QUESTION No. 1301—**Lacquering Silver.**—*We have several jewel boxes and other silver pieces which we tried to clean and lacquer. We were not very successful, as the pieces looked clouded. How should we proceed?* *M. J. & K. Co.*

ANSWER:—The cloudy appearance of your silver pieces may be attributed to one of two causes, either the articles were not properly cleaned and polished, or the lacquer was too dark in color for silverware. To be successful the pieces must be clean and highly polished, and the lacquer should be the white, which is especially prepared for silverware. The room in which this is done must be free from dust or flying lint, otherwise this dust and lint will settle on the articles while drying. When there are only a few pieces to lacquer it is best to dry them quickly in an oven, or over a gas stove, which has an iron plate over the flame. The lacquer is very inflammable and should not be brought too close to a light while working with it.

QUESTION No. 1302—**Etching on Silver.**—*Kindly give me the directions for etching on silver.* *B. C.*

ANSWER:—This question has already been answered in THE CIRCULAR-WEEKLY, but we repeat it as follows: Spread a thin layer of beeswax on the work you wish to etch; with a sharp pointed instrument draw the design through the layer of beeswax to the metal, then pour diluted nitric acid over all. It is impossible to specify the degree to which the acid shall be diluted. This may either be commercially pure, or chemically pure; in the former case it is in a state of dilution; again, if commercially pure, it may contain certain ingredients. Procure a certain reliable brand and institute experiments with it. Take a sheet of silver and perform the necessary manipulation, dilute the acid in different degrees, and then watch the result. The undiluted acid, however, is too strong to be used on silver. The process is somewhat tedious, but is the only one that is public property; there are several quicker methods, but they are patented, while others are so-called "shop secrets," not to be divulged even under torture. In fact, nearly every large manufacturing plant has its own methods and "shop secrets."

QUESTION No. 1303—**To Polish Steel.**—*I want to polish tempered steel so that its finish will be like that of the pinions, screwheads and regulator of fine watches. I do not want a crocus finish, as it takes too much time to produce it. What I want is a fine polish that is quickly and easily produced.* *W. J. V. E.*

ANSWER:—The principal materials for the polishing of steel are crocus diamantine, putty powder and Vienna lime. The first three are applied with plate glass (finely grained), bell metal, block tin, a composition of tin, lead, copper and arsenic (this composition is being used also for lapping gold and brass), soft iron and copper. All the above-mentioned materials, except the Vienna lime, in different degrees of fineness, may be applied moistened with sperm oil, but not with olive oil. But the latter agent, Vienna lime, requires special treatment. It has a caustic nature and is applied with boxwood, maple wood, or some of the softer woods moistened with alcohol, and sometimes with water or oil. It imparts to steel a fine black polish and will do its work rapidly when moistened with alcohol. Being of a caustic nature, it is not adapted to polishing a flat surface of some size, as it will destroy the beautiful sharp corner on flat steel work, seen in the old Geneva repeating watches. A quick, final touching with Vienna lime may sometimes be done to finish an imperfect surface. Vienna lime ought not to be used for polishing the heads of screws, which are intended to be blued, as the bluing will not be seen; it should be kept in corked bottles away from the light, and mixed just as it is required to be used. It will also become worthless by exposure to the air. Vienna lime is an excellent polishing agent in the case of costly steel gongs in repeating watches or chime clocks, as the rust requires the tone, and polishing them by other means might prove a tedious job.

QUESTION No. 1304.—**A Lacquer Resembling Gold.**—*I have a very large brass clock, which at one time was gold plated. The clock case has been polished a number of times, and the gold is nearly all rubbed off, and shows the light colored brass. How could I color this clock and have it look like gold, without going to the expense of plating the same?* *I. S. B.*

ANSWER:—The brass should be rubbed and cleaned as well as possible and the whole lacquered with a gold-colored lacquer. To obtain the most satisfactory results it is best to use a light colored lacquer which may be colored with the gold coloring. A small quantity will suffice and can be mixed to obtain the right shade. After trying a small part, and when the right shade is obtained, the clock should be brushed over with the lacquer. Be very careful to cover every portion, otherwise the discolored brass will show in a few days where the lacquer is missing. After the lacquer has dried in the air for about half an hour it should be placed in a warm oven or near a heated stove to thoroughly dry. By this means brass can be made to look like gold, and will retain this color for several years.

QUESTION No. 1305—**To Oxidize Brass, Copper and Silver.**—*Kindly give a recipe for oxidizing brass, copper and silver.* *B. S. I.*

ANSWER:—One solution will oxidize all of the above three metals. If the articles are cast pieces, then they should be dipped in the regular acid dip to clean them, except the silver. This can be cleaned with a strong hot potash, or in a cyanide dip. If the brass and copper are in the form of sheets or wire, then a cleansing in potash or benzine will suffice. The chemical used for oxidizing is potassium sulphite dissolved in warm water, strong enough to obtain the shade desired. To preserve the oxidized it is necessary to lacquer the articles and have them well dried in the drying oven.

QUESTION No. 1306—**Black on Gun Barrels.**—*I have a double barrel hunting gun and want to color it black. Can you give me a formula for this?* *I. J. E.*

ANSWER:—The fine black shading on guns manufactured at St. Etienne, France, is produced with the following solutions: (1) Take chloride of mercury and sal ammoniac; (2) perchloride of iron, sulphate of copper, nitric acid, alcohol and water; (3) perchloride and protochloride of iron, alcohol and water; (4) a weak solution of sulphite of potassium. These solutions are successively applied, each becoming dry before the other is used. No. 3 is applied twice and a bath of boiling water follows No. 3 and No. 4. The shade of color is fixed by active friction with a woolen cloth and a little oil.

QUESTION No. 1307—**Solder for Steel and Iron.**—*What kind of solder is best for joining together small articles of steel and iron?* *K. L.*

ANSWER:—Prepare a solder by using granulated brass, 8 parts, and zinc, 1 part. Mix this with borax and spread on the articles to be joined.

QUESTION No. 1308—**Polishing Powder for Glass.**—*Please give me a recipe for powder for polishing mirrors and plate glass.* *E. H.*

ANSWER:—According to the *Deutsche Maler Zeitung*, the Germans use for polishing mirrors and plate glass the following mixture: Powdered cologne chalk, 30 grammes; tripoli, 30 grammes; bole, 30 grammes. The whole should be finely powdered. To use, moisten the glass, then rub a linen rag into the powder and rub the glass until it is clean.

THERE IS AN ATTRACTIVENESS just in mere glass alone, bright and sparkling. Taking this as a basis and adding the skilful work of the craftsman, the product may well be called "Beauty Crystallized."

Center pieces that add to the beauty of flowers and the lusciousness of fruit. Richly etched pieces with unique shadow-tints. Gold appliqué decorations; fruit and flower designs. An extensive showing of Bon-bons, Cocktail and Liquor Sets, Glass Candlesticks and Candelabra.

Edgar Allen Poe uses the expression "crystalline delight." It is exemplified in the high lights, the forms and fashions, the glint and glitter of these crystal products.

## ncient Heroic Bronze Statue for the Metropolitan Museum of Art.

N the Metropolitan Museum of Art, New York, a new acquisition to the ancient tatues, which is attracting much attention, s the bronze statue of Caius Vibius Trebo-ianus Gallus, one of the Roman Emperors. The trustees bought this fine example of ncient art in Paris, and it recently has been laced in one of the galleries, where it may e conveniently inspected and admired. The icture of the statue herewith presented is rom a photograph taken by Charles Bal-ard, the official photographer of the mu-eum, and gives an excellent idea of the roportions and beauty of this work of Roman art.

The history of the statue relates that it vas found in excavations made in the early ears of the last century, near the church f San Giovanni in Laterano. At the time uriosity had been stimulated concerning he state of ancient Rome by the example i Pope Pius VII., and the permission to ake these excavations was obtained by Count Nicolas Demidov. The huge statue ay in several pieces, which were gathered nd sent to Demidov's palace in Florence, where the work of reconstruction and iden-fication was begun. At first the statue re-eived the name of Julius Cæsar, by which ame it was known for a long time. In 828 it passed into the possession of Demi-ov's son, Anatole, afterward Prince of San Donato.

In 1848 Count A. de Montferrand, the rchitect, received the statue as part pay-ient of his services in constructing the alace of San Donato. For several years he statue was in the architect's splendid ollection at St. Petersburg, but it gradu-lly fell to pieces, as the work of the artist ho first endeavored to restore it to its riginal shape was imperfect.

After the death of the Count, in 1858, the tatue was in seclusion for a quarter of a entury. Then it was bought by Rollin and Feuardent, who sent it to the Louvre at Paris, where M. Penelli began the work of econstruction, which again proved a fail-re.

Feuardent packed the statue away in a ied, from which is was brought out a ouple of years ago. A careful examina-o of the statue made at that time by ex-rts led to the conclusion that it was real-y a magnificent example of ancient sculp-ire, which had been harshly treated. To M Andre was entrusted the task of re-building the statue on scientific lines. He found that not only were the pieces not well joined, but several of them were transposed, portions of a leg, for instance, being found in the back.

As the joining had been done with cement, without rivets, the damage was not irremediable. M. Andre found that it was

HEROIC BRONZE STATUE IN METROPOLITAN MUSEUM OF ART.

easy to undo the work and reconstruction could be almost perfect, since no part of the original was missing except a few inches of the torso. In 18 months he completed his task and critics declared their entire satisfaction with the results.

A comparison of the statue with authentic coins in European collections establishes in the minds of those who have studied the subject, the identity of the statue with Trebonianus Gallus, who fought against the Goths in 251 and on the death of Decius was proclaimed emperor of Rome by the soldiers. He entered the city with pomp, and lived in luxury, and persecuted the Christians in order to win popular favor. Finally he was defeated in battle, and was killed by his own soldiers, according to the historians.

## Reappraisements of Statuary, China and Kindred Lines.

REAPPRAISEMENTS of statuary, decorated china and curios were announced last week by the Board of United States General Appraisers as follows:

Japanese curios from Wing Yee Woh Co., Yokohama, exported May 30, 1905, entered at Portland, Ore. (File No. 36055); findings of Sharretts, G. A.: 2 vases, silver, entered at 5.06, advanced to 6.50 yen each; 1 pair vases, copper, entered at 4.40, advanced to 6 yen per pair; 48 sets bamboo baskets, entered at .90, advanced to 1.10 yen per set; 90 sets do., entered at .97, advanced to 1.40 yen per set; 56 sets do., entered at 1.37, advanced to 1.95 yen per set; 18 sets do., entered at 1.70, advanced to 2.40 yen per set. Add packing boxes, etc.

Manufactures of ivory and marble statuary from G. Volterra & Levi, Rome, exported Jan. 27, 1905, entered at New York (File No. 34747); findings of Waite, G. A.: 2 ivory figures, entered at $15, advanced to $22 each; 1 marble group, entered at $135, advanced to $200. Add packing.

Decorated china from A. Lanternier & Co., Limoges, exported May 3 and June 6, 1905, entered at New York (File Nos. 36175/76); findings of Sharretts, G. A.: 10 dozen tea cups and saucers, Navarre N27, entered at 8, advanced to 9.94 francs per dozen; 6 dozen plates, 8½ do., entered at 9, advanced to 10.45 francs per dozen; 8 dozen do., 7½, entered at 7.25, advanced to 8.42 francs per dozen; 6 dozen do., 6½, entered at 6, advanced to 6.90 francs per dozen; 8 meat dishes, 14 Navarre, N27, entered at 3.50, advanced to 3.56 francs each; 6 dozen fruit saucers, 4/4 do., entered at 3, advanced to 3.94 francs per dozen; 6 sauce boats, do., entered at 3, advanced to 3.56 francs each; 12 dozen plates, 4½, Cherbourg N233, entered at 3.90, advanced to 4.10 francs per dozen; 36 dozen plates, Louisiane, N247, entered at 4.25, advanced to 4.55 francs per dozen; 6 dozen A. D. coffee, 2d, c. and s., N247, Navarre, entered at 7.25, advanced to 7.66 francs per dozen; 1 only dinner set, 102 pieces, Louisiane, N291, entered at 80.60, advanced to 85.08 francs per set; 2 salads, 25, Navarre, N196, entered at 1.80, advanced to 2.70 francs each. And similar goods. Discounts, 25 per cent., 5 per cent. and 7½ per cent. Add casks.

## THE RAMBLER'S NOTES.

WHAT THE RAMBLER SAW AND HEARD AMONG THE DEALERS IN ART POTTERY, CUT GLASS, BRONZES, ETC.

**ARTISTIC AUSTRIAN GLASS WARE.**

FROM Austria comes a magnificent line of artistic glass called Empress Josephine ware. This line, which has been imported by Chas. Ahrenfeldt & Son, 50 Murray St., New York, consists of jardiniers, puff jars, candlesticks, vases, etc., all made in shapes, designs and colors to conform to the style prevailing during the period of Empress Josephine's reign. The ware is blue in color, and the decorations are of gold in relief. These decorations are symbolic of music, love, war and other topics, and every piece bears the characteristic Empire border, consisting of the mythological torch and of laurel garlands. Some of the pieces are also ornamented with a blue glass silhouette in gold, representing the Empress from whom the line derives its name.

*

**MANY LINES OF ELITE CHINA.**

IN passing along the sidewalk of late pedestrians could not but notice the display of handsome plates in the window of Bawo & Dotter, 26 Barclay St., New York. This line of plates from the firm's Elite factory at Limoges, is decorated with roses painted in rich colors on a dark green background, encircled with wide gold border. The patterns are large, the colors warm, and to buyers in search of pronounced effects these plates will appeal. Among other new lines are several in lilac and other quiet tints, with small patterns, that will prove pleasing to cultured taste. The variety in the display of china at this house was probably never wider than at present, giving the buyer a comfortable assurance that he can find lines suited to his requirements.

*

**QUAINT NOVELTIES IN ROYAL DOULTON**

TWO distinctly new lines of Royal Doulton ware have been received at the salesrooms of Wm. S. Pitcairn, 19 Murray St., New York, the sole agent for the United States. One is the Izaak Walton line of pottery, which will be especially appropriate for the holiday trade, and is handsomely finished in an ivory glaze with enamel underglaze scenes. There are figures of fishermen in all kinds of positions and attitudes, suggestive of the sport, with a vein of humor running through the work of the artists. The fishermen's faces give expression to about all the emotions that may be expected of men of the rod and line. You will find the stout fisherman, with pole, line and bait, and the confident expression of the man who knows that the fish are just waiting in the water to be caught. In another picture are a couple of lean and hungry-looking men, who clearly have used up all their bait, without catching a single fish. Accompanying the pictures are appropriately worded mottoes. The second line, which is also quite certain to draw the favorable attention of buyers in search

THE EXCLUSIVE ART GOODS HOUSE

Reaping the Harvest.

For months our buyers have been scouring the art centers of the world, inspecting, scrutinizing everything offered, discarding much that did not meet with their critical approval, and selecting only the choicest and most exclusive wares. The harvest of their labors is now on exhibition in our showrooms—a harvest of plenty and of richness, the fruit of the untiring and fertile efforts of the master artists and craftsmen of the world.

**Bronzes,** perfectly moulded, realistically posed, entrancingly attractive. **Marble Statuary,** in color and texture unsurpassed; exquisitely carved, inspiring forms. **Electroliers** and **Electric Lamps,** a multitude of varied effects, fascinating in their affluence of form and imaginative charm. **Sevres,** graceful forms, harmony of color schemes, exquisite and delicate. **Royal Vienna,** bold, bright, ravishing colors, beautiful modeling, finest paste and glaze. **Bohemian Glass,** brilliant gold effects in a profusion of fascinating forms and decorations. **Clocks** and **Clock Sets,** beauty and ornament, science and art, happily combined; masterpieces of horology. **Empire Ware, Ivory Figures, Limoges Enamels,** quaint, appealing, fascinating.

novelties for the holiday trade, comprises china painted in enameled colors, with various representations of "Coaching Days in Old England." The artists have skilfully made use of this inexhaustible vein of subjects, which they have treated in an attractive manner, as the coaches, horses, postillions and passengers making many picturesque-looking groups. This ware comprises plates, vases, tea sets, bowls and fancy pieces in many shapes.

*

**SALE OF COALPORT CHINA SAMPLES.**

A FINE collection of plates of Coalport china, also cups and saucers, chocolate pitchers, tea pots, sugar and creams and fancy pieces, shown by John Davison, 12 Barclay St., New York, as samples during the recent season are now offered for sale, and it is expected that by the holidays this stock will be absorbed by the trade. This gives an opportunity for those who wish, to add some fine pieces to their stocks without waiting to import them. In the sales for import from the samples, it has been observed that the Indian tree pattern, a favorite for generations, more than holds its own this year. A large assortment of gold lined cups, Mochas and after dinner cups, as usual, has proved an irresistible attraction in the trade. Directly after the holidays the new lines selected by Mr. Davison while he was in Europe, during the Summer, will be offered to the trade, and ideas developed by the English artists in the course of the last year will then be uncovered.

THE RAMBLER.

**Antique Jewels Found in Persian Temples.**

REMARKABLE discoveries have been made in the ruins of the temples at Susa, the ancient capital of Persia, where marvels of jewelry have been brought to light, the earliest examples ever known of that country.

The jewels of gold and silver are the first of those countries and those ages which have come down to the present day. In this they present a great interest. Unfortunately it is not possible to assign a precise date to each of them. As the cylinders and the seals, which form a part of the finds, belong to all periods, from the 40th or 50th century, B. C. down to the date of foundation, so it is with the jewels. There are some of every age. The rings of filigree work and the scepter with the lion's head seem to be more recent than the statuettes of gold and silver, which have a frankly archaic appearance, but one can not be sure of this appreciation. Have the discoverers not been surprised by finding rings which, if their origin had not been certain, would be attributed by the most acute connoisseurs to the Greek or Etruscan epochs?

Before the discoveries at Dashur nothing was known of the Egyptian jewelry. The opening of the tombs of the princes of the 12th dynasty was a revelation. It is the same now as regards Elam.

## THE SILVERSMITH'S ART IN MILITARY TROPHIES.

FOR a regimental trophy a fine piece of handiwork in silver and bronze has recently completed and is now in the possession of a Boston military organization, having been awarded as a prize in a contest of marksmanship at the Hub. Three Krag-Jorgensen rifles, made of silver, are stacked on a frame-shaped base, also of silver. With outstretched wings an American eagle stands on the center of the frame, his head rising triumphantly amid the guns. Thirteen stars, emblematic of the original States, stretch in a band around the dome, which has a diameter of seven inches. The rifles are 12 inches high, the total height of the trophy is 15 inches, and the weight 15 ounces. The silver is finished in frosty gray and in Butler style, with the stars burnished brightly. The eagle forms a pleasing contrast in a soft green.

The designer has shown much skill in this clever example of work in metal, and the execution is equally creditable. Details of the rifles are brought out with fidelity as in real weapons and the posing of the eagle is particularly appropriate to the purpose in view.

The trophy was made by Geo. W. Shiebler & Co., 5 Maiden Lane, New York, to the order of Rand & Crane, of Boston, Mass.

Postmaster-General Cortelyou has announced the conclusion of a parcels post convention with the Republic of Panama.

SILVER AND BRONZE TROPHY WON BY BOSTON MILITARY COMPANY.

### Lalique's Art in Modern Jewelry.

IN speaking of the London exhibition of "French fashion-jewelry" the *International Studio* recently said:

"M. Lalique is courageously Parisian in the way that he gives his great imaginative skill to the splendors of fashion. Many people might be prone to underate the genius of the man, for are we not rather in the habit of measuring achievement in art not alone by the beauty of results, but also by outside reasons? We rather like an artist to have a moral pose, and we may be inclined to begrudge praise to art dedicated to fashion. In Messrs. Agnew's galleries in Bond St. M. Lalique has exhibited his treasures—his creations of alabaster and jewels. Each case sprung upon us some revelation of delicate artistry and resource in design. Lalique is not without conventions—he has his limitations; to our mind, too much of his great talent goes to the imitation of beautiful natural forms and flowers in unnatural looking material, which suggest sometimes an unpleasant decadence. The imitation orchids as hatpins seem to absorb too much time and skill; and in looking at all this energy put into the manufacture of an ignoble form of sham, it seems a pitiful waste of talents in one whose hands have often modelled in the Grecian spirit. * * * The exhibition was a success."

# The REPAIRING

## END OF YOUR BUSINESS IS THE MOST IMPORTANT PART OF IT

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department f their business. They give it the most prominent place in their stores; they emphasize t in all their advertisements; they keep themselves and their employes thoroughly nformed on the costs of all kinds of work, new ideas and methods; they are courteous nd accommodating to repair customers; have all work ready when promised; and do nly such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this mportant branch of the jewelry business; employ and educate the best help that can be btained; systematize and inspect the work, and use every modern method to produce the est work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

LEATHER EBONY

# Details:

## They Are Important.

IMPRESSIVE as the products of this house are, it does not ask the trade to judge by surface appearances. While examining leathers observe the precise tints and shades employed. Look at the "build" and entire set-up of the goods. As to linings, examine their quality. Carefully observe the interior fittings and note that there's a "feel" as well as a "look" to all employed. Trifles, perhaps, but they spell LEADERSHIP.

THE MAGIC TOUCH OF BEAUTY characterizes all our designs. The Brooch shown here is only one out of many designs, all of which are notably impressive and effective. The price of this Brooch is $250. Neither the most nor least expensive, but a fine example of brooch-making.

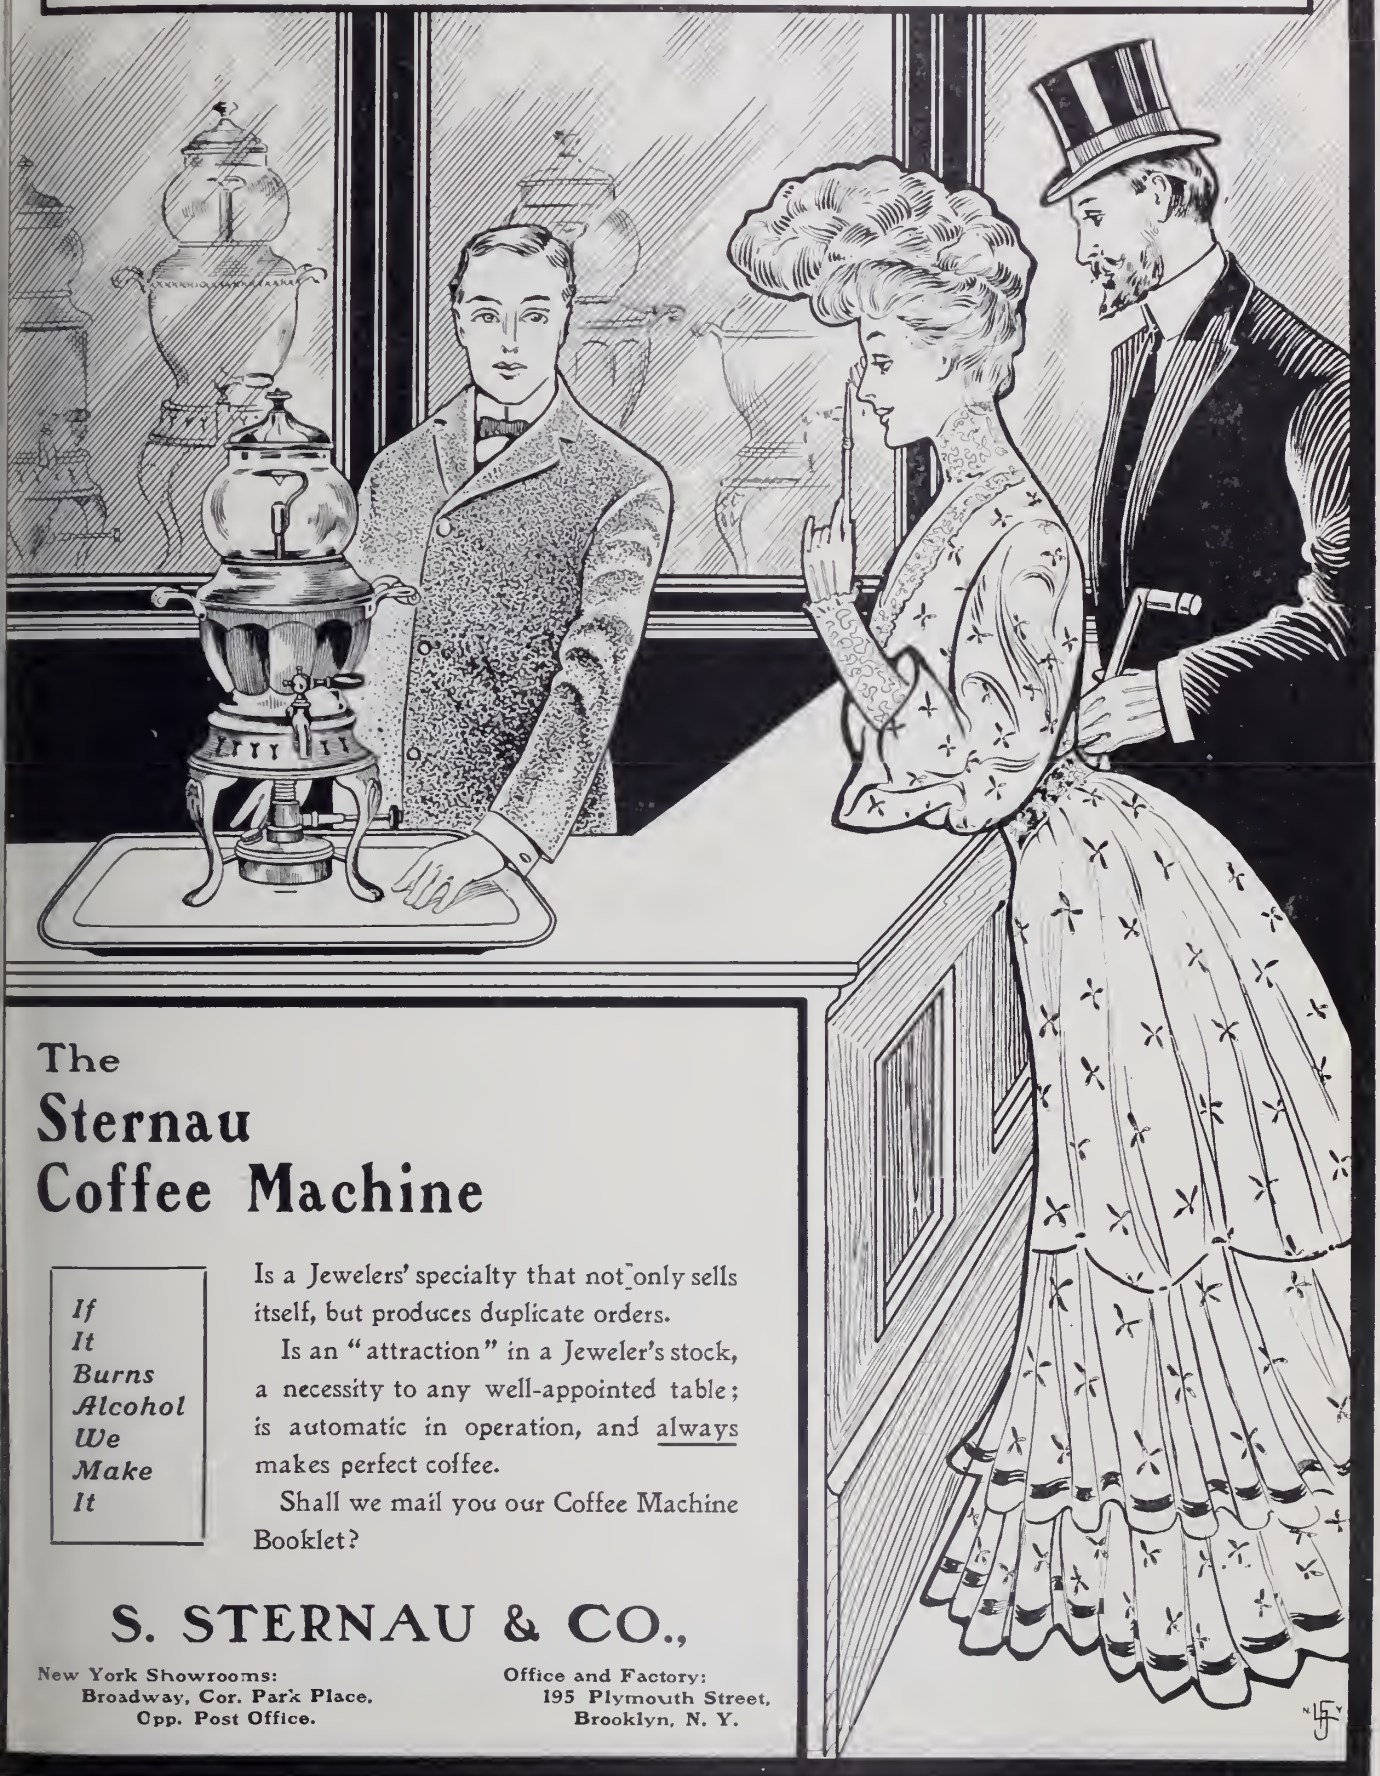
ALL OUR ENAMEL GOODS are 18 karat. We make hundreds of attractive Brooches in enamel combinations, at prices ranging from $5.00 to $350.

ALL THE POPULAR GEMS are used to add brilliancy and enhance the color effects. Pearls, Rubies, Diamonds, Sapphires, Emeralds, etc. Originality and exclusiveness characterize our designs.

Design No. 2772.

SIMILAR DESIGNS AND EFFECTS are applied to Pendants, Scarf Pins, etc. Our line of Scarf Pins is worthy of the special attention of the trade. Prices from 75c. up.

DESIGNS ARE "EXCLUSIVE" in all the finer pieces. Only one of a kind is made. We are prepared to make such designs to order, submitting water color sketches.



THE IDEAS OF INDIVIDUAL CUSTOMERS are faithfully carried out when desired. If the customer has gems and wishes the same to be effectively mounted, we are prepared to furnish special and original designs therefor, which we agree not to duplicate.

SPECIAL: OUR PATENTED ELK HEAD.

Our Pacific Coast Agents, A. I. HALL & SON, Inc., San Francisco, Cal., carry our full line!

## ...s of the Pacific Coast at the Lewis and Clark Exposition.

HE New York house of Tiffany & Co. in cutting balls out of California rock ...tal equal in skill the Japanese, whose ...k of this sort long excited wonder, ...s Dr. George F. Kunz in an article on ... precious stones at the Lewis and Clark ...position, published recently in the New ...k *Sun*.

...n relation to the exhibit the writer said ...art:

It is a striking circumstance that where ... west and east meet—in Japan and Cali... nia—should be found such masses of ...sparent rock crystal, from which can be ... those wonderful balls which the collec... of the world have always obtained ... such delight from Japan. It was quite ...urprise, some years ago, in working a ...d mine at Mokelumne Hill, Calaveras ...nty, Cal., that great masses of this ...eral were found; these cut, as shown in ... case, rock crystal balls measuring from ... to 5⅞ inches in diameter. It was be... ed that the Japanese only could work ...rtz crystals in this manner, but the ex... tors, Tiffany & Co., cut these in their ... establishment, from this American ma... al, and no finer examples of such balls ...e ever been produced.

Southern California is fast becoming ...wn as one of the most remarkable gem ...ions in the world, rivaling the long cele... ted treasure ground of the Ural Moun... ns. San Diego County, with its wonder... yield of gems, was hence more fully rep... ented than any other part of the coast, ...ably in the splendid tourmalines from ...sa Grande and Pala—red and green and ...olored crystals that weigh several pounds ...d wonderful gems that weigh up to 30 ...ats each—red, green, yellow and some... es single gems showing two or three dis... ct colors.

The remarkable new gem mineral, kunz... a transparent lilac variety of spodu... ne, discovered within the last two or ...ee years in San Diego County, had the ...st display yet shown at any exposition. ...ere were a number of gems from five ...ats up to nearly 100, cut in various ...apes—drops, beads, square, round and ...er brilliantly faceted forms—and vary... in color from pale pink to dark rich ...c; also some magnificent large crystals ...m which this gem is cut—all of which ...re absolutely unknown and unsuspected ... years ago. Another recent discovery ... gem stones was shown in the fine topaz ...stals of light blue color from Ramona, ...d Valley Centre, San Diego County, Cal., ... best topazes that this continent has ...duced. The beryls from the same region ... also very interesting, and some would ...ord good cut gems; one of the rarest ...ieties, although perhaps not the most ...uable, is pink beryl, found both at Pala ...d Mesa Grande. This has never been ...nd in such fine crystals or in such large ...sses anywhere else in the world.

* * *

The cut stones in this exhibit numbered ...ogether 90, and the uncut specimens ... making a total of 219. Besides these, ... exhibits of the several States and Ter... ories contained, of course, a great deal ... other and similar gem minerals.

Sydney: 5 packages clocks, $162.

Trinidad: 15 packages clocks, $201.

Valparaiso: 2 packages watches, $170.

Yokohama: 108 packages clocks, $1,715.

## Litigation to Continue on the Subject of Classification of Certain Millinery Pins.

Importers who believed that the decision in the Schiff and other recent cases had settled, in their favor, all questions as to the duty on hat pins, were disappointed last week on learning that the Treasury Department had directed Collector Stranahan to appeal from a decision in a case brought by Dieckerhoff, Raffloer & Co., New York. The Board of United States General Appraisers, following the recent court decisions, held that the more elaborately ornamented pins were dutiable as jewelry at 60 per cent., but most of the pins imported by the firm were classified as follows:

"Hat, shawl, belt, toilet, or lace pins with black heads, faceted or otherwise, or with so-called plain wax paste or glass heads of various colors intended to harmonize with the drapery of the apparel to which attached, or with heads of imitation round and barroque pearls, all of the foregoing if not adorned with metal work, are not commonly known as jewelry and are dut-

l at 45 per cent. ad valorem under Par. or 193, Tariff Act of 1897."

is from the above ruling that the ap- to the courts is to be taken. One ex- nation of the Government's action is that r acquiescing in the Schiff decision, the ials of the Treasury Department chang- their mind. Another version is that the ials believe that too broad an applica- is being made of the court decisions the General Appraisers in disposing of numerous cases that are pending.

.fter the department acquiesced in the uff decision made by the United States cuit Court of Appeals, the General Ap- sers authorized the refunding of excess es paid by millinery importers. Sev- l thousand cases are involved and the nding was well under way when the er came to prepare a new contest. The cess of refunding is now suspended and litigation over hat pins will continue.

### Death of Nathan Fenn.

MERIDEN, Conn., Sept. 14.—Nathan Fenn, of the oldest and best known jewelers this place, died, Sunday, at noon, after fering for three weeks with cancer of the mach. Death had been expected two eks ago by Mr. Fenn's physicians, but was prolonged by his remarkable vi- ty.

Mr. Fenn was born in Wallingford, nn., March 15, 1824, being the son of el N. and Hanna Curtis, who were de- ndants of the first settlers of that town. Fenn came to this place in 1861, after npleting his early education in the schools Wallingford. He first started in the velry business in Grandville, Mass. After ssing 14 years at that place, he returned Meriden and opened a watch repairing ablishment on State St., where he con- cted business for 17 years.

The deceased was frequently a subject of graphical sketches published in the local wspapers. He never sought political nors and was not affiliated with any fra- nal organization. He was a man of keen siness ability and of temperate and retir- habits. He is survived by four chil- en. The funeral was held from his resi- nce, 43 Reservoir Ave., the interment ng in Walnut Grove Cemetery.

### vy Department Awards Contracts for Furnishing Spy-Glasses and Clocks.

WASHINGTON, D. C., Sept. 15.—The Navy partment has awarded the following con- cts for furnishing the Washington Navy rd with spy-glasses and clocks:

Queen & Co., Philadelphia, Pa., 75 spy- sses at $450; Chelsea Clock Co., Boston, boat clocks at $120, and 10 deck clocks $135.

The contract for furnishing 80 quarter- ster's spy-glasses is still in abeyance.

The large clock in front of the store of ntgomery Bros., 3d and Spring Sts., Los geles, Cal., recently stopped for the first ne since its erection, two years ago, as result of an earthquake shock. The ck was erected in 1903 at a cost of $2,000, d is one of the largest on the Pacific ast.

tended to be used as ornaments on artic of wearing apparel. The Board held th to have been properly classified as jewel under Par. 434, Tariff Act of 1897.

SILVER BUCKLES—JEWELRY.—Protest H. Muhr's Sons against the assessment duty by the Collector at Philadelphia. C tain silver buckles were held to have be properly classified as jewelry under P 434, Tariff Act of 1897.

IMITATION PEARLS.—Protest of Garrea & Griser against the assessment of duty the Collector at New York. United Sta *v.* Weinberg (T. D. 26483) followed, lating to imitation pearls.

IMITATION PEARLS.—Protests of Ame can Express Co. Same as Garreaud Griser, above.

IMITATION PRECIOUS STONES MOLDED Protest of Overton & Co. against the sessment of duty by the Collector at N York. The merchandise consisted of v ous kinds of imitation precious stones the form of cameos and intaglios, be composed of paste and given their fres form by the process of molding or pre ing. The Board sustained the import contention that they should have been cl ified under Par. 435, Tariff Act of 1 as imitation precious stones not cut, graved, or otherwise ornamented or d orated, etc. Compare G. A. 5981 (T. 26206).

IMITATION PEARLS—HALF PEARLS—I TATION PRECIOUS STONES.—Protests of bert Lorsch & Co. against the assess of duty by the Collector at New York. claimed by the importers, the Board h certain imitation pearls to be dutiable imitation precious stones by similitude der Par. 435, Tariff Act of 1897, and tain half pearls to be dutiable by simili as pearls in their natural state under P 436. Certain other articles were also to be dutiable as imitation precious st under Par. 435. Note G. A. 6088 (T 26554) and G. A. 5914 (T. D 26013).

JEWELRY.—Protest of I. Emrich & against the assessment of duty by the C lector at New York. The Board held tain brooches, bracelets, rings and ot articles of adornment to have been prop classified as jewelry under Par. 431, T Act of 1897.

GOLDSTONES—IMITATION PEARLS—JE ELRY SETTINGS.—Protests of Rud C. H. & Co. against the assessment of duty the Collector at New York. As clai by the importers, the Board held cer goldstones and imitation pearls dutiable imitation precious stones under Par. Tariff Act of 1897, and certain small r crystal balls, suitable for use in jew settings, dutiable under the provisions the same paragraph for precious stones but not set.

FRAMES FOR CHATELAINE BAGS.—Pro of J. C. Hacker against the assessment duty by the Collector at New York. Board sustained the importer's content that certain frames for chatelaine b classified as jewelry, should have classified as manufactures of metal u Par. 193, Tariff Act of 1897. Note Tuf *v.* United States (T. D. 25316).

A. Gilberson, Ruthton, Minn., has sold to a Mr. Haywood, of Osakis, in the State.

### Last Honors to the Late Joseph M Bates, Attleboro, Mass.

ATTLEBORO, Mass., Sept. 13.—In accordance with the wishes of Joseph M. Bates expressed before his death, the funeral services Monday were private. It was his desire that there be only members of the family present, but there was a slight modification, inasmuch as the directors of the First National Bank, the Savings & Loan Association, the Attleboro Steam & Electric Co. and a few of those men with whom he was most intimately associated were present. The attending clergymen were the Rev. Wilson Fritch, the former minister of the Pilgrim Church, with which Mr. Bates was prominently identified, and the Rev. John H. Applebee, the present minister. The Mendelssohn Quartette of Boston was also in attendance.

The services began at 2 o'clock, and from that time until 3 o'clock there was a suspension of business in the mercantile center of the town.

During the afternoon the First National Bank of Attleboro, of which Mr. Bates was president, was closed out of respect for him.

Last week there was held a meeting of the standing committee of the Pilgrim Church, of which Mr. Bates was chairman. A committee was appointed to prepare a set of resolutions as a memorial.

### Jet Stones Dutiable as Manufactures of Paste and Not as Imitation Precious Stones.

Jet stones were held last week by the Board of United States General Appraisers to be properly dutiable at 45 per cent. as manufactures of parts and not at 20 per cent. as imitations of precious stones. The question arose on a protest by Samuel Schiff & Co. against an assessment of duty by the Collector at New York. The opinion by General Appraiser Sharretts follows:

"The goods in dispute are invoiced as 'jet stones' and were returned by the appraiser as parts of jet ornaments. Duty was assessed on the said stones at the rate of 45 per cent. ad valorem under Par. 112 of the Tariff act of 1897. The importers claim alternatively that the merchandise is imitations of precious stones, and as such dutiable at 20 per cent. ad valorem under Par. 435 of the present Tariff act.

It does not seem to be disputed that the invoice description and appraiser's report fairly describe the merchandise in question and that the same is imitation of jet composed of paste. We find as a fact that jet is not a precious stone, and find further that the merchandise does not belong to the class of goods known as imitations of precious stones. The protest is overruled and the collector's decision affirmed.

Charles F. Doring, of Doring Bros., Troy, N. Y., and Miss Mabel J. Lewis were married recently at the German Lutheran Church, at that place.

Burglars visited Mount Carroll, Ill., a short time ago, and among the four stores which they entered was that of F. Jeanairet. The stolen articles include a set of silver knives and forks, one dozen spoons, a carving set, a clock, several watches and a large amount of jewelry.

IT doesn't necessarily take a very wise man to understand the "selling" quality of the O. & B. Ring—but he is indeed a wise man who buys this superior product. The O. & B. Fac tory is the propelling force be hind the progressive jobber. Now that September is here and the ma chinery is in operation—he who would "reap the harvest" should know that it is not wisdom, but folly, to delay. Send in your order—THE TIME IS NOW.

## Death of Albert F. Williams.

TRENTON, N. J., Sept. 11.—Albert F. Williams, whose funeral took place Saturday morning at his late residence, 628 W. State St., was one of the oldest jewelers in this section, and for many years was prominent in the business world of Trenton. The esteem in which he was held was well shown by the great number who attended the services conducted by the Rev. John I. Fox, pastor of the State St. M. E. Church and the Rev. J. L. Howard, former pastor of the Central Church. The pallbearers were: Lewis R. Williams, Marvin C. Williams and William H. Williams, the brothers of the deceased, and his brother-in-law, Chas. H. Wood, William J. Wood and Dr. Harvey Iredell. The interment was in River View Cemetery.

Deceased had been in the jewelry business for about a third of a century, and had operated a store in this city for over [illegible] years. Beginning on a small scale he had by his industry, ability and the reputation for honesty which he established become the leading jeweler of Trenton. His store at 21 E. State St. was one of the most important in this section of the State.

The business will be continued as heretofore under the name of Mrs. A. F. William[illegible].

ELK GOODS A SPECIALTY.

### Salesman's Low Prices Excite Suspicion of Jeweler, and Police Are Notified.

Sterling silverware offered at low price to J. Rosenkranz, 554 Columbus Ave., last Wednesday, excited his suspicions that the merchandise was stolen. The young man, carrying two sample cases, entered the jewelry store, and asked permission to show his line, saying that he represented the Newburyport Silver Co. The jeweler, who had never seen the salesman before, said that he did not wish to buy any silverware just at the time. The salesman was quite insistant, promising bargains, and offering one inducement after another in the way of low prices. Mr. Rosenkranz says that he repeatedly told the young man that he was not prepared to buy at the time and was not looking at bargains. Still the salesman persisted, returning to the store.

When the salesman's price went down from 70 or 75 cents to 40 cents an ounce the jeweler says that he was surprised, because he knew that even broken silver was bringing about 50 cents an ounce that day. The salesman also offered, the jeweler says, to accept diamonds in payment in case the cash was not at hand. The cases, which had been opened by this time, contained a large assortment of napkin rings, spoons, knives and forks, egg cups, souvenir spoons and other articles, all marked "Sterling Silver," and having the manufacturer's trade-mark. The salesman also showed the company's catalogues.

The jeweler says that the salesman claimed to have in his cases and in a pawnshop 150 pounds of this ware. After examining the line Mr. Rosenkranz said that he would consult a friend a few doors down the street, with a view to getting the money with which to pay for the silver and, going out, he went into one of his neighbors' stores and telephoned Police Headquarters. In a few minutes a policeman in plain clothes arrived from the station in 100th St. Mr. Rosenkranz explained that the offer of silverware at 40 cents an ounce when broken silver was worth more than that, seemed to him sufficiently suspicious to call for a notification of the police.

The salesman, who was surprised, denied that there was anything wrong. He said that he had authority from the company to sell and showed his order book, containing orders from a number of jewelers in that part of the city. At the officer's request the salesman accompanied him to the police station, and later was released, taking his samples with him, his explanation apparently having been satisfactory to the police. A reporter of THE CIRCULAR-WEEKLY called on several of those whose names were given in the salesman's order book and they said as far as they were concerned the transactions were perfectly regular, the young man having taken their orders at reasonable prices, and not having tried to sell them any samples.

The Newburyport Silver Co., Newburyport, Mass., is represented in New York by J. J. Rolleston, 41 Maiden Lane. Inquiry at this office elicited the information that the young man, recently engaged as a salesman, had failed to return with his samples last

### Harrisburg, Pa., Merchants' Association Indorses the Circular-Weekly's Stamping Act.

HARRISBURG, Pa., Sept. 18.—That the members of the craft in this city thoroughly appreciate the efforts now being put forth by THE CIRCULAR-WEEKLY, looking to the passage of a national law forbidding interstate traffic in articles of gold and silver not properly stamped, was made evident this evening at the regular meeting of the Harrisburg Merchants' Association, when Edward L. Rinkenbach presented the following resolution, which was adopted:

"Whereas, a movement has been inaugurated by THE JEWELERS' CIRCULAR-WEEKLY, of New York City, resulting in the drafting of a bill to be presented to the coming session of the National Congress forbidding interstate commerce in articles of gold and silver spuriously marked, under penalty of a fine of not more than $500, imprisonment for not more than one year, or both, at the discretion of the Court; and

"Whereas, the enactment of such a measure will be of inestimable benefit to the legitimate trade, and their patrons, and will tend to equalize the effect of the present State laws relating to the marking of the precious metals, as well as to prevent the shipment of spuriously marked jewelry and silverware into States which have no special laws forbidding this practice; therefore be it

"*Resolved*, That the Merchants' Association of the city of Harrisburg, Pa., is active in the promotion of any cause or measure that will benefit the legitimate trade, hereby places itself on record as strongly endorsing this proposed bill, and declares its purpose to use every lawful endeavor to assist in securing its speedy passage by Congress."

The Harrisburg Merchants' Association is one of the leading mercantile bodies of central Pennsylvania, with a large and growing membership, embracing a number of jewelers, and its unqualified endorsement of the proposed bill will be highly appreciated by the trade at large, as it is THE CIRCULAR-WEEKLY. This association has been taking an important part in the preparations for the proper celebration of Harrisburg's first "Old Home Week," to begin Sunday, Oct. 1, with religious reunions in the various city churches, and terminate Saturday, Oct. 7. A fund approximating $15,000 has been raised by public subscription to defray the expenses of the celebration, which will include patriotic exercises at Reservoir Park on Monday, a parade of the military and firemen on Tuesday, parade of secret societies on Wednesday, trades display procession on Thursday, athletic sports and "mummers'" parade Friday and a carnival at Island Park and Land concerts every day in the week. In this preliminary work the jewelry fraternity has been taking no insignificant role, Jeweler Rinkenbach being chairman of the Finance Committee. The decorations will be extraordinarily fine.

## New York Creditors of Thos. J. Bradley Win Victory and Elect a Trustee in Bankruptcy.

New York creditors of Thomas J. Bradley, formerly in business at 372 Broad St. Newark, N. J., won a victory at the hearing conducted one day last week before Edwin G. Adams, the referee in bankruptcy, at Newark, N. J. Mrs. Ellen McConville, to whom Bradley turned over most of the stock before he disappeared, filed a claim against the estate for $4,600, based on two notes. At the same time Mrs. McConville's lawyer, Wm. J. Linihan, sought to obtain an appointment of a trustee. Some of the creditors had assigned their claims to the lawyer, and this strengthened her position.

Benjamin F. Rees, of Zimmerman, Rees & Co., headed a committee of the creditors who opposed Mrs. McConville's contention. These creditors were represented by Edward J. Kalisch.

Mr. Rees testified that several months ago, when Bradley asked for an extension he and Richard Friedlander, of R., L. & M. Friedlander, went to Newark and looked over the stock. Mr. Bradley made a statement to them of his liabilities. The witness asked Bradley if there were any additional debts, and the jeweler replied in the negative. The witness said that Mrs. McConville was present at this interview, and that the statement did not give her name as a creditor.

The witness said that the stock of diamonds, worth $5,000, was handed to him and that Mr. Friedlander took the watches. The watches and diamonds were then placed back in the safe, so that Mr. Bradley could continue in his business. According to the statement made to witness at that time and the exhibit of stock, Mr. Bradley's assets were much in excess of his liabilities.

The visitors concluded that as he was simply in difficulties because of his inability to raise ready cash, an extension of time might properly be granted, and they made this recommendation to the other creditors. Bradley then gave notes, but these were not met, when due. After the exposure of Bradley's divorce case and his other difficulties, accumulating about this time, Mr. Rees went back to the store in Newark. The diamonds and watches were gone, and comparatively little of the stock remained.

Mr. Friedlander corroborated the testimony of Mr. Rees. The referee then rejected Mrs. McConville's claim, and at the suggestion of the creditors headed by Mr. Rees, Carl Saenger was appointed trustee. Mr. Linihan notified the referee that he would no longer refuse to testify as to Bradley's affairs, and the contempt proceedings against the lawyer were then discontinued.

An order was obtained from the court permitting a search of a safe deposit vault in which Bradley kept some of his property. Among other things was found a document in which Mrs. McConville transferred to him the stock and fixtures of the store, at one time conducted by her husband, and also some furniture in the living rooms above the store. The referee gave notice of a hearing to take place Sept. 27 at 2 P. M., in his office, 164 Market St. Newark, on the question of giving to the trustee permission to sell the stock, etc.

### Death of Wm. H. Best.

DAYTON, O., Sept. 18.—William H. Best, one of the best known and most prominent jewelers of Ohio, died Monday evening at his late residence, 119 Salem Ave., this city, after an illness of but a few days. The immediate cause of his death was a dropsical condition of the heart, from which he had suffered for some time, although not seriously.

Few jewelers of the State were better known and none were more highly thought of in the city than was the deceased, who was born here in 1845 and resided in Dayton all his life. He was a son of Henry Best, who founded the business years ago, and at whose death he succeeded to the concern formerly known as H. Best & Sons on Main St. For some time he had been alone, but at one time was associated with E. A. Mudge.

In the business world of this city, as well as in social life, the deceased had a wide number of friends, who were deeply shocked and grieved at his death. He is survived by a widow and two children, a son, Carl J. Best, and a daughter, Mrs. R. Harry Croniger, both of this city.

Lewis & Van Sickle, Oskaloosa, Ia., are making extensive improvements in their retail jewelry establishment.

N. C. Pabst, Fargo, N. Dak., last week received a severe shock, which sent him unconscious to the floor, while turning on an electric light in the basement of his residence. He did not suffer any permanent or serious injury.

### Bankruptcy of Mrs. Annie Abel, M Keesport, Pa.

PITTSBURG, Pa., Sept. 13.—It was learne here last week that the business of Mr Annie Abel, who operated a jewelry ar optical store at 538 Fifth Ave., McKeespor Pa., was in bankruptcy. The matter is n yet settled.

This business was started by Max Abe who at one time was a member of the fir of Green & Abel, New York, which di solved in 1898. Mr. Abel then located Waterbury, Conn., where he continued bus ness until 1901, when he offered to compr mise with his creditors, and came to Ne York, obtaining employment with l brother-in-law, M. Mannist. Two years a he came to McKeesport, where the busine was established under his wife's name, M Abel managing it for her.

# COMMUNITY SILVER

Believing that every dollar spent on magazine advertising means larger sales for the dealer, we are this year getting out the most striking series of silverware advertisements which has ever appeared.

The list of magazines in which we advertise is one of the strongest in the world. Its enormous aggregate circulation brings "Community Silver" advertisements before nearly ten million readers.

The extraordinary sale of "Community Silver" following our Fall advertisements last year—in many cases lasting far beyond the holidays—is practical evidence of the tremendous selling power of such advertising.

By ordering "Community Silver" now you can secure the full benefit of all our Fall advertisements, and thus increase the sales of your store in a profit-making line.

Remember that your profit on "Community Silver" is unusually large and stock now. Inquire of your jobber or write us.

ONEIDA, N.Y.

## Attleboro.

TRADE CONDITIONS.

The condition of the jewelry trade in Attleboro, just now, is highly pleasing to manufacturers. In almost every factory there is a demand for workers as the advertisement columns of the local papers show, and in some of the factories, it has not only become necessary to work the employes overtime, but to organize night shifts as well. One manufacturer said: "The condition of the jewelry trade in this town has not been so good as it is now for some years, and I am highly pleased with the outlook."

C. M. Robbins, of the Chas. M. Robbins Co., is on a two months' trip to California.

Charles H. Eden, of the C. H. Eden Co., returned Saturday from a trip to New York.

William H. Blake, of the James E. Blake Co., started out last week for the west on his annual Fall trip.

Sidney O. Bigney, of S. O. Bigney & Co., spoke at the naturalization meeting of the Laurier Club last week.

Chas. P. Keeler, of McRae & Keeler, won first prize, a beautiful silver cup, at the Attleboro gun club shoot Saturday.

H. A. Allen, of C. H. Allen & Co., who has his headquarters in Chicago, and covers the north and middle west for the concern, has been visiting this town.

Mabel Bryan was arraigned Saturday in the District Court on the charge of larceny, and among the things recovered were a number of finished and unfinished toilet articles taken from the factory of William Nerny & Co.

The first meeting of the Ezekiel Bates lodge, which is composed mostly of the prominent jewelry men of Attleboro, will be held in its new quarters in Bronsen Block, this week. The dedication will not take place until October.

No trace has yet been found of any of the three suspects thought to be guilty of robbing Mrs. Cummings, of the P. J. Cummings Co., of $600, which was the money to be used for the weekly pay-roll of that concern. The police of the surrounding towns and cities have been communicated with, but so far, with no results.

Saturday noon Michael Barret, who has for some years been connected with the concern of Fontneau & Cook, was presented with a Morris chair by the employes of the firm, the presentation speech being made by George Boyden. Mr. Barret has been assistant foreman and leaves to enter the employ of the Electric Chair Co.

Percy A. Randall, the Attleboro correspondent of THE JEWELERS' CIRCULAR-WEEKLY, and Miss Edith Louise Cole, were married last week at the home of the bride's mother, Mrs. Sabra L. Cole, 32 Holman St. Rev. Hendrik Vossema, pastor of Murray Universalist Church, officiated at the ceremony, and there were present only the immediate relatives of the young couple. The Universalist ritual was used, it being a double ring ceremony. Mr. Randall is the city editor of the Brockton *Times* and the bride has been prominently identified with the social affairs of the Murray Universalist Church and is a member of the choir and of the Sunday school. They will reside in Brockton.

Last week the Attleboro Duck Pin League was formed and, with one exception, the league will be formed of teams from different jewelry concerns. There will be 10 houses represented, and on at least five of the teams will play one or more members of firms. At the meeting the election of officers was as follows: Elmer A. Scott, Jr., president; W. C. Hodge, secretary; G. I. Boyden, treasurer. It was decided that players must be employed in the shop represented in the league on or before Sept. 12, in order to be eligible to roll on the team. The concerns having teams are: S. O. Bigney & Co., Regnell, Bigney & Co., Fontneau & Cook, Attleboro Mfg. Co., C. A. Marsh & Co., W. E. Richards and Watson & Newell Co., McRae & Keeler, Carter, Qvarnstrom & Remington and the W. H. Wilmarth Co.

## Savannah, Ga.

R. Van Keuren, of R. Van Keuren & Co., has returned to Savannah from a vacation spent in New York and vicinity.

The two bells for the new City Hall clock were received last week from the Meneely Bell Co., Troy, N. Y. Upon examination it was discovered that the initials of Architect Witcover, whose name is cast on one of the bells, had been transposed and now reads W. H. instead of H. W. Witcover. Mr. Witcover wired the Meneely Co. that if the error was not corrected the bell would be rejected, and the Meneely Co. replied that the letters would be corrected. This will be done by Robert Schneider.

## North Attleboro.

TRADE CONDITIONS.

The jewelry business is now at its flood. From the west there has been a constant stream of orders during the past few weeks, and the result is that the manufacturers are rather hard hit for workers who know a little something about the business. A good example of how hard the manufacturers are pushed, is shown by the hiring of Thomas F. Lynch by E. Ira Richards & Co. Mr. Lynch is 78 years of age, and has been out of the business for some time, but he volunteered to go back for a few months in order to assist in taking care of this almost unprecedented trade. At the present time several factories are running until 7 and even 9 o'clock evenings in order to keep up with the orders, and it will not be long before others will be forced to swing into line.

Walter B. Ballou, of R. Blackinton & Co., has returned from a trip to New York.

George K. Webster and family have returned from Matunuck, where they passed the Summer.

Alpin Chisholm, of the Bugbee & Niles Co., returned Thursday from an extended trip through the west.

I. Himmelreich has started on a three months' trip to the west in the interests of the B. S. Freeman Co.

While trying to accomplish an extra amount of work, Arthur Benjamin caught his left hand under a stamp at the Webster Co.'s factory Thursday. One of the fingers on his left hand was amputated and several others were badly jammed.

The list of North Attleboro's heaviest taxpayers was given to the public last week, and the following are the sums that will be paid into the town treasury by manufacturing and jobbing jewelers, their firms and corporations: Heirs of H. F. Barrows, $1,118.03; H. F. Barrows, Jr., $202.10; Roswell Blackinton, $176.57; Anthony H. Bliss, $101.36; Walter G. Clark, $163; Walter G. Clark & Co., $172.50; David A. Codding, $383.80; Arthur E. Codding, $114.24; Frank H. Cutler, $131.03; O. M. Draper Estate, $1,143.33; Herbert G. French, $964.78; Thomas G. Frothingham, $156.10; Fred D. Heffron, $217.97; Woodbury Melcher, $345.81; Paye & Baker Mfg. Co., $278.30; J. J. Sommer & Co., $117.30; John Thompson, $141.15; Thomas Totten & Co., $366.85; G. K. Webster Co., $591.10; Louis W. Wise, $678.20; Walter Ballou, $178.20; William H. Bell, $226.85; A. H. Bliss & Co., $761.76; James A. Codding, $102.97; Codding & Heilbron Co., $414.92; H. H. Curtis Co., $172.50; W. F. Fisher & Co., $115; T. G. Frothingham & Co., $138; Mason Box Co., $154.10; E. Ira Richards & Co., $264.50; William W. Sherman, $246.50; H. K. Sturdy, $145.40; J. F. Sturdy, $148.28; Fred E. Sturdy, $137.01; Frank M. Sturdy $176.80; J. F. Sturdy's Sons, $1,005.56; Ira Richards, $301.23; W. & S. Blackinton Co. $368; Bugbee & Niles Co., $138; H. F. Barrows Co., $556.60; R. Blackinton & Co. $345; Frank G. Pate, $135.40; C. Ray Randall & Co., $103.50; G. C. Hudson Co. $103.50; William H. Riley, $1,424.09; Riley French & Heffron, $641.01; Theron L. Smith, $829.08; Sturtevant, Whiting & Bigelow, $149.50; Albert Totten, $553.64; Frank M. Whiting & Co., $345; F. M. Whiting Co., $493.35; E. A. Whitney, $125.35.

## Baltimore.

The early closing season, which includes a half holiday on Saturday, which has been in vogue among the leading jewelers, ended last week.

The charge against "Bob" Sloine, of the larceny of a diamond ring from I. M. Storram, a salesman for the Castelberg National Jewelry Co., was dismissed last week at the Central police station, when a later hearing was given.

Two women "pennyweighters" were in this city, last week, and complaint has been received at headquarters of a loss by B. H. Nuitz, 608 N. Eutaw St. The women asked to be shown some rings and, after hesitating over a selection, finally left without making a purchase. While returning the rings to the showcase Mr. Nuitz discovered that a diamond ring, valued at $50, had been taken and a paste imitation substituted. The police were immediately notified and are on the lookout. Mr. Nuitz says that one was a blonde and the other a brunette, both being quite pretty.

The establishment of E. M. Banks, Nashville, Tenn., was damaged by fire Wednesday, the loss amounting to about $500. There was no insurance.

Mfr. of HIGH GRADE DIAMOND MOUNTINGS,
64 Fulton Street, NEW YORK.

## Boston.

Among the buyers in town last week were U. C. Smith, Brockton; Mr. Weston, South Framingham; Robert A. Lohnes, Worcester; H. S. Hewitt, Brockton; George W. T. Case, New Bedford.

At the store of F. Vorenberg & Co., Winter St., extensive alterations have been undertaken, including the removal of the offices of the concern to balconies, thereby giving considerable extra space for stock.

John E. Dellit, 21 years old, a silversmith, of 533 Boylston St., Jamaica Plain, died recently of typhoid fever at the Faulkner Hospital. He was born in Jamaica Plain Oct. 26, 1883, and was employed by Goodnow & Jenks for some time.

Charles E. George, who was held last week in $5,000 bonds, charged with using the mails to defraud, is a brother-in-law of the Stillings brothers, lately jailed as the outcome of an alleged swindling scheme and contempt of court. George was not associated with the Stillings pair, but had a game of another kind, which he is said to have worked in connection with Mexican mining properties.

W. H. Goddard, 339 Washington St., this city, representing a concern which does an instalment business, incurred the displeasure of Judge Sullivan last Saturday by not appearing to prosecute after causing the arrest of George A. Martin, on the charge of stealing a watch. When the case was called the Judge was informed that the case had been settled out of court. The Judge ordered the issuance of a capias for Goddard, who appeared in court later and was released on his own recognizance until yesterday, when he was to have been called upon to explain the transaction. The courts here do not approve of the process, which has been resorted to at times by instalment men, of trying to secure payment of leases by bringing criminal cases against lessees, holding that civil action is the proper procedure.

George J. Taylor, Somerville, who had a jewelry and repair store in the section known as West Somerville until Sept. 1, is wanted by the police on several charges. A few weeks ago he was summoned into court at Chelsea on the charge of non-support of his wife, who lived at Revere. Sept 2 the case was called, but Taylor had defaulted. An attachment was put on the stock in Taylor's store by the owner of the building, and it has been learned, since the jeweler took his departure for parts unknown, that he pawned a number of watches left with him to be repaired. To one of his customers, Edward B. Perry by name, who met him in Boston, he owned up to these transactions, and gave up to him about a dozen pawn tickets, which have been given by the recipient to the watch owners. Considerable other property has not been accounted for. A default warrant has been issued.

---

The last vestige of the first jewelry store opened in Muncie, Ind., was detroyed Wednesday, when the small frame building at 207 W. Main St., that place, which was built by A. M. Klein in 1846, was razed. The original business is now being carried on in spacious quarters by Henry C Klein & Sons.

## AVERY & BROWN,

68 Nassau St., New York.

## Providence.

A. L. Stone, of Stone Bros., Chicago, was one of the visitors in town last week.

Waite, Mathewson & Co. are soon to occupy quarters in the Irons & Russell building.

W. C. Codman was one of the successful owners who entered bull dogs at the Newport dog show.

The manufacture of seamless rings has been abandoned by the Original Seamless Ring Co., at 234 Chestnut St. H. J. Geer is the principal owner.

At the recent bazaar of the Edgewood Yacht Club, Harry Fulford was one of the members of the Executive Committee and D. W. Flint was one of those in charge of the wheel of fortune.

Among imports at the port of Providence last week were nine packages of imitation precious stones from Bremen, one package of the same from Havre and one package of candelabra from Liverpool.

The officers of the Providence Jewelry Co., the incorporation of which was announced in the last issue of THE CIRCULAR-WEEKLY, have been elected as follows: President, T. O. Loveland; vice-president and treasurer, J. L. Records; secretary, Harry Cutler.

Mr. and Mrs. Charles D. Heaton, of 1254 Broad St., celebrated last Friday evening the 20th anniversary of their wedding. About 40 friends were present, and the evening was pleasantly spent, a programme of musical selections adding to the enjoyment of the occasion. A collation was served. Mr. Heaton is a gold refiner and a manufacturer of gold settings.

William A. Stoddard, 144 Elm St., celebrated, last Friday, his 90th birthday. Mr. Stoddard about 20 years ago began the sale and repair of eyeglasses, and has a number of old customers. He is remarkably active for one of his years, and a week or so ago took a walk of seven miles. He still does considerable repair work among those who have been his patrons for many years.

The Irons & Russell Relief Association, made up of the employes of that firm, had their annual outing, Saturday, on the grounds of the Warwick Club. A special car conveyed the party to the resort, and on their arrival the members of the association had dinner, after which came a business meeting. Alfred Williams presided, and the reports which were presented showed that the organization is in a prosperous condition both numerically and financially. A series of athletic events followed the meeting, a ball game between the single men and the married men being a feature. The benedicts proved the better players, winning by a score of 6 to 5. The committee in charge of the outing, Messrs. Manchester, Tanner and Nixon, came in for many congratulations on the success of the affair.

Hampick Arabian, proprietor of the Arabian Jewelry Co., proposes to fight to the finish the case brought against him by the police charging him with drunkenness. Mr. Arabian was tried in the Sixth District Court, pleaded not guilty and after a trial was adjudged guilty and fined $2 and

costs. He immediately appealed. The trial brought out the fact that Mr. Arabian is not a drinking man; that he was endeavoring to go aboard the Joy Line steamer *Edgemont* with two sample cases in his hands, and when called upon to show his ticket said that he could not do so until he got aboard the boat. He was hustled to the dock. Naturally he was not pleased with this treatment, and there was an argument, which resulted in Mr. Arabian's arrest on a drunkenness charge. A complaint was also made against him charging him with an assault upon an officer of the *Edgemont*. Mr. Arabian has advertised for witnesses of the incident to communicate with him, and is prepared to put up a stiff fight if occasion demands it.

### Connecticut.

W. E. Sessions and wife, Bristol, returned home last week from a short trip to Bretten woods, in the White Mountains.

Harold Wilcox, son of G. H. Wilcox, Meriden, has just entered the Hotchkiss School at Lakeville, to which place he was accompanied by his parents.

A. Hartmann, Waterbury, has the sympathy of the trade on the recent death of his mother. Deceased was 75 years of age. Death was caused by diabetes.

John W. Kramer, for some time in the employ of factory "E," International Silver Co., Meriden, of which place he was a well-known resident, died Sept. 12, after a week's illness.

Otto Oths, of the Wendell Mfg. Co., New York, who is taking a trip to Boston by trolley, was the guest on Tuesday of last week of Mr. and Mrs. E. C. Young, of New Haven.

Christian Strobel, Waterbury, recently purchased the Wallace House, on Lake Quassapaug, and the Wallace homestead, together with what is known as the old Buckingham farm.

Henry Kohn, Hartford, was one of the appraisers of the estate of Bertha A. Pratt, last week. The appraisal, as filed in the court of Hartford, showed the valuation of the property to be $6,577.

C. F. Monroe, the president and treasurer of the C. F. Monroe Co., glass manufacturers, 30 Barclay St., New York, with a factory at Meriden, and the secretary of the company, Miss Emma L. Bamman, are to be married soon, the engagement having been formally announced at a dinner given recently in New Haven, Conn., by Mr. and Mrs. Allen B. Squire, the latter being a niece of the prospective groom. Mr. Monroe resides at Meriden, where he is a prominent club and yachtsman and one of the leading citizens. Another engagement that has been announced is that of Miss Fannie C. Wetmore, stenographer at Meriden for C. F. Monroe & Co., to W. E. Atwood, president of the Mechanics' Bank, New Britain. It is possible that both weddings will take place on the same day, on which the factory will be closed.

L. C. Koberg, Healdsburg, Cal., is enlarging his store room in order to meet the requirements of his increasing business. The workshop is being placed farther in the rear of the establishment so that more space will be obtained for the salesroom.

## Cleveland.

C. C. Sigler, of the Sigler Bros.' Co., who has spent most of the Summer with his family at their home in the country, will move back to the city in a short time.

John Trapp, for four years head watchmaker with the Sigler Bros.' Co., has resigned to take a place with the Russell Clarke Jewelry & Art Co., 696 Wilson Ave.

Albert Zang, of J. A. Zang & Sons, Alliance, was in this city a few days ago. He willingly passed the cigars owing to the arrival of a fine baby girl at his home recently.

Thieves broke in the window of I. Baber's store, 419 Ontario St., recently, and stole over $200 worth of jewelry, revolvers, rare coins and other things of the kind. They escaped before an officer could reach them.

F. Bredbeck, Port Clinton, has on exhibition in his store a clock, all the parts of which consist entirely of wood. It was made by a German who lived at one time near Fremont and was a maker of tower clocks. Owing to the peculiar workmanship the clock attracts quite a little attention.

Among the out of town buyers in this city the past week the following were noted: D. C. Cornwell, of D. C. Cornwell & Co., Athens; C. I. Kennedy, Berea; Mrs. F. R. Montgomery, Sandusky; W. H. Hoyle, Sidney; D. Leonheiser, Huron; O. G. Carter, Jr., New London; Mr. Harms, of Harms & Allen, Napoleon, Harry B. Downs, Bellevue, O., and R. H. Beyer, Erie, Pa.

Samuel Grossman, of this city, will receive the $1,500 reward for giving information regarding the murderers of Pawnbroker Moyer, of Detroit. Grossman recognized the men from descriptions sent out and informed the police when they came to his store, thus being instrumental in their capture. Owing to the risk he took in risking his life to the friends of the crooks, the officers feel that the reward offered by the city of Detroit is thoroughly deserved.

## Syracuse.

M. L. Mantell, 124 S. Salina St., who has been ill for the past few weeks, is slowly improving, and is expected soon to be on the high road to recovery.

His many friends in the jewelry trade were grieved to learn, last week, that Gen. J. Dean Hawley, one of the oldest and best-known jewelers of this section of the State, was suffering from an attack of paralysis. Gen. Hawley, who is 85 years old, retired from the jewelry business in 1893, after a career of nearly half a century in the trade. On Sept. 7 Gen. Hawley, while in S. Salina St., was stricken with paralysis and taken home in a carriage. The doctor who was summoned discovered that his entire left side was paralyzed, but that he retained the power of speech. It is said that he stands a good chance of recovery.

Chas. E. Baab has resumed business in Parkersburg, W. Va., where he has leased quarters at 110 Market St.

L. L. Bickings, Norristown, Pa., is making extensive improvements in his establishment at that place. The show window is being enlarged and the interior has been fitted up with new show cases.

LAST month we told you about the quantity of adjusted watches we sold. Now we will tell you the cause.

Almost every large retail dealer in Railroad watches is pushing the sale of ***BUNN SPECIALS*** and ***SANGAMOS,*** because, these watches are ***absolutely satisfactory*** and are now the recognized standard for Railroad service.

For the past three years minimum retail selling prices on these grades have been established and maintained, enabling the dealers to make a justifiable profit, and at the same time give their customers perfect watches at reasonable prices.

We sell to a limited number of jobbers, who cooperate with us in protecting the retail dealers against undesirable competition.

If none of these solicits your business, and if you are not familiar with the quality and prices of our watches, write us.

Minimum Retail Selling Prices of R. R. Grades.

## Optical Notes and Briefs.

I. Greenberg is a new optician with Kuesel & Puls, Milwaukee, Wis.

J. G. Garrison, optician, Forest Hill, Cal., accompanied by his family, is spending a few days in San Francisco, Cal.

F. N. Wooster, with the California Optical Co., San Francisco, Cal., has started on his southern trip for the concern.

E. F. Lohanier, formerly with Chas. H. Wood, Oakland, Cal., has opened an optical establishment at 1207 Broadway, that city.

C. H. Cronise, Santa Barbara, Cal., will move his optical stock into his new quarters at the corner of State and De la Guerra Sts., Oct. 1.

Miss Parsons, refractionist for the G. Heitkemper Co., Portland, Ore., was in San Francisco, Cal., recently, combining business and pleasure.

I. A. Brown, optician, formerly with Chas. W. Hurl, New Bedford, Mass., has opened an optical establishment of his own at 206 Union St., at that place.

F. A. Moses is the proprietor of the new Central Optical Co., which has opened a store under the Central Bank, Rochester, N. Y. Dr. Sedgwick is in attendance.

Geo. Blakeslee, optician, Tonopah, Nev., returned last week to San Francisco, Cal., after a visit to the Lewis and Clark Exposition at Portland, Ore., and left soon afterward for Tonopah.

The Continental Optical Co., Webster, Mass., has completed arrangements to resume business. The concern's factory was closed for about four weeks. J. P. Drake is president and manager.

The Northwestern Optical Association recently adopted a set of resolutions expressing regret and sympathy on the death of George W. Hauenstein, of Red Wing, Minn. The deceased was held in high esteem by the association and by his many friends in the optical trade.

At the meeting of the Optical Society of the City of New York, held in parlor D. R. of the Fifth Ave. Hotel, Sept. 13, Wm. Sesnick and W. A. Johnson were elected members. A report was received from the banquet committee determining the arrangements for the annual banquet which will take place in November. Other business of routine character was transacted. The paper of the evening was read by R. M. Lockwood, and was entitled "Fitting Eyeglasses from Sample Eyeglass Frames and Mountings."

By the arrest of Henry Fisher, manager of J. Gladske's pawn office, Geneva, N. Y., last week, in this city, a clever scheme was balked and a series of mysterious thefts, which have annoyed the Standard Optical Co., of Geneva, for several months past, cleared up. On Monday afternoon of last week Fisher entered the store of a well-known Main St., E., jeweler, and told him he had a quantity of gold wire and other gold material which he wished to have melted. He produced a tin box filled with $200 worth of fine gold wire and material. The jeweler becoming suspicious notified the police, who arrested Fisher, upon his refusing to state where he had obtained the gold or what the nature of his business was. Later in the evening Fisher said he had obtained the gold from John Keleher, an employe of the Standard Optical Co. The Geneva police were notified of Fisher's arrest. They arrested Keleher on a charge of grand larceny. Keleher denies having any connection with the thefts. The officers of the optical concern claim that about $2,000 worth of material had been stolen during the past few months. No complaint has as yet been lodged against Fisher or Keleher by the officers of the company, and strong pressure is being brought to settle the matter.

Raines Bros., formerly of Tarkio, Mo., are now at Maryville, in the same State.

McDuffie Bros., Lawton, Okla., have dissolved, and the business will be continued by N. A. McDuffie alone.

Anton Progner, Vicksburg, Miss., recently moved his stock into a more convenient location, at 104 N. Washington St.

# Single Stone Diamond Rings

We carry a large stock of Ladies' and Gents' Diamond Rings. The tag of each ring is marked with a letter or number to correspond with our "Grading System," to indicate the quality of the diamond.

This is a time-saver for the expert and a safe and sure guide for the inexperienced. Where they are marked as being perfect we warrant them as being so.

We also have a complete assortment of loose diamonds and can supply any jeweler's needs. Our prices will enable you to meet any competition. Order of us and others, and compare prices and qualities, when you have a prospective sale.

IMPORTERS AND CUTTERS.

1 Maiden Lane, - - - - - - New York.

## Items of Interest.

The business of R. B. West, Seattle, Wash., has been incorporated and the firm style is now R. B. West & Son.

A. H. Hitchcock, one of the oldest opticians in Springfield, Mass., has retired, and the business has passed into the hands of Hitchcock & Gohl, who will continue at the old location, 331 Main St.

A. W. Akers, as receiver of the Hoggs Mfg. Co., recently sold at public auction in Nashville, Tenn., the jewelry and notion stock of that concern. It was purchased by Valentino & Co., for $1,325.

The Harbach-Mansfield Co., Boston, Mass., has been incorporated with an authorized capital of $15,000, to deal in optical goods. The incorporators are: Charles F. Harbach, F. C. H. Mansfield and Joseph Mansfield.

Abraham Franklin, Toronto, Ont., died on Sunday of last week, after an illness of some weeks. He had been in business for many years, and was a prominent member of the Jewish community and noted for his charitable disposition.

Mrs. J. T. Mervin, Brady, Tex., was out with a party of pearl hunters on the Llano River, near Mason, Sept. 1, when she found a pearl of large size, which she sold to Max Martin, a banker of Mason, for $200. The pearl is said to be worth much more than that sum.

Myer Slotopolsky, Boston, Mass., who recently reported that he had lost a wallet containing $12,000 worth of diamonds, is asking an extension from his creditors on the following basis: 25 per cent. Sept. 12, 10 and 25 per cent. every three months thereafter until the amount is liquidated.

Charles R. Bates has been appointed administrator of the estate of the late Joseph M. Bates, Attleboro, Mass. He will manage the business of Bates & Bacon, owned by his father, while the other son, Frank Bates, will manage the opera house property. Bates & Bacon have resumed business. Clarence L. Watson has been elected president of the First National Bank as successor to Joseph M. Bates.

Abraham Werby, of 231 Chelsea St., East Boston, Mass., reported to the police of Station 7 on Sunday the loss of a red leather wallet, containing jewelry valued at $2,000. Werby thinks that the wallet was stolen from his pocket Saturday night. The contents included 5 gold settings, a solitaire diamond ring, a gold locket set with seven diamonds, and a hoop ring set with five diamonds. Werby deals in diamonds and jewelry as a side line. He told the police that people who knew him were aware of the fact that he always carried jewelry about in his pocket.

Treasury Department regulations of April 11, 1905, establishing a rate for the allowance of drawback on clocks manufactured by Bawo & Dotter, New York, from imported materials, have been extended, so far as applicable, to cover the exportation of cuckoo and miniature den clocks manufactured by the American Cuckoo Clock Co., Philadelphia, Pa., with the use of imported movements, chains, bellows, pendulum rods and discs, hands, gongs, dials and moss or inlaid borders, in combination with domestic cases, carvings and weights, in accordance with the manufacturers' sworn state-

ment, dated Sept. 11, 1905, and accompanying illustrations, which are now on file in the office of the Collector of Customs at Philadelphia.

The War Department is in receipt of the first lot of field glasses purchased under contract of Sussfeld, Lorsch & Co., the New York representatives of the German manufacturers, of a type adopted by the chief signal officer of the army after a competitive test of numerous samples. These field glasses in the first delivery of 250 will be issued as far as they will go, each troop of cavalry, battery of artillery and company of infantry receiving two pairs with two of the smaller signal kits. The distribution will be to those commands which have been designated by the commanding generals of the various military departments who were recently requested to make recommendations to this effect. It will take some time, of course, to complete the distribution, as may be judged by the fact that there are 700 organizations to be supplied with 1,400 pairs of field glasses at $16.60 each. It is understood the signal office will soon issue another call for bids for furnishing the signal corps with field glasses in the hope that some American manufacturer will be induced to enter the list. For many years the signal corps have been endeavoring to interest American optical manufacturers with a view to securing for this branch of the service American field glasses, but the officials almost despair of success. After paying the import duty of 45 per cent., the War Department can secure foreign field glasses for about one-half the price asked for the domestic glass.

## Trade Gossip.

Scofield & DeWyngaert, 50 Walnut St., Newark, N. J., have just issued their catalogue "C." It contains 28 pages, and profusely illustrates their line of gold and silver jewelry, back and side shell combs and sterling silver photograph frames.

The Koy-lo Co., 11 Broadway, is pushing the sale of its spiral stem hat pins by a vigorous campaign in street car advertising. The pin, which has recently met with much favor, is a departure in manufacturing, although the company for some time has manufactured a hair pin which embodies the same mechanical process. The new hat pin is looked upon by many in the trade as a distinct improvement on the old style of straight pin. Many handsome head designs in imitation stones and in sterling silver are shown in the Fall samples.

Edwin Keller & Sons, Allentown, Pa., recently celebrated the 40th anniversary of their business career. The business was started by Edwin S. Keller and his brother, Samuel S., in September, 1865, when the boys purchased the old store of John Newhard and began business under the name of Keller & Bro. This firm continued until 1888, when Samuel retired and his brother conducted the business alone. In 1893 Herbert C. Keller, eldest son of Edwin Keller, was taken into partnership, and in 1892 the youngest son, Arthur E. Keller, entered the business, whose firm style was then changed to E. Keller & Sons. The business was moved to its present quarters, at 711 Hamilton St., in August, 1892.

## Recent Tariff Decisions.

MILLINERY ORNAMENTS—HAT PINS—JEWELRY.—Protests of Chicago Mercantile Co. *et al.* against the assessment of duty by the Collector at Chicago. The Board held that certain millinery ornaments, including so-called pins in the form of buckles and certain hat pins with imitation jet heads, were dutiable as manufactures of the component material of chief value, as claimed by the importers; certain hat pins with fancy heads were held to have been properly classified as jewelry under Par. 434, and certain other articles were held to have been properly classified as cut glass under Par. 100.

GUN METAL COIN HOLDERS.—Protest of G. W. Sheldon & Co. against the assessment of duty by the Collector at Chicago. On the authority of G. A. 6075 (T. D. 26507) the Board sustained the claim that gun metal coin holders are dutiable as manufactures of metal under Par. 193 Tariff Act of 1897.

BROOCHES—JEWELRY.—Protest of I. Frankrich & Co. against the assessment of duty by the Collector at New York. Certain brooches were held to have been properly classified as jewelry under Par. 434, Tariff Act of 1897.

MILLINERY ORNAMENTS—HAT PINS—JEWELRY.—Protests of Edson Keith & Co. against the assessment of duty by the Collector at Chicago. G. A. 6139 (T. D. 26679) and G. A. 6130 (T. D. 26653) followed, relating to fancy hat pins and millinery ornaments of which the former were held to have been properly classified as jewelry under Par. 434, Tariff Act of 1897, and the latter to be dutiable as manufactures of the component material of chief value, as claimed by the importers.

DIAMONDS, PEARLS AND PRECIOUS STONES.

MEMORANDUM ORDERS SOLICITED.

## Lancaster, Pa.

S. Kurtz Zook spent part of last week in New York on business.

John J. Bowman, of Ezra F. Bowman's Sons, is in New York.

Henry Weeber has returned to Philadelphia to finish his optical studies, which will require three or four more weeks.

Albert Rosenstein, head of the Lancaster Silver Plate Works, announces the engagement of his daughter, Helen, to Dr. I. V. Levi, Philadelphia.

Among the jewelers visiting in Lancaster last week were: E. G. Hoover, Harrisburg; Jacob Esch, Intercourse; J. M. Kreider, Denver; H. F. Andrews, Strasburg.

The H. S. Meiskey Co. has removed from 13½ E. King St. to 25 and 27 W. Chestnut St., where it now has one of the best equipped establishments in the State.

Manuel Robertson, who was among the earliest employes of the old Lancaster Watch Factory, spent several days here last week. He retired from the trade several years ago.

Oscar A. Smith, whose orchestra played a Summer engagement at Rocky Springs, has returned to his post in the manufacturing department of Augustus Rhoads' jewelry store.

Parker Mullen is spending a couple of weeks in Lancaster, having come from his late home in Indianapolis before taking a position as traveling salesman for a Chicago jewelry house.

Edward Spering, formerly a well-known Columbia jeweler, now of Bristol, Pa., announces his intention of visiting his old home during the week of Sept. 21, "Old Home Week" there. During this celebration of "Old Home Week" the Columbia jewelers purpose making a particularly attractive window display.

G. Wm. Reisner has purchased the manufacturing department formerly owned by L. C. Reisner & Co., of which he had charge, and will continue it in the same line of work, making a specialty of Masonic, Elk and other fraternal order emblems, as well as repairing jewelry. He is located at W. Chestnut and Market Sts.

Lancaster was visited last week by a very attractive young lady vendor of cheap jewelry, who managed to dispose of a great deal before being scared off by threats of arrest. Several policemen came into contact with her, but their natural gallantry prevented her arrest, as they simply gave her warning to leave at once.

Harrison Lippy, of the Ezra F. Bowman Technical School, has taken a position as watchmaker and engraver with the Jobe-Rose Jewelry Co., Birmingham, Ala. Emory Hoyt has taken a position with C. T. Fuller, Olean, N. Y. James W. Leonard, an instructor at the school, served on the Grand Jury of Lancaster County last week.

The court has appointed F. A. Peters, of the H. S. Meiskey Co., and Ernst Schwartz, of Schwartz & Gerz, to appraise the property of the Biehl Mfg. Co., which recently went into a receiver's hands. The court also issued an order restraining a constable from selling goods levied upon on an execution for a small amount, which was issued the day the receiver was appointed. It is believed the creditors will not get over four cents on the dollar.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet, "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

# GORHAM STAINED GLASS

¶ The attention of the Jewelry trade is directed to the fact that in the Gorham Company's studios every facility is offered for the production of Ecclesiastical and Domestic Stained Glass Windows.

¶ The increasing use of stained glass as an effective and artistic medium in which to perpetuate the memory of those who have passed away has led the Gorham Company to pay special attention to the subject of memorial windows.

¶ Sketch suggestions or fully worked out designs will be prepared on the request of those who desire work of this nature, while all useful information will be cheerfully placed at their disposal.

ACCORDING to a tabular statement issued by Chas. D. Walcott, Director of the United States Geological Survey, the total value of the mineral products of the United States for the calendar year 1904 was $1,289,660,788, of which the non-metallic minerals were valued at $747,178,805, and the metallic $542,081,983, and the unspecified $400,000. The value of the precious and semi-precious stones found in this country during the year amounted to $315,900. This tabular statement gives the value of every substance by name for each year of the past decade, and from this we learn that the amounts of precious and semi-precious stones produced by the United States in the past 10 years were: $113,621 in 1895, $97,850 in 1896, $130,675 in 1897, $160,920 in 1898, $185,770 in 1899, $233,170 in 1900, $289,050 in 1901, $328,450 in 1902, $307,900 in 1903, $315,900 in 1904.

### Excellent Trade Conditions.

FROM reports received by THE CIRCULAR - WEEKLY from all parts of the country there is no doubt that jewelers' Fall trade has not only commenced, but that sales in all sections are very gratifying, both as to number and amount. Industrial activity, while not uniform in extent, seems to be apparent from the Atlantic to the Pacific Coast and from the Lakes to the Gulf, with the result that the consumers at large appear to be in a position to purchase more than the normal value of merchandise, and especially does this seem to be true of luxuries, such as jewelry and gems. Reports from Providence, the Attleboros, Brooklyn, New York, Newark, Philadelphia, Cincinnati, Chicago and other manufacturing jewelry centers show that factories are running under pressure of large orders, while the retail jewelers in practically every large city and town report strong and increasing demands for nearly all the lines they handle. Even in the south, where the yellow fever and its resultant quarantine regulations have seriously disturbed all business, conditions are much better than one would expect that they could be under the circumstances, and wherever business can be done jewelers seem to be getting at least their share of trade.

The situation at the present time is well summed up in the introduction to an article on business conditions of the past week, published in the last issue of *Bradstreet's*, which reads:

Trade and industry continue remarkably active in nearly all lines. Fall distribution is in full swing, and in portions of the west is of unprecedented volume. Interior merchants are still greatly in evidence in many primary markets, three-fourths of the corn crop is out of danger of frost, iron and steel are in exceptionally good demand, with outputs heavily sold ahead and prices tending upward, and building and building material are apparently as active as at any preceding period this year. Labor seems to be well employed; there is an actual scarcity of competent help in many sections. A few strikes, notably in the printing and building trades, disturb the otherwise very quiet appearance of the industrial situation. Only at the south, and there only because of fever quarantines, and not owing to real lack of business, is there any appearance of irregularity of demand. Collections generally are good for this season of the year despite the fact that retail trade in the agricultural regions is still retarded by active farming operations. Money is in active demand to move the crops, but as yet nothing approaching stringency is visible. Bank clearings show large increases over this week a year ago. Business being handled by the railways is of large proportions despite the lighter than expected grain movement, due to farmers' indisposition to take current prices for their products. Gross earnings for August were five per cent. in excess of a year ago, when the present wave of activity first manifested itself, marking a continuing progressive gain for that month in every year since 1896.

An almost equally optimistic report was published by *Dun's Review* at the same time as follows:

Industrial, commercial and agricultural progress continues satisfactory. Nothing has occurred to weaken confidence, the disposition being to extend plans further into the future, and many plants have their facilities engaged well into next year. As demand broadens there is a natural tendency to enlarge capacity, which adds to the already exceptional structural activity. Jobbers have secured much more forward business than at this date last year, especially in dry goods lines, and the frequent reminders of Autumn temperature stimulate retail distribution of wearing apparel. Thus far the weather has not been cold enough to harm the crops that remain to be harvested, and another week of favorable conditions should assure an unprecedented yield of corn. Several settlements maintain labor disputes at the minimum, and mercantile collections continue prompt. A few complaints of inadequate transporting facilities from manufacturing centers are attributed to the requirements of grain moving. Railway earnings thus far reported for September were 3.7 per cent. larger than last year's, while foreign commerce at this port for the last week showed gains of $2,364,180 in value of exports, and $97,851 in imports as compared with 1904. The official report of exports of staple products from all ports of the United States in August exhibited a gain of $16,833,901 over the same month last year, or more than 50 per cent. Securities recovered part of the recent loss in market values, but are irregular, and money is slightly firmer, despite an engagement of gold for import. Bank exchanges in New York for the week were 19.9 per cent. larger than last year's, and at other leading cities the increase averaged 14.6 per cent.

Altogether members of the jewelry trade have reason to congratulate themselves upon the opening of the season of the year in which they do their greatest business under more favorable auspices than have existed for a very long time.

### Receiver Appointed for the Brodie Jewelry Co., Baltimore, Md.

BALTIMORE, Md., Sept. 16.—Louis N. Frank was appointed receiver for the assets of the Brodie Jewelry Co., 211 W. Franklin St., conducted by Deborah D. Brodie, of New York. The receiver was appointed after she had been adjudged a bankrupt upon her own petition. Mr. Frank's bond as receiver was $4,000. In the petition in bankruptcy, filed by Mr. Frank as attorney for Mrs. Brodie, he stated that she owes $16,467.81 and has assets of $6,900. Of the liabilities $260 is for State and city taxes and $16,207.81 is divided among 17 unsecured creditors.

The principal creditors are Joseph Frankel's Sons, New York, to whom $12,476.03 is due on open account and notes. The assets consist of stock in trade, $2,500; store fixtures, $300; instalment accounts, $4,000; and personal effects, $100.

The immediate cause of the failure is said to have been attachments obtained by two creditors.

A Japanese jeweler who conducts a store at 4th St., between K and L Sts., Sacramento, Cal., recently reported to the police that a man entered his store while he was in the back room and, opening one of the show cases, stole a handful of cheap jewelry and escaped. The thief has not been apprehended.

## New York Notes.

Max Moser is representing Leo Goldsmith, 9 Maiden Lane, in New York, Newark and the vicinity.

Cohen & Leibowitz have moved from 214 Ocean Ave., Jersey City, N. J., to 82 E. Broadway, New York.

B. Maitland was last week appointed receiver in bankruptcy of the Puritan Watch Co., 1218 Broadway.

Judgment against Frank Spaulding for $85 was filed last week in favor of the International Time Recording Co., New York.

Leopold Stiassny has given up his jewelry business at 14 Maiden Lane, and has turned his attention to real estate, in the Bronx.

J. Alexander Hardy, of the Hardy & Hayes Co., Pittsburg, Pa., is in New York this week making his headquarters with W. L. Sexton & Co.

George A. Boehm, New Orleans, La., has opened a New York office at 37 Maiden Lane, which will be continued until after the epidemic of yellow fever now raging in the south.

Bernard Strauss, of Oppenheim & Strauss, is receiving congratulations of his friends on his engagement to Miss Bertha Levi, formerly of Baltimore, Md.

Joseph P. Meurer, who for 18 years was associated with John F. Saunders and Saunders, Ives & Co., recently opened an office at 12 John St., as a dealer in precious stones and pearls, loose and mounted.

Visitors at the office of THE CIRCULAR-WEEKLY in the last week included Lewis S. Kann, Washington, D. C.; Walter Powell, of Powell & Sons, Cumberland, Md.; M. O. Nobbe, of M. O. Nobbe & Co., Galveston, Tex.

Louis Levy, manager of Louis M. Levy's pawnshop, 807 Columbus Ave., committed suicide Wednesday night by shooting himself in the head. He was to be married soon, and recently lost money betting on the races.

Charged with having in his possession a gold badge, stolen from Gen. James R. O'Beirne, 352 W. 117th St., Isaac J. Picken, pawnbroker at 102 Bowery, was arraigned last week in the Harlem Police Court and held in $1,000 bail for further examination.

In a baseball game played recently a team representing W. B. Bryant & Co. defeated a nine representative of J. B. Bowden & Co. by a score of 23 to 21. The battery for the winning team was Klusmeier and Miller; opposed to them were Sherer and Pflighardt.

By an oversight it was stated in the account of the robbery of Geo. W. Shiebler & Co.'s window, published last week, that the block is guarded by the Holmes patrolmen. This is an error, as the Holmes Electric Protective Co. has never furnished a night patrol for Maiden Lane.

Sussfeld, Lorsch & Co., besides occupying their present quarters at 37 Maiden Lane, will take possession of the ground floor and one of the floors above in the addition to the Lorsch building, which is being constructed at 35 Maiden Lane, and is to be ready for occupancy in the beginning of next year.

New members were admitted to the Jewelers Association and Board of Trade at a meeting held Thursday by the Board of Directors, as follows: Stevens & Co., Providence, R. I.; Chopard Freres, New York; Julius Mamluck & Co., New York; Rosenfield & Saltman, New York.

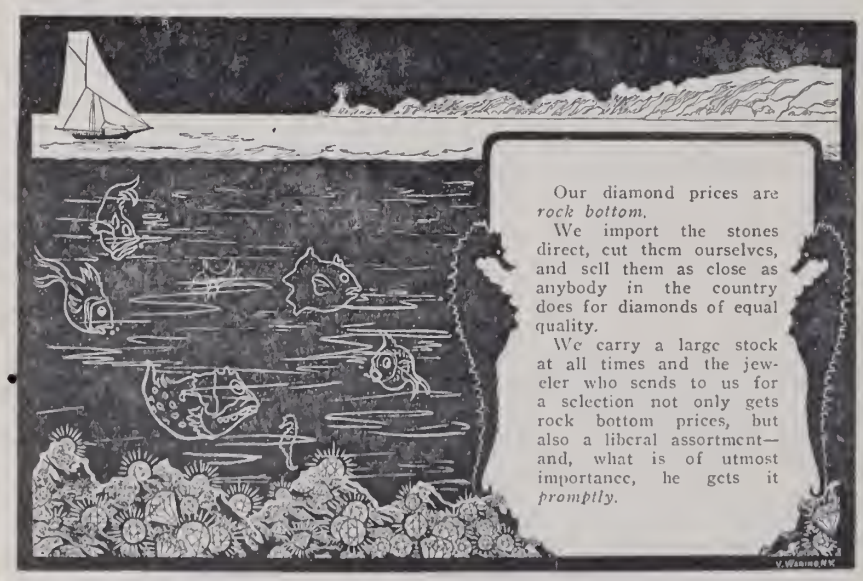
A decree of divorce from Leverett Lewis, a jewelry salesman, was granted last week by Justice Garrettson to Cecilia Isabel Lewis, who was then married to Supt. Senator Benjamin M. Wilcox, Troy, N. Y. The decree of divorce gave to Mrs. Lewis the custody of her two children.

Judgment for $4,064 was taken last week by the International Silver Co., on a balance of a bill of $6,022 for silverware sold to Mrs. Rose T. Shanley, who conducts a restaurant at 1204 Broadway. An execution was issued but later proceedings were stayed by the defendant re-opening the case and taking an appeal.

Because it was not declared to the customs officers a quantity of jewelry purchased by John Steger, a passenger on the steamship *Moltke*, arriving last week, was seized by Inspector Timothy Donohue. The goods were seven pairs of earrings, seven brooches, seven pairs of cuff buttons, seven scarf pins and other articles, valued altogether at $1,000.

Charles Weaver, a jeweler, who lives at 116 E. Kinney St., Newark, N. J., reported to the police last week that jewelry valued at $200 had disappeared from the safe drawer in his home. Later the jewelry was found in the same drawer, and its return is a mystery to the detectives who was working on the case, as much as it is to the Weaver family.

The business of Lindley J. Higham, 11 Fifth Ave., will be conducted after the under the style of the Lindley J. Higham Co., the corporation having been formed with $10,000 capital and the following directors: Lindley J. Higham, 136 Rockland Ave., Mount Vernon, N. Y.; Lindley M. Higham, 225 Keap St., Brooklyn; Harry C. Baker, 568 Putnam Ave., Brooklyn.



Peter Korn, who conducts a store at 17 Union Sq., under the style of Max C. Lynch's Son, announces that the business will be moved Jan. 1, at which time the lease expires. He intends to select a location farther uptown. Unless a new district is established, the west side of Union Sq., once famous as a jewelry center, will have no retail establishment after this year.

The show window in the store of Mrs. Williams, 53 Gates Ave., Brooklyn, was smashed, one night last week, and the proprietor's son, Arthur, saw a man running grab three alarm clocks and run. He followed the burglar to a house on Lewis avenue and called the police, who arrested Joseph Halford, 38 years old, of 53 Gates Ave. A charge of abandonment had been made a few days before against the prisoner by his wife. He was held in the Gates Ave. Police Court for examination on a charge of burglary.

A new organization is being formed under the name of the Jewelers' Protective Association. It is to be a branch of the Legal Advice Society, 32 Broadway, N. Y., of which John B. Merill is the president. Leopold Frank, one of the attorneys

Financial troubles of the American Corundum Co., 76 William St., New York, with a mill at Bridgeport, Conn., came to a crisis last week. An assignment was made Wednesday to Bernard C. Lyon, Bridgeport, formerly the treasurer of the company, and an hour later a petition in bankruptcy was filed against the concern in behalf of a number of the creditors, headed by Archibald H. Whan, who has a claim for $3,875 for money loaned. The company was organized in 1901 with an authorized capital of $25,000 for the purpose of dealing in corundum obtained in South America. Dr. Arthur B. Townsend is president, and Edward J. Welch is secretary.

An attempt was made early Wednesday evening to steal a gold watch case from the store of H. Marenstein, 523 Amsterdam Ave., New York, by a youth in fashionable attire, who twirled a cane gracefully as he entered, and asked to see diamond rings and pins. Frederick Johnson, 323 E. 123d St., is the name and address of the young man accused of the attempt to steal. Mr. Marenstein says that he placed on his show case a quantity of rings and pins, which the visitor inspected with care, and then called for one of the articles in the show window. The jeweler turned to the window, and as he did so the young man, who was tall and had a long arm, reached over the metal grill and grabbed the case of a $600 watch which had been left for repairs. This act was seen by the jeweler, who rushed around from behind the counter, while the young man ran out of the door. In front of the store Johnson was collared by the jeweler and the latter's clerk immediately afterwards came to his help. Mr. Marenstein and his assistant dragged the young man back to the store, and detained him for a half hour, while they waited for the police. The jeweler says that during this time he saw the prisoner making signs to two other men on the outside. The jeweler and his clerk would not go after the supposed confederates, as they thought it was safer for both of them to remain in the store and cling to the prisoner already in their custody. After two detectives came they took the prisoner to the Police Station on 54th St. The watch case was found near the curb by a woman who was passing by and had picked it up. It is supposed that the prisoner threw the case toward the street when he was grabbed by the jeweler, possibly with the expectation that his confederates would get it. In the Police Court the young man pleaded not guilty, and was held for trial. According to one of the detectives, the prisoner said that he had an appointment with a young woman to go to Coney Island, and not having the money to pay expenses he had tried to get it by stealing from the jeweler. This explanation does not tally, however, with the jeweler's idea that the robbery was planned by the prisoner and two confederates. An East Side jeweler, since this incident, called at Mr. Marenstein's store and said that a $65 watch was recently stolen from his store by a young man who grabbed it and ran, the method being similar to that ascribed to Johnson.

The recent remarkable escape from death or injury of Fritz Ziegler, of Cross & Beguelin, has given to his friends occasion for hearty congratulations. A bolt of lightning struck the Ziegler house at Fort Wadsworth, S. I., during a recent thunderstorm while the family was asleep. The terrific crash, which followed immediately after

the flash, roused the neighbors, who, upon investigation, found the Ziegler homestead practically a wreck. Remarkable antics were played by articles securely fastened in the rooms, but the most wonderful of all was that Mr. Ziegler and his family escaped with nothing worse than a bad scare.

Charged with assisting William Murnick in assaulting his father, Simon, a silversmith at 361 Canal St., Manhattan, and also attempted robbery, Morris Wiener, 25 years old, who says his home is at 365 Washington Ave., Brooklyn, was in the Essex Market Court, Manhattan, Sunday. Murnick has for three weeks looked for his son, who, he alleges, robbed him of $2,800 in checks and cash. He heard that William was living at 43 Henry St., Manhattan, with Wiener, and on Saturday night he went there. Both men were out, so he waited. When they returned he alleges they assaulted and attempted to rob him of his pocketbook. He beat them off and Wiener was arrested, but the son escaped. Wiener was held in $1,000 bail for examination.

Fred P. Lovell, Somerset, Ky., is offering his creditors 33 1-3 cents on the dollar.

Arthur West, formerly of Odell, Nebr., has purchased the business of H. B. Mack, Galena, Kans.

Burke & Selman, Lufkin, Tex., have dissolved, and the business will be carried on by Claude A. Burke.

### Receiver Appointed for the Klein Bros. Co., New York, in Involuntary Proceedings in Bankruptcy.

A petition in involuntary bankruptcy was filed at noon yesterday against Klein Bros. Co., (Inc.), manufacturers of jewelry at 51 Maiden Lane, New York. Abraham Roseman is the petitioner, and bases his claim on notes made in February and May, 1903, aggregating $549. He alleged that the company had recently paid out on antecedent indebtedness, $2,500, and that the payments so made were in violation of the rights of the petitioner and other creditors.

A petition was also filed by Mr. Roseman asking for the appointment of a receiver. In the affidavit accompanying this petition, Mr. Roseman estimates the liabilities of the Klein Bros. Co. at $25,000, and said that the company formerly had assets of $10,000. It was said that a large part of the outstanding accounts have been pledged with the Mechanics & Traders' Bank, but the defendants have an equity in these accounts. The petitioner values the manufacturing plant at $3,000; merchandise on hand, $200 to $300; accounts not hypothecated, $200 to $3,000.

Judge Holt appointed Robert G. Perry receiver, requiring him to give a bond of $3,500. Mr. Roseman was represented in the proceedings by Myers & Goldsmith. An appearance in behalf of the alleged bankrupt was made by M. B. Blumenthal.

The company comprises Joseph Kle president and treasurer; Morris Klein, vic president, and Samuel Klein, secretar The firm of Klein Bros. began busine back in 1899, previous to which time Mc ris Klein was an engraver. In 1903 t firm went into bankruptcy with mercha dise liabilities of $22,000, and confident liabilities $12,000. A settlement was ma with the creditors at 10 per cent. ca 15 per cent. in notes endorsed by L. Witse hausen, and eight per cent. in other not running two years. A private settleme was made with the confidential credito it was reported at the time, and bankrupt proceedings were dismissed. The Kle Bros. Co. was incorporated soon af wards, Mr. Witsenhausen and Julian Ster berger putting in a part of the capit which was $10,000. In the Spring of 19 Mr. Witsenhausen and Mr. Sternberger r tired from the company, and the Kle continued. Afterward they met their e dorsed notes and, it is said, have paid part of the indebtedness to Messrs Witse hausen and Sternberger. Of late the ha fallen behind, it is said, in meeting th regular obligations.

P. C. Doehring has succeeded Jacob Da nenbaum, Houston, Tex.

Henry F. Eyler, a retail jeweler Waynesboro, Pa., and Miss N. Guerth, Baltimore, Md., were united in marria about a week ago in the latter city.

### Bold Burglars Cut Into New York Jeweler's Safe and Escape With Stock.

Early Wednesday morning burglars gained an entrance to N. Schwartz's retail jewelry store, 1413 Third Ave., New York, and by boring a hole through the back of the safe took away watches and jewelry valued at $3,000 to $3,500. No arrests have been made by the police.

Back of the store is a small apartment used as a store room. A strong iron grating is placed outside the window of this room. The burglars removed the screws which held the upper part of the grating in place and pulled down the bars. Then they cut a hole through the window and raised the lower sash, admitting them to the back room. A safe stands in the partition which separates the store from the back room. The door of the safe opens into the store, and the back of the safe extends into the rear room.

The burglars did not enter the store itself, the door leading into it from the back room not having been disturbed. They went to work with chisels and jimmies on the back of the safe, drilling a hole one foot in diameter on the outside, and tapering to a few inches in width, just sufficient to admit an arm into the compartment in which the jewelry was kept. In taking out the goods the burglars broke the cases which were too big to be extracted through the opening.

Among the articles taken were 10 ladies' gold watches, 13 silver watches, two Elgin watches, size 16, and other men's and ladies' watches, three dozen marriage rings, three dozen gold signet rings, three dozen men's rings with stones of various kinds, 48 lockets and various other kinds of jewelry.

When Mr. Schwartz entered the store in the morning he did not for a few moments notice that anything was wrong. The clocks, silverware and other bulky objects on the shelves were all there as usual, but when he opened the safe he was amazed to see a streak of light coming from the back. Then he saw that the safe had been rifled, and every article in it had been taken.

Mr. Schwartz is confident that the burglars had opportunity for examining the safe in the daytime, possibly visiting the store as supposed buyers, and noting the location of the goods in the safe, made their plans accordingly. Several families occupy living rooms over the store, but nobody, as far as known, was disturbed during the night by any noise.

### Death of R. W. Scheedel.

CHICAGO, Sept. 18.—R. W. Scheedel, a jeweler at 462 W. 12th St., died last week, and the business, which has been conducted in the name of his wife, Mrs. Clara Scheedel, will be discontinued.

Mr. Scheedel was at one time in business at Providence, R. I., and about 20 years ago came to Chicago, conducting for a time the business in his own name, and then transferring it to Mrs. Scheedel. He was held in high regard by many friends, who deeply mourn his death.

### Death of William R. Thomas.

William R. Thomas, a salesman, who for a number of years had been in the employ of prominent houses, representing them on the road and also in New York, came to his death last Wednesday, when, in a spirit of despondency, he shot himself in the head. He was 30 years of age and a bachelor. For some time he and two other young men lived on the sixth floor of the apartment house at 823 West End Ave. He left a note, addressed to one of his roommates, stating that "This is the result of my own troubles."

Mr. Thomas came here from Philadelphia. He was for several years in the employ of the Howard & Cockshaw Co., selling silver novelties, and he was for a time in the employ of Eckfeldt & Ackley, Newark, N. J. During recent months he was unfortunate in not having employment. After a long period of idleness he obtained an engagement as a salesman in a Fifth Ave. retail concern the day before he committed the rash act. To his friends his deed is inexplicable. They believed that his ill health during the Summer was only temporary and that in a short time he would have regained all that he had lost. Although he did not know it, another concern was about to offer him a position when the report of his death was received.

Mr. Thomas had many excellent social qualities, which won for him friends in and out of the trade. He was a member of Tabernacle Lodge of Masons. His mother and his brother-in law, C. D. Phillips, 2121 N. 15th St., Philadelphia, Pa., came here after the body, and the burial was in that city.

### Games Rolled by the Jewelers' Bowling League of New York.

The tournament of the Jewelers' Bowling League, of New York, is now under way and is already exciting much interest among the members of the various teams and their friends. It is expected that the bowling this season will show even greater skill than a year ago, as the teams now include a large number of experienced players. Following were the results of the games in the last week:

Sept. 12.—Cross & Beguelin, 690, 656, [illegible] Gorham Mfg. Co., 561, 653, 616.

Sept. 13.—Dennison Mfg. Co., 732, 779, [illegible] N. H. White & Co., 775, 637, 772.

Sept. 14.—Tiffany & Co., 714, 784, [illegible] H. Smith & Co., 792, 782, 780.

Sept. 15.—Aikin, Lambert & Co., 65[illegible] vs. Joseph Fahys & Co., 746, 697, 677.

Following are the standings of the teams [illegible]:

| | Won. | Lost. | [illegible] |
|---|---|---|---|
| Cross & Beguelin | 3 | .. | [illegible] |
| Jos. Fahys & Co. | 3 | .. | [illegible] |
| Tiffany & Co. | 2 | 1 | [illegible] |
| N. H. White & Co. | 2 | 1 | [illegible] |
| A. H. Smith & Co. | 1 | 2 | [illegible] |
| Dennison Mfg. Co. | 1 | 2 | [illegible] |
| Aikin, Lambert & Co. | | 3 | [illegible] |
| Gorham Mfg. Co. | | 3 | [illegible] |

Landscapes in miniature are often seen in brooches. An example noted is framed in a design which embraced a horseshoe in Roman gold, with three diamond nails on either side. Other novel brooches are a large rectangle of blue aquamarine in diamonds and pearls, and a three-leaf design, consisting of three stones, pink kunzites, connected with diamond openwork and framed in diamonds.

Wm. J. McIntyre died recently at Seatonville, Ill., and his business will be continued by H. W. Christensen.

Burglars recently entered the store of Fred Kellogg, Culdesac, Idaho, and stole 4 watches and $55 in cash.

The business of Ike Stern & Co., Danville, Ill., will in future be conducted by Gus M. Greenebaum & Co., Inc.

The business formerly owned by Mrs. Bertha Demmert, Camden, N. J., is now conducted in the name of John C. Demmert.

H. Vanderzanden, De Pere, Wis., will erect a one-story brick structure on Broadway for his jewelry store in the near future.

Watches, rings and diamonds valued at about $900 were stolen recently from the store of Bart Mulvaney, Bellingham, Wash.

Chas. J. Marson, Cambridge City, Ind., has just completed extensive improvements in the interior of his store. A well equipped workshop has been fitted up in the rear.

The Dean-Herbert Co., Manchester, N. H., has been made the defendant in two suits brought against the concern for $5,000 damages for alleged false imprisonment by Miss Annie Sullivan and Miss Annie Cassey, of the same place. The defendant's stock was attached by Deputy-Sheriff Woods. The plaintiffs say they entered the store of the defendant, a short time ago, to purchase jewelry. A tray of rings was shown to them and three of the rings were placed in an envelope to be held until called for. In the meantime another customer entered the store and was waited upon. The clerk finally missed two rings and the young women allege that the door of the store was then locked and that they were detained while an investigation was made.

## Philadelphia

L. C. Reisner, Lancaster, Pa., was a visitor to this city last week on a business trip.

C. H. Johnston is removing this week from 1131 Vine St. to 13th St. above Race St.

A. Lindo, a Trenton watchmaker, has accepted a position with F. L. Kirkpatrick, 9th and Locust Sts.

George Greenwald, watchmaker, formerly with Hoover & Smith, has accepted a position with L. P. White.

Samuel Chestnut, formerly with the B. Williams Co., has accepted a position with M. Sickles & Sons.

The Bailey, Banks & Biddle Co. secured the contract for the prize cups and trophies to be awarded at the Bryn Mawr Horse Show.

J. Burroughs Robertson, of the material department of M. Sickles & Sons, is expected home from a honeymoon trip north next week.

Charles Scott, a watchmaker, who was reported to have attempted suicide recently, is said to have gone to Wilmington, Del., to accept a position.

Charles Gabler, watchmaker for years with Henry Euler, has removed from 716 to 722 Chestnut St. Emil Zothe, engraver, has moved also with Mr. Gabler.

J. B. Bechtel, of J. B. Bechtel & Co., 725 Ransom St., made a trip along the North Pennsylvania route last week. George K. Ware, of the same firm, went to Baltimore and nearby southern points.

John N. Gill & Co. and William R. Dougherty have invited estimates for the erection of two additional stories to the machine shop of the Philadelphia Watch Case Co., at Riverside, N. J. Bids were due Sept. 16.

J. Warner Hutchins and L. P. White spent the week's end at the Ours Club, an auxiliary of the Jewelers' Club at Atlantic City. A number of local jewelers will go to Atlantic City soon to take part in the festivities marking the closing of the Ours Club for the season.

Retail jewelers in town last week included: F. C. Maag, Brideport, Pa.; D. H. Krouse, N. Wales; Aug. Carmandy, Coatesville, Pa.; M. K. Loudenslager, Souderton, Pa.; Mr. Braveman, Reading, Pa.; John Ridenour, Bedford, Pa.; H. S. Landis, Frederick, Md., and F. H. Ewald, Coatesville, Pa.

Charles Euler, who sold out the business of the late Henry Euler at 716 Chestnut St., at public auction, last week, has retired to private life. The sale of the stock, fixtures, etc., attracted a large crowd of local jewelers, among them: Wm. Haines, F. C. Bode, Henry Dornhoffer and B. Gebhard. Mr. Bode is reported to have purchased $1,100 worth of the stock.

Charles P. Coleman, formerly a money loan broker and a diamond dealer in St. Paul, Minn., shot and killed himself last week at 1102 Pine St., this city. The suicide is explained by reason of Coleman's fear that he would be made helpless by paralytic strokes. He had lived here since he gave up his business in St. Paul a few years ago, and is reported to have been quite wealthy.

M. Bernstein, jeweler, at 5th and Reed Sts., was held in $800 bail last week to answer the charge of larceny by bailee of several diamonds belonging to Louisa Hall, Evansville, Wis. Mrs. Hall, who is the wife of a circus proprietor, says she left $300 worth of jewelry with Bernstein to be reset last year, and says she has been unable to recover it. Part of the jewelry was found by a detective in a pawnshop.

Marc J. Isaacs, a pawnbroker and diamond dealer, 1312 Columbia Ave., died last week of blood poisoning from a carbuncle. He was only 40 years old and one of the best known and most successful pawnbrokers in town. He was a son of the late W. Judah P. Isaacs, an old-time Democratic leader. He established his Columbia Ave. store about 12 years ago. The funeral services were held Monday from his late residence, 3027 Diamond St.

J. L. Wolff, Paducah, Ky., has just removed his stock from temporary quarters to his former location at 327 Broadway, which has been entirely renovated.

Charles L. Wiedhahn, Lock Haven, Pa., has removed his stock back into his original quarters in the Sterner block, which have been considerably improved.

**"Our gold always stands the test."**

**S. FRACKMAN, Manufacturing Jeweler,**
**51-53 Maiden Lane, NEW YORK.**

We are pleased to send selection packages to responsible jewelers.
*Write for our new fall catalogue.*

¶ The Koy-lo Company, of No. 7 Broadway, New York City, beg to offer to the trade their new *patented*

## KOY-LO REVOLVING SPIRAL HAT PIN.

¶ The head of the Koy-lo pin is swiveled on to the spiral stem. Thus, when the pin is inserted in the hat, the spiral revolves automatically. There are no hidden springs, and nothing to get out of order. The Koy-lo is used in precisely the same manner as an ordinary straight hat pin. It is as superior to a straight hat pin as a screw is to a nail, or as an automatic screw-driver is to the old kind. It is the only practical device at present in existence which will hold the hat firmly and comfortably. It will not work loose when in the hat.

¶ The Koy-lo pin is made up in a variety of popular styles at from $9.00 per gross to $75.00 per dozen, to retail at from 10c. to $10.00 each. Each pin carded separately. Terms: 1%, 10 days; net, 30 days, f. o. b. New York City.

¶ As the Koy-lo Company's salesmen will not, for the present, call on the trade outside of New York City, out-of-town dealers who desire to see samples should make application by mail to

## Pittsburg.

J. A. Boggs, formerly of Scottdale, Pa has opened a store at Mount Pleasant, Pa

Henry A. Barrett, of the G. B. Barrett Co., is spending a few weeks at Atlantic City.

Charles Guth, a watchmaker formerly in the employ of S. Davis & Co., is now with E. P. Roberts & Sons.

S. F. Roberts, of E. P. Roberts & Son has returned from Shelter Island, where he and his family spent several weeks.

Many friends of Abraham Lewis, 20 Fifth Ave., will be glad to learn that he is recovering from an attack of typhoid fever.

Most of the stores of this city, which have been closing at 5 P. M., are now remaining open until 5.30 P. M., some staying open until 6 o'clock.

There have been no new developments in the reported sale of the building occupied by E. P. Roberts & Son, the option not expiring for several weeks.

Judge Buffington has not as yet handed down an order, bearing on the petition in voluntary bankruptcy filed several weeks ago by David H. Kahn, of Erie, Pa. Definite action is expected this week.

Howard Hall, the thief who was captured in the store of Graf & Niemann, 210 6th St., several weeks ago, was before the Grand Jury last week and held for trial on two charges of entering a building with intent to commit a felony.

Among the out-of-town merchants in Pittsburg last week were the following: John Linnenbrink, Rochester; J. V. Pratt, Pitcairn; Harry Furtwangler, Greensburg; Frederick Patton, Monaca; F. H. Hayes, Washington; C. H. Bauer, Blairsville, J. Z. Simpson, Blairsville; A. Merz, Sewickley; J. R. Thorn, Tarentum.

Samuel Grossman, a pawnbroker whose place of business is in Erie St., Cleveland, was in Pittsburg last week attending a trial in which Paul La Salle, alias Parker and various other names, was being tried for burglary. Grossman identified La Salle and Charles McKnight, alias Joseph Flannery, who have served long terms in the penitentiary, as the men who pawned some stolen jewelry from him.

Mrs. Christina Pafenbach, aged 75 years, the mother of Albert Pafenbach, of Witt & Pafenbach, 1204 Fifth Ave., died last Friday morning at her home in Zelienople from old age. She was born in Germany and was a resident of Pittsburg for many years, after coming to this city in 1848. The funeral took place last Sunday afternoon, the interment taking place in the village where Mrs. Pafenbach died.

S. T. A. Loftis, of Loftis Bros. & Co., Chicago, was in Pittsburg, last week, completing arrangements for making alterations to the firm's new store, 220 6th St., formerly occupied by the Prosser Optical Co., at a cost of about $4,000. The fixtures now in the store, which were bought by the landlord to satisfy a claim for rent against the optical company, cost between $7,000 and $8,000, so that the store will be one of the handsomest in the country when Mr. Loftis gets through with it. Speaking of the instalment business, Mr. Loftis said: "Our houses last year did a business of $8,000,000, and we only lost one eighth of 1 per cent. on all transactions on instalment

rybody is presumed to be honest. I am afraid of the public." It will be a month re the alterations are completed to the e.

hristian Frederick Bauen, who several ths ago stole the silver handles from eral priests' coffins in a vault in St. ry's Cemetery, Allegheny, and who melt- them into dises and attempted to sell melted silver to Heeren Bros. & Co., last week found guilty of the charge. ien had made a confession to Superin- dent of Detectives Thomas A. McQuaide t he had committed the crime, but ien's attorney told the jury that the pris- r had been intimidated into making this ement, as he would receive a good posi- n and his freedom if he made the state- nt Bauen afterward, however, contradict- many statements which he had made, and jury evidently suspected that he told ame story and brought in a verdict of lty. Bauen, in his effort to gain the tal, had desecrated the bodies of former ests by tramping over their dead bones. e case was one of the most gruesome t has been heard in the county court ise in many a day.

## Rochester.

M. B. Rosenthal, with Philip Present, who been in town for the past week, will ve shortly for his second trip of the sea- n.

A dispatch from Geneva last week stated t Judge Wyckoff had rendered his deci- n in the case of the American Standard welry Co., of Detroit, which brought an ion against W. J. Brennen & Co. to ob- n judgment for $180 for jewelry alleged have been sold to the defendants. The fense was that they returned the goods. e decision was no cause of action.

Clarence M. Hall, who has just completed term in the Ohio State penitentiary for empting to swindle a Cleveland merchant, under arrest here on a charge of swin- ng J. R. White & Co. out of a diamond g last year. Hall lays all his troubles to e morphine habit, with which he is ad- cted. Hall is very bright, and while in e penitentiary, it is claimed, invented a se coupling that is expected to bring him fortune. The prison officials obtained a tent for him.

Eight years ago Charles W. Thomas indled several merchants of Batavia out money and articles of value. His scheme as promoting a war drama called "At- ta." Among others, he went to the jew- y store of C. C. Bradley & Co. and se- red two gold watches, upon which tickets re to be sold. He left town suddenly, ving secured something over $100. He af- rward wrote to Mr. Bradley. In 1898 omas, under the name of C. W. Stanley, as sent to Sing Sing. Last week Thomas peared at Batavia and requested to be nished. He was accommodated.

## Canada Notes.

TRADE CONDITIONS.

The Fall trade is opening well, especially in Ontario. Retailers have had a satisfactory Summer and are looking forward hopefully to a good season. Conditions in the west are not so favorable, owing to overbuying during the last two or three years, and the large amounts of money locked up by land speculation. The good grain crop is expected to improve the situation to some extent, but the farmers are, many of them, heavily in debt to the big implement manufacturers, and the policy of the latter is to press for payment this season. Payments from the west have been unsatisfactory, and the volume of sales small. The watch business is improving, but a noticeable drawback is the hold which Swiss watches have obtained. The retailer can make more profit out of the Swiss goods and the call for them is steadily increasing. The demand for silverware is good, and values are likely to be maintained, there being apparently no disposition on the part of the large manufacturing houses to engage in a price-cutting contest. Owing to the keen competition among American manufacturers the market for clocks is somewhat unsettled.

T. Edwards, Brighton, Ont., has sold out to W. M. Kitchen.

A. C. Skinner, Sherbrooke, Que., was a recent visitor to Providence, R. I.

Ryrie Bros., Ltd., Toronto, Ont., have offered a reward of $1,000 for the recovery of the diamonds stolen last week, and a proportion of the sum will be given to any one furnishing information leading to the recovery of any part of the stolen goods.

Elizabeth Clement, who was charged, with her husband, with theft from the Ottawa Jewelry Mfg. Co., Ottawa, Ont., has been released on bail of $1,500. Clement was sentenced to seven years for the offense, but the jury twice disagreed in the case of l wife. Clement belonged to a good Qu bec family. His wife came from Huntin don, Que.

A fund of several thousand dollars h been raised by Canadian subscriptions t presenting a silver shield to the battlesh *Dominion* of the British navy in recogniti of the compliment paid to Canada in t selection of the name. The order for t work, which will be on a representati design, has been given to P. W. Ellis Co., Toronto. When complete with all cessories it will cost about $5,000.

Steps are being taken by the Montr branch of the Canadian Manufacturers' A sociation to have repealed the act pass last Spring imposing a tax of $300 on co mercial travelers who enter the Pro vi of Quebec from foreign countries and fr other provinces of Canada for the purp of selling goods. After careful conside tion the executive committee placed its on record as being strongly opposed t tax, and the legislative committee will dr up a petition, which will be submitted all the members of the local branch for s nature, setting forth the views of the me bers on the matter. When the signatu are obtained a delegation will wait upon government and strongly urge the repeal the act. At the same meeting, arrangeme were made for the banquet to be tende W. K. George, the well-known jeweler, the retiring president of the associati The convention and the banquet took pl at Quebec, the convention commenc Monday, Sept. 18.

A certificate of incorporation was recently filed at Albany, N. Y., by the Universal Jewelry Mfg. Co., which has an authorized capital of $100,000. The directors are: George Stein, Edward Selkinghaus, William Selkinghaus, New York.

John H. Mellish and Frank M. Kefer, formerly with the Schrader-Wittstein Co., Chicago, have commenced business on their own account at room 611 in the Inter-Ocean building, Chicago, under the name of Mellish & Kefer. They make a specialty of electroplating and jewelry polishing.

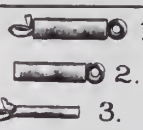
## Harrisburg, Pa.

TRADE CONDITIONS.

Dealers report an unusually large number of visits from traveling men during the past few weeks, all of whom speak confidently of the trade prospects for the Fall and Winter. Locally the business situation is very good. Opinions differ somewhat as to the volume of business that will be transacted by the jewelers during the "Old Home Week" celebration, Oct. 1-7. Just at this time the local jewelers are carrying large stocks in their establishments, and visiting patrons will have no cause to complain on the score of selection and quality.

H C Claster has moved into his handsomely remodeled home at 3d and Peffer Sts.

A daughter of Geo. A. Hutman was painfully injured recently by a fall at her father's cottage at Mt. Gretna.



Local jewelry stores will remain open evenings after Oct. 1. They have been closing at 6 P. M. since last Spring, Saturdays excepted.

The auction sale of the stock in the F. E. Commings store, 441 Market St., has been concluded, and Mr. Commings will now devote himself to his N. 4th St. store.

George A. Hutman's store was closed a portion of last week on account of the death of Mrs. Hutman's father, Prof. Isaac Lloyd, the oldest public school teacher in the city.

Miss Ether Louisa Plack, daughter of Herman Plack, was wedded last week to William Swoyer, also of this city, the ceremony being performed at the home of the young couple by Rev. E. S. Bowman.

The Farnsworth Cup, donated by Hon. W. C. Farnsworth, of this city, to the winner of the Tri-State Baseball League championship, was presented to the Williamsport team at Williamsport last Saturday.

Vol. LI. CHICAGO, WEDNESDAY, SEPTEMBER 20, 1905. Vol. LI. No. 3

## Chicago Notes.

Calvin Clauer is on a trip through Illinois.

A. Feltenstein, diamond dealer, is visiting New York.

Herbert W. Allen has returned from a fishing trip to the Northern Lakes.

I. S. Gross, with the Knickerbocker Silver Co., has returned from a trip to Denver.

Chas. J. Jacobs, of the Knickerbocker Silver Co., has returned from a trip to the east.

The capital stock of the Norse Pottery Co., Rockford, Ill., has been increased from $2,500 to $5,000.

The cut glass factory of Heintz Bros. has been removed from 61 and 63 Union Park Court to St. Charles, Ill.

J. M. Stanly, representing the Mauser Mfg. Co., and Mrs. Stanly have returned from a 10 months' trip to the Pacific Coast.

Max Schweiger, formerly of Feigenbaum & Schweiger, New York, was here last week on his first trip since the dissolution of partnership.

Louis J. Bohl, a diamond setter, arrested four weeks ago as an accomplice of Henry Hoffman, an alleged diamond smuggler, is out on bail.

Chas. H. Hulburd, president of the Elgin National Watch Co., is home again after spending the greater part of the Summer at Watch Hill, R. I.

Chas. E. Howes got back from Denver last week. Mr. Howes attended many free excursions on this trip, arriving home full of enthusiasm and beet sugar.

F. R. Sheridan, western representative of Arnold & Steere, and W. A. Fay, representing the Jno. T. Mauran Mfg. Co., are on a trip to the Pacific Coast.

Sol. Hess, of Rettig, Hess & Madsen, has returned from a 10 months' trip to the Coast. Mr. Hess was busy all last week explaining to his friends how he didn't lose his trunk, as reported in the daily newspapers.

Because of recent reports of diamond discoveries in Indiana the Federal officials in Chicago are inundated with inquiries from holders of backwoods land in the Hoosier State who see themselves in prospect the proprietors of rich diamond mines.

E. A. Bazzett, formerly manager of the South Bend Watch Co., now manager of the Tulsa Watch & Clock Mfg. Co., Tulsa, Ind. T., has been confined to his bed with typhoid fever since Aug. 20. It was thought for a time that he would not recover, but he has at last regained consciousness and is now convalescent. He will probably be able to be up and around in three or four weeks.

Mrs. Ely, wife of William Ely; May Hart, Wm. Gilhooley and Charles Johnson were dismissed from custody last week for lack of evidence. The quartet were arrested on suspicion of being accomplices of Wm. Ely, who confessed to having held up A. W. Johanson's jewelry store at 270 Wells St. Ely was held for the Grand Jury. He has steadily declined to reveal the names of his accomplices.

Sol. Caro, a former salesman for the Madson-Steele Co., was indicted by the Grand Jury last Friday on a charge of embezzlement, and was later released in $2,500 bail. Caro is charged with having made collections for his firm and not remitting the amounts. He is also charged with not returning jewelry to the trustee when his firm went into bankruptcy. Altogether Caro's shortage is claimed to be between $12,000 and $15,000.

Chicago jewelers who issue catalogues will do well to observe the following rules: In order to get the third class rate (printed matter), two ounces for one cent, do not enclose more than one blank order and one printed envelope in each catalogue. A number of large jewelry houses here have paid the penalty for doing otherwise. The Post-Office holds that order blanks are merchandise and subject to a postage of one cent for one ounce; that is the merchandise rate, and if more than one order blank is inserted in the catalogue a rate of one cent for one ounce is charged.

J. Bernstein, a diamond dealer, of New York, seems to be playing in hard luck. His claim against the Marquardt & Scott Co. was originally for $2,680. In the first proceedings in involuntary bankruptcy against the defunct concern Mr. Bernstein, through his attorney, settled at 50 cents on the dollar and received a check for 10 per cent. in cash, amounting to $268. The first composition having proved fruitless through the vanishing of $6,000 of the firm's assets, a voluntary petition was filed, and Mr. Bernstein filed his claim less the 10 per cent. he had received. This claim is now disputed, and Mr. Bernstein will be compelled to return the $268 and come in with the rest of the creditors and receive the regular dividend.

## Kansas City.

### TRADE CONDITIONS.

The outlook for a big Fall trade continues bright. Travelers say that this year's business will be the largest in the history of the Kansas City trade. Collections are satisfactory.

C. P. Kionka, of Kionka & Stuhl, was in Ohio last week. Indiana will be his next territory.

A. Rees, formerly a retailer here, is going to Los Angeles, Cal., to engage in business on his own account.

Wm. Mosbacher, Wichita, Kans., who buys all his goods here, is recovering rapidly from a very severe illness.

C. F. Gash, Fredericktown, Mo., passed through this city, last week, on his return from a vacation trip to his old home in Sterling, Kan.

C. M. Crossno, Salisal, Ind. T., passed through this city on Wednesday on the way to Chicago, where he will spend two weeks with friends.

Walter Jaccard, of the Jaccard Jewelry Corporation, will return to Kansas City this week. He was in New York last week having arrived recently from Europe.

H. K. Herbert, El Dorado, Kans., has notified the trade here of his return from a hunting and fishing expedition into the heart of the Wichita Mountains in Oklahoma.

Henry J. Norton and W. C. Schuman, traveling for the C. B. Norton Jewelry Co., replenished their stocks last Thursday and started for the corn country again that night.

W. C. Summers, Eureka, Kans., bought railway tickets for himself and wife for Portland, Ore., in Kansas City last week. They will spend a month at the Lewis and Clark Exposition.

T. S. Lidstone, pioneer jeweler of Dearborn, Mo., when in Kansas City, last week declared that his part of the State was never so prosperous as now. He added a few holiday stock while here.

L. E. De Larity, Parkville, Mo.; I. I. Henry, Summerfield, Kan.; J. A. Lukin, Buckland, Kans.; C. D. Hunt, Garnett,

Kas., and B. O. King, of B. O. King & Co., Sekton, Kans., were buying visitors to Kisas City last week.

. B. Norton and Ward Lewis, president manager of the jewelry department, re-tively, of the C. B. Norton Jewelry Co., nded the corn carnival in Atchison, s., last week. Mr. Norton began his olesale career in that city.

. Frank, 1012 Union Ave., is offering creditors 20 cents on the dollar. Mr. nk conducted a small auction business, quite a number of claims against him e been placed with attorneys within the few months. He came here from Mem-s, Tenn

he following students were recently en-ed in the Kansas City Polytechnic In-stitute: M. Green, Charles Marshall, Toby Fishman, John Mayo, F. G. Thomas, Hugo Hardten, Kansas City; W. C. Schoeble, Falls City, Nebr.; A. H. Thistlewaite, Topeka, Kans.; F. M. Newton, Missouri City, Mo.; E. L. Levin, St. Joseph, Mo.; Mrs. Otto Burklund, Osawatomie, Kans.; J. A. Ricker, Emporia, Kans.; Mrs. I. Slusher, Independence, Mo.

T. Brunner, who has a shop at 117 E. 5th St., was arraigned in Police Court recently, on a charge of keeping a pawnshop without a license. According to the testimony of a dozen persons who appeared against him, Brunner was in the habit of lending money on pledges and exacting the regular rate of interest charged by pawnshops. Brunner denied each charge, and explained the situation by saying that he bought the articles mentioned instead of loaning money. He was fined $50.

## Pacific Coast Notes.

Clarence Dunlap recently opened a store at Alturas, Cal.

L. Katz, a pioneer jeweler of Sutter Creek, Amador County, Cal., was in Quincy, Cal., on business last week.

The owner of the onyx quarries, located 45 miles northwest of Prescott, Ariz., has awarded a contract amounting to $80,000 to develop the quarries, and has also made other contracts with Chicago people to take the entire output. He will build a narrow gauge railroad from Seligman direct to the quarries.

## San Francisco.

TRADE CONDITIONS.

As the holiday season approaches, the volume of business increases. It is not the spasmodic rush which marks a period of financial uncertainty, but a slow and steady gain of the kind which is always gratifying to dealers. The trade in general expect a continuation of the increased business and are laying in heavy stocks in anticipation of the same.

E. G. Webb, Fresno, Cal., was in this city last week replenishing stock.

G. D. Schulze, Dixon, Cal., was here last week, calling on the jobbing trade.

J. C. Donovan returned last week to Los Angeles, Cal., after spending a week in this city.

B. C. Kennedy, Hilo, was in this city last week buying stock for his Fall and holiday trade.

Daniel Pugh, Ogden, Utah, was in San Francisco, last week, combining business with pleasure.

J. C. Feige, the popular road representative of A. Eisenberg & Co., has just started out on his Fall trip.

M. Markheim, Stockton, Cal., was one of the numerous visitors to the San Francisco wholesale houses last week.

H. C. Van Ness, of H. C. Van Ness & Co., returned early last week from a business trip through the northwest.

C. C. Richdale, San Diego, Cal., was in San Francisco last week, calling on the jobbing trade and adding to his Fall stock.

L. Weitz, Farmington, Cal., made a short purchasing trip to San Francisco, last week, and added extensively to his Fall stock.

All of the local jewelers and other merchants closed their stores Saturday, Sept. 9, in observance of Admission Day.

The California State Mining Bureau has just issued Bulletin No. 37, describing the gems and jewelers' material found in the State of California.

Percival Urmy, who has so ably filled the position of watchmaker for the Fleissner-Marshall Co. for some time past, has left his position with this firm and taken a similar position with S. Nordlinger & Co., Los Angeles.

R. L. Radke, of Radke & Co., attended the Admission Day celebration at the State capital Sept. 9. He was a member of a large company of Mystic Shriners who wer from San Francisco to assist in the fe tivities of the occasion.

H. P. Bristol, of the Bohm-Bristol Co has just purchased a beautiful suburba residence across the bay in Fruitvale, suburb of Oakland, and is about to mov into it. He will make the place his perm nent home in the future.

Dan S. Briggs, of Radke & Co., was in tiated into the mysteries of the Order Native Sons of the Golden West recent and left with that aggregation on their e cursion to Sacramento Sept. 9, when th took part in the Admission Day celebra

Radke & Co. have done some very effe tive decorating in their establishment at 1 Sutter St., having fitted it up with a re artistic arrangement of flowers and gre branches, making one of the most attracti ly decorated jewelry stores in the city T decoration was in honor of Admission Da

A. G. Prouty, who was formerly a mem ber of the firm of Landram & Prouty has taken a position with M. Schussler & C This contradicts the rumor, which was rent some time ago, that Mr. Prouty gone east to secure manufacturers' lin and was about to go into the manufactur agency business.

A. Andrews left Sept. 9 with the Gov nor's staff for Sacramento, where he pa ticipated in the ceremonies attending celebration of Admission Day. Col A drews is one of the pioneers of Cali nia and a veteran of the Mexican War was one of the original "Forty-niners" a was a member of General Sutter's staff also assisted in the original admission ce mony when California was admitted to t Union.

Shreve & Co. have just turned out handsome example of the silversmith's in the shape of a magnificent loving to be awarded by the State of Cali to the company of the First or Second B gade of the National Guard, which has t best record for general efficiency at t of the year. The cup is of solid silver a chased, and stands 24 inches high They also have on display in their show win a fine trophy cup, designed and made themselves, to be competed for in the future by the Coronade Golf Club

TRADE CONDITIONS.

Jewelry merchants are much pleased with the business which the State Fair brought them. They say that Wednesday and Thursday of last week were the best days since the holidays of 1904. There were 40,000 strangers in the city on Thursday and 35,000 on Wednesday, the majority each day being from the rural communities. Collections are better than for some time, and merchants generally are pleased with the prospects.

Carl L. Rost and wife last week visited Columbus, where Mr. Rost's brother is a jeweler.

Ferd. Mayer, of Charles Mayer & Co., has returned from a four months' trip in Europe.

Elmer Stokes, watchmaker for Horace A. Comstock, has resigned his position to go to Texas.

J. A. Oswald and N. W. Myer, of Crawfordsville, Ind., were greeting friends in this city last week.

The Rev. Calvin R. Gray, Madison, Ind., was a recent guest of A. W. Gray and A. R. Gray, of Gray, Gribben & Gray.

Managers of the Hoosier Jewelry Co., which concern has rented quarters in the Traction and Terminal building, state that they will have one of the handsomest stores in the city. The formal opening of the new store will be held Oct. 15.

Local detectives are trying to locate the burglars who recently robbed the store of E. F. Starks, Newpoint, Ind. The thieves gained entrance by breaking a large plate glass window. They were frightened away, but carried $100 worth of stock with them.

A man giving his name as William Jackson was arrested in a local jewelry store last week, while trying to sell a piece of gold weighing 28 dwts. for $2. The man claimed to be from Muncie. He was sent to the workhouse for vagrancy. The police are trying to learn where he secured the gold.

While in this city last week J. W. Royse, manager of the Gold Creek Mining Co., said that his firm was making a specialty of mining small rubies to be used for watch jewels. These, he said, are fou in abundance in the Morgan county hil

The recent State Fair brought many o of-town jewelers to the city, who took casion while here to visit the manufact ers and jobbers and leave orders. Amo the visitors were: J. F. Ratliff, Richmon Joseph Hummel, Jr., Muncie; J. O. Lu Zionsville; J. E. Meyer, Elwood. J. Hardin, Greenswood; F. C. Sheldon, Sh byville; E. C. Seaton, Clayton; A. S. O Greenfield; L. E. Heap, Spencer; J. Hudson, Fortville; H. Wheeler, D a; A. Pickett, New Castle; Claude Phil Carbon; J. H. Smith, Greenfield; F. P nington, Knightstown, and Bernard Ma Edinburg.

## Pacific Northwest.

H. E. Peterson, Toledo, Ore., was a itor in Gardner, recently, where he looking for a location for a retail ewe store.

On exhibition in the window of G. B inghausen's store, on First Ave., Seat Wash., is an emerald necklace more t 500 years old. It belongs to the collect of a Tacoma woman and has been han down in the family for generations. necklace was given to the great-grandmot of the present owner by Empress M Theresa, of Austria, as a wedding pres The original present consisted of three eralds in the shape of earrings and a br pin. When the earrings went out of s the jewels were made into a necklace, have been kept in the family in that sh ever since.

Fifty gold watches were recently se at the custom house in Seattle, Wash., til an investigation can be made by police. They were taken while be spirited from the steamer *Victoria* by C T. Scott, of Duluth, and C. A Brooks, Winona, Minn., after a bungle had b made in landing them. An examinat the watches shows they are all of Ameri manufacture and therefore not subject duty, but of this fact the owners appea

te unaware. Brooks claims to have met S t on the boat. Scott claimed he was pe lling the jewelry about the country and w just returning to Seattle from Victoria. L r he is said to have stated that he was a aveler for a wholesale jewelry concern. Nther of the men was detained, but a t rough investigation is in progress.

## Minneapolis and St. Paul.

r. A. Nelson, Fertile, Minn., and Frank terbury, Wyndmere, N. Dak., were in Twin Cities on business during the past k.

hantgen & Kohl, Minneapolis, have en- ed a new engraver, John Neilson, from east, and also another diamond setter, Feigelman.

he rwald Stendahl, who formerly worked the Reed-Bennett Co., of Minneapolis, w traveling in Wisconsin for F. W. H. midt, Chicago.

Arthur E. Paegel is the first licensed uffeur in Minneapolis. Mr. Paegel is an husiastic automobilist, and had no trouble establishing his ability in handling his chine.

The contract for the purchase of 30 binoc- r field glasses for the Fort Snelling post cers has been awarded to C. A. Hoff- n, Minneapolis. The glasses were all im- ted from Europe and enclosed in leather es.

Harry Rosen, St. Paul, was recently in rt on a preliminary hearing of convert- to his own use two pairs of diamond rings valued at $750, the property of M. Finkelstein, retail jeweler, of St. Paul. nkelstein claimed that Rosen had taken goods as an agent and had converted m to his own use.

Carl S. Sutter, St. Paul,, formerly in the velry business, who was adjudicated a nkrupt June 27, has filed a petition in the ited States District Court for full dis- arge of all his debts in bankruptcy. The tition was filed last week, and the court n signed an order to the effect that a aring shall take place Oct. 2, at 10 A. M., which time the creditors may appear and ow cause, if any they have, why the dis- arge should not be granted.

James J. Lane, who atempted to rob the re of the Paegel Jewelry Mfg. Co., Min- polis, during the Summer, pleaded ilty when recently arraigned in court, d was remanded for sentence. Hillyer, cused of being his accomplice or "stall" the matter, pleaded not guilty and was d for trial. Lane is the man who pene- ted an 18-inch stone wall and sawed his y through a wooden partition, entering basement of the Paegel store, where the rglar alarm on the trap door from the sement to the storeroom revealed his en- nce. E. H. Brandeis, of the company, s the man who discovered Lane under a l-top desk, where he had lain concealed ile a thorough search was made of the tire building for him.

## Cincinnati.

C. Stoner, of Lindner & Co., Carlisle bu ling, has left on a trip to the south.

ugo Lindenberg, of Lindenberg & Fox, is aking a tour of the south and southw .

Ganz, of the Gustave Fox Co., leaves th week for an extended trip through the Eastern States.

. Moss and wife, Owensboro, Ky., st ped off at this city on their return from Eich Lick Springs, last week.

J. Greenwald, 33 Arcade, has added n electrical fixtures, which greatly im- e the appearance of his store.

H. Galbreath, formerly with the Eime Jewelry Co., has taken a position he new store of Tiffany & Co., New Yk.

rank Herschede spent some time in New Yk last week purchasing holiday stock. was accompanied by Charles W. Lucius, his house.

l C. Reed, Blanchester, O., called here week while en route to Dayton, O., ere he was a delegate to the meeting of Junior Order of United American Mechics.

larry C. Walton, Jr., formerly in the Cinnati office of the Keystone Watch Case has accepted a position at the com- y's Philadelphia office. George Lawton es the position left vacant by Mr. Wal- 's promotion.

oseph Noterman & Co. made the charm ently presented by the citizens of Portsuth, O., to Bridwell, third baseman of "Cincinnati Reds." William Pflueger, of above house, is about to leave on his ular trip south and west.

William Swan was arrested last week on charge of petit larceny. S. Suslow, at St. and Broadway, claims that Swan led at his store to see some watches, and e of the watches disappeared while the rk's attention was distracted for a mo- nt.

F. Spies, Stubenville, O., was in this city t week, purchasing new stock for his re, which he has completely remodeled. Loose, of Loose & Loose, Columbus, was here also, purchasing for the new re which he has opened at 180 E. 4th St., lumbus, O.

The two thieves who last week broke into l robbed I. N. Pollack's store at Ashd, Ky., were caught by detectives near Ashland. The thieves, upon being detected, pleaded guilty and told where they had concealed the booty in the woods in that locality. It is needless to say the culprits were imprisoned and Mr. Pollock was very happy at recovering his goods.

Among the out of town jewelers who visited the Cincinnati trade last week were: E. S. Clifton, Rogersville, Tenn.; A. Clooney, Maysville, Ky.; Charles Keller, of M. A. Selbert, Frankfort, Ky.; D. A. Lamb, Wilmington, O.; V. E. Duncanson, Lynchburg, O.; F. G. Whittlinger, Middletown, O.; A. Brandley, Elkins, W. Va.; F. C. Moorefield, Oxford, Ala.; J. W. Roop, Greenville, O.; Charles Keller, Frankfort, Ky.; George Krecke, with D. Adler & Son, Lexington, Ky.; Fred J. Heintz, Lexington, Ky.; G. W. Meyer, Chattanooga, Tenn.; Mr. Douglas, of Watkins & Douglas, Elizabethtown, Ky.

## Detroit.

TRADE CONDITIONS.

Contrary to the expectations of some of the members of the trade, Detroit's first State Fair, last week, did not result in an increase in the volume of transient business. City trade fell off also, although there were 50,000 visitors, most of them from the rural districts. The finest crops in years have just been harvested in Michigan, and this is expected to give a healthy stimulus to business in the small towns. Many jewelers from the northern part of the State took advantage of low railroad rates to visit Detroit jobbers.

Frank Mathauer, of Mathauer & Koester, has returned from a trip to the Copper Country.

The insurance on the jewelry stock of Jeweler W. A. Gregory, Bay City, Mich., has been adjusted, and he is holding a sale preparatory to putting in a new stock.

A. W. Hazen, Michigan representative of the Kennedy Optical Co., was recently taken to Des Moines, Ia., suffering from appendicitis. J. S. Caie has taken his place.

John Stuetzer, Sebewaing, Mich.; Wm. Gribin, Carsonville, Mich., and W. F. Hittig, Dundee, Mich., visited the trade last week. Mr. Gribin had an exhibit at the State fair.

John Hellerich, 39 Michigan Ave., who has been the victim of robbers several times and who keeps a bloodhound in the store at night, sent in a hurry call for help to the police one night last week. Three fellows threatened to blow his head off if he did not hand over his diamonds and money at once. They left before officers arrived.

Sterling Effects in Plate

### Trade in Fish Scales Used in the Manufacture of Imitation Pearls.

REPORTS from St Petersburg, Russia, say the discovery of a method for preserving the brilliancy of fish scales has led to their export from Rostov-on-Don for several years. The scales are used for the making of artificial pearls and similar articles. The trade is growing and several Russian cities have begun to export.

The fish that yield these scales are very small. It is said that 72 pounds of fish will yield 14 ounces of scales, which are powdered with some preservative, packed in 1-pound tins, hermetically sealed, and sent by parcels post to Berlin, Stettin and Paris.

### Artistic Novelties in Domestic Clocks.

CLOCKS in new and artistic cases, in the Empire, cabinet and other styles, are shown in unusual variety at the salesrooms of the Seth Thomas Clock Co., 51 Maiden Lane, New York. The Fall catalogue just sent out has three times as many new designs as in any similar book issued by the company at this time of the year, the assortment being supplementary to those mentioned in the regular Spring catalogue. The manufacturers have introduced numerous ornamental effects in art noveau and classical forms. In elaborating this side of the work to a greater extent than ever before, the company is clearly inviting some of the trade which now goes abroad, and the result of this effort will be watched with interest, as well as a degree of confidence, based on the previous success of this concern in whatever it has undertaken. There is a wide variety in sets, comprising clocks with vases, candelabra and side ornaments. The figures are artistically posed and modeled, representing mythological and romantic subjects. One of the clocks, which promises to meet with much favor, is surmounted by a head of a maiden in old-fashioned bonnet tied under the chin. Full-length figures of maids in various poses are used, one resting her head reflectively above the clock, another gazing beyond the hours to the butterflies on a climbing vine, the third supporting the dial on her shoulders, and there are also various other conceits. In the dials themselves some novel effects are introduced. In the cabinet clocks are new patterns in mahogany and inlaid marqueterie have been added to those previously shown by the company. Many rich-looking patterns in Empire clocks are shown, including Syrian bronzes and gold-plated cases. There are about 20 styles in the new line denominated, "metal novelties," these cases being substantially plated and overlaid with transparent lacquer. An assortment of moderate-priced clocks in adamantine finish with metallic ornaments is also offered. The catalogue gives to the trade the particulars as to the height, weight, style of finish and details as to the movements, bell and gongs, so that the jeweler may see at a glance exactly what is offered, and may make his selections to advantage.

J. B. O. Fowler, Dalton, Ga., is now located in his new territory in Chattanooga, Tenn.

ISSUE OF SEPT. 5, 1905. (CONTINUED)

**798,749.** COVERED PEN, PENCIL, ETC. ALBERT E. ROSE, Brooklyn, N. Y. Filed Dec. 16, 1904. Serial No. 237,050.

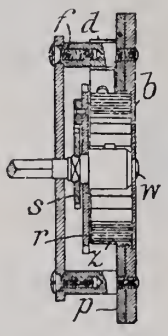
As a new article of manufacture, an article of

the class described over which is fitted a length of a tube of woven or knitted textile fabric, said tube being of substantially the same diameter as that of the article.

**798,879.** HINGE. OWEN CORRIGAN, Attleboro Falls, Mass. Filed May 26, 1905. Serial No. 262,387.

A hinge of the type described comprising a pair

of members each consisting of a body portion and a projecting ear, one of said ears being hollow for the reception of the other, and a pintle pivotally connecting the hinge members.



## BRITISH PATENTS.

ISSUE OF AUG. 30, 1905.

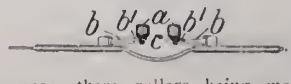
(ABRIDGMENTS OF SPECIFICATIONS, 1904, FROM *The Illustrated Official Journal.*)

**10,348.** CLOCKS AND WATCHES. F. FALLER, Gutenbach-Schwarzwald, Germany. May 5.

*Framework; Mainsprings.*—The mainspring *z*, having the outer end *d* looped on a post *f*, is

coiled within a hole in the pillar plate *p*, the arbor *w* being pivoted in a bridge *b*.

*Barrel Ratchets.*—The ratchet-wheel *s*, riveted on a squared part of the arbor, holds the first wheel *r* on a neck of the same.



**10,357.** EYEGLASSES. L. COURLANDER, Croydon, Surrey. May 5.

Pince-nez are provided with small rollers to

FIG. 1.

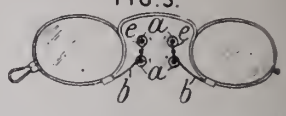


FIG. 2.

grip the nose, these rollers being mounted on small spindles to rotate as the glasses are put on. Rotation in the opposite direction is prevented by ratchet-wheels and spring detents. The rollers are made of india rubber, cork, or other non-slipping material. Figs. 1 and 2 show each roller

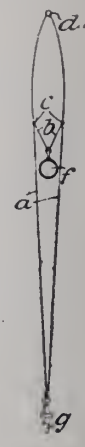

FIG. 5.

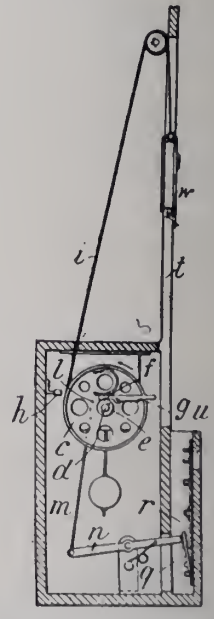
*a* mounted on a spring *b*, a portion *b'* of which acts as a detent to the ratchet-wheel *c*. Fig. 5 shows two pairs of rollers *a* carried by arms pivoted to the springs *b*.

**10,585.** NECKLACES; CHAINS. J. H. ELLIOTT, Cathays, Cardiff, Glamorgan, Wales. May 9.



The necklet watch chain or muff chain *a* is fastened at the top by the spring split-ring *d* and is provided, a short way from the top, with the rings *c*, to which are attached the short chains *b* for carrying a pendant *f*. The watch or muff is attached to the hook *g*. According to the pro-

visional specification, the chains *b* may carry a watch, muff, purse, or other article.

**10,739.** CLOCKS. H. V. KNIGHT, Mitcheldean, Gloucestershire. May 10.

*Chronoscopes; Clock Cases; Clocks With Moving Figures; Motionwork; Dials.*—A figure or weight *w* sliding up and down a slot *t* indicates the min-

utes on a vertical scale, the hour divisions being seen on a disk *r* through the perforation *u*. The figure is connected by a cord *i* to a drum *c* loose on the arbor *d* of the center pinion. A wheel *l* is fixed to the drum and, by a cord *m* and pivoted lever *n*, operates a push-piece *q*. A detent *g* fixed to the drum *c* is kept by a spring in contact with a stop *f* on a wheel *e* coupled to the arbor *d*, and, as the drum moves with the great wheel through one revolution in the direction of

...rrow, the figure *w* moves up to the top of ...cale. The detent *g* then strikes against the ...*h* and is set free with the drum to turn in the ...ite direction as the figure falls by its weight, the stop *f* again engages the detent *g*. The ...piece *a* is at the same time forced against one ...e pins on the hour disk *r*, pushing the disk ...gh one-twelfth of a revolution.

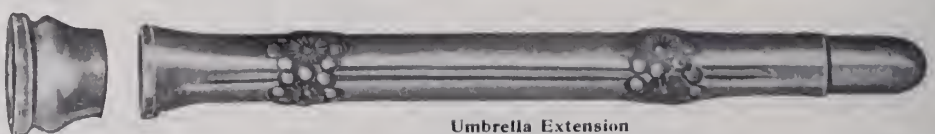
## Original Design for a Tiara.



THROUGH the courtesy of H. Pollard, Philadelphia, THE CIRCULAR-WEEKLY is enabled to present to its readers this week an original design for a diamond tiara in feather effect. The tiara is formed of feather scrolls and on the main rib at intervals has springs hung in gold boxes in a way that causes the feathers to spring back and forth with a slight motion. This idea, as well as the entire outline of the design, is wholly original, and will no doubt produce a rather pleasing effect. Under the top lobe, extending from the center of the tiara, is a spray, which is made so that it can be separated from the rest of the piece and used with a combination joint stem and catch.

FEATHERWORK TIARA DESIGNED BY H. POLLARD.

Mr. Pollard, the originator of the above is a designer at 101 Chestnut St., Philadelphia, Pa. Before starting in business he served seven years at practical work in the jewelry trade, two years with John Lehman, and five years with Paul H. Rosenthal.

## National Law Popular.

### Jewelers in All Sections Favor Measure Against False Marking of Gold and Silver.

In a recent issue, the Toledo *Courier-Journal*, recognized as the society paper of Toledo, devoted practically an entire column in calling attention to the movement begun by THE CIRCULAR-WEEKLY to secure national legislation covering the improper marking of gold and silver articles. Aside from printing a large portion of the proposed law, as outlined by THE CIRCULAR-WEEKLY, the article contained the following introduction:

"Toledo jewelers are shortly to be asked to lend their assistance in securing the passage of a national law which will forbid interstate commerce in gold and silver improperly marked. The act would also prevent the bringing into the United States and the carrying from one State, Territory, district or possession of the United States into any other State, Territory, district or possession of the United States, of articles constructed in whole or in part of gold or silver or an alloy of either of said metals, which articles are spuriously marked or stamped in respect to the fineness of the gold or silver or alloy.

"Toledo jewelers who were questioned by the *Courier-Journal* yesterday are highly in favor of the proposed law, and will do all in their power to secure its passage. There have been several efforts to secure the passage of some such law, but previous efforts have not been properly handled and they have ended in failure, although some States now have some such laws. The present attempt is being pushed by THE JEWELERS' CIRCULAR-WEEKLY, one of the largest publications of the kind in the country, and it is lining up jewelers in all parts of the United States to assist in every way possible.

"While it is stated that the law will work harm to some of the dealers in the cheaper grades of jewelry, it will be a benefit to the public at large. It will require all articles to be properly marked and, for example, it will not be possible to stamp 'sterling' on a piece of metal which has no more silver about it than possibly a thin plating. Similar laws are in effect in the majority of the countries in Europe and it is strictly enforced there. All articles of jewelry going through government mails are receiving the proper stamp.

COMMENTS FROM NEW HAVEN.

NEW HAVEN, Conn., Sept. 14.—The general opinion among the leading jewelry houses in New Haven is strongly favorable to the proposed law. It was the prevalent feeling among those interviewed that it was a matter for national control and that the movement placing the interstate trade under Federal law was a decided step in advance. Some of the opinions gathered from the most prominent members of the trade in this city are in substance as follows:

Gen. George H. Ford, president of the Ford Co.: "I have not carefully read the draft of the proposed law, but I am in favor of any legislation that will protect the honest bank president and punish the dishonest one. I am in favor of any law that refers to gold and silver that will protect the honest dealer and will punish the offender. There is no reason why a national law should not cover counterfeits in gold and silver to protect the honest dealer, and punish the counterfeiter the same as the offender who distributes spurious bills and spurious coin as genuine."

C. S. Monson, Jr., of C. S. Monson, Jr., & Co.: "Certainly we are in favor of it. Do you expect to find any jeweler who is not? It is a good measure and a step in the right direction. It has our hearty support."

John Gunde, of Wells & Gunde: "I think it is a good measure and that it should be enacted. The National Government should take charge of such matters. State action is not sufficient. I am heartily in support of the movement."

Mr. Silverthau, of Silverthau & Sons: "We think it is a good thing and have no objection to the use of our name in support of the movement."

J. H. G. Durant: "We have a State law here in Connecticut which protects us, but I am heartily in favor of a national law as an aid to honest business. This proposed law is a matter of honest business and therefore has our hearty support."

John B. Kirby, of S. H. Kirby & Son: "It is a good thing and ought to be pushed. We are in favor of the movement."

Samuel Fox, of Glauskin & Fox: "That is what we want them to do. I am in favor of the movement."

LETTERS FROM SUBSCRIBERS.

KANSAS CITY, MO., Sept. 4, 1905.

*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:

Your Kansas City representative has brought to our attention your very commendable efforts to secure the passage of a bill through our National Congress at Washington, D. C., to forbid the interstate commerce on articles in gold and silver spuriously marked. We heartily indorse your course and feel that honest competition and higher business ethics will have secured another victory. If there is anything further that we can do to aid you in this matter, kindly command us.

Yours truly,

EDWARDS & SLOANE JEWELRY CO.,
By N. R. F.

COLUMBUS, O., July 27, 1905.

*Editor of* THE JEWELERS' CIRCULAR WEEKLY:

We heartily recommend the passage of the bill to forbid interstate commerce in gold and silver improperly marked. In our estimation it is a necessity to protect the legitimate dealer as well as the public in general. Very truly,

GOODMAN BROS.

ROCHESTER, N. Y., Aug. 5, 1905.

*Editor of* THE JEWELERS' CIRCULAR WEEKLY:

It was with much pleasure and interest that I read in a recent issue of THE CIRCULAR-WEEKLY the bill forbidding interstate commerce in gold and silverware spuriously marked, which THE CIRCULAR WEEKLY proposes to introduce into Congress. I have always believed in the solidarity and equality of commercial as well as other laws, which are important for the welfare of society, for the whole United States. State rights seem to me as a relic of semi-civilized countries. The standard of value of currency in which the intrinsic value is based upon the metal is uniform all over the country, and there is no reason why the fineness of the finished product in gold and silverware should not be worth as much to the citizen of one State as to a citizen of another. I certainly approve of the bill and hope that THE CIRCULAR-WEEKLY will succeed in introducing it into Congress. Yours truly, PHILIP PRESENT.

FURTHER EXPRESSIONS FROM TORONTO, ONT.

Edmond Scheuer: "I am strongly in favor of the proposed law. It ought to be made more drastic if possible. It should be made a misdemeanor to fraudulently stamp any goods. Owing to the effectiveness of our Canadian law such practices are of infrequent occurrence here. I feel sure that the trade generally will favor the legislation promoted by THE CIRCULAR-WEEKLY."

F. T. Proctor: "The question is not one which affects the legitimate trade to any extent. It is the public who are more particularly interested and they ought to be protected against frauds of the character indicated in the bill. So far as I can see I think the proposed measure is a step in the right direction and would like to see it become law."

APPROVAL FROM LOUISVILLE, KY.

Geo. W. Wolf, of Geo. Wolf & Co.: "It would save the retail merchant a great deal of trouble and annoyance."

Benj. Rogers, of Rogers & Krull: "I think every article should assay just what it is marked, the fair minded man will never complain; it will only be the rascal who is hurt by a such a bill."

---

Charles J. Maigenheimer, Jordan, Minn., died recently as the result of a self-inflicted bullet wound. Mr. Maigenheimer had been ill for some time and suffered from dementia which led to a fear that enemies were pursuing him. He kept a revolver at hand to drive off intruders, and finally, in a fury at the attempt of an imaginary intruder to enter, he seized the revolver and fired a bullet into his head.

## The Atmospheric Clock of der Bouvet.

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from the *Revue Internationale de l'Horlogerie.*)

In a clock which der Valentine Bouvet has constructed about a year ago, a motive power is used, which is produced by the changes in the temperature of the atmosphere. This clock belongs to a class

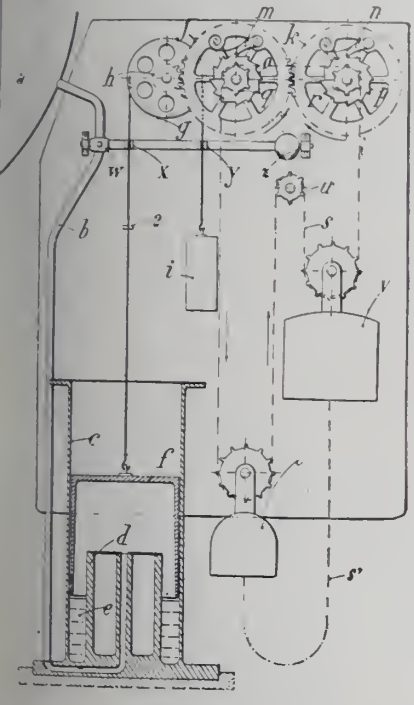

FIG. 1.

which might be named "pseudo perpetual." Of these, we will mention in particular one to which Moulucla refers, in his edition of "L'Ozanam Mathematical Recreations." This is a pendulum clock, located in the Painters' Academy of Paris, which does not require to be re-wound, and whose ingenious inventor has used the changes in the atmospheric air pressure for the purpose. The clock of the Painters' Academy of Paris is, therefore, the parent of Bouvet's clock.

With this introduction, we will explain the construction of the present clock, in accordance with the description and design of Mr. Bouvet's patent: a is a closed air receiver, which may be located at any distance from the clock with which it is connected by a tube b, which is fitted with a faucet w, by means of which it may be opened or closed as required, and which tube has its lower end under a cylindrical bell-shaped plunger. This plunger leads into another cylinder c, which incloses in its lower interior a liquid, intended to prevent the communication of the inner air with the motor air. According as the temperature is raised or lowered, the air in the receiver is expanded or contracted, and the plunger, f, rises or descends in its turn, causing the wheel, g, and the connecting pinion, h, to revolve in either the one or the other direction. This pinion is geared in a wheel, j, which is geared in a

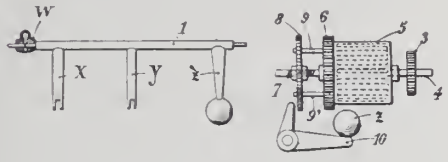

FIG. 2.

similar wheel, k. Each one of these two wheels carries clicks, m and n, each of which rests upon the teeth of one of two ratchet wheels, o and p. The inclining teeth of these two ratchet wheels incline in the same direction, and each one is attached to a pinion, q and r, over which passes the chain s s', carrying the weight, v, and the counterweight, t. An examination of the illustration will make this clear.

When the air in the receiver is caused to expand by the rising temperature, the plunger is lifted, and while its cord of suspension is made rigid by the counterweight, the wheel, g, and its pinion, h, are set in motion from left to right. In consequence, the wheel j, turns from right to left, and its click, m, drives the ratchet wheel, o, with pinion, q, in the same direction, from right to left, by means of which the weight of v is raised. The movement of the wheel, k, does not prevent the rising of the weight, v, because this motion is in the opposite direction of the wheel, j, from left to right, and the click, n, slips only on the ratchet wheel, p, which is carried along by the pressure of the chain.

When, on the other hand, the temperature falls, the air contracts and the plunger, f, descends. In this case, the wheel, h, turns from right to left, causing the wheel, j, to turn from left to right and k from right to left. It is the click, n, of k, which propels the ratchet wheel, p, and its pinion, r, from right to left, while the ratchet, o, from j, is carried forward by the chain, allowing a click, m,, to slip over its teeth. The weight, v, rises in the same manner as in the preceding case.

As it is necessary to prevent the weight from being wound too high, which would cause the chain to jump over the pinion, u, this system requires the faucet, m, which, when open, permits the air to pass out without acting on the plunger, f. This faucet begins its action as soon as the weight has reached its greatest height, in which case the ball at the end of the lever, z, is raised. The weight, when it redescends, will close the faucet mechanically.

If, in the same way, the plunger, f, rises or falls too much, it acts in the same manner on the faucet, by means of a lifting stud, 2, by the counterweight, i, on the lever, y. The closing of the faucet will be effected by opposite temperature changes.

Fig. 2 represents the application of the Bouvet system to a movement with the mainspring. Here it is pinion 3 which, by means of the ratchet wheels p and o (moving in the same direction), receives the same motion, which is caused by the plunger, f, and which, in this case, sets up the mainspring in barrel 5, the one end of which is attached to the arbor, 4. To prevent the over-winding of the spring, the toothed part, 6, of the barrel is fitted with two pins, 9 9', which enter holes in disk, 8, which can move backward and forward on a screw thread, 7, on the axis, 4. As soon as the spring is completely wound, this disk operates the lever, 10, which, in lifting, z, causes the opening of the faucet, w, and the stoppage of the action of the motor force.

This atmospheric clock is very ingenious, but it has these objections: Its exterior air receiver requires too much room when being placed in ordinary dwellings, and, in addition, its installation will be rather expensive.

## More About Escapements of Clocks and Watches.

(Translated for The Jewelers' Circular-Weekly from the *Almanach de l'Horlogerie.*)

PART II.*

THE dead beat escapement for clocks was invented by Graham, the celebrated English horologist, who afterward transformed the mechanism and adapted it to watches, giving to the latter a cylindrical form, and so reducing it as to embrace only a single tooth of the 'scape wheel. This ar-

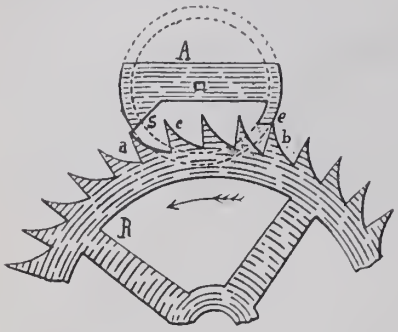

FIG. 1.

rangement then took the name of the cylinder escapement.

If the different half-dead escapements that we have previously described and represented by exact drawings are considered, the remark cannot be avoided that the dead beat escapement had been already half invented. If we examine Fig. 1, representing one of the half-dead escapements in which there is no recoil except on one of the pallets, it will be seen that the form of the lever is similar to the one we have before

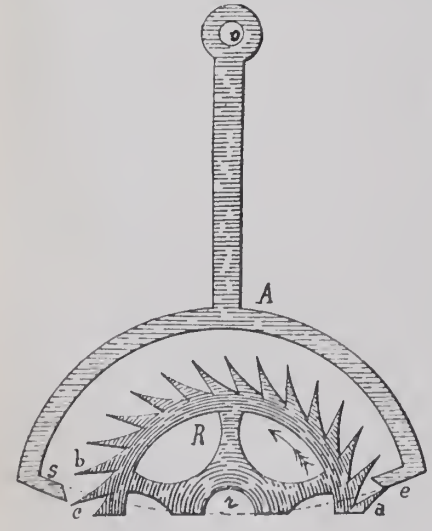

FIG. 2.

described, except that the tooth *b* is arrested at *c* against a locking case drawn from the center of the lever A. On this side the tooth is locked without recoil, and in order to obtain the same result on the other pallet, it would be sufficient to cut the lever at *s*, following the inside circle traced to dotted line. Thus, an escapement would be secured in which the teeth would undergo no recoil during the supplementary vibration, on either of the pallets.

In our view this dead-beat escapement must have been invented before the half-dead escapement, and it will be perceived that the results are not as good as with the recoil escapement. Constructed somewhat at hazard, as recoil escapements were established without much concern as to dimensions, the weight of the pendulum, the extent of the oscillations, etc., the dead-beat escapement was regarded as inferior. It lacked the power of correcting the variations of the motive force, and it was found under these conditions that a moderate recoil was preferable. This led to restoring the recoil on one of the pallets.

It was about 1695 that Graham, by means of intelligent experiments, taking account of the locking faces, the relations of the pallets, the height of the impulse planes, and the length and weight of the pendulum, succeeded in demonstrating that the anchor dead-beat escapement was capable of giving to the rate of a clock a regularity unknown at that time.

Fig. 2 represents a Graham anchor escapement. The two locking faces, *c*, *s*, against which the teeth of the wheel are

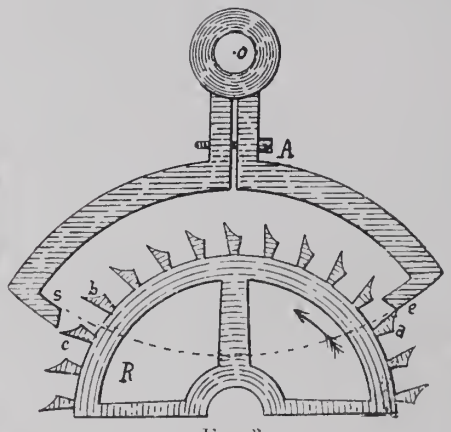

FIG. 3.

arrested, are concentric with the pivoting point of the lever; there is therefore no recoil during the locking.

It will be seen that these lockings were traced according to circle, *s*, *r*, *e*, passing through the center of the 'scape wheel; they were afterward arranged tangentially, the points or lines from the center of the lever being tangent to the circumference of the wheel (Fig. 3). Traced in this way, the anchor had two unequal arms. They were rendered equal by limiting the impulse planes by two circles described from the pivoting center of the lever.

In this new construction, Fig. 4, the tangential points are between the two circumferences—that is, in the middle of the lifting planes. The last three figures show that the two pieces constituting the Graham anchor escapement might be varied in form, their working remaining the same. We see in these three designs a tooth, *a*, locked on the entrance pallet *c*, the tooth *c* escaping from the exit pallet *s*; the locking arcs, *c*, *s*, are drawn from the pivoting point *o* of the lever. The teeth remain therefore immovable during the supplementary vibration and undergo no recoil. On the return of the vibration, the tooth *a* engages on the inclined plane and gives an impulse to the lever; it escapes, and the tooth *b* then becomes locked on the exit pallet *s*, producing an impulse in the opposite direction.

The number of teeth of the 'scape whe may vary, but are generally fixed at 3 The anchor may embrace between its palle a less or greater number of teeth. Th number ought, however, to bear a certa relation with the distance of the center The locking arcs are invariably drawn fro the pivoting center of the anchor Th width of the pallets is determined by t separation of the teeth of the wheel, a the inclination of the lifting planes is reg lated by the angle of vibration desired du ing the impulsion.

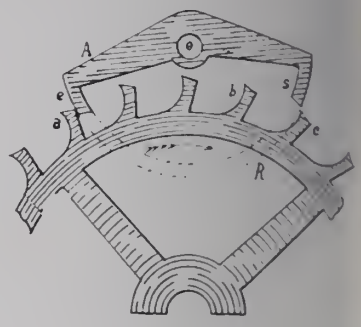

FIG. 4.

Aside from these three funda n points, the others are arbitrary. The chor may embrace any number of teet , a it may have any form. Figs. 2, 3 and 4 e hibit wheels with pointed teeth, work with pallets, of which the width is eq al half the space included between tw ten of teeth, less the necessary drop.

In large clocks the sharp teet f t brass wheels are worn rapidly; so, in e larged form has been adapted, making t bear a part of the impulse plane The capement represented in Fig 4 has its ing planes, half on the teeth of the w and half on the pallets of the anchor

In Fig. 5 we have an escapement draw on the principle of equidistant pallets—t is, having the middle of the incl d pla at equal distance from the cen r of

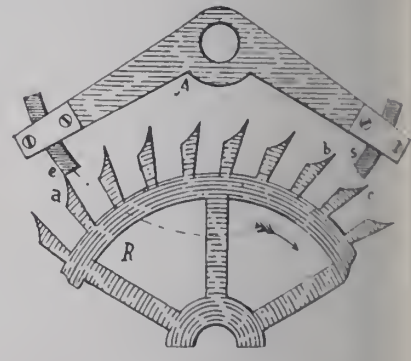

FIG. 5.

lever. The construction of this pa genious and practical. The mobility of two pallets on the two arms allow of taining without difficulty faultless wo This is a construction much appreciated our own day in the manufacture of che clocks.

Fig. 6 represents an escapement, in wh the pallets terminate in points, the impul planes being carried entirely by the teet the wheel. This arrangement, of which t general design is the same as in the pr ceding, is but little employed, because t

extremity of the pallets is rapidly destroyed by the repeated impact of the teeth of the wheel.

The form represented in Fig. 7 is given simply to show certain varieties of construction that can be obtained, while observing the fundamental principles which we have explained. The attempt has been made, by giving a certain curve, concave or convex, to the lifting plane, to obtain a gain in the force of the impulsion, as well as a slighter impact on the lockings, but the experiments have not yielded a satisfactory result.

In Fig. 8 is delineated an escapement which has a lever with movable pallets like those seen in Fig. 5. Here, the form of the teeth is peculiar, the design being to obtain

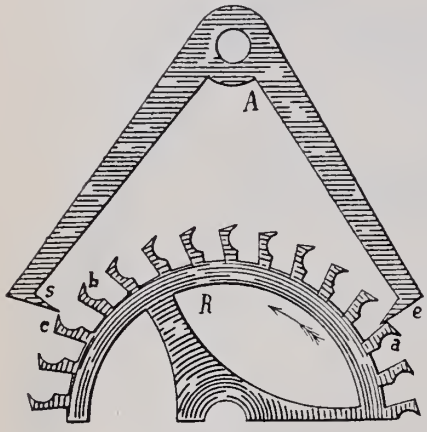

Fig. 6.

stronger and shorter teeth, if possible, while allowing to the pallets a space sufficient for penetration.

In Fig. 9 the pallets of the lever, also movable, are carried on two arms, of which one may regulate the separation with the aid of a differential screw B. This escapement was constructed by Vulliany, the able Swiss horologist.

The construction shown in Fig. 10 is the same as a recoil escapement which we have shown before. The teeth work with two pallets, *e, s,* are fixed vertically in the body of the lever A. The locking faces therefore consist of straight lines. A certain recoil is produced, which in ordinary clocks having a light pendulum can only have a good influence. The pallets are mounted on *boushons,* which may be turned at will for the regulation of the functions.

At first sight the mechanism seen in Fig. 11 gives a remainder of the cylinder escapement. The pallets consist of a cylindrical shell, cut at *e* and at *s,* and forming two lips, against which the teeth of the wheel work—teeth which carry the whole of the lifting planes. We have so far had in view

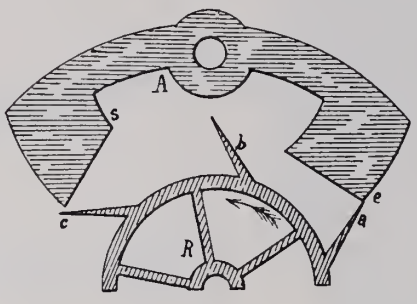

Fig. 7.

the Graham anchor escapement, with lockings traced from the center of the lever. Here, the escapement piece has been modified, so that it can be formed on the lathe. The working is still the same. A tooth *c* has escaped from the entrance pallet *e,* the tooth *a* has become locked on the exit pallet *s* and is ready to furnish an impulse on the return of the vibration. The lever em-

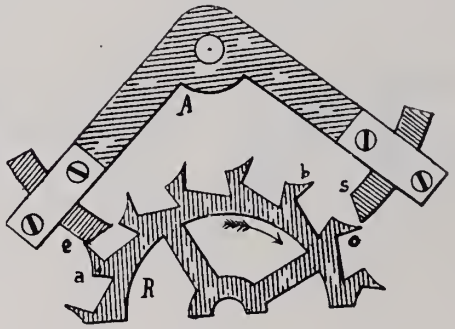

Fig. 8.

braces only three teeth; its pivoting center is necessarily very near the outer circumference of the wheel. It was necessary to cut the arbor V for the passage of the teeth.

This escapement was adapted by the horologist, H. Robert, to clocks giving the half second. Its author denominated it *"échappement identique,"* by which he probably meant "interchangeable," the levers being such as to be readily formed on the lathe under conditions of absolute exactness.

In all the escapements of which we have spoken the point on which the lever

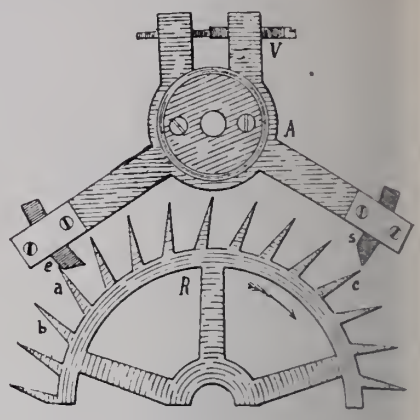

Fig. 9.

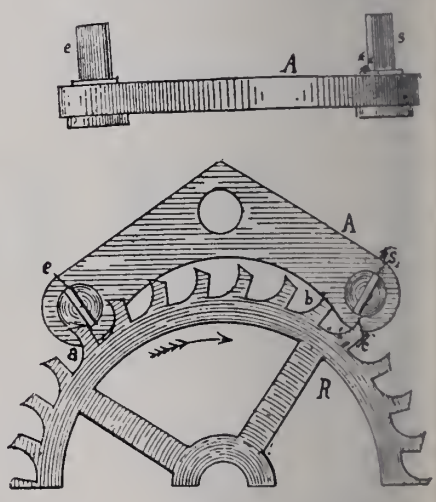
pivots is above that of the wheel, and the lever staff carries the fork which communicates the movement to the pendulum. In Fig. 12, in which the axis of the lever is below that of the wheel, the lever A and the pendulum P form but a single piece. About



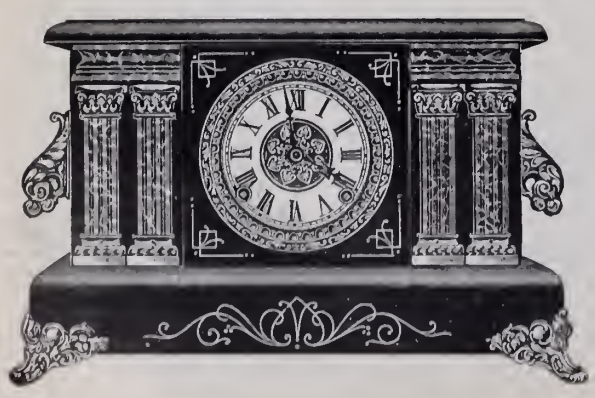


Fig. 10.

the year 1820, a class of clocks was constructed having a 'scape wheel of cardboard and a lever of horn whose arrangement was that represented in Fig. 12.

# Some New Cases for the

# BETSY ROSS

## Complete O size Watch

Previous announcements have given little suggestion of the casing of the Betsy Ross Complete O size Watch. There was so much to say about the quality of the movement and the value of the combination with the Jas. Boss 20 year case that perhaps some dealers think we use but few styles of cases for it. Here are four of the newest and prettiest Boss cases representative of the large line from which you are free to choose. All *recherché*—in style, effect, finish—from the satiny plain case to the extreme of elaboration. Combined with that excellent 7 jewel, nickel, pendant-set movement, it should be possible to interest the greater number of your customers to the point of sale. This is the experience of hundreds of jewelers, whose repeat orders are pressing the factory toward the limit of production. If you haven't your share yet, don't delay. Consult your jobber to-day—he has the Betsy Ross in a variety of cases.

*We have just prepared a very interesting folder—in colors—illustrating the Betsy Ross Watch and telling how and where Betsy Ross made the first American flag. We print your name on them and furnish free as many as you can use. Send your business card.*

TARRYTOWN, N. Y., Sept. 13, 1905.

*Editor* THE JEWELERS' CIRCULAR-WEEKLY

Would you kindly give me some informa tion about the Black Forest clockmakers (1) When did they first become interested

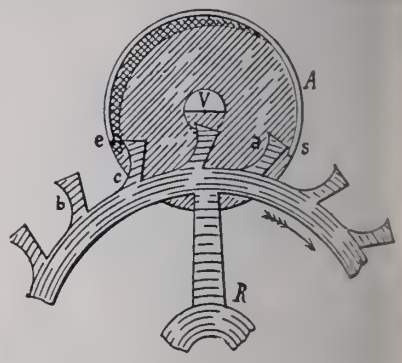

FIG. 11.

*(See page 94 for text.)*

in horology. (2) What effect had the in troduction of machinery upon this industry

C. D. L.

As is known, the Black Forest is one o the centers of clock and watch manufac turing in Germany. This industry has as sumed very great proportions.

It was in 1685 that the people of the Black Forest became interested in horology their wooden clocks, comparatively cheap for the period, soon acquired renown The demand for a long period was domestic bringing comparative pecuniary ease to those engaged in it, but at the commencement o the 19th century machines made their ap pearance. The shop gradually became the working place of the trade, and was able to produce merchandise more regularly and at lower prices. It was not, however, until 1870 that the small producers had to give place to the large factories. This radical change was due particularly to the introduction of American machines.

It was the Junghans factory of Schramberg which first inaugurated the new processes of production. This establishment now has an output of 8,900 pieces per day and employs 2,500 artisans. Afterward came the Hamburg-Amerikanische Uhrenfabrik of Schramberg, which now makes daily 300 or 400 timepieces.

This industry has been especially devel-

**SUBJECT:**

## How and Under What Conditions Should Auction Sales be Conducted?

(*Continued from issue of Sept.* 13, 1905.)

MANY sales are conducted at which large quantities of cheap goods are bought or received on memorandum and distributed among the other goods, with the object of realizing as much as possible on the sale. I do not intend to say very much in connection with this matter as the majority of auctioneers are thoroughly posted on this subject. They make arrangements with the business man, who can decide for himself what he wishes to do. This may be all right when a business man retires from the jewelry business entirely, but I do not think it the proper way to conduct a sale under all conditions.

The conditions which warrant the conducting of an auction sale are various. (1) When the jeweler is retiring from business entirely; (2) when retiring from the jewelry business to enter another line of business; (3) when retiring from business owing to incompetency; (4) when retiring from business on account of old age; (5) when changing the business location from one town to another; (6) when changing the business location from one store-room to another.

The above-mentioned conditions, I think, are the only proper conditions under which auction sales should be conducted. The first four mentioned conditions are practically under the one heading of retiring from the jewelry business entirely, and the sales are conducted nearly in the same manner, namely, until the entire stock is disposed of.

The fifth and sixth conditions are quite different, as the business man intends to remain in the jewelry business, only changing his location, which gives him this chance of running an auction sale successfully, inasmuch as he is desirous of ridding himself of his old stock in order to make room for the fresh stock to be installed in his new place of business, where he intends to show to the public a better and more up-to-date line. The jeweler's motive in running a sale under these conditions is to dispose of old unsalable stock, keeping the best of the stock for his new place of business, thus giving himself a chance to use the capital obtained in this way for improving his establishment and buying new and up to-date stock. But great care must be exercised in running a sale of this kind lest one's future prospects be injured, for the majority of one's patrons may be very sensitive in this respect, and hence the sale must be conducted very honestly, so as not to give customers the slightest chance to think that they have been imposed upon.

One condition particularly under which I think an auction sale should not be conducted, and which in the majority of cases would do more harm than good to the jeweler's business, is the conducting of such a sale with the object of acquiring ready cash to meet some obligation or for any other similar purpose during a time when business is at a standstill and remaining at the same place of business. If the jeweler is at any time in a position of this kind there are hundreds of other ways and means of acquiring and meeting these obligations without injuring his future business in any way.

A special sale, properly conducted, with certain inducements, is sure to bring results. Compare the expense of running an auction sale at such a time, the amount of sales made and prices received and you will see that you can hold a special sale with far greater inducements and with better results, and you will not be running any risk whatever of doing harm to your future business.

An auction sale conducted systematically and under the proper conditions is sure to bring to the jeweler the desired results without being detrimental to his business. But no undertaking, no matter what it may be, will be wholly successful without combining system with the undertaking.

H. I. K.

[THE END.]

C. E. Marvin, Howell, Mich., has admitted a partner, and the firm style is now Marvin & Finley.

John Rosendahl, Mabel, Minn., recently purchased the stock of J. C. Hub & Co., Mapleton, Minn. Mr. Rosendahl will move to the latter place this month.

### A Nerve-racking Window Attraction.

THE visitor from Massachusetts points scornfully at an electric buzzer in the window of a New York shop, recently remarked a writer in the New York *Sun*.

"What a fiendish contrivance! How much trade do you suppose that thing draws in the course of a year? No wonder you New Yorkers are nervous, with such absolutely useless sounds added to the necessary noises of the city streets. We do better in the Bay State.

"In Springfield, the port I hail from, you will notice in many of the stores in Main St. a device for attracting the attention of passers-by to the stock displayed in the windows in a pleasing manner that is calculated to draw purchasers, not repel them as these window buzzers do.

"To the center of an electric fan long streamers of ribbon are fastened, sometimes all white, sometimes in tasteful combinations of colors. When the fan revolves these streamers float out over the goods in the window, fluttering in the swift current of air, and waving in graceful, ever changing hues. The effect is one of coolness; and stopping a moment to enjoy it on a hot day one is much more likely to feel drawn to enter and buy than if a wicked little buzzer mocked at his tired nerves.

### Buying on the Memorandum Plan.

"THE dealers who wait until the hot days to order goods by the 'mem' plan are going to get left this year," said a Kansas City, Mo., jobber, recently. "These dealers won't buy of travelers, but depend on the good nature of jobbers to help them out when the rush comes.

"The 'mem.' plan is all right for high priced goods, as they are often beyond the reach of retailers in small towns, but the men who order stocks in a hurry and return what is left after dallying with them for two weeks will be taught a deserved lesson.

"This consignment business is wrong. It is wrong all down the line. I repeat, the dealer who doesn't buy early is going to get left."

No man can run a good paper in a poor town. Are you helping to make your local paper a good one?

In considering the use of a new medium the advertiser should insist on an answer to the question, "Who will it reach that I am not already reaching?"—*Advertising World.*

# Storekeeping Department.

## inal Thoughts for the Enterprising Jeweler.

WELERS can often obtain ideas from the advertising of dealers in other s of business, which are even more ap- riate for their own line, and should ys keep their eyes open for such op- unities. Some will say that unless they originate their own advertising they do care to advertise. The people who e this claim to originality, however, do advertise a great deal. It is the thing attracts you which is likely to at- t another. The fact that you take up idea of some other clever man is a pliment to him and an advantage to rself, and his idea may suggest other s to you which are even more clever the original, but which would never come to you if you had not first seen

racket store proprietor of Valley City, Dak., recently used an idea which should gest many good things to jewelers. re has been a great deal of rain in rth Dakota of late and in the store's ertisement one day appeared the follow- "We have often heard people say wished they had something laid away a rainy day. Won't a good umbrella be opriate?"

le appeals to the natural instinct of nine of 10 people when he makes that re- k about laying aside something for a y day. That is an appeal which creeps the organism of almost every one. Some entirely unable to save, but they wish could, and these people are usually spenders. That is the reason they are le to lay anything by. The umbrella will appeal to these people. There are those who want to lay something by the future and, feeling their inability to e enough to amount to anything, a slow cess, they buy stock in mines, oil wells, what are ordinarily termed "long shot" stments, taking the chance with the e that a few dollars will provide that y day nest egg.

little thought along this line will sug- many ways of appealing to this class. umbrella is not the best thing the jew- has to offer, but I would not despise umbrella suggestion, by any means. A d window card would be desirable on a y day. There will not be many on streets, but those who are, are not ng to come into your store unless you e something that will pull them in. A d with the above idea well worded will ce many a man think for a while on a y day; and if he does not come in and a good umbrella, he is apt to figure on ing a good one, and does so the first e he has money enough, feeling that it be something that will last him, in ference to the $1.00 umbrella he has ght on a rainy day, because he was ght without one.

he jeweler may advertise diamonds on "ve for a rainy day" plan. He has ny good talks to make along that line, ticularly when he can cite the steady ad- ce in the price of diamonds. This will appeal to the masses, especially when the jeweler is conducting an instalment business, and diamonds can be bought on easy payments. This is indeed becoming an instalment age and a great deal of business is done that way. Again, there are others, including the best business men, who have plenty of money. These, too, are inclined to invest in something for a rainy day and diamonds appeal to them.

There are many things in the stock of the average jewelry store which can appropriately be mentioned in connection with a "save for a rainy day" advertisement, as well as umbrellas, and if you will think along this line for a while you will find that you can fix up some ideas of your own which are clever enough to bring in the customers, and that is what you are advertising for, either in the show window or the newspaper. F. A. P.

## The Less Credit the Better.

"I BELIEVE," said a jeweler, recently, "that it were better if bills of sale and note alike were not collectible at law. Such a state would make credit impossible, and would compel us all to appear just what we really are; and while then some of us would not seem so prominent, we would certainly be less troubled about what we owed to others, or about what others owed to us.

"At any rate, it is much safer to wait for customers to ask the dealer for credit than for the dealer to make an offer of credit. I myself have been in business in this little town during the past 15 years, and have not offered credit to any one (all sales on account having been at the initiative of the purchaser). The accumulated ledger balances now outstanding are equal in sum total to less than ordinary two weeks' business transactions. I carry a larger stock and get more repair work than any of my competitors."

## A Representative Retail Jewelry Establishment of Meadville, Pa.

THE town of Meadville, Pa., has a population of over 10,000 and about half a dozen jewelers, among the latter being F. E. Van Patton, whose establishment is illustrated below. The store is situated at the corner of the two principal thoroughfares in Meadville, and has a depth of 51 feet and a width of 21 feet.

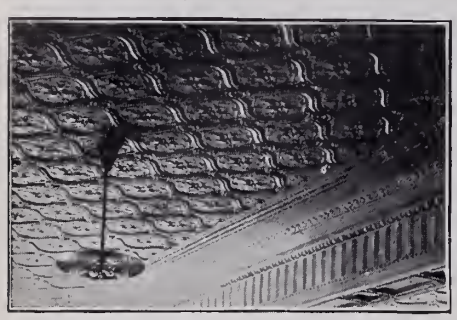
The fixtures and show cases are of birch, with a mahogany finish. The beauty of these cases is greatly enhanced by the fact that the glass is of the finest French plate. The floor is made of Mosaic tiles, while the ceiling, which is richly ornamented with conventional designs in relief, is of steel.

INTERIOR VIEW OF THE STORE OF E. VAN PATTON, MEADVILLE, PA.

The back of the show window is adorned with a plate glass mirror which extends all the way across. The store is well lighted by electricity and heated by means of natural gas.

An attractively furnished private office is located in the rear of the store. The neat arrangement of the wall cases and show cases, with their generous supply of attractive stock, renders this establishment most pleasing to the eyes of all who enter it.

---



The fellow who doesn't advertise and the girl who sits in the shade all Summer are soon forgotten because the crowd goes where there is something doing.

You shouldn't judge advertising by the returns from one ad. any more than the climate of a country by one rainy day.

A vain ad. writer in control of an appropriation is as costly as three boys on the Fourth of July whose parents have allowed them the family credit.

The trouble with most ad. writers is that they spend too much time studying how to write the ads. and too little finding out why the customer don't buy.

## New York's Greatest Palatial Silverware Establishment.

WHEN the Gorham Mfg Co. formally opened its new building at Fifth Ave. and 36th St., New York, as described in the issue of Sept. 6, the several previous migrations of the company were recalled by many, as these changes have a semi-historical interest, marking as they do, with precision, the steady, up-town movement of New York business houses during the last half century.

In 1859 the Gorham business was carried on in a building in Maiden Lane, owned by the firm. In 1870 the company had moved its chief establishment to 1 and 3 Bond St., at that time accounted to be well up-town and in the center of the retail jewelry trade. In 1876, a store at 37 Union Sq. was opene and until 1884 this remained the Ne York headquarters.

In 1883 Edward Holbrook, president the company, had formed the idea of hou ing the company in its own building. Pla were prepared, a site selected and what w at that time the very notable building Broadway and 19th St. was commence

EXTERIOR OF THE NEW BUILDING OF THE GORHAM MFG. CO.

In 1884 the company moved in and th it has, as is well-known, remained until removal to Fifth Ave. The conception successful execution of the Broadway b ing as well as the magnificent new e now opened and the extensive factories Providence mark the long period d which the company's fortunes have bee ably controlled by Mr. Holbrook, wh hands are to guide the helm, it is hoped

ected, for many more years during h further progress and additional evements will be recorded.

has already been noted that in no other of the world is there a building of such deur as the new Gorham home devoted usively to the sale of the products of its manufacturing establishment.

he architects, Messrs. McKim, Mead & te, to whom was entrusted the design of the new building, must share the itude which the public will doubtless that from them was demanded no "sky per." Instead of what is nowadays the 1 15 or 20-story building the problem ented to the architects was the effective tment of only eight stories. So skilfully these been handled that the general ression is that of a building of only erate height.

he motive is that of the early Florentine aissance. The lower story, which is of rse the most important feature of the ding is, on the Fifth Ave. front, divided three great bays, the round arches of ch are supported by massive Ionic col- is of polished dark granite, forming a king contrast with the creamy color of limestone in the rest of the building.

n the spandrels between these arches a series of bas-relief sculptures, em- natic of art and industry, carved by An- w O'Connor. The lines of these sculp- es emphasize rather than conflict with the ictural nature of the spaces they so ad- ab'y fill. Over the first story runs a frieze of bronze-work, which like the balconies, serves to accentuate the simplicity of the shaft of plain masonry, which stretches up to the topmost loggia. This frieze was fashioned in the Gorham Co.'s own bronze foundry at Providence. The whole building is finished with a wide and overhanging cornice, decidedly Florentine in character, of ruddy copper picked out with gold. The building stretches 67 feet on Fifth Ave. and 157 feet on 36th St., exclusive of a 17-foot annex on the latter street, used for delivery purposes.

The interior of this building is marked by the same simplicity and elegance as the exterior. Especially is this noticeable in the show rooms, which occupy the first and second stories. The ground floor, comprising some 10,000 square feet of floor space, is devoted to the general purposes of effectively displaying the Gorham goods. Eight columns serve to support the roof, consisting of a series of domes, about 22 feet in diameter, which are most elaborately decorated with allegorical subjects in relief, tinted in a color scheme so low as scarcely to detach them from the delicate background on which they have been modeled.

Around the columns are clustered the dark-hued mahogany show cases, which are also arranged so as to form a succession of alcoves around the walls. Thus the enormous area is practically unobstructed.

The panels and balustrading of the staircase, which runs on the left side of the building to the second floor, as well as the open work grilles, which enclose the numerous elevators, are of wrought bronze fashioned, as in the case of the exterior metal work, in the Gorham ateliers. The second floor, like the first, is devoted to the display of silverware and other goods, but it has also arranged in it several exhibition rooms for the more effective showing of special works of art and collections of artistic wares.

The whole of the third floor is given up to the ecclesiastical department. Special departments, for the Anglican, the Roman and other church wares, are arranged, while the alcove-like annex at the southern end is fitted up as a chapel, whose stained windows like all else of its furnishings were designed and executed by the company.

INTERIOR VIEW OF FIRST FLOOR OF NEW GORHAM BUILDING.

The fourth floor is given up to the wholesale department, ample provision being here made for the out-of-town buyers. The next floor, the fifth, is arranged for administrative purposes with a succession of ample and well-lit offices and a board-room. The remaining floors, the sixth, seventh and eighth, are necessary for the general purposes of he business, such as the disposition of surplus stock and the carrying out of the lighter character of repairs. The engraving studio, the stationery department and the stained-glass ateliers are here. Not the least interesting portion of the building is that to be found below the street-level. It is here that a most elaborate system of vaults and strong-rooms to hold and store silverware, are installed.

## Dynamics of the Ocular Muscles.

By John C. Eberhardt, Dayton, O.

(*Continued from issue of Sept.* 13, 1905.)

THE LAW OF FIXATION.

THE ability to investigate individually the various motor muscles depends entirely upon the fact that the eye involuntarily assumes that angle which will permit the ocular image to be formed upon the macular region, which can readily be verified by causing one eye to fix an object and noting how it will follow the slightest motion. The fact that the retinal surface upon which these images are formed is decidedly concave and that, therefore, the central part of these images will be more clearly defined than the peripheral portion, explains the sensitiveness of the eye in its desire for central fixation.

If the eyes are caused to fix a point of light 20 feet away, both will assume that position of parallelism which will cause both retinal images of this light to fall upon the center of the macula. If now a prism base out be placed before the left eye, it can readily be observed that the right eye continues to fix the light, whereas the left eye will rotate inward until the macula is in line with the deflected rays of light entering through the prism before the eye. This experiment is particularly striking in persons having strong converging power, where a 15° or even 20° prism placed before one eye when fused will show plainly the extreme inward angle assumed by this eye; whereas the right eye will continue to maintain rigidly its original position.

This demonstration can be made still more effective by attaching a retinoscope to a stand the height of the eye and placing it about 30 inches from the patient in such a position that light can be reflected upon the cornea of one eye; a bright spot of light will be seen within the pupillary area. If, now, the prism is placed before the other eye the examiner will notice a spasmodic or trembling movement of the eye under observation, which ceases when the other eye has succeeded in fusing the prism placed before it, the slightest movement of the observed eye showing itself by the changed position of the corneal light reflex referred to, the pupillary area being the guide. This method of observation is also valuable in determining variations in the visual angle and determining the deviating eye, as outlined by Maddox in his invaluable work on "The Ocular Muscles."

It will be desirable for every student by personal experiment to thoroughly satisfy himself upon this principle of fixation, as it is the foundation of the method of muscular calisthenics hereafter outlined. This principle is emphasized because some of our prominent educators still maintain that the converging muscles cannot be individually investigated, for the reason that the innervation to these tendons is simultaneous and that, therefore, convergence is always equally participated in by both interni.

This is true as long as binocular vision is directed upon a given point, when the desire for single vision will cause an involuntary tendency on the part of both eyes to simultaneously fix the object under observation. This is especially true when the eyes are fixed upon objects nearer than 20 feet, when as we know accommodation contributes toward the involuntary act of convergence.

When, however, the eyes fix a point 20 feet away, they are forced to maintain rigidly that position which will permit the rays of light to impinge upon the macula. Should, however, a prism be placed before one eye, causing these rays to strike the retina upon its outward section, double vision would ensue, the desire for single vision resulting in an involuntary inward movement of this eye, thereby moving the macula outward until brought in line with these deflected rays. Whereas, should the uncovered eye endeavor to assist in this effort of fusion, as has been held by some authorities, it would necessitate an inward deviation, which would throw the macula of this eye out of range of these rays of light and make single vision or fusion impossible.

A simple method for demonstrating the fact that the fixing eye maintains its primary position, while the eye receiving the deflected or false image always individually neutralizes this displacement by a reciprocal change of its fixation angle, is as follows: Fix the light at 20 feet with both eyes, now turn the head to the right, still keeping both eyes directed upon the light, then cover the left eye with a card, and upon removing this card a doubled image of the light will be seen, the right image being the true one, it appearing more clearly defined, the other being false and more illy defined, for the reason that it is not reflected upon the central or most sensitive part of the macula. It is this eye which will change its angle so that these reflected rays will fall upon the macula, as shown by the act of fusion.

By rapidly covering and uncovering this eye the movement of the false image can be readily observed, it always being found that the true image remains stationary, because it is formed upon the central m ular region, whereas the false or illy fined image will always be the mova one, because it is not formed upon t portion of the retina composed of the c panion nerve fibers, and will involu a assume that position where such w the case.

Having satisfied ourselves upon this basic principle, we can proceed to the c sideration of the philosophy and va ue ocular physiologic exercise.

STIMULATING SLUGGISH CENTERS.

The optometrist has much in his fa for the reason that he deals with facts not in conjecture, the ophthalmoscope, tinoscope, ophthalmometer and phor me enabling him to obtain tangible evidence existing conditions.

Heretofore in the investigation of ocular muscles, he has been constantly c fronted by perplexing contradictions. cause tendencies, called "phorias," were cepted as conditions, which the analyt student now knows largely lack diagno value, it being as irrational to accept circumstantial evidence thus obtained was the criminal practice of muscle cutt the elimination of which is largely due the insistent and convincing campa waged by the optometrist, which, m than anything else, has educated pu opinion and made this barbaric pract with rare exceptions, a thing of the p

THE RECTI INTERNI.

Aside from the ciliary muscle, no ot members of the ocular muscle group more constantly called upon or more severely taxed than the converging musc and yet in the past all our efforts have b directed toward assisting the accomm tive functions, whereas these faithful overworked tendons have been left to str gle on as best they may. The practitio who will take up the careful and system consideration of the motor muscles in c junction with his refractive analysis, w find it an interesting and grateful adju which will often solve perplexing co tions.

He will also find that the use of pris will be largely limited to advanced pres opie conditions, except for physiologic p poses, where they simply become a me to an end, for, while we know that rational and properly directed use of dumbbell has its value, we would scarc endorse a method which advocated constant carrying of these weights, wh on the other hand, there are times and c ditions which make the use of a crutch sirable, yet we well know that its const

## Optical Department.

must ultimately lead to degeneration some part of the anatomy.

herefore, having ascertained and cor- ed any existing refractive error, and en nature ample time to recover from austed conditions, and finding that vis- conditions continue to be unsatisfac- y, every factor contributing to this func- should be carefully investigated.

We first test the efficiency of the interni. lving the proper refractive correction be- the eye, we place in a trial frame a prism base out before right eye and se patient to fix a point of light 20 feet ay. If this can be fused, the power of prism is gradually increased until the ngest prism is found through which, its base out, single vision can be main- ed, this representing the maximum effi- ncy of the right rectus internus, termed duction. The writer for a number of rs used for this purpose the rotary sm, but found it unsatisfactory, for the son that greater duction could be ob- ned by the use of individual prisms than rotary prism. In exercising the mus- s this difference was even more notice- e, and as the result of an extended ob- vation it is the writer's opinion that the sible effect of the rotary prism does t produce that energetic response of the tor nerve centers which the placing of rious powers with well defined intervals ites. For example, with the rotary prism given muscle will only develop a maxi- mum efficiency of 12°, whereas by placing a 10° prism in trial frame and introducing over this the prism bar containing eight separate prisms from 1° to 8° in strength heretofore described, the muscle can be stimulated until 20° or more can be developed.

Therefore, the use of this prism bar is advocated and will be found efficient and easy of operation, if used in the apparatus having slide herein described. It is surprising how often, even in young persons, particularly after recovery from illness, a marked deficiency in one or the other rectus internus will be discovered, and how quickly it will respond to these enforced calisthenics, whereas existing asthenopia and other reflex nerve disturbances are dissipated through this method.

What is the philosophy of this procedure? The optometrist simply locates definitely the muscle receiving an inadequate innervation, and by systematic, rational and coercive use of the deficient member, excites the relative nerve center, enforces enhanced nerve supply, and through the exhaustion which follows forces an increased blood supply to this part, thereby contributing to the building of additional tissue, dilating the nerve conduits and thus not only augmenting the efficiency of this part, but producing an increased tonicity of the depleted or relaxed centers, and thereby stimulating indirectly the entire nervous system.

In those cases (usually in the female) where trying visual and nerve conditions evidence themselves between the age of 45 and 50, subnormal convergence is a common symptom, and it is here that much good can be accomplished and relief obtained by these ocular calisthenics, it being found that the insufficient interni not only rapidly respond to development, but that physical improvement invariably results therefrom.

*(To be continued.)*

### Decentering of Lenses for Near Work.

As one reviews his success, or more probably perhaps his non-success, with prisms when prescribed for constant wear he readily assumes that the meagre results are not due to any lack of individual knowledge on his part, but to the general versatility of opinion regarding abnormal muscular conditions. However true this may be remains to be seen, but one thing is certain and that is that many bad results are due to improper adjustment of frames. Should a strong plus sphere be decentered out where the muscular condition is perfect it is sure to produce exophoric symptoms.

Geo. C. Savage offers some valuable suggestions on these points. He claims that the ideal position of lenses when there is perfect muscular adjustment of the eyes, is such that the visual axis may cut the optical centers of the lenses, and that the planes of the lenses may be parallel to the equatorial planes of the eyes. When the visual axis cuts the optical centers of the lenses there can be no prismatic effect; and when the plane of the lens is parallel to the

# HAVE You Signed the EYE-FIX Contract?

WE have adopted the Serial Number Price Restriction Plan, and are now sending contracts to all opticians and druggists in the United States. This contract stipulates that EYE-FIX shall not be retailed for less than 50 cents. As the cost to dealers is $3.60 per dozen, you can readily see that the

## Retail Profit is 66⅔ per cent.

The demand for EYE-FIX is steadily increasing, and there is no proprietary article in the market that can be handled with more confidence and satisfaction.

Opticians will find EYE-FIX a valuable aid in preparing the eyes for a proper measurement for glasses. It is an effective tonic and antiseptic—absolutely harmless and non-irritant—and does not dilate the pupil. As a safe and sure cure for eye trouble of every nature, EYE-FIX has no equal. Dealers can recommend it to do all that is claimed for it. **Every package contains a tube of EYE-FIX SALVE, as well as a bottle of liquid.**

*Samples and further particulars will be furnished the trade upon request.*

## The NEW Standard Prisoptometer.

The above illustration shows the Improved Standard Prisoptometer, an invaluable instrument for diagnosing errors of refraction, without which the equipment of any refractionist's office is not complete. The instrument is handsomely finished and can be attached to any table or stand. Illustrated circulars and directions mailed to any one upon application. The instrument can be obtained of any jobber.

## ANNOUNCEMENT.

A handsomely illustrated 32-page *Catalogue of Machinery* is now ready for distribution.

## QUALITY "STANDARD" QUALITY.

It has been in the past, and is now, our aim to increase the quality and style of our goods whenever circumstances warrant rather than to decrease the price, as is commonly the practice. We make special styles and quality for those of our customers who require something other than the regular styles. Our regular goods are the very best in quality and workmanship that can be turned out by skilled workmen and up-to-date machinery.

If you would be convinced, give us a trial order. The quality of our goods is our best advertisement.

**The Standard Opt. Co.,**
Geneva, N. Y., U. S. A.

# Optical Department.

equatorial plane of the eye there can be no cylindrical effect.

(1). If there is orthophoria (perfect balance), presbyopic lenses should be properly centered, that is, they should be so placed that each visual axis will cut the optical center of its lens, when a point of fixation is in the extended median plane of the head.

(2). If there be uncomplicated esophoria both presbyopic lenses should be decentered directly out, and to an equal extent, so that the two visual axis may cut the lenses to the nasal side of their optical centers, thus favoring the weak externi. This can be accomplished equally as well by making the frames wider than is called for by the pupillary distance of patient.

(3). In simple exophoria each presbyopic lens should be decentered directly in and to an equal extent, or what would be the same in effect, the frames should be made narrower than called for by the pupillary distance of patient.

(4). In esophoria complicated only by hyperphoria of one eye and cataphoria of the other, the decentering of presbyopic lenses should be confined to the lens for the hyperphorie eye, and should be down and out, so as to develop a compensating esohypertropia of this eye.

(5). In exophoria complicated with hyperphoria of one eye and cataphoria of the other, the decentering of presbyopic lenses should be confined to the one for the cataphoric eye, and should be in and up.

(6). In hyperphoria of one eye and cataphoria of the other, the decentering should be confined to the lens for the hyperphoric eye and should be directly down.

(7). In double hyperphoria uncomplicated, both lenses should be decentered directly down, and to an equal extent, or the nose bridge should be made higher so that the visual axis cut the lenses above their optical centers.

(8). The maximum vertical prismatic effect should be placed at one degree, certainly not more than two degrees, and the maximum lateral prismatic effect should be placed at two degrees, certainly not more than four degrees. In the greater number of cases the prismatic effect should correct about one half of the manifest error, but in some cases of small vertical error a full correction may be given.

(9). Prisms and decentered lenses interfere often with some of the visual judgments and therefore are objectionable.

The following table gives a fair idea of how much lenses should be decentered:

A + or — 4.00 D. S. decentered 10 mm. will give a 1° prism effect.
A + or — 8.00 D. S. decentered 10 mm. will give a 8 prism effect.
A + or — 2.00 D. S. decentered 10 mm. will give a 2° prism effect.
A + or — 2.00 D. S. decentered 5 mm. will give a 1° prism effect.
A + or — 2.00 D. S. decentered 2½ mm. will give a ½ prism effect.

E. L. R.

---

Philip Dechant, a young jeweler and optician of Middletown, Conn., who was engaged to be married, but whose marriage was prevented by his fiance's parents, last week, attempted suicide by slashing his throat with a razor. It is believed that he will recover.

## The Importance of Noting Pupillary Act

ONE of the most important, but at same time one of the most neglec points in an optometrical examination the action of the pupil under varying li intensities. The optometrist should every effort to differentiate strictly betw the optometrical and medical cases and pupil affords one of the best means.

The insecurity of the ophthalmoscopic pearances is soon realized by the exp enced optometrist or oculist, fundus cha occurring, as a rule, only in adva diseased conditions causing, theref slighter symptoms to be overlooked. n however, the slight symptoms that are n frequently met with by the optometrist asmuch as the severer cases usually their own way to the hospital

The test is simple. The pupil should c tract quickly as a stronger beam of l is thrown into the eye and should d when the intensity of the light is decrea and if this contraction and dilatation d not take place almost simultaneously w the increase and decrease of lignt influe the optometrist should in all cases ass that some abnormal condition, probably thological, exists.

The simplest manner of ascertaining th points is to note whether or not this act takes place where you first throw n light into the eye when you begin w with the hand skiameter (retinosco This part of the examination should ne be omitted.

Some pertinent observations have b made by Tange, who examined the pu in 1,000 patients of different age, sex refractive conditions, and from which drew the following conclusions: (1) T size of the pupil varies greatly in differ individuals. (2) Women have wider pils than men. (3) The physiological s of the pupil decreases with age. (4) T pupil is narrower in hypermetropia than myopia. (5) It decreases with the deg of hypermetropia. (6) It is wider in opes up to the 20th year, than in metropes. (7) In increasing age, the ferences between the physiological wi in various refractive conditions are less cided. Beyond the 40th year, they unimportant. (8) The color of the iris no influence on the size of the pupil

It is believed that the smaller pupil hypermetropia is due to the increased n mal tone of the sphincter muscle, which sults from the more constant use of accommodation. The smaller pupil of age is assumed to be due to a greater we ening of the dilatator muscle than of sphincter.

### Meeting of the New England Association Opticians.

BOSTON, Mass., Sept. 19.—The re monthly meeting of the New England sociation of Opticians was held at Y Hotel, this evening. The principal feat of the meeting was the address of Dr W L. QUESTION No. 1309.—**Removing Lacquer from Silverware.**—*We have often lacquered pieces of silverware from which we are sometimes obliged to remove the lacquer. Please inform us how we can remove the lacquer without injury to the goods.* C. B. & Co.

ANSWER:—Lacquer may be removed from the articles by immersing in lacquer thinner for two or three hours. This dissolves the lacquer and keeps the silver articles clean and in perfect condition. Where there is not enough thinner wood alcohol may be used equally as well. After removing from the thinner or alcohol the article should be rinsed in cold water and then washed in warm soap suds, then rinse in hot water and dry with a soft towel. By using thinner or alcohol for the removal of lacquer the liquid becomes charged with the lacquer, and may be used for thinning lacquer. It should, however, be strained first.

QUESTION No. 1310.—**Broken Glass Vases.**—*How can we repair cut-glass vases whose bases are damaged and partly broken?* E. S. & Co.

ANSWER:—It is best to cut off the base at the neck or smallest point and then have a silver plated stand made with a socket so that the glass vase will fit in this well. It may be secured by means of plaster of paris. To cut the glass, make a notch with a file around the place to be broken and give the foot a sharp rap with a mallet, holding the upper part in the hand. This usually breaks off the foot where it has been filed. Vases repaired in this way with silver bases will sell for more than the original cost.

QUESTION No. 1311.—**To Strip Silver from Spoons.**—*How can I strip the silver from German silver spoons and forks?* S. T.

ANSWER:—Articles that are silver plated and which have a base of German silver, brass or copper, can be stripped without the electric current. Prepare a solution which must be free from water. Take sulphuric acid, one pint, and nitric acid, two ounces. To strip the silver rapidly heat the solution. The articles must be handled carefully in order to prevent injury to the base. A somewhat slower but safer way is to use the solution cold. The stripped pieces should be rinsed clean and dried so as to prevent oxidizing, which is often difficult to buff off.

QUESTION No. 1312.—**Sheet Metal Alloy.**—*What is the composition of sheet metal which serves as tin foil and is used for wrapping up chocolates, lining tea boxes, etc.?* B. T. S.

ANSWER:—The alloy for these purposes is as follows: Tin, 35.0 parts; lead, 25.0 parts; copper, 2.5 parts; zinc, .05 parts. This alloy has a whitish color and can readily be rolled into very thin sheets or foil. The copper and zinc are added to the metal in fine strips, and the alloy is cast into plates, which are then rolled into paper-like sheets.

QUESTION No. 1313.—**To Clean Kayser Zinn.**—*We have several Kayser Zinn pieces which need cleaning. Please tell us how we may do this ourselves?* A. & Co.

ANSWER:—Kayser Zinn may be renewed by mixing a little soda with water and adding finely sifted white sand. With a soft brush lightly apply the above. Rinse the article well in hot water and dry with a soft towel.

QUESTION No. 1314.—**Putty Powder for Burnishing Tools.**—*What is the best polishing material to use for polishing bloodstone and steel burnishing tools?* B. T.

ANSWER:—For the bloodstones use a piece of thick chamois and charge freely with putty powder. For the steel tools use a piece of bull-neck leather in which several grooves are cut, one for fine emery and the other for putty powder. The tools are first rubbed with the fine emery and finished with the putty powder.

QUESTION No. 1315.—**Brilliant Alloy.**—*Can you give me the composition of brilliant alloy, used for producing stage diamonds?* T. B.

ANSWER:—From the German publication *Neueste Erfahrungen und Erfindungen* are extracted the following facts which will answer your question: Brilliant alloy is composed of tin, 29 parts; lead, 19 parts. This alloy has an exceedingly high luster, of great permanency and may be used for imitation and other precious stones. As a rule an alloy consisting of two parts tin and one part lead is prepared, to which tin is added until a drop let fall upon a smooth plate of iron forms a mirror. The diamonds are produced by quickly dipping a piece of glass, cut in the shape of a precious stone, into the molten alloy, withdrawing it again and allowing it to cool. The small amount of alloy which clings to the stone rapidly solidifies and drops off. From the outside these diamonds appear rough and exhibit a gray color, but the smooth inside reflects the light very prettily, giving the stone in artificial light the appearance of a real diamond. The reflection surfaces are sometimes coated with red, blue or green aniline varnish. In place of the easily cracking glass genuine tin diamonds can be produced by means of suitably cut pieces of well polished steel or bronze.

QUESTION No. 1316.—**Alloys of Solder Metal.**—*Please give me an alloy which I can use for casting small candlesticks, buttons, ornamental disks, etc.?* L. M. H.

ANSWER:—An alloy useful for this kind of casting is termed solder metal, and an alloy of tin four parts and lead three parts makes a fusible, rather soft and yielding substance which gives sharp impressions. A harder but somewhat brittle and very fusible alloy is composed of: tin, 8.0 parts; lead, 6.0 parts, and antimony, 6.5 parts.

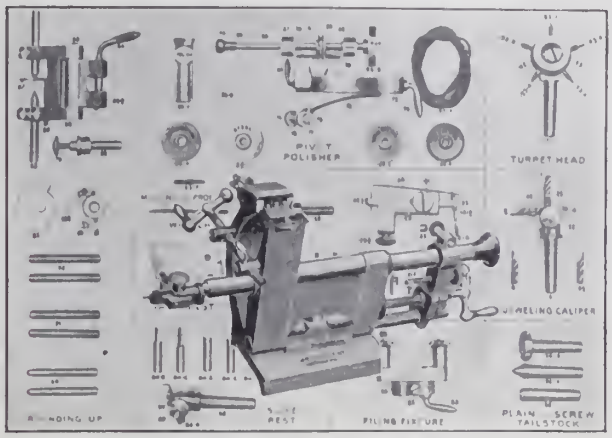
QUESTION No. 1317.—**Gelatine Moulds.**—*Kindly inform me how to prepare gelatine for a mould?* M. C.

ANSWER:—There are several gelatine used for moulds. One is prepared as follows: Soak white glue for 24 hours in water; then pour off the water and heat in the glue-pot until it has the consistency of soft rubber when cold.

QUESTION No. 1318.—**Frosting and Whitening Silver Goods.**—*How can I make a solution for frosting and whitening silver?* Z. L.

ANSWER:—A pickle for this purpose is composed of sulphuric acid, C. P. 1 drm., water 6 ozs. Heat and immerse the silver until frosted as desired, wash well, dry with a soft linen cloth or in fine sawdust. For whitening only, use less acid.

QUESTION No. 1319.—**German Production of Patina.**—*Will you kindly give a formula for producing several different colored patinas, a yellowish green, green-brown and bluish-green, on copper?* S. M.



ANSWER:—A very interesting article on producing patina was recently published in the German *Goldschmiede Kunst*, and gives the following formulæ: A handsome patina which must be applied quickly, is obtained by means of a solution of cooking salt, 5 grammes; ammonia, 7.5 grammes; good wine vinegar, ½ liter; salammoniac, 5 grammes. The solution should be painted on several times, until the desired tone is procured. A yellowish green patina is produced by brushing on the following and drying quickly: Dilute acetic acid (about 30 per cent.) 20.5 grammes, oxalic acid, 2.5 grammes; salammoniac, 5 grammes; or, instead, a compound of sorrel salt (acid oxalate of potassium) 2 grammes, salammoniac, 8 to 8.5 grammes; vinegar (6 per cent.) 500 grammes. If the following solutions are desired to present after a bluish-green shade, apply after the above mentioned process, a solution of salammoniac, 20 grammes; water, ½ liter, ammonium carbonate, 60 grammes, with brush. A greenish-brown coloring will result from potassium sulphide, 2.5 grammes, which is dissolved in ½ liter of water, painted on the article and allowed to dry on it. Next paint with 10 grammes of spirits of salmoniac to which acetic acid is added until saturated, and five grammes of ammoniac, both together diluted with water to make 1 liter. Then dry and brush. A bluish-green patina is brought about by heating the following solution: sulphide, 2.5 grammes, saltpeter, 8.6 grammes, copper acetate, 22 to 22.5 grammes. The specially a Birmingham process. The following composition will cause a green patina, sorrel salt, (acid oxalate of potassium) 3 grammes; salammoniac, 3 grammes; distilled water, 280 grammes. The article must be coated repeatedly with this solution, but the process requires little more time.

BRASS AND COPPER antiques, as well as modern designs in the same metals, unite the past and present in an interesting showing.

For cozy corners, tankards, vases and special pieces. For dens, humorous designs in candlesticks and smokers' utilities. For hall and dining-room, umbrella stands and placques, many of the latter embodying Tenier's subjects. Other notable lines, such as tea-sets, jardinières, cachepots, etc. Finishes are in verd antique, hammered effect or high polish.

It has been said that this is a metal age, and these goods are worthy representatives thereof.

## pecial Knowledge Necessary to the Good Salesman of Art Products.

THE selling of art products differs from other forms of salesmanship. It demands special qualifications and accomlishments, not the least of which are enuine interest in and appreciation f wares falling within this class. Difrent departments of trade have difrent standards. The finer the grade f the product, the higher the type of alesmanship demanded. A successful merhant recently remarked that the first prinple of selling is to "tell the truth about ne's goods." At first sight this seems a ery simple proposition. To state the facts bout the ordinary run of merchandise may e comparatively easy. There may not be uch to tell. There are articles of such ommon and familiar character as to rener their merits or defects fairly obvious. rt, however, is largely a matter of techique, and even beauty often needs to be nterpreted to the uninitiated. To tell the ruth about one's goods, it is necessary to now them. Associated with all interesting rt-products is a wealth of interesting inormation. It is well, therefore, if the salesman can appear, in his own department at east, to be somewhat of a connoisseur. The best way to appear such is to be one.

We may admit at the outset that it would e absurd to assume that goods are to be old alone by what the salesman has to say. The first appeal lies in the attractiveness of he products themselves. That appeal may e enhanced or diminished by the manner in which the goods are displayed. The groupngs, the proper light, the set up and general nvironment, these are important factors. Art products should be displayed artistically. Did you ever see such goods shown amid litter of disorder, dust on everything, strings and loose paper scattered about, dim ight through unwashed windows? The effect is dampening. Give the goods a chance o appear at their best; they deserve that, and they will create for themselves the first favorable impression. Their appeal will gain at least a hearing, and then the salesman can get in his fine work.

If the prospective customer be versed in art subjects, competent to appraise the merits and value of the products before him, then the problem of the salesman is simplified. It may not be expedient in such case to supplement at all the direct appeal of the goods except in so far as that appeal may be emphasized. There are many estimable customers, however, who lack artistic training or who have not had sufficient experience to enable them to discriminate intelligently, and who sincerely desire to be informed and to some extent guided in the making of purchases. The number of such customers is larger than one might suppose. The confidence thus imposed in the salesman should not be abused. He should be able to tell the truth about his goods, and should do so. The old legal maxim *Caveat emptor* (let the purchaser beware), has no place in the ethics of modern business. The salesman, then, sustains some sort of confidential relation to a large class of customers. This relationship if properly observed and maintained forms an admirable basis for permanent business. How can a salesman stand in this position unless he is well versed in his subject, and keeps himself informed?

On the other hand one will sometimes encounter a curious type of purchaser who neither knows nor cares about the inherent qualities and associations pertaining to art products, to whom art merely as such makes no appeal, and yet who is a buyer of such wares. If he has the money, why not? One is reminded of the stories of affluent but uncultured persons who in equipping a library would order such books as had bindings to match the color-scheme of the room, quite irrespective of the contents of the volumes. As literary appreciation is not essential to book-buying, neither is a taste for the beautiful necessary for the collection of art objects. On a recent occasion when admiration was expressed for a handsome product, the manufacturer replied, "Yes, it is impressive; but it may not be appreciated. Like as not someone will buy it merely because it is expensive and beyond the reach of ordinary purses." The salesman need not care so long as he gets his price. The object of business is to make money. One has to be prepared to meet everyone on his own ground.

Purchasers of the kind last described are in the minority, and will become fewer in the lapse of time. They are the result of conditions which have passed or are passing away, relating to a time when fortunes were made rapidly and easily by many persons unaccustomed to luxury. It does not require a prophet to forecast that within a few years a leaven of general knowledge and appreciation of art will have spread over the entire country. The introduction of art studies in the public schools, the continuance of prosperity, the accessibility of art exhibits and libraries, the educational effect of good halftones and other meritorious prints that are scattered broadcast, these and other circumstances combine to raise the level of public taste and appreciation in matters of art. Thus purchasers will become more and more accomplished, more and more discriminating, more and more critical. This is the normal, the natural and to-be-expected purchaser of such goods, the man who understands the artistic as well as the pecuniary value of these wares. He, too, the salesman should be prepared to meet on his own ground. Imagine the plight of one floundering helplessly in the presence of a customer who knows more about the goods than he does!

The word "technique" belongs to the arts. Bronzes, marbles, ivories, potteries, porcelains, and, indeed, all products which properly fall within the scope of this department, are the concrete embodiment and standing testimony of genius and painstaking skill. If the products come from leading establishments in Europe, every such place has an interesting art history. The very artisans are studies in themselves, inheriting their skill from generations of craftsmen before them, all working in the same line as far back as they can trace, so that the descendants have genius in their very finger-tips. Every type of design relates to some historic period, the influence of some monarch and his court, the inspiration of some epoch-making genius, some wave of popular sentiment or some new development in mechanical possibility. In short, every art product has its own interesting story.

Does it not behoove the salesman to know that story? Of course he cannot know all about everything. The man who knows it all is a proverbial bore everywhere; he does not exist except in the bump of egotism possessed by certain individuals. One is not expected to be a walking encyclopædia; encyclopædias make rather dry reading anyway. But the salient facts, the interesting points that enlist attention and stir the imagination, these at least one may strive to know. How is such information to be obtained? The publishers of this paper will not object to the assertion that its columns from time to time contain art-notes designed to be both interesting and helpful. In the better class of current journalism is more or less of similar matter to be found. There is considerable potency in a well-kept scrapbook, in which a mine of such matter

The subject illustrated is taken from our extensive line of

THE COMMENTATOR.

## Recent Tariff Decisions on Statuary.

DECISIONS of the Board of United States General Appraisers in cases affecting the duty on statuary were published last week by the Treasury Department as follows:

STATUARY.—Protest of E. H. Weatherbee against the assessment of duty by the Collector at New York. The Board held that statuary made from several kinds of marble is statuary as defined in Par. 454, Tariff Act of 1897, as claimed by the importer. Abstract 7044 (T. D. 26516) followed.

STATUARY, CAST OF SCULPTURE.—Protest of Benziger Bros. against the assessment of duty by the Collector at Plattsburg. The Board sustained the importers' claim for free entry under Par. 649, Tariff Act of 1897, for a molded figure composed of plastic mineral substance. G. A. 5681 (T. D. 25295) followed.

BRONZE STATUARY, FRENCH RECIPROCITY.—Protest of Syndicate Trading Co. against the assessment of duty by the Collector at New York. Certain cast bronze statuary, classified under Par. 193, Tariff Act of 1897, was claimed to be dutiable under the provisions of the French reciprocity agreement. Protest overruled on the authority of Tiffany *vs.* United States (71 Fed. Rep., 691) and G. A. 5213 (T. D. 24016).

The Robert J. Riles Co., Jacksonville, Fla., has just added a new tile floor to its establishment at 15 W. Bay St. Other improvements have also been made which greatly add to the attractiveness of the store.

James Dayton was taken into custody in Ogden, Utah, a short time ago, on a charge of selling bogus jewelry. Dayton is said to be the man who was arrested Aug. 30 on a charge of mendicency, when he gave his name as Ed. J. Lane.

## Art Metal Workers of New York.

MANY artists of excellent training in Europe are to be found, says a writer in the New York *Sun*, in the little metal and marble working shops of lower New York. He continued:

"The coppersmiths still work mainly in little shops of their own, dingy, dusky places, where the rich, quiet luster of their wares shines out with subdued splendor by contrast. There is a coppersmith up in the new French quarters whose shop, just as it stands, would make a subject for one of those old Dutch or Flemish painters who loved dim and homely interiors lit with the gleam of old copper vessels or ruddy with the glow of a forge. This coppersmith's unwashed window is cumbered with strange vessels and the rearward gloom of his shop is lit by scant sun rays that fall through encrusted panes in the first three hours of the morning.

"In Mulberry St. is an Italian coppersmith skilled in making various utensils. His window is filled with strange coffee pots, rich in color, with copper measures, great and small, some of them gay with a narrow binding of warm light brass. He is a man proud of his handicraft; and his dim little shop is adorned with one of those characteristic creations of skilled European mechanics, an elaborate testimonial to his skill and knowledge and patience. It takes the form of a battleship wrought in copper, a great big object with guns, lanterns and davits and all the details, such as a ship should have. Within is a gasoline contrivance which serves to light the whole ship and to give it the semblance of life and motion. Days and days has the coppersmith put upon this creation, which he cannot sell and which he does not commonly exhibit.

Harry Beresford has succeeded Arthur W. Miller, Fort Dodge, Ia.

# THE RAMBLER'S NOTES

**NOVELTIES IN DOMESTIC POTTERY.**

SEVERAL new lines of art pottery are shown in the New York salesrooms of the J. B. Owens Pottery Co., 68 W. Broadway, New York. In gun metal ware there is, besides an iridescent luster, a distinctly metallic effect, which adds to the charm of the coloring. The potters keep the secret of how the peculiar tint is imparted to the ware, and this novelty is expected to prove one of the most captivating of the present season. This ware comprises vases, urns, tobacco boxes and other articles in a variety of shapes. Another line, which is attracting buyers, is known as Opalesce. Some have a frosted glaze, a zigzag tracing and inlaid decoration, while others are similar except that the glaze is in olive green. The designs are of a floral character and the lining of each article is in gold. In this ware, you may find vases, jardinieres, umbrella stands and other products, there being so many shapes that the buyer has a wide choice. There are several other new wares, now being introduced, that reveal the progress constantly being made by the Zanesville potters and artists. The present season's shapes will be especially admired, because while the classic ideas are utilized there is sufficient departure from conventional lines to show originality. The graceful curves of many of the vases will commend them to those in search of beautiful models, while the charm of the production is much enhanced by the artistic skill of the designers and decorators.

**FANS WITH CARVED IVORY AND PEARL STICKS.**

SAID a fan importer to The Rambler: "You may say that the Chinese still excel in the elaborate carving of ivory for fan sticks. Years of labor are represented in some of the fans made in the Orient. For nearly two centuries the manufacture of fans for the European market has been an important industry in China. The Chinese workmen, brought to Paris in the 17th century, in order to teach French men the art, aided greatly in giving the prominence to French fans. At Dieppe and other industrial centers in France, fine examples of carved ivory fan sticks are produced and many of the most beautiful far-reaching the New York market come from there. There is a wide choice of materials for the sticks, comprising ivory, mother-of-pearl, tortoise shell, horn, sandal and other woods, with occasionally filigree work in metal. The most common materials, of course, are wood and bone, which are decorated with prints or pressed work. One of the most notable fans, made with pearl sticks, is the one of carved silver said to have once belonged to Marie Antoinette. This fan is now in the South Kensington collection. The mother-of-pearl sticks offer an excellent opportunity for artistic carving, and also for clever gilding. The disadvantage in the use of this material comes in the difficulty of so joining the pieces as to conceal the points of contact, and to have the work so well done that there is no danger of the pieces separating. These difficulties have now been largely overcome by the manufacturers."

THE RAMBLER.

Clarence S. Dustin, Stillman Valley, Ill., has been succeeded by John C. Scott.

J. C. Turner, Columbus, Ga., was taken into custody recently on a charge of attempted larceny preferred against him by H. & W. W. Williams, retail jewelers, Macon, Ga. Turner, the plaintiffs aver, was given a gold watch and chain after claiming to be a conductor on the Central Railroad of Georgia. An investigation proved that Turner was a fraud. His description was sent out by the police and he was arrested shortly afterwards.

## ORIGINALITY IN TROPHIES FOR AQUATIC SPORTS.

VHAT is generally regarded by the trade of Philadelphia as one of the st designed and most artically finished cups for aquatic events of this ar was recently made by E. Caldwell & Co. The ler was secured for the se from George F. ffman, of the Hoffman-rr Co., donator of the phy, by F. S. Wright. e of the firm's salesen. It was competed for the annual regatta of e Schuylkill Navy.

In submitting designs r the cup Messrs. Caldell were especially desirs to furnish something nique in aquatic trophies thout damaging its atactiveness by exaggeraons or handicapping the rtisans by making it in ny way inartistic That is has been, in this inance, accomplished is erhaps better told by the ccompanying illustration, howing the obverse of a ree-handled cup in which he dolphin, sea shells and eaweed are made the hief feature of the ornamentation.

The handles ingeniously ake the dolphin's form, while the top is circled by he flags and insignias of he clubs forming the Schuylkill Navy. These are rettily enameled and lend olor and richness to the iece. The individual club pennants are arranged in order, according to the seniority of the clubs entered in the regatta.

The inscription, which is on the obverse of the cup, is plainly discernible, while on the reverse is cleverly engraved a picture of an eight-oared shell. Underneath in the engraving of the winning club's name. The base of the cup is beautifully chased and cut in imitation of seaweed and marine forna. A solid piece of ebony forms the pedestal of the trophy.

TROPHY PRESENTED BY GEO. F. HOFFMAN TO THE SCHUYLKILL NAVY.

The height is 24 inches, and the entire cup has been made out of coin silver in French gray finish. The eye is caught in particular by the richness and perfection of the chasing.

### New Amber Deposit.

A REPORT from Santo Domingo states that an American company has recently exploited an amber deposit on that island in the Province of Santiago, the locality having an altitude of 1,800 feet, near the top of a hill known as Palo Quemado, or Burnt Post, at the headwaters of the Licey River, on a small branch of the Miguel Sanchez.

The amber occurs in a friable, disintegrated and much broken sandstone, which at times becomes a conglomerate and contains fragments of lignite. The amber itself is found loose in the soil and disintegrated rock, and also in the friable sandstone. It appears usually in ovate masses, from an inch or two to the size of a man's hand, round, sometimes flattened, dull on the exterior, and covered with a brown surface crust, like much of the Baltic amber and like buried resin generally. It possesses some of the opalescent character of the beautiful amber of Roumania and of that from Catania, Sicily. In color it varies from yellow to a deep rich brown hue.

If your goods are appropriate to the occasion, your sale is half made.

LEATHER EBONY

# Details:

## They Are Important.

IMPRESSIVE as the products of this house are, it does not ask the trade to judge by surface appearances. While examining leathers observe the precise tints and shades employed. Look at the "build" and entire set-up of the goods. As to linings, examine their quality. Carefully observe the interior fittings and note that there's a "feel" as well as a "look" to all employed. Trifles, perhaps, but they spell LEADERSHIP.

TRADE MARK

**MODERATE PRICES**

**SUPERIOR EFFECTS**

---

**A WONDERLAND OF DESIGNS.**

THERE IS A STYLE about Schickerling products that makes each article a veritable "piece of jewelry." In appearance they are equal to the best importations, and in workmanship they are superior. As several distinct lines are produced at graded prices, it is always possible to meet requirements as to style and cost. The same artists that design the more elaborate pieces are employed also on the less expensive ones. Thus the element of style is never lacking, and the simplest piece has its own distinctive points of merit.

A popular and moderate-priced line is made in 14 karat. The range of showings in this class is very comprehensive both as to designs and pieces included. With and without jewels. All finishes. In our line of Enamel Jewelry 18 Karat is used exclusively. The floral and other effects in this line challenge comparison. The high-grade Diamond-Platinum Jewelry of this house has long stood pre-eminent. Exclusive designs. Thus a review of Schickerling Jewelry shows a range that is "WIDE AS THE DEMAND."

## *ELSIE BEE'S FASHIONS.*

ELTIES SEEN IN A LADY'S RAMBLES AMONG THE JEWELERS.

NIQUE little globe-shaped vases in plain silver are mounted on tall tri-ls, and other and deeper shapes are unted in like manner.

*

Some new gold pocketbooks are in per-tly plain, bright gold.

*

A rather odd glove box, finished in green ther, has a hunting scene in color on the .

*

One large marquise-shaped diamond or-ments a diamond studded hoop in a strik- ring.

*

Not only in small, open-face chatelaine tches, but in large watches, very thin, t models are shown.

*

A handsomely chased openwork border, rrounding an oval in Roman gold, with diamond in the center, forms a novel ttern in sleeve links.

*

Some little traveling clocks in folding ther cases, prettily lined with red or een silk plush, are shown in plain and ncy shapes of onyx, silver and silver-gilt.

*

The furore for bracelets results in ex-mes, so to speak, as to width. For the l who affects the tall, *svelte* style there the slightest of gold chains, with a dia-nd heart as a charm, or the narrowest of mond bracelets.

*

Rose gold is employed in new models in de bracelets, handsomely chased and set th gems. Gold braid is simulated in lf-inch bands, with the bracelet catch un-r a rosette formed of the braid, and ny other novel styles are shown.

*

Fashion's latest fad is the veil pin; some e convex and thus well shaped for fast-ing flat the stylish, circular veil or the tomobile veil. Fancy bars, dragon flies, ows and swords are among designs seen, e pins being longer than those used for cks.

*

Very beautiful are the diamond collar-es, now so highly favored, and new pat-ns in close effects show conventional de-gns of fancy bar arrangements that are gnified in character. Very graceful are e open designs, and a happy medium is own in diamond bows connected to form inch-wide band.

*

A costly collar in close diamond network punctuated with round pearls and dis-ays an elaborate oval ornament carried t in diamonds at the throat. Other col-rs show festoons of leaves on a netlike ound or elegant bar patterns in a variety designs that challenge the admiration of e beholder.

ELSIE BEE.

A. Sartor, San Antonio, Tex., has ad-itted a partner, and the firm style is now rtor & Roempke.

## Statistics of the Jewelry Industry o New Jersey in 1903 and 1904.

TRENTON, N. J., Sept. 21.—The 28th an nual report of the Bureau of Statistics o New Jersey, now in course of preparatio shows the manufacture of jewelry and othe wares from gold and silver to be one of th most important industries of the State.

The manufactories, which are all loca ed in the city of Newark, are for the mos part large, employing a number of opera tives ranging from 10 to several hundre per establishment, and the products includ every variety of article made from gol or silver.

The presentation is for 1904, and em braces 79 establishments, the same fro which reports were obtained in 1903. Fift five establishments out of the total numb are managed by private firms, partnershi and individual owners, and 24 are owne and operated under the corporate form management. The aggregate number stockholders, partners and individual ow ers who control all establishments includ in the presentation for both years is 228.

The total capital invested in 1903 w $4,520,792; in 1904 the capital invested h grown to $6,563,282. Of this amount t reports from individual establishmen show that $58,000 is invested in land; $11 500 in buildings; $529,810 in machine tools and implements, and $5,857,972 in ca in hand, stock in process of manufactu and finished products.

The increase which the records show f 1904, amounting to 45 per cent., is real due to the fact that the reports for th year are different in form, and include se eral items which do not appear in the r ports for 1903; deducting these, a compa son of the capital invested for both yea shows a gain in 1904 which closely appro imates 15 per cent.

The cost value of all stock or mater used in the manufacturing processes of t jewelry industry was $1,248,360 in 19 in 1904 it was $1,362,966, an increase $114,606 or 2.7 per cent.

In regard to the finished product, the sa ing value of the same is given at $8,37 649 for 1903, and for 1904 the figures r ported are $8,678,987, an increase in t value of product amounting to $300,338, 3.6 per cent. The average number of pe sons employed during both years was, f 1903, 2,927, and for 1904, 3,011, an incre of 84, or 2.8 per cent.

The total amount paid in wages was $ 753,002 in 1903; in 1904 it was $1,974,3 an increase of $221,329, or 12.6 per cent.

Of the total number of employes engag in the industry during 1904, the repo show that 74.3 per cent. are males over years, 23.7 per cent. females over 16 ye of age, 2 per cent. children under 16 ye of age.

The classification of wages shows th of the male operatives, 216, or 10.3 per ce are paid rates ranging downward from per week, 386, or 19.5 per cent., are p between $5 and $10 per week; 881, or 4 per cent., are paid between $10 and $20 week, and 582, or 28 per cent., are amo those who are paid over $20 per we many of them receiving from $25 to $30.

Of the female operatives, 202, or 30.4 cent., are paid $5 and under per week; 4

61.2 per cent., receive between $5 and $10 week, and 56, or 8.4 per cent., command es ranging between $10 and $20 per ek.

The total number of children employed is and all are paid wage rates varying from to less than $3 per week.

One week's payroll for each of the 79 ablishments included in the presentation ows the average wages for that partic- ar week to have been, for males, $16.16; r females, $7.53, and for children under years of age, $3.30.

Calculated on the basis of the actual time e various establishments included in the esentation were in operation, which aver- ed 286.7 days, the average yearly earnings male employes were $772.44, the average arly earnings of female operatives were 59.93 and the children under 16 years of e averaged for the same time $157.74.

The manufacture of jewelry was first es- blished in Newark in 1830, and the city quired a high reputation for the produc- on of fine solid ware, which it still main- ns; in the manufacture of goods of this ss New Jersey occupies a position not r from first if not first among the States the Union.

In the manufacture of all kinds of jew- y, including plated and rolled goods, New rsey's products are exceeded in value ly by those of Massachusetts, New York d Rhode Island.

### hief Who Attempted to Rob Graf & Niemann's Store Sentenced to Seven Years in Prison.

PITTSBURG, Pa., Sept. 20.—Howard Hall, e thief who was captured in the store of raf & Niemann, 210 6th St., several weeks o, yesterday pleaded guilty to charges of tering a building with intent to commit felony and was sentenced to serve seven ars in the Western Penitentiary in Alle- eny. Having been caught "with the ods," there was no alternative than to ead as he did and ask forgiveness of the ncern which brought about his prosecu- on and insisted that he be punished to the ll extent of the law.

Hall had planned a gigantic raid of the ock in the store and openly boasted of e fact, and this was one of the reasons hy the judge was severe with him, al- ough Hall did not succeed in carrying off dollar's worth of property. Hall entered adjoining building, in company with two her men, who escaped. They got into e Graf & Niemann establishment by saw- g a hole in the floor leading from the llar to the store room. Once inside, Hall thered up all of the delivery baskets and, ing through the store, had emptied every t of jewelry in the trays of the cases to these baskets, dumping the goods into a le, as if it were junk. When interrupted the arrival of the police, he crawled into little opening under the show window, e box apartment being only about two et high, and there, for seven hours, he uded the vigilance of the officers, who nally discovered his hiding place. Hall aid that he suffered torture while in this ramped position, and was glad to be taken ut even though to be captured.

The stock which he had packed to carry way was valued at about $500.

### Clocks, Watches and Jewelry Shipped to Alaska, Hawaii, Porto Rico and the Philippines.

WASHINGTON, D. C., Sept. 20.—Details of the commerce of the United States with their non-contiguous territories during certain periods have just become available, and those relating to the jewelery, watch and kindred lines are given herewith:

ALASKA.—Clocks to the value of $66[illegible] were shipped to Alaska in July last year while the shipments for July of this year were valued at only $89. However, during the seven months' period ending with July a slight gain is recorded, the figures being $2,594 for the seven months of 190[illegible] and $2,788 for the same period of this year. Watch shipments increased in value from $90 during July, 1904, to $219 in July last, and from $695 to $783 during the seven months' periods. Jewelry shipments in July a year ago were valued at $1,43[illegible] increasing to $3,641 in July last. During the seven months' period the jewelry shipments more than doubled, the figures being $11,417 for the seven months of 1904 and $25,323 for the same period of this year. Plated ware shipments increased from $8[illegible] during the seven months of last year to $3,399 this year.

HAWAII.—A slight increase in the value of clocks shipped to Hawaii is reported, the value for July, 1904, being $301 and that for the same month this year, $440. During the seven months' period there was a decline from $7,302 in 1904 to $5,487. While the watch shipments increased from $5 in July a year ago to $1,227 in last July, they fell from $11,075 during the seven months of 1904 to $1,944 this year. On the other hand, the jewelry shipments show large increases, both for the month and seven months' period. The value for July, 190[illegible] was $22,680, as against $9,350 in last July, while that for the seven months of this year was $124,925, as compared with $93,51[illegible] for the corresponding period of 1904. Plated ware shipments increased from $5,539 in July, 1904, to $10,572 during the same month of this year, but fell from $44,153 during the seven months of last year to $25,4[illegible] this year.

PORTO RICO.—During July, 1905, clocks to the value of $418 were shipped to Porto Rico, while $183 represented the value of these shipments during the same month a year ago. The values for the seven months' periods were $1,032 in 1904 and $2,247 this year. Watches to the value of $308 were shipped to Porto Rico in July, 1905, against nothing in July a year ago. During the seven months ending July, 1905, the shipments were valued at $944, as compared with $609 during the same period of last year. Jewelry shipments increased from $186 in July last year to $1,449 during the same month this year, and from $4,323 during the seven months of last year to $5,3[illegible] during the corresponding period of this year. Plated ware shipments likewise increased from $551 in July, 1904, to $8[illegible] last July and from $3,794 during the seven months of 1904 to $4,002 this year.

PHILIPPINE ISLANDS.—There is no record of any shipments of clocks to the Philippines during July, 1904, while a value of $210 is reported for that month this year. During the seven months' period of last

### Another Store in Maiden Lane Successfully Robbed by Burglars.

Maiden Lane was visited last Wednesday night by burglars, who entered the store of I. W. Cokefair, at 25 Maiden Lane, New York, close to the corner of Nassau St., and took from the show cases spoons, forks, knives, cups and other articles of plated silver, roughly valued at $300. The exact amount of the loss will not be known until Mr. Cokefair completes his inventory. There have been several robbeies in this section of late, causing some discussion in the trade as to whether or not adequate precautions are maintained in the wholesale jewelry district at night.

The robbery of Mr. Cokefair's store differed from others, in that entrance was not obtained by breaking a window, and the thieves, presumably, had false keys with which they opened the front door, walked in, took what they desired and locked the door after them as they departed. Bulky articles were not taken, the burglars confining themselves to the stock that was more easily carried. They might have packed all the property that they took away in an ordinary dress-suit case.

The show cases were not damaged and the store was not upset to any extent, as is usual in the case of burglaries. The supposition is that the burglars required no more light than was furnished by the electric lamps on the street. The skill with which the thieves operated suggests the idea that at least one of them had some familiarity with the premises possibly from visiting the store during the day time and observing the disposition of the stock.

The daily papers, in reporting the occurrence, described the store as that of the Derby Silver Co. This was an error. The store was formerly conducted by that company, and the old sign still remains. Since the Derby Silver Co. was taken over by the International Silver Co., Mr. Cokefair, who was previously an agent for the former company, has been in business for himself making a special feature of the Derby products.

George W. Shiebler & Co.'s store, at 4 Maiden Lane, was robbed on the night of Sept. 7. In that case the burglars broke a window and fished out bulky goods. Early in the year thieves stole brass signs from the outside of the stores of George W. Shiebler & Co., and the Reed & Barton Co., and there have been some petty thieveries in a couple of stores in other lines of business in this district. Besides the regular protection by the policemen on post three private watchmen are employed in this district. No arrests have been made for any of the burglaries.

---

E. D. McAhan has succeeded to the business of McAhan & Long, St. Joseph, Mo.

F. T. Parritt, Bloomington, Ill., has just leased new quarters at 619-621 Walnut St., Des Moines, Ia., where he will open a branch establishment Nov. 1.

Dan I. Murray, who has been in personal charge of an auction sale of Dresden china at Atlantic City, N. J., during the past five weeks, will conclude his work there within a few days. The total amount of goods sold by Mr. Murray is in the neighborhood of $13,000.

IT doesn't necessarily take a very wise man to understand the "selling" quality of the O. & B. Ring—but he is indeed a wise man who buys this superior product. The O. & B. Factory is the propelling force behind the progressive jobber. Now that September is here and the machinery is in operation—he who would "reap the harvest" should know that it is not wisdom, but folly, to delay. Send in your order—THE TIME IS NOW.

## Further Details as to the Bankruptcy of Mrs. Amy Abel, McKeesport, Pa.

PITTSBURG, Pa., Sept. 20.—The first meeting of the creditors of Mrs. Amy Abel doing business at 548 Fifth Ave., McKeesport, who recently filed a voluntary petition in bankruptcy in the United States District Court, giving her liabilities as $2,852.5[illegible] and assets $2,652.79, will take place Sept. 28. In the schedule which she files Mrs. Abel reserves the right to file an amended schedule giving the date of the maturity of certain notes, which she does not now know.

Mrs. Abel, according to the schedules, gave a half dozen notes for various amounts to Harry Levinsohn, 30 Maiden Lane, New York, being accommodation paper, and demand for payment was made through the National Bank of McKeesport. The last of the paper fell due Sept. 9. There are, however, other notes for $611.50, in addition to those already named, being given for goods bought.

Among the creditors are: S. Davis & Co., $42.50; Grafner Bros., $43.07; Landau Bros., $25; Goldstein & Sternberg, $125; Louis Gray, $37.50; Flora Mannist, $10[illegible] Mrs. Abel gives as part of the assets a policy for $1,000 in the Grand Fraternity of Philadelphia. The value of the stock of jewelry is placed at $1,300.

Judge Buffington has made no formal order as yet in reference to the appointment of a receiver.

## Isthmian Canal Commission Asks Bids for Swiss Watches—Silver Bids Received.

WASHINGTON, D. C., Sept. 22.—The general purchasing agent of the Isthmian Canal Commission is inviting sealed proposals until Oct. 11, for furnishing a quantity of stop watches. Blank proposals and full information can be obtained upon application to D. W. Ross, general purchasing agent, Washington, D. C., or the assistant purchasing agent, 24 State St., New York City.

The Navy Department has received the following bids for furnishing a quantity of silver candle stands for flag officers and regular navy standard, delivery to be made at the New York navy yard: International Silver Co., Meriden, Conn., $1,610; J. E. Leonard & Co., New York, $1,676.75.

## Recent Changes in Tariff Schedules of Granada and Brazil.

WASHINGTON, D. C., Sept. 21.—The following tariff changes are of interest to the trade:

GRANADA.—Jewelry, plate and plated articles 10 per cent. ad valorem; watches and clocks, 10 per cent. ad valorem.

BRAZIL.—The duty on all merchandise entering Brazil via Rio de Janeiro is advanced 2 per cent. in gold.

Robert P. Kiep, Joliet, Ill., will shortly move to a new location, where he will have more space and better accommodations for his increasing business.

The new catalogue of the E. W. Bliss Co., Adams and Plymouth Sts., Brooklyn, N. Y., contains 80 pages of illustrations and descriptions of the power presses, dies, etc., made by the concern, some of which are of particular interest to the manufacturing jewelry trade.

## Recent Customs Decisions on Gems, Jewelry and Kindred Lines.

Decisions by the Board of United States General Appraisers, New York, in cases involving questions as to the duties on jewelry, precious stones and imitations were last week published by the Treasury Department as follows:

IMITATION PEARLS.—Protest of Benedict & Warner against the assessment of duty by the Collector at New York. G. A. 6,088 (T. D. 26,554) followed, relating to imitation pearls.

IMITATION PEARLS—HALF PEARLS.—Protests of R. A. Breidenbach against the assessment of duty by the Collector at New York. A portion of the merchandise consisted of imitation whole and half pearls, some on wire, some loose and some pear-shaped. Some of them had a hole part way through, but none were pierced entirely through. The importer's contention that these articles should have been classified as imitation precious stones under Par. 435, tariff act of 1897, was sustained on the authority of G. A. 6,088 (T. D. 26,554). The remainder of the merchandise consisted of split drilled pearls, which the Board held to be dutiable as pearls in their natural state by similitude under Par. 436, as claimed by the importer. G. A. 5,899 (T. D. 25,986) followed.

IMITATION PEARLS—STRUNG BEADS.—Protest of Loeb & Co. against the assessment of duty by the Collector at New York. As claimed by the importers, the Board held certain imitation pearls to be dutiable as imitation precious stones under Par. 435, tariff act of 1897, and certain strung beads to be dutiable as manufactures of the component of chief value.

STRUNG BEADS—CHAINS.—Protest of I. Emrich & Co. against the assessment of duty by the Collector at New York. As claimed by the importers, the Board held certain long chains for fans, muffs, etc., and certain strung beads to be dutiable as manufactures of the component material of chief value.

MILLINERY ORNAMENTS—IMITATION SHELL CAMEOS.—Protests, etc., of Samuel Schiff & Co. against the assessment of duty by the Collector at New York. G. A. 5,386 (T. D. 24,581) and G. A. 6,130 (T. D. 26,653) followed, relating to imitation shell cameo and millinery ornaments, respectively.

MILLINERY ORNAMENTS—HAT PINS—METAL CHAINS—CHATELAINE BAGS.—Protests of Strawbridge & Clothier against the assessment of duty by the Collector at Philadelphia. The Board followed G. A. 6,13 (T. D. 26,653), relating to millinery ornaments, ornamental hat pins, etc., Abstrac 5,635 (T. D. 26,248), relating to metal chain for fans, etc., and Tiffany *vs.* United State (T. D. 25,316), relating to chatelaine bag in chief value of leather.

MILLINERY ORNAMENTS—HAT PINS—JEWELRY — SILK ORNAMENTS — BEADS—CHAINS—PURSES.—Protests of John Wana maker against the assessment of duty by th Collector at Philadelphia. The Board hel certain slides, buckles and other milliner ornaments composed of metal and past similar to those covered by G. A. 6,13 (T. D. 26,653); like goods composed of im tation jet, similar to those covered by Bad *vs.* United States (116 Fed. Rep., 541); ce tain garnitures and other completed orn ments compased in chief value of silk, sim lar to those covered by G. A. 5,664 (T. 25,254); beads temporarily strung; cha purses and parts thereof similar to tho covered by Tiffany *vs.* United States (T. 25,316), and scissors, fan and muff chair similar to those covered by Abstract 5,6 (T. D. 26,248), to be dutiable as manufa tures of the component of chief value Ce tain metal hat pins, highly ornamental character, and set with imitation precio stones, were held to have been proper classified as jewelry under Par. 434.

PRECIOUS STONES—DRILLED AMETHYSTS. Protest of American Express Co. again the assessment of duty by the Collector New York. On the authority of G. A. 6,0 (T. D. 26,586), the Board sustained t claim that certain amethysts, faceted a drilled through, were dutiable as precio stones cut, but not set, under Par. 435, tar act of 1897.

GOLD BEADS.—Protest of John D. Gluck Son against the assessment of duty by t Collector at New York. Certain gold bea were held to have been properly classifi as beads under Par. 408, tariff act of 1897

Wm. H. Allen, Lima, O., has sold out.

### Members of Klein Bros. Co., New York, Arrested on Charges by Eduard Van Dam.

Morris, Joseph and Samuel D. Klein, of the Klein Bros. Co., jewelry manufacturers, at 51 Maiden Lane, New York, were arrested last Thursday on charges of grand larceny made by Eduard Van Dam, 27 City Hall Pl., New York, and Amsterdam, Holland. They were later released on bail without examination.

An involuntary petition in bankruptcy was filed Sept. 19 against the Klein Bros. Co., as related in the last issue of THE CIRCULAR-WEEKLY. Mr. Van Dam says that he entrusted to the Kleins, on memorandum, merchandise to the value of $10,000 or thereabouts. According to the contract, it is claimed, the Kleins were to sell this merchandise and turn over the proceeds to Mr. Van Dam. The contract specified the price which Mr. Van Dam was to receive, he says, and the Kleins were to make their profit by selling above those figures and retaining the margin.

After the bankruptcy petition was filed replevin proceedings were begun by Mr. Van Dam, and a deputy sheriff went to the factory of the Klein Bros. Co. with a writ for the purpose of seizing the merchandise. Robert G. Perry, the receiver in bankruptcy, permitted the deputy sheriff to enter the office and search the safes. No merchandise was found, except a dozen of cheap stick-pins and a package of garnets. Mr. Van Dam says none of the stock which he entrusted to the Kleins was on the premises. After the failure of the search he caused the arrest of the brothers. An effort may be made to show that they pawned the property.

Mr. Van Dam told a representative of THE CIRCULAR-WEEKLY that the merchandise which he gave to the Kleins on memorandum was outside his usual line of trade. He says that the brothers came to him and asked for credit on a line of diamonds, and that he absolutely refused the request. This he did, he said, because he knew that previous to their forming a corporation they had failed as a firm. They made representations to the effect that they were not altogether blamable for their first failure, that their intentions were honest, and that they were then trying to build up a business in a legitimate way. Mr. Van Dam said that he had sympathy with young men trying to get along, and he knew that others, after hearing their story, felt the same. Having come into possession of some merchandise not in his usual line of trade about that time Mr. Van Dam decided to allow the Kleins to sell it in order to help them along.

The contract, he said, was made only a few weeks ago, and they went over to his factory and got the merchandise in several lots, as needed, from time to time. Recently he heard reports of a disquieting nature about them, and made demands for the return of goods, but there was delay on their part, and finally the bankruptcy proceedings brought affairs to a crisis. Bullow & O'Connell, the attorneys for Mr. Van Dam, then saw the District Attorney, and the arrest of the brothers followed. They were arraigned in the Tombs Police Court and gave bail in $1,000 each to appear for examination this week.

The liabilities of the Klein Bros. Co. have been estimated at $25,000. Several claims against the corporation have been handed over to the Jewelers Association and Board of Trade, whose attorneys are making inquiries as to the affairs of the corporation.

### Death of Harvey Feldman.

FRANKLIN, Pa., Sept. 20.—The funeral of Harvey Feldman, senior member of the firm of B. J. Feldman's Sons, of this city, and one of the best known of the younger business men of this section, took place this morning at his home, 617 Liberty St., the Rev. R. B. Beattie officiating. The services were in charge of the Franklin Lodge of Elks, in which fraternity the deceased was especially prominent.

Mr. Feldman's death occurred suddenly at his home late Sunday night, and was due to neuralgia of the heart, superinduced by an acute attack of acute indigestion from which he had been suffering for several days. He was apparently very much better on Sunday, and no thought of serious complications was entertained; he continued to improve until shortly before midnight, when he suddenly gave a gasp and fell over. The doctor who was in attendance examined him and discovered that he had died instantly. The news of Mr. Feldman's death caused a great shock to his many friends in the city, many of whom did not even know that he was ill.

The deceased was 36 years old and was born in the city of New York. He came here when quite young, and had been a resident of Franklin until his death. He was the son of B. J. Feldman who started in the jewelry business in 1881, and it was natural therefore that he should seek out the jewelry trade as his vocation. After being associated with his father for some time he with his brother Geo. W. Feldman succeeded in the business when the elder Feldman retired in 1898. Mr. Feldman was married last April to Miss Louise Fabe of this city, and she with his father and mother and the following brothers and sisters survive him: George Feldman, of this city; Edward Feldman, Pittsburg; Miss Minnie Feldman, Franklin; and Mrs. P. J. Hickey, of Coraopolis, Ind. The deceased was especially prominent in social life and was identified with several organizations.

### Death of W. E. Britt.

ATLANTA, Ga., Sept. 20.—W. E. Britt, jeweler of this city, died Monday night at his residence, 160 Cortlandt Ave., and will be buried to-day from the chapel of H. J. Patterson, this city. He was 32 years old and was well known in this section.

The deceased was formerly a member of Bushway, Britt & Co., Decatur, Ill., and early in 1902 withdrew from that concern and came to Atlanta, where he started a jobbing business. The next year he incorporated the business under the style of the W. E. Britt Co., with an authorized capital of $40,000. In January of last year he opened a store at Leesburg, Va., where he made his headquarters, retaining his office in this city as a branch. Mr. Britt was also a prime member of the Southern Wholesale Jewelry Co., which was incorporated at Columbia, S. C., some time ago and later moved to Atlanta and finally to Leesburg.

Some time ago the deceased was attacked with consumption and quickly declined until he was forced to give up business. His death was therefore not unexpected.

Camp and Orchard Streets, Newark, N. J.

### Anchor Silver Plate Co.'s Entire Plant Destroyed by Fire.

St. Paul, Minn., Sept. 20.—The plant of the Anchor Silve Plate Co., Water and Walter Sts., West Side, St. Paul, was totally destroyed by fire at midnight last night. The estimated loss is $125,000.

It is thought that the fire originated in the elevator shaft in the basement, where the flames were fist noticed by Peter La Valle. He went to the second floor to turn in the alarm, but was unable to reach the telephone before the chemicals stored in the basement had exploded, and forced him from the building. He had no sooner reached the street than the building was enveloped in flames, and before the department could arrive it was beyond any hope of being saved. The building is so situated that other buildings were in little danger.

The building was of brick, three stories high, and located in the heart of the manufacturing section of the city. There is nothing now standing of the great plant but a mass of crumbling and smoking walls. It is not known exactly how the fire started, but it is believed that oil, leaking in some manner through the elevator shaft was ignited.

The remarkable feature of the fire was the incredible swiftness with which the flames spread through the building. The initial blaze was hardly noticed, when there came a loud explosion, and the entire structure burst in flames in an instant. Fire spurted from every window, and the blaze was most luridly spectacular on account of the burning of oil and chemicals. The firemen confined the flames to the property, but were unable to do anything to save the plant itself from total destruction.

The Anchor Silver Plate Co. located in St. Paul just about one year ago, coming from Muncie, Ind. The company is capitalized at $150,000 and has about $190,000 invested. The total insurance is $120,000. The concern had been doing a prosperous business and has been offered assistance from several of its competitors in the trade. It employed about 125 hands.

### Kennon Mott, Brunswick, Ga., Attributes Embarrassment to Absence due to Fever Quarantine.

Brunswick, Ga., Sept. 20.—The jewelry store of Kennon Mott, 215 Newcastle St., this city, was closed recently by an action of the National Bank of Brunswick, which foreclosed a mortgage which it held on the stock. Proceedings were begun and judgments were given in favor of the bank by Justice Lambright.

In explanation of the proceedings, Mr. Mott said that his trouble was due to the fact that he had been out of the city for several weeks, and was thereby prevented from arranging the matter with the bank. Shortly before the yellow fever broke out Mr. Mott went to Mississippi, and when he started to return home found it was impossible to do so on account of the quarantine regulations. He was unable to be home in time to meet his obligations and the proceedings resulted.

Mr. Mott is now endeavoring to arrange a settlement and expects to be able to resume on the old stand.

### Multi-Colored Imitation Precious Stones Dutiable at 20 Per Cent.

Imitation precious stones, faceted and shaped as diamonds, are dutiable at 20 per cent. ad valorem, according to a decision announced last week by the Board of United States General Appraisers, sustaining a protest by R. A. Breidenbach against a ruling by the Collector at New York.

The opinion, written by General Appraiser Sharretts, was as follows:

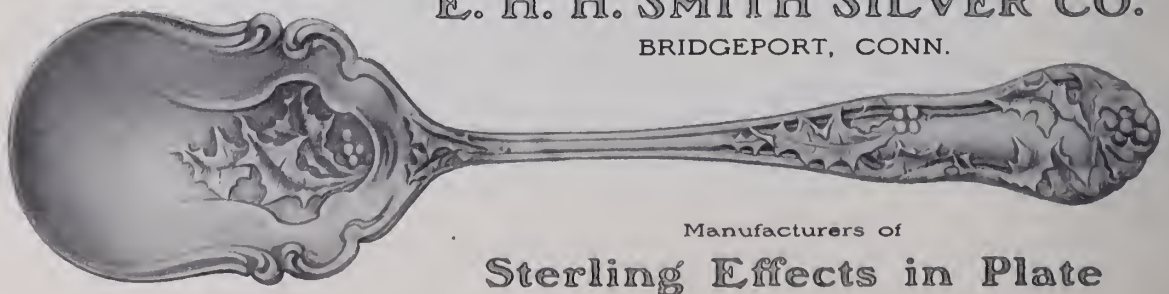
"The appraiser reports:

"The first item on the invoice, 13848, consists of a manufacture of paste. These articles are of many colors and do not simulate any precious stones. They were returned for duty under Par. 112 as manufactures of paste at the rate of 45 per cent. ad valorem, following T. D. 22762.

"The goods represented by 3978 are manufactures of paste in imitation of pearl. They were returned for duty under Par. 112 at the rate of 45 per cent. ad valorem, following T. D. 19447.

"At the hearing in the case the importer appeared and submitted a sample of the so-called multicolored stones, and inspection thereof shows it to be faceted and shaped in the form of a diamond about three-quarters of a carat in weight. It presents three strata of colors incorporated therein during the process of manufacture—namely red, amber, and light blue (a condition frequently existent in the maline, a precious stone)—and is backed with foil. By turning the imitation stone so as to reflect light from different planes thereof, the three colors named blend into various additional hues.

"The merchandise was designed for and intended to be used in the manufacture of cheap jewelry, and we find it is an imitation of a precious stone.



"The goods described as item 3978 on invoice No. 13849 are imitation pearls partially pierced through, composed of paste and not exceeding an inch in dimensions, the same belonging to a class of merchandise repeatedly held by the courts and the Board to be dutiable as imitations of precious stones.

"The protest claiming 20 per cent. ad valorem duty under Par. 435, Tariff Act of 1897, is sustained as to all of the merchandise returned at 45 per cent. ad valorem, the Collector's decision being reversed."

G. A. Schlechter, Reading, Pa., has been awarded the contract to supply 1,000 stick pins for the Sons of Veterans. The pins are in the form of a keystone and are made of oxidized silver. Mr. Schlechter also made the gold medals for the Sons of Veterans' convention, which was held about a week ago, in Gettysburg.

### Merchants' Supply Co., Columbus, O., Adjudicated Bankrupt on Petition of Creditors.

COLUMBUS, O., Sept. 25.—No defense was made Monday by the Merchants' Supply Co. to the involuntary bankruptcy proceedings brought against it by the Putnam-Hooker Co. and other creditors, and it was accordingly adjudged a bankrupt. The adjudication was assigned to Referee in Bankruptcy Rogers, of this city.

The North American Watch Co., of Mansfield, has filed a motion with the court asking the return of three consignments of gold watch cases, 106 in all. The company says that the Merchants' Supply Co. furnished it with a statement, dated May 20, 1905, showing stock on hand, $34,360.40; bills payable, $8,760. It is alleged that the officers of the company, particularly A. C. Featherstone, president, knew that this statement was untrue and a misrepresentation of facts, in that the company did not then have such stock on hand, and that its bills payable exceeded the amount given in a considerable sum. The watch company therefore seeks to prove no sale, and to have its goods returned. The motion will be heard Sept. 27. The *Ohio State Journal* Co., of Columbus, has filed a claim for $108.48 for advertising.

The date for the fist meeting of creditors has not been set, and the schedule of liabilities will not be available until that time. E. S. Howard, Columbus, has been appointed to appraise the stock of the defunct company, and his work is now almost complete.

## Another New Office Building to be Erected in Maiden Lane.

Work is to begin early next year on an extension to the Fahys building, at 54 Maiden Lane. The building at 52 Maiden Lane, a five-story red brick structure, now occupied by the Alvin Mfg. Co., will come down, and on the site will arise a 12-story structure similar in architecture to the present Fahys building, which it will adjoin. Joseph Fahys, who owned both pieces of property for some time, has contemplated this improvement, which will give to the Fahys companies improved office and selling facilities in the Maiden Lane district.

Each story of the addition will open into the corresponding story of the present building, so as to practically make one building. The handsome carved stone front which rises two stories high in the present building will be duplicated in the extension. The upper stories will be in gray pressed brick.

The basement and the first four floors of the enlarged building will be occupied by Fahys and companies, and each floor will be about 50 feet square. The Alvin Mfg. Co. will occupy all the store on the ground floor and will also occupy the basement and most of the two floors above. The offices of Joseph Fahys & Co. will be located on the third floor. The lower floors in which the Fahys interests will thus be centralized will have a separate elevator. The upper floors will be rented for office purposes as at present and will have their own elevator service.

The cost of the addition, including the value of the site, will be about $225,000. The work is to be completed by October of next year.

## Chicago Jewelers Organize Society to Protect Themselves Against Thieves.

CHICAGO, Sept. 23.—At a meeting in the Masonic Temple recently 200 Chicago retail jewelers organized a protective association to prevent the robbery of jewelry stores. They appointed a committee to formulate plans for the protective organization with ideas suggested. A detective service will be a part of the scheme.

A reward of $500 for the arrest and conviction of any person robbing or attempting to rob a jewelry store was recommended. Another meeting will be held on Oct. 13.

The association is only just on its feet but the idea seems popular. The president is Wm. Lambrecht, 1576 Milwaukee Ave. and the secretary is Bernard T. Hoffman, 121 Fullerton Ave. Both are prominent retail jewelers.

To a CIRCULAR-WEEKLY reporter Mr. Lambrecht said he was desirous of hearing from all Chicago retail jewelers in regard to joining the association. Mr. Lambrecht also said it was the purpose of the association to enlist the support of other storekeepers, such as druggists and members of other trades, so that the association would be strong enough to vigorously prosecute all hold-up men and thieves, who may operate in the Windy City.

### Court Sustains Demurrer to Bankruptcy Petition Against Van Houten Bros. Jewelry Co., Newark, N. J.

New York creditors, who some time ago began bankruptcy proceedings against the Van Houten Bros. Jewelry Co., Newark, N. J., have been defeated in the litigation that ensued. An application for the appointment of a receiver was made last Spring in the State courts of New Jersey. A receiver was appointed March 21 and qualified the next day. The court in naming the receiver signed an order giving the creditors opportunity to appear April 4 for the purpose of interposing objections. The receiver named in this conditional manner was designated in the order as a permanent receiver. In other cases the courts have, in the first instance, appointed a temporary receiver, making a permanent appointment only after creditors are heard, or have an opportunity to be heard.

After the bankruptcy petition was filed by the New York creditors, the Van Houten Bros. Jewelry Co., through its counsel, interposed a demurrer, on the ground that under the bankruptcy law such a petition must be filed within four months of the appointment of a permanent receiver. The creditors through their lawyer, Frank Benjamin, Newark, N. J., took the position that a permanent receiver was not legally appointed until the day of the hearing, April 4. The arguments on this issue were heard last Friday before Judge Cross, of the United States District Court at Trenton, who decided that the receiver was properly appointed March 21, and that, therefore, the bankruptcy petition had been filed too late. The petition was accordingly denied.

The affairs of the company will now be closed by the receiver. The firm's assets have been estimated at $13,000 and the liabilities at $19,000. The National Newark Banking Co. is a creditor to the amount of $6,000.

### A. J. Cranwell & Co., Portland, Ore., Refused a Discharge in Bankruptcy.

PORTLAND, Ore., Sept. 20.—Recent investigations in the case of A. J. Cranwell & Co., retail jewelers of this place, who failed several weeks ago, with liabilities of $10,000 and known assets of $900, have brought to light the fact that Cranwell has mulcted his creditors, including several prominent wholesale houses of San Francisco, to the extent of nearly $10,000.

The investigation has shown proof enough to convince his creditors that Cranwell had made away with a large part of his stock prior to filing his petition in bankruptcy and the court has refused to grant him a release. It is commonly believed that Cranwell either carried his goods out of the United States or over on Puget Sound and there disposed of them.

Not long ago Cranwell's store was reported to have been looted and $2,000 worth of jewelry was alleged to have been stolen from the safe. Detectives who were detailed on the case, after an investigation, reported that in their opinion he had done the job himself and refused to take any further steps toward the apprehension of the alleged burglars.

The Laurens Jewelry Co., Laurens, S. C., has been succeeded by Caine & Moorman.

### Chicago Woman Pledges Diamonds Obtained on Memorandum.

CHICAGO, Sept. 23.—The loss of many thousands of dollars' worth of diamond jewelry was revealed last week when Justice Johnson issued search warrants for the recovery of some of the property. The warrants authorized the search of the premises of the Bauman Loan Co. and of the U. S. Loan Bank (D. M. Bernstein, proprietor), and were sworn out by the Elmer A. Rich Co., diamond merchants, in the Columbus Memorial building.

It appears that a Mrs. Louis Berg, whose husband is a liquor salesman, took the jewelry from the Rich concern on memorandum, and instead of returning the articles, pawned them. Mrs. Berg, who is well known in Chicago as a diamond dealer, has been in the habit of getting large amounts of diamonds from dealers and loan brokers, and heretofore has always returned either the goods or the money. She was recommended to Mr. Rich by a broker only a short time ago. She obtained about $2,000 worth of jewelry from Mr. Rich, $2,500 from A. Lipman, $1,300 worth from F. Coleman, $1,100 worth from C. H. Seaman and W. C. Slatts, $650 worth from Sam Barnet and $600 worth from the Harris Co.

The premises of the Bauman Loan Co. and the United States Loan Bank were searched under the warrant, but the property of the Elmer A. Rich Co. was not found. Later Mr. Bauman and Mr. Bernstein were arrested on a charge of concealing stolen property and were released on bonds of $3,000 and $1,000, respectively.

Among the loan brokers there is a disposition to do nothing against Mrs. Berg. There is an unwritten law among such brokers here to pay the advances when their goods are pawned and take their medicine. Mr. Rich, however, doesn't see it in that light and says he is going to fight the case.

It is alleged that Mrs. Berg gave the money raised on the jewelry to her husband, who lost it in playing stud poker at a local club. James T. Brady, attorney for Mrs. Berg, is trying to get the money back that Berg lost in gambling, and every one is waiting to see if a settlement can be made. No criminal proceedings have as yet been brought. Mr. Berg has surrendered the pawn tickets.

The question of recovering goods obtained on memorandum that have been pledged is a perplexing one, and no two lawyers seem to agree on the subject. Many have cited the case of Moe *vs.* Logue decided by the Appellate Court of Illinois October, 1902. In that case Maurice Stein got a diamond on memorandum from J. H. Logue Co., valued at $160, and pawned it with Chas. Moe. Logue sued Moe and got judgment. Moe carried the case to the Appellate Court, which sustained the decision of the lower court. In this case Mr. Logue testified that he gave the diamond to Stein to show to a prospective customer and it was not to be sold but to be returned to him that day.

## The Diamond Markets.

ANTWERP, Sept. 15.—This month may be considered to have marked an era of prosperity in the diamond trade here. Large numbers of dealers, especially Parisian merchants, have visited this city in the past fortnight and sales have been brisk in all lines of fine and ordinary brilliants, the recent rise in rough apparently making no difference. Mêlée of 170 to 200 francs per carat is in general demand but is not easy to find. Pairs of stones around 20 grains, of a pure while quality, are also in demand. Large white roses have been sold at as high as 180 francs per carat. All the factories are working full force, and more hands could be employed if they could be obtained.

The "Antwerpsche Diamantbewerkersbond" celebrated the anniversary of its foundation Sept. 10, at which time a procession of 2,000 men, headed by several bands of music, paraded, and a large meeting was held at the Hippodrome de Sud, where President Bartels of the Bond, President Pollack, of the "Algemeine Nederlandsche Diamantbewerkersbond," and J. Groesser, the international secretary, made speeches. The celebration ended with a ball.

During the past fortnight the register of the Diamond Club has contained an unusually large number of names, among them the following: Messrs. Hekster, Bawley, Pardo, Amsterdam; Messrs. Schapira, Codas, L. Hazan, Schiff, B. Rapoport, Regenold, Citroen, Heschelson, Max Menasche, M. Slabotzky, Woelfling, André Levy, N. Mund, Eknayan, Birman, De Haan, Weissberg, B. Misrahi, E. Weill, E. Mayer, Wins, Prager, Langbank, Mitacoupolo, Lambert, Sloog, Alex. Pouldjian, all of Paris; Messrs. Robinson, Infeld, Lunzer, W. Vuillet, Kauffman, Goldberg, London; H. Straus, Hanau; Mr. Katsenelsohn, St. Petersburg; Mr. Canes, Rotterdam; Mr. Hacken-Crock, Frankfort-on-Main; Mr. Van Guth, Goch; Messrs. Herzl, B. Figdor, Guttenberg, Vienna; Mr. Kanter, Lodz; W. Habib, Alexandria; Mr. Maiselsohn, Tiflis; Messrs. Kekati and Matalanie, Beyrouth; Mr. Lagowir, Moscow; Mr. Davis, Birmingham; Mr. Grossbard, Warsaw; M. Blankstein, Kiew.

AMSTERDAM, Sept. 15.—Business is excellent so far this month, most of the merchants having returned from their holidays and trade being again in full swing.

The demand for stones of the highest grade increases every day, and in fact since the peace protocol between Russia and Japan there have been general inquiries for all classes of goods. Lots which remained unsold for the past three or four months have been disposed of, and orders kept pouring in, especially from Russia and France, which countries are important purchasers of fancy roses such as pears, lozenges, and triangles at prices ranging from 150 to 200 francs per carat. Fine melee also continues active. The shops here are all working full time and with full forces.

PARIS, Sept. 15.—This has been a lively month in the diamond market here owing to the demand due principally to the presence of a large number of buyers from practically all the countries of the world. The peace news has also been a factor in the improvement of business.

Brilliants, roses and six faces have been sold in greater quantities than for a long time past, while an equally good demand is felt for pearls and colored stones. More business would be done if it were possible to find enough pure brilliants to meet the demand, and even impure stones are sold well and at good prices.

Thieves broke into the workshop of Mr. Crossard, a well-known jeweler at 160 Rue du Temple, while the proprietor was absent a few days ago, and stole a quantity of gold jewelry and pearls, valued in all at 70,000 francs. The place was guarded at the time by a watchman who was strangled by the thieves.

LONDON, Sept. 12.—The peace between

IF IT IS ANYTHING IN THE LINE OF

AMERICAN PEARLS,

communicate with

Maurice Brower, 16 John St., New York.

HIGHEST PRICES PAID FOR AMERICAN PEARLS.

Japan and Russia has had a remarkably good effect upon business conditions in this country, owing to the large commercial connections of British merchants with Japan, and this is as true of the jewelry trade as of all other lines. The diamond trade is in excellent shape, and the outlook augurs well for the holiday season.

Considerable business has been done lately in American pearls; black and very white pearls are called for to a great extent. The sales have been many and prices firm.

The last rise in the price of rough was only three per cent. instead of five per cent., on Kimberley and Bulfontein stones, and on closed mêlée.

The trade in commercial carbons with Berlin and Paris firms is picking up well, many sales having been made within the last week or so.

### How a Smuggler's Novel Plans Were Accidentally Thwarted.

FORT WILLIAM, Ont., Sept. 20.—The authorities at Fort William have had brought to their notice recently an illegal traffic in jewelry from across the border which has been carried on for some time past. A photographer named Thomas Carlan, whose home is in Toronto, recently described the manner in which he was approached at Grand Forks as he was about boarding a train for Winnipeg and a valise placed in his possession which supposedly contained "cheap silverware" for St. Norbert, with the offer of $10 if he would deliver the goods.

Carlan consented and was escorted to the railway yards, where the valise was turned over to him. He was then directed to enter a box car of a northbound freight and told to have no fears as the conductor had been "fixed." The owner of the valise and the "cheap silverware," the young man was informed, would meet him at St. Norbert.

But the young man did not go to St Norbert, at least on that train. When he arrived in Emerson, the first town on this side of the boundary, the car in which he was riding was detached and run on to a siding. Finding that he was some distance from his destination and that without funds he would have difficulty in continuing his journey, Carlan, upon leaving the car, broke open the valise and learned that he had smuggled into Canada watches of good make and rings valued at about $400.

He disposed of one of the watches in Emerson and purchased a ticket to Winnipeg, where he sold part of the smuggled property. When he arrived in Fort William he had six gold-filled watches of Elgin make and several rings.

A. Jonas, Youngstown, O., accompanied by his daughters, Mrs. Hattie Kirshman and Miss Emma Jonas, has returned home from an extended trip to Europe. The party spent most of the time in Germany.

W. H. Appel, Allentown, Pa., has purchased the property on which he has his store at 625 Hamilton St., for $29,000. Mr. Appel has been engaged in business in that location for 10 years, having succeeded the late Jacob S. Massey.

## The Cohn Mfg. Company,

Factory, Newark, N. J. Office, 59 Nassau St., N. Y.

ADDRESS ALL COMMUNICATIONS TO NEW YORK OFFICE.

## Connecticut.

The Landers, Frary & Clark Mfg. Co., New Britain, has increased its capital stock to $1,000,000.

Oscar Zube, Meriden, has the sympathy of his many friends in the trade in the recent death of his mother, Mrs. Regina S. Zube.

Richard Vaughn, with C. L. Bryant, Danbury, has resumed his business duties after an enjoyable week's vacation spent in company with his wife at Fairfield Beach.

H. N. Hull, formerly of Deep River, is now located in the jewelry business in Leesburg, Fla., a town having a population of about 1,700, and located 125 miles south of Jacksonville.

Morton Ingraham, of the E. Ingraham Co., Bristol, has just returned home from an extensive tour of Europe. While in Rome Mr. Ingraham was given a private audience with the Pope.

A. S. Brainard, who for 25 years had been employed as foreman at the factory of the Bradley & Hubbard Mfg. Co., Meriden, died in Collinsville, on Tuesday morning of last week, aged 78 years.

Among the members of the committee of arrangements for the opera which was held recently under the auspices of the Country Club, of Wallingford, were Chas. H. Tibbits and Geo. D. Munson.

S. W. Tasch, Danbury, formally opened his new store in the McAllister Block on White St., Friday evening. Visitors were given attractive souvenirs and treated to popular melodies by a local orchestra.

Edgar Dwight Pond, Terryville, who spent most of the Summer in England, reports having found a clock in a house near London, which was made by the Brewster & Ingraham Clock Co., nearly 75 years ago.

Gen. Henry C. Dwight, who is secretary of the committee having in charge the purchase of the silver service for the battleship *Connecticut*, will receive bids until noon on Nov. 11 at the State capitol. The cost of the service must not exceed $1,000.

Julius Luftig, who was taken into custody a short time ago on a charge of larceny preferred against him by his uncle who conducts a jewelry store in Grand Ave., New Haven, recently pleaded guilty and was fined $22 and sentenced to 30 days' imprisonment.

The C. F. Monroe Co., Meriden, has decided to light its plant by electricity, and has just installed a large new dynamo for that purpose. The electric power will be used to operate the metal and sterling departments. The cutting department will be run by steam power.

Wm. H. Vernon, for several years employed by Simpson, Hall Miller & Co., Wallingford, died recently at Biddeford, Me., aged 70 years. The deceased for several years had been a frequent visitor to Biddeford, where he sold silver-plated ware and jewelry.

Howard Travest, claiming to reside in Baltimore, Md., was arrested, last week, in Huntington, W. Va., and held for investigation. When taken into custody Travest had in his possession over 40 gold watches, and a large amount of jewelry which he was selling at prices below the intrinsic value.

## Optical Notes and Briefs.

The Athens Optical Co. has just begun business in Athens Ga.

The Fresno Optical Co. has established a permanent office in Selma, Cal.

C. C. Richdale, optician, Santa Barbara, Cal., was a recent visitor o San Francisco, Cal.

A. B. Wilson, optician, Monterey, Cal., was recently in San Francisco, Cal., on business.

J. G. Garrison, optician, Forest Hill, Cal., was in San Francisco, last week, combining business and pleasure.

Dr. W. E. Doty, optician, Cloverdale, Cal., is at present making San Francisco his temporary headquarters.

George E. Parker, at one time engaged in the optical business on Columbia Ave., Philadelphia, Pa., died in Reading, in the same State, last Friday.

A plate glass window in the store of J. C. Huteson & Co., Omaha, Nebr., was shattered by lightning during a severe electric storm, at that place, a short time ago.

Jos. B. Williams, optician, Suisun, Cal., who has been suffering with typhoid fever for several weeks past, is now convalescent and has just arrived in San Francisco, Cal., on his first trip since his illness.

The Rochester Optical Society, Rochester, N. Y., has appointed a committee to secure the services of a competent instructor to deliver a series of lectures on the anatomy and physiology of the eye.

D. V. Brown, manufacturing optician, 738-740 Sansom St., Philadelphia, Pa., is making further extensions and improvements in his establishment to find adequate space to meet the demands of his business, which is steadily growing in volume.

Otto Bachmann, optician, St. Louis, Mo., and Miss Katherine Moerschel, of the same place, will be married some time in November. Mr. Bachmann is now building a beautiful new home in Tower Grove Heights, which will be completed in November.

Henry J. Fisher and John H. Kelher, who were recently arrested on a charge of having been implicated in the theft of $200 worth of gold material from the Standard Optical Co., Geneva, N. Y., have been released from custody, no complaint having been made against them.

Geo. Blakeslee, Tonopah, Nev., has just left San Francisco, after a four weeks' sojourn in that city, during which he selected stock and fixtures for a new optical department. Edwin Cords, formerly with the Standard Optical Co., has been secured as manager of the department.

The health authorities of Philadelphia, Pa., after completing a recent physical examination of the children in the public schools, report that hundreds of them need spectacles or eyeglasses, and it has been suggested that some charitable institution or the city provide the glasses for those who cannot afford to pay for them.

---

John McKeating, a messenger boy, 14 years of age, in the employ of the firm of Hirsch & Oppenheimer, Chicago, who recently absconded with $20 of his employers' money, was arrested shortly afterwards in Aurora, in the same State.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

# WHY?

*Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had **FREE** for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

Extract from "Printers' Ink," Nov. 23, 1898.

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

All Krementz Collar Buttons—of every quality—are manufactured by

# KREMENTZ & CO.,

in their Factory,

**49 Chestnut Street,**

PARKS BROS. & ROGERS,
20 Maiden Lane, New York.

**NEWARK, N. J.**

Selling Agents to Jobbing Trade.

¶ The Koy-lo Company, of No. 7 Broadway, New York City, beg to offer to the trade their new *patented*

**KOY-LO REVOLVING SPIRAL HAT PIN.**

¶ The head of the Koy-lo pin is swiveled on to the spiral stem. Thus, when the pin is inserted into the hat, the spiral revolves automatically. There are no hidden springs, and nothing to get out of order. The Koy-lo is used in precisely the same manner as an ordinary straight hat pin. It is as superior to a straight hat pin as a screw is to a nail, or as an automatic screw-driver is to the old kind. It is the only practical device at present in existence which will hold the hat firmly and comfortably. It will not work loose when in the hat.

¶ The Koy-lo pin is made up in a variety of popular styles at from $9.00 per gross to $75.00 per dozen, to retail at from 10c. to $10.00 each. Each pin carded separately. Terms: 1%, 10 days; net, 30 days, f. o. b. New York City.

¶ As the Koy-lo Company's salesmen will not, for the present, call on the trade outside of New York City, out-of-town dealers who desire to see samples should make application by mail to

**Ralph W. Ashcroft,**
General Manager,
No. 7 Broadway, New York.

## Syracuse.

A. H. Rose has moved his jewelry store into the new Shallish block on Jordan St.

According to the schedule of the Social Art Club Mrs. L. V. Lynch will lecture before that body Dec. 12, on pottery and porcelains, enamels, ivory, carvings, etc., and Mrs. Allen D. Draper and Mrs. Wm. A. Barnum will lecture Jan 16. on gold, silver and brass work, precious stones, etc.

S. Charles Greene, since Jan. 1, 1899, the secretary of the Utica Railroad Young Men's Christian Association, has resigned to become interested in the firm of John D. Greene & Co., Utica, N. Y. Mr. Greene's resignation will take effect Oct. 1. He has been very successful in the Y. M. C. A. work.

The factories of the M. S. Benedict Mfg. Co., East Syracuse, N. Y., are now running overtime to keep up with their Fall orders. This company went into the hands of receivers last May, and is now being operated by the Syracuse Trust Co., which was appointed trustee in bankruptcy. All the lines formerly manufactured by the company are continued by the trustee.

Le Roy Holmes Wright, a Civil War veteran, who was buried from the home of his brother, of this city, last week, was for many years in the jewelry business here. The deceased was born in Syracuse, March 29, 1840, and first learned the printer's trade but later learned the jewelry business and was employed in the Caldwell jewelry store here for a long time. He left Mr. Caldwell to go to the Civil War, and when it was over went to Newark and became employed by the firm of Carter, Howkens & Dodd. He remained with the concern for a number of years until ill health forced him to retire from work. He then started in the grocery business in East Orange.

Wm. Morse, formerly of Benton Harbor Mich., is now in charge of the store of G W. Stolz, 412 Genesee Ave., Saginaw, Mich.

The store occupied by the Gabriel Jewelry Co., Mobile, Ala., was filled with smoke one day last week, the result of a fire which broke out in the business district at that place. The fire was extinguished before doing any serious damage.

## Canada Notes.

Moodie Bros., Calgary, Alberta, are succeeded by J. F. Moodie.

Amedee Lechasseur, Levis, Que., has assigned and A. Lemieux has been appointed guardian.

J. H. Willmott, with the Gorham Mfg. Co., Montreal, has returned from a trip in the Maritime Provinces.

Charles Green, traveling representative of Simpson, Hall, Miller & Co., returned to Toronto, last week, from a trip to the Pacific Coast.

R. J. Abbs, Montreal representative of the Goldsmiths' Stock Co., Toronto, Ont., was married at Rosseau, Muskoka District, on Tuesday of last week, to Miss Florence Monteith, of that place.

Frank Proctor, Toronto, Ont., during a recent visit to Amsterdam, purchased a miniature diamond factory exhibited by Van S. Ween at the Paris Exposition. It is now displayed in operation in the store of his Yonge St. establishment, where it attracts much attention.

Complaints have recently reached Silas Carpenter, chief of the Montreal detective department, that a number of burglaries have been committed on the outskirts of the city, and, because of the way the thieves went to work, it was thought that they were the two men who gave the police trouble last year in connection with the robbery of jewelry and other stores. These men, after their operations in the early morning, sought refuge on Mount Royal. Following up this clew, two detectives were put on special duty to watch for the criminals, and, after many days of watching, the officers caught the men, about 4 o'clock in the morning. They were sleeping soundly in a gully on the side of the mountain. Brought to detective headquarters, they said they were brothers and gave their names as William and Charles Day. In their possession were found a quantity of valuable jewelry, bracelets, diamond rings, etc., two spade guineas and a powerful searchlight, with electric battery. The men have been remanded for trial.

A thief, Wednesday, broke into the store of A. J. O'Brien, Oshkosh, Wis., and escaped with nine cheap watches.

IF IT'S A ROY
TRADE MARK
IT'S STANDARD

Leading jobbers everywhere prefer the ROY SOLID GOLD WATCH CASES because they are always made from assayed gold, which insures reliable quality in the newest designs and finest workmanship.

ROY WATCH CASE COMPANY

The "ROY" stamp in the watch case is a perpetual guarantee of satisfaction to the purchaser.

*ROY WATCH CASE CO.,*

*21-23 Maiden Lane, New York City, N. Y.*

206 Kearny St., San Francisco, Cal.

## New Orleans, La.

TRADE CONDITIONS.

The yellow fever, while having its bad effect on the general jewelry trade of this section, is not setting it back to such an extent that the dealers will incur any very serious loss, according to the statement of local jewelers. But, as they say, the dealers are being seriously hampered in placing their Fall and Winter orders, the traveling representatives of the big supply houses, tabooing New Orleans in their journeyings, fearing infection. Said one dealer: "The fever is hurting us some, but not in a manner that approaches the alarming, and business is much better than one might expect it to be under existing conditions. However, the fever is doomed to an early passing, and then we will doubtless have a big revival in trade."

Mrs. F. Hausmann, of this city, with her daughter and grandson, are in Paris, after visiting points of interest on the Continent.

The leading jewelers of New Orleans took an active part in the recent diamond festival, which was given to aid the general fund being collected to fight the yellow fever. F. Hausmann & Sons gave a round-trip ticket to Asheville, N. C., with all expenses, which was presented to one of the young ladies in the working girls' contest, and also donated a handsome gold fob as a prize for the best individual work in the baseball game between two prominent local teams. M. Scooler gave a beautiful silver water pitcher as a prize for one contest, and Paul Granzin & Son donated a fine diamond ring for the ladies' contest.

August Levy, the watch and clock thief, who drove such a flourishing business in filching valuable antique clocks from customers from whom he got the clocks to repair, entered upon his first jail term for his recent misdeeds several days ago. He was convicted on a charge of larceny of a watch valued at less than $20, a crime punishable by imprisonment in the local jail, and the judge who had found him guilty sentenced him to confinement behind the bars for three months. The charge upon which Levy was senteneed is the least of a long string against him. On five other charges of larceny he will have to stand trial before the Criminal District Court, which will probably mean a long penitentiary term. Levy is said to be an expert watch and clock maker and diamond setter. He claims to have worked for several big firms in New York and other large northern and eastern cities.

## Savannah, Ga.

Theus & Co., R. Van Keuren & Co., and J. & C. N. Thomas, have improved their stores.

Robert Schneider has corrected the error made in casting the initials of Architect Witcover on the bells for the City Hall clock. The bells have been tested, accepted and placed in position in the tower of the City Hall.

M. P. Messinger, Rolfe, Ia., has sold his stock at auction.

## Oriental Salesmen's Work to Stop Effect of Chinese Boycott.

A COPY of the July 23 issue of *The Bund*, a 32-page magazine-newspaper published in Shanghai, China, has been received in Attleboro, Mass., by one of the local jewelry manufacturers. The Sunday paper contains an account of the boycott meeting of Chinese merchants on July 19.

The meeting was held in a 16 x 22 room after the crowd of merchants were kept waiting several hours. Several American business men journalists were present. When the meeting began to consider the boycotting of all American piece goods, American oil and American cigarettes there was such a commotion from the dissenting merchants that the meeting was abruptly called off.

Among those present were Messrs. J. J. Keegan and Hilliard J. Rosencrantz, well-known representatives of American jewelry manufacturers, familiarly known as "The Irishman and the Jew."

Mr. Rosencrantz, who was refused permission to speak at a previous meeting, addressed the gathering and said in part: "Far be it from any American to think that the present agitation is going to make our two countries bad friends. I must say that to my mind you should handle this matter in a business-like manner. Let each guild's leader sign a joint petition to the Chinese foreign office, in which their wants are specified. Let your people in Pekin take it up with Washington. How can two sets of merchants settle an international question by boycotting one another's goods?"

Mr. Keegan, who was kept busy in an endeavor "to smooth things out," said: "Make progress slowly. That you feel in possession of a grievance against America on account of your dislike of the present immigration law, is admitted, but why should you proceed with such haste? Is this not a question for your diplomats to first attempt the settlement of? As you are asking for fair play, why don't you give your old friend, the local American merchant, a little of it by deciding to hold back your boycott against him until after the American Congress meets? Then, if they do not change the present law to suit your wishes, you will have plenty of time for a dozen boycotts. I honestly believe that, if you think it over calmly, you will agree with me that this matter may be straightened out without resorting to any movement that would tend to paralyze trade and that China and America will still remain good friends."

The article is illustrated with two excellent portraits of Messrs. Keegan and Rosencrantz.

F. E. Bruhl, Macon, Ga., has sold his jewelry business to Miss J. P. Williams and J. H. Virgin, of the same place. Mr. Bruhl has been in business for nearly a quarter of a century.

## News Gleanings.

J. S. Simpson, Rockland, Tex., has sold out.

Stephen Swart died, last week, at West Bay City, Mich.

L. L. Daugherty has succeeded O. H. Farr, Wabash, Ind.

B. R. Shoemaker, New Madison, O., has gone out of business.

Thomas W. Roe, Pratt, Kans., has sold out to O. J. Weseman.

F. Willis Spahr, Tarentum, Pa., recently sold out to B. R. Spahr.

August Manecke, Wausau, Wis., is now at Merrill, in the same State.

H. F. Ward, Lindenwold, N. J., has removed to Laurel Springs, N. J.

Wesley K. Eckfeld, Dennison, O., has been succeeded by J. H. Gardner.

The Star Loan Co., Evansville, Ind., has sold out to Brunstein & Kilbert.

B. M. Johnson, Lime Spring, Ia., has sold out to J. G. Doan, Cresco, Ia.

The business of the late F. M. Prince, Seneca, S. C., has been discontinued.

H. E. Cobb, Ayrshire, Ia., will shortly move to Waterloo, in the same State.

The store of A. E. Winter, Bemidji, Minn., has been closed by the sheriff.

J. J. Livingston, Harrison, Ark., moved, recently, to Conway, in the same State.

The Morse Drug & Jewelry Co., El Reno, Okla., has been succeeded by V. A. Morse.

J. W. Cutright, formerly of Blacksville, W. Va., has gone to Hundred, in the same State.

H. O. Jacobson, Cumberland, Wis., has bought the store building in which his store is located.

James C. Throop, formerly of Columbus, Kans., is now located at Scammon, in the same State.

C. L. Kumner, Truman, Minn., was called to Brainerd, Minn., recently, by the death of his brother.

F. J. Post has taken a position as watchmaker and jeweler with Carl Hansen & Co., Tyler, Minn.

Jacobs & Co., Waterbury, Conn., have dissolved, and the business will be continued by R. Jacobs alone.

Joseph F. Creel, Carrollton, Ga., has admitted a partner, and the firm hereafter will be known as Coleman & Creel.

I. M. Radabaugh, Hastings, Minn., has bought the Norrish building, into which he will soon move his jewelry stock.

D. L. Nielson, Vermillion, O., who recently disposed of his business, has decided to locate in California for the Winter.

O. H. Olson has succeeded to the retail jewelry business of S. C. Hone, Osceola, Wis. He is having the store redecorated.

The Federal Watch Co. is a new concern which was recently incorporated in Pierre, S. Dak., with a capital stock of $1,000,000.

W. L. Davids, Troy, Ala., has just installed six large new mahogany wall cases and made other improvements, which add considerably to the attractiveness of his establishment.

William C. Diller, head watchmaker for G. A. Schlechter, Reading, Pa., who contemplated engaging in business for himself, has decided to remain in the employ of Mr. Schlechter.

William H. Smith, of Smith & Crosby, Attleboro, Mass., is again able to take up his duties. At the first of the season he was thrown from an automobile and received several severe injuries.

Christian J. Belles, Fargo, N. Dak., has been granted a divorce from his wife, on a charge of desertion. Belles stated that his wife deserted him 15 years ago and he has not since heard from her.

A. W. Cornelius, Asbury Park, N. J., has purchased the property of Robert Johnson, of that place, which includes two stores. Mr. Cornelius expects to move his stock to the new location during the early part of 1906.

Chas. G. Gordon, Shreveport, La., soon after arriving home from Waskon, recently, was taken by health officers to the detention camp because he had passed through Vicksburg while en route to Cincinnati. He was released from the camp after displaying proper health certificates accounting for all the time during which he was absent from the city.

N. F. Solomon, Macon, Ga., recently reported to the local police department that a valuable timepiece had been stolen from his store. The missing watch was finally found in the pawnshop of a pawnbroker named Goldman, where it was pawned by a negro. The latter declared that he had purchased the watch from a well known local character.

A report from Washington, D. C., Monday, stated that Acting Postmaster-General Hitchcock had just issued a fraud order against the International Jewelry Co., 346 Broadway, New York, on a charge of obtaining money by false pretenses. The company was charged with purchasing the names from letter brokers and sending to those persons circulars stating that the addressees had won a prize for the correct solution of a certain puzzle. The prize was described as "a handsome silver nut dish, guaranteed quadruple silver plate," and a set of silver table ware. But the company demanded $1.25 for packing and shipping the pieces. An investigation disclosed that the "silver ware" cost about 68 cents, and the Post-Office Department then stepped in.

Ernest J. Qvarnstrom, of Carter, Qvarnstrom & Remington, Attleboro, Mass., was quite seriously injured late Saturday by the explosion of a gas generator supplying the lights for his automobile. The accident happened on S. Main St., near the railroad crossing. Mr. Qvarnstrom and J. Cobb, of Mansfield, had both stopped their machines to make a slight repair, and as Mr. Cobb's lights were dim he asked the loan of Mr. Qvarnstrom's for the night. Mr. Qvarnstrom turned off both of his lights and took off his generator, and as he was handing it to Mr. Cobb it exploded with great force. Mr. Qvarnstrom seems to have received the full force of the explosion in the face. He was at once taken to the office of Dr. Charles S. Holden, and an examination disclosed serious injuries. His face was badly burned and one eye was injured to such an extent that he was removed to Providence for more available treatment. To-day it was reported that he was resting comfortably.

# DIAMONDS

Some very attractive novelties are included among our Fall designs of DIAMOND

REGISTERED HW TRADE-MARK.

JEWELRY.

## Newark.

The Mockridge Jewelry Co. last week caused the arrest of Patrick Madden on the charge of stealing tools valued at $12. The man was employed assisting stone masons in building work.

Joseph J. Hartman, in charge of Hahne & Co.'s jewelry department, recently began a suit for divorce, and his wife has since filed an answer emphatically denying all charges made against her.

## New Stores and Enterprises.

John Gaffner is a new jeweler in Saint Jacobs, Ill.

C. A. Nordhouse has just begun business in Wall Lake, Ia.

H. S. Shanks opened a store at Castlewood, S. Dak., last week.

T. L. Ferguson has engaged in business at 2306 Olive St., St. Louis, Mo.

Joseph H. Jacques last week opened a store at 17 Essex St., Haverhill, Mass.

George Bruhn has completed arrangements to open a store in Bellingham, Wash.

The Radius Jewelry Co., last week, began business at 83 Peachtree St., Atlanta, Ga.

A. Bone has started in the retail jewelry business in the McAlpin building, Bridgeport, Ore.

Edward Sohm, Jr., will soon begin business on Main St., between 5th and 6th Sts., Quincy, Ill.

H. M. Amadon recently began business on his own account, in Atlantic Sq., Stamford, Conn.

H. L. Merritt has opened a watch and jewelry repairing shop in Water St., Torrington, Conn.

F. J. Vater, a brother of Charles Vater, is about to enter the retail jewelry business in Galeton, Pa.

Gilbert Knutson, who has been east for some time, has returned to Pomeroy, Wash., where he will open a retail jewelry store in the Wolford building.

A. Yeager, formerly watchmaker with Russell Bros., 6th and Market Sts., Philadelphia, Pa., has opened a small retail store of his own at 22d St. and Girard Ave., Philadelphia, Pa.

The Royal Supply Co. was incorporated, last week, under Massachusetts laws, to deal in watches and jewelry, with a capital stock of $1,000. The officers are: President, Morris Miller; treasurer, Albert Goldman; clerk, Stanley Sternberg, all of Salem, Mass.

The Gardiner & Hall Co. has just been incorporated in New Haven, Conn., to manufacture and deal in jewelry. The capital stock is $10,000, divided into 400 shares of $25 each. The incorporators were: Robert S. and Edwin E. Gardner, and Stephen W. Hall, all of Derby.

## Trade Gossip.

The E. Ingraham Co., Bristol, Conn., has just issued a new catalogue—No. 33. It is illustrated in colors and shows a number of new designs of their clocks. The concern has added to its list a Mission-finished solid oak eight-day clock, 32 inches high and 12 inches in diameter.

The anniversary clocks, for which the Bowler & Burdick Co., Cleveland, O., are sole agents, are attaining a wide sale. A few days ago the house had an inquiry for them from a prominent jeweler in Copenhagen, Denmark. Many of them have been shipped to outside countries and the business in this country is rapidly growing.

Owing to the sale of the building occupied by the store of W. G. Crouse, Bloomer, Wis., the stock will soon be moved to another location.

## Providence.

W. A. Copeland has left for a six weeks' trip to Europe.

After a successful trip through the West, T. E. Bennett, of the T. E. Bennett Co., has returned to this city.

Among buyers in town last week were F. Goldsoll, of New York; M. Baumgarten, Baltimore, and L. Heller, Chicago.

The Reandeau Mfg. Co., formerly at 38 Friendship St., is now located in the basement of the Irons & Russell building on Chestnut St.

Finding that a growing business has severely taxed its present accommodations, the B. A. Ballou Co. has decided to take the floor space in the Dyer Land Co.'s building, formerly occupied by Waite, Mathewson & Co.

The F. I. Gorton Co., North Attleboro, provided the dedication badges for Providence Lodge of Elks at the exercises in connection with the dedication of the Elks' Memorial Sunday. A number of jewelers took part in the parade that preceded the formal dedication.

Now that the political campaign is warming up the names of jewelers, or those closely associated with the industry, are being mentioned in connection with various positions. Councilman Bixby is practically certain of renomination. George C. Richter, a designer for the Gorham Mfg. Co., and Edward I. Mulcahy, superintendent for Sydney Smith, are talked of in connection with a vacancy in the Seventh Ward Council delegation.

The temporary financial difficulties of Sommer & Kotler, manufacturers, interested jewelry circles somewhat last week. The firm is said to owe but about $2,000, and is attempting to secure an extension of time in which to pay certain claims against it. The Lederer Realty Co. and Mark Streicher are said to be the two heaviest creditors, and it is understood that the firm will have little difficulty in securing the concessions desired, as it has evinced every determination to pay all claims in full and continue in business.

By a peculiar coincidence last week at two jewelry establishments, on successive days, accidents almost of exactly the same character occurred. Fortunately neither was accompanied by serious results. The first was in the establishment of the Reandeau Mfg. Co., pearl manufacturers, Thomas McSherry, the foreman, being caught by a revolving shafting while doing some oiling, and being drawn up and whirled about at great speed. His predicament was discovered and he was released from his position and escaped with bruises. The second accident was in Brown & Mills shop, where John Fitzpatrick was caught in a belt and hauled partially over a shafting. His injuries consisted of a scalp wound and minor bruises.

## TO WHOM IT MAY CONCERN:

Everyone knows that specialties in Precious Stones and Pearls are not to be picked up every day; no one knows what day they may appear in the market.

A dozen short trips to Europe might not hit upon the accepted time.

In view of these facts, does it occur to you that a reliable expert of 27 years' experience, *always* on the *spot*, and continually on the *watch*, can serve your interests to great advantage?

Both time and money can be saved by collecting your goods in advance through the only American Commission Merchant in Precious Stones and Pearls located in Paris.

TRADE CONDITIONS.

The appearance at frequent intervals of new machinery in the local freight house, especially the last few days, has been a wholesome indication of the state of affairs in the jewelry industry. Another has been the demand for factory help.

Winthrop W. Barden, of Chapman & Barden, started Monday for a week's stay at New York.

Fred. A. Newell, of the Watson & Newell Co., has returned, after a Summer spent on the shores of Narragansett Bay.

Dr. Arthur B. Lamb, son of Louis J. Lamb, of C. H. Allen & Co., has accepted a position as instructor in chemistry at Harvard.

Walter L. King, with W. E. Richards & Co., was married last week to Miss Katharine, daughter of Selectman George A. Sweeney.

David E. Makepeace, of the D. E. Makepeace Co., has returned from New York, where he attended a trade conference at the Murray Hill Hotel.

Robert B. Macdonald, son of R. B. Macdonald, of R. B. Macdonald & Co., was married last week in Providence to Miss Louise W. Jenks, of that city.

Secret order associates, bearing several gifts, assisted last week to celebrate the 15th wedding anniversary of Hiram R. Packard, with the Daggett & Clap Co.

Gurney Bros., retailers, Brockton, Mass., have given up their show window to a display of the scores of beautiful trophy loving cups for the annual Brockton Fair and horse show.

The Atlas Silver foundry, closed since the sudden death of its owner, Albert Salt, several weeks ago, was reopened Monday under the old name. The purchasers were George C. Belcher, Russell L. Keith and Arthur I. Britton.

Walter E. Sanford, who sold out his jewelry manufacturing business, in this town, to open a retail store at Cottage City, Mass., was in town Saturday. He secured some stock for his store and had considerable personal property removed to his new home.

Albert S. Ingraham, of A. S. Ingraham & Co., presided, last week, at the first session of the Attleboro Masonic lodge in its new hall in the block erected by Winthrop F. Barden, of Chapman & Barden. The hall is the finest in the State outside of Boston. There were several charter members

present. The living charter members include Charles E. Bliss, recently retired from Bliss Bros.; John W. Luther, of J. W. Luther & Co.; Alfred R. Crosby, of Smith & Crosby, and John C. Cummings, of J. C. Cummings & Co.

Charles R. Bates, son of the late Joseph M. Bates, has been made administrator of the latter's estate, and, as such, has reopened the Bates & Bacon plant for business. Charles R. Bates has succeeded his father as a member of the directorate of the First National Bank.

Col. Sidney O. Bigney, of S. O. Bigney & Co., whose candidacy for the Governor's Council steadily gains support, has been indorsed by the vote of the Attleboro Republican town committee. Last Friday evening he was tendered a reception by the Dorchester Republican Club.

Miles L. Carter, of Carter, Qvarnstrom & Remington, and William A. Bigelow, of Sturtevant, Whiting & Bigelow, in an auto paid a flying trip to the western part of the State, last week. They left Attleboro, breakfasted at Worcester, dined at Springfield and took supper at Pittsfield.

When E. D. Gilmore, of E. D. Gilmore & Co., took possession of his handsome new residence on South Main St., Wednesday; he was made the recipient of a mahogany rocker, a mahogany bookcase and a Webster's International Dictionary, which were presented with a note of appreciation by his employes and associates.

## Harrisburg, Pa.

I. S. Ricker has bought the property, 817 N. 3d St., from Susan Owens for $7,500.

An ordinance for the better regulation of pawnbrokers was presented in City Council last week at the instance of Police Chief Hutchison.

The prize to be awarded the young lady receiving the most votes in the "Queen of Old Home Week" contest, to be determined Oct. 2, is a $150 diamond ring. It is expected that the total vote will reach 50,000. The official "Old Home Week" souvenir will include a John Harris button and a John Harris spoon, designed by C. Ross Boas especially for the committee. These souvenirs will be placed on sale about town.

## Pittsburg.

A. Kingsbacher, of Kingsbacher Bros. spent last week in Chicago on business.

W. J. Johnston, of the W. J. Johnston Co., spent two days of last week in New York.

Harry Heeren, of Heeren Bros. & Co. attended the wedding of a niece of Mrs Heeren last week at Somerset, Pa.

J. H. Hardy, of the Hardy & Hayes Co spent a few days last week in New York Mr. Hayes, of the same firm, returned last week from Cape Cod.

Samuel Weinhaus, of S. & B. C. Weinhaus, who has been dangerously ill with pneumonia, left last week for Atlantic City where the sea air is expected to restore him to perfect health.

The following out-of-town buyers visited Pittsburg last week: John Z. Simpson, Blairsville; E. A. Bloser, New Kensington; J. J. Schmidt, Turtle Creek; T. M. Smith, Morgantown; R. W. Kuhns, Youngstown; A. Merz, Sewickley; Adam Dobernecker, Derry Station; F. B. Theakston, Brownsville; J. W. Wolke, Monessen.

W. R. Blair, referee in bankruptcy, has issued notices that there is now on hand $3,778.85 for distribution among the creditors of the bankrupt estate of Durbin & Fuhr. A dividend will be declared Sept 3 at which time the uncollected accounts of the firm will be offered for sale. Mr. Durbin, of the firm, died before the firm went into bankruptcy.

Although nothing definite has transpired it is said that the syndicate seeking to buy the block bounded by Union St., Fifth Ave and Market St., are still after the property. The jewelry stores of J. C. Grogan & Co, John M. Roberts & Son Co. and J. R. Reed & Co. are located in this block, the stores all adjoining each other, facing on Market St. The property is one of the most valuable parcels in the city.

S. F. Roberts, of E. P. Roberts & Son, 25 Fifth Ave., stated last week that he understood that J. Alexander Hardy, of the Hardy & Hayes Co., had bought the building occupied by the Roberts firm. Mr. Hardy was out of the city at the time and the report therefore could not be confirmed but Mr. Roberts said that he was told that the deal was closed for $250,000. Mr. Hardy having had an option on the property. The Roberts house lease runs one year from next April. Mr. Roberts stated that his firm now has two locations in view, and that the indications are that a site will be bought and a building erected. The present store, he says, is too small for the firm's business purposes. If a site is bought which will be in the vicinity of the present store, a modern building will be erected.

B. Latourell, Minnesota Lake, Minn., recently suffered the loss of a large amount of jewelry by burglars.

# GORHAM SILVER

"SMALL JACKS WEE HAVE, TIP'T WITH SILVER, BESIDES THE GREAT BLACKJACKS."—*JOHN HEYWOOD'S "PHILOCOTHONISTA," A. D. 1635.*

¶ In response to the growing demand for Presentation Cups and Tankards less costly than those of Solid Silver, but yet of sufficient dignity and decorative value to serve as wedding or other gifts, or as prizes in Athletic Contests and Races, the Gorham Manufacturing Company have designed a series of notable adaptations of the Old English "Blackjacks" and "Leathern Bottles."

¶ The bodies of these are of heavy, handworked leather lined with red copper and mounted in Sterling Silver.

¶ They are of a desirable range of sizes from the drinking mug to the Tankard or Flagon, and so far as is consistent with their careful workmanship are exceedingly moderate in price.

JEWELERS of New Jersey cannot fail to be proud of the position which their State holds in the jewelry industry as shown by the preliminary annual report of the Bureau of Statistics, details of which are published in another column. New Jersey stands fourth in the list of States manufacturing jewelry, following Massachusetts, New York and Rhode Island. She stands practically at the head of all in the production of artistic wares of solid gold and silver, and her prosperity indicates the prosperity of the legitimate jeweler throughout the country.

### A Careless Way of Placing Safes

A RECENT robbery in New York calls attention to a very careless way in which many jewelers both in and out of New York, place their safes. These dealers practically invite robberies by making them possible without interruption, in placing their safes in a partition with the front opening into a store and the back absolutely hidden from view in the street. This offers an opportunity to the safe-crackers, who may come in from the back, to operate upon the rear of the safe without the slightest chance of being seen by a watchman, or by pedestrians, no matter how well the store is illuminated.

Jewelers seem to be under the impression that the door of the safe is the only means by which it can be entered by cracksmen, forgetting that in the case of most of the safes used by small jewelers, it is much easier to get through the iron or steel in the back, chisel through the cement, and force a way directly into the inner compartments, than it is to break through the main door and then into the smaller compartments within.

The robbery perpetrated last week is the second of this kind that has taken place in New York, and should stand as a warning to the trade. It clearly shows that the only sure way for jewelers to protect their stocks is to have their safes occupy such a position that they can be seen from four sides, placing it out some distance from the walls, or if this cannot be done by placing the back against a solid wall of the establishment and not against a partition.

### Foreigners and German Trade-Marks.

MAIL advices from Germany bring word to the effect that the Imperial Court has decided that foreign goods bearing a trade-mark protected in Germany, no matter how long the foreign firm may have used that mark, are liable to seizure on importation into Germany. An American house shipped to Hamburg, on the order of a German buyer, a consignment of goods bearing their old trade-mark, but as this particular mark happened to have been protected in Germany by a German firm two years prior to the importation, the goods were seized by the Hamburg customs officials, at the instance of the German who had registered the mark.

The American's answer was an action for wrongful seizure and a claim for damages. In the Strafkammer the seizure was upheld, and the Imperial Court, to which the American firm appealed, took the same view of the case. Section 17 of the German trade-marks act of May 12, 1894, gives a German court power to uphold such a seizure in the interest of German traders against foreigners.

It is thus open to any unscrupulous German firm to register in Germany the trademark of a reputable foreign house not registered there, work it at home for all it is worth, and get the goods of the foreign house seized should they be imported into Germany or to compromise with the foreigners if the amount involved is great enough to make such blackmail worth while.

### Address of President J. P. Byrne, of the Chicago Jewelers' Association.

CHICAGO, Sept. 25.—The first regular meeting of the Chicago Jewelers' Association since the Summer vacation, was held at the association rooms in the Columbus Memorial building last week. Routine business was transacted. The committee on social relations is the same this year as last year, and is composed of Lem. W. Flershem, M. A. Mead and A. L. Sercomb. President J. P. Byrne was in the chair and made an address as follows:

I congratulate you on the favorable trade outlook during the last half of the 28th year of this honorable association's existence. Thanks to a generous Providence, the farms of this great country have never before produced such enormous crops or the mines a greater output. Thus we have the two great essentials of prosperity—immense stocks ready to sell and plenty of money with which to buy. And so we manufacturers and purchasers of jewelry, relying on the liberality in expenditures of a prosperous people in flourishing times, may safely, I think, increase our orders above last year, so as to be prepared for a Fall and holiday trade unequalled in our history.

It is true that the news from Wall St. and from the legislative inquiry now being made in New York City into the conduct of the great life insurance companies, is not as cheerful as we could wish, but Wall St. is not the farming, nor the mining, nor the manufacturing world, where wealth is created by the sweat of man's brow, and its influence on the nation's life is waning and has been waning for many years. It is the realm of speculation (or gambling some people call it). The business of the members of this association is more stable—they don't deal in futures, although some of us may give a dating—especialy down south.

Speaking of things local, you may remember the teamsters' great strike during April, May, June and July, and we must admit it did affect many lines of trade in Chicago, but, nevertheless, I never saw money spent so freely for amusements in my life by all classes, from the humbler patrons of the Summer gardens, ball parks, lake boats, railroad excursions near and far, to the wealthier European traveler, and the still wealthier automobilist that visits the bumps of Glencoe, of whom this association has several (I mean automobilists—not bumps.) If there were not plenty of money in circulation all this would not be.

In yesterday's newspapers I read a despatch from New York stating that more than $250,000,000 in orders are now on the books of the manufacturers of cars, locomotives and steel rails. And that is practically one industry alone; it does not include structural iron for building or the 1,001 other industries of the land.

I cite these facts to back up my first statement that times are good and promise to so continue quite indefinitely. "They certainly look good to me," and I sincerely trust we will get our due share of the general prosperity.

I wish to add that the honesty of purpose of such vigorous public leaders as President Roosevelt, Governor Folk, Governor Lafollette, District Attorney Jerome, and others, in exposing corruption in high and low places, in high finance as well as in petty politics, is giving a much healthier tone to our national life than it has before experienced in this generation. The rare ability and dash and popularity of those men will surely give their life work a place in the heart and conscience of the coming era that bodes well for the country's future. I say Godspeed them.

## New York Notes.

Henry Fogler, formerly of Toronto, Can., has engaged in business at 262 W. 116th St.

Emil Pimsler, of Pimsler Bros., 77 Third Ave., announces his engagement to Miss Mary Harris, of this city.

I. Shonberg recently opened an office in the Downing building, 106 Fulton St., his metal factory remaining at 363 Hudson Ave., Brooklyn.

Christian Scherfig, American agent for the Royal Copenhagen Porcelain Co., returned this week from a western trip, during which he called on the jewelers in several States.

S. Hinman Bird, 2 W. 48th St., stepson of C. T. Cook, president of Tiffany & Co., who was seriously injured in an automobile accident in New Jersey, one day last week, has been pronounced out of danger by his physician. The chauffeur was killed in the accident.

James H. Hart, who was formerly in the jewelry business in Brooklyn, and retired in 1894, recently celebrated at the Palace Hotel, Montgomery, N. Y., the 51st anniversary of his marriage. Mr. and Mrs. Hart and their two daughters welcomed the guests to a family dinner.

A pearl merchant of this city has received a letter from a correspondent at Vincennes, Ind., saying that the quality of the shells has continued unsatisfactory, and the quantity of slugs being found is less than formerly. No pearls were found for several days, the writer says.

The newly organized Weinreb Co. has taken possession of the store of D. H. Greenberg, 600 Fifth Ave., Brooklyn, who goes out of business. The new corporation, which has an authorized capital of $5,000, will be managed by Arthur Weinreb, of the old firm of Weinreb & Merker, whose affairs are in litigation.

Louis C. Castagnetta, of I. Castagnetta & Son, and Miss Eugenia Di Mariano will be married to-day at the Church of the Archangel, 114th St. and St. Nicholas Ave. After the ceremony there will be a reception in the Star Casino, and later the bride and groom will go to Niagara Falls for a three weeks' honeymoon.

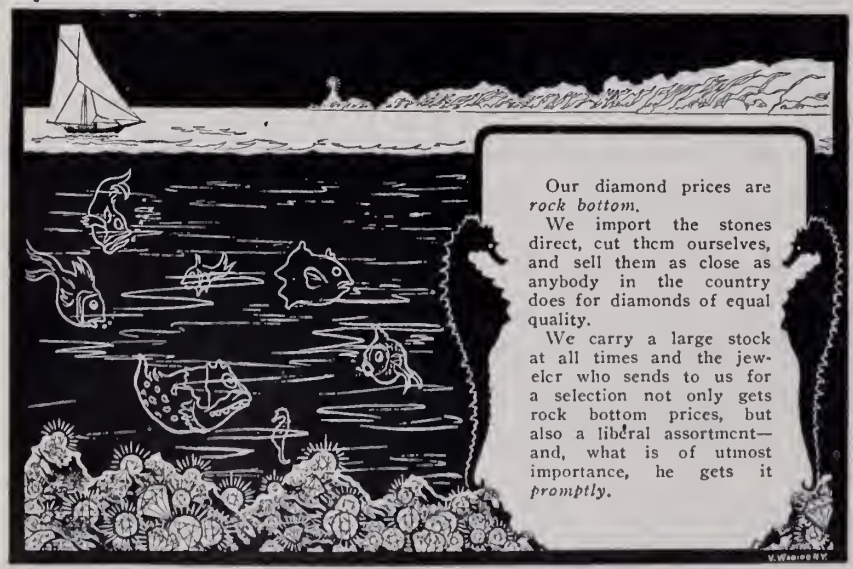
The Ideal Advertising Co. was recently organized by Leonard W. Sweet, of L. W. Sweet & Co., 37 Maiden Lane, with $100,000 capital. Mr. Sweet is the president and other officers included: J. S. Fiske, treasurer; W. W. Dashiell and S. Raives, vice-presidents; J. De Lyon Howth, secretary. The headquarters are in the Lorsch building.

Among the creditors of Joseph S. Jantzen, the former manager of the Subway Tavern, who recently filed a petition in bankruptcy, is the estate of Louis Neresheimer, London, Eng. Mr. Neresheimer was a member of the firm of Neresheimer & Co., diamond merchants, London and New York, and before his death he personally loaned the money to Mr. Jantzen, who was a relative.

Negotiations were recently opened with creditors of the late Max Rainess, who died Sept. 4, by his widow, who desires to continue the business at 1324 Third Ave. According to a statement made to the creditors, Mr Rainess, largely because of a long period of illness, had gone into debt to the extent of $4,000, while his assets were estimated at $1,500. The creditors are considering what to do in the case.

Fire which last Wednesday destroyed the upper portion of the two-story building at Eighth Ave. and 124th St., caused considerable damage to the jewelry store conducted on the ground floor by Alexander Backer. A flood of water poured through from the upper floor, as great streams were poured on the flames, which threatened adjacent buildings. Mr. Backer says that his losses are fully covered by insurance.

A black leather jewelry case, containing a quantity of chains, pins, fobs, bracelets and other jewelry, was stolen recently from Wm. A. Cook, of the Fontreau & Cook Co., Attleboro, Mass., while he was calling on a jeweler on Canal St., New York. The trays in the case were of black leather and have fleur-de-lis marks. The case had wood straps on the bottom and nickel corners. Mr. Cook sent out cards notifying the trade of his loss. He remained at the Astor House last week and then went back to Attleboro, not having heard anything regarding his missing property.



Sloan & Co., 21 Maiden Lane, are receiving congratulations on the opening of their new factory which took place last Saturday. The location at Fourth and Mt. Pleasant Aves., Newark, N. J., is close to the Erie railroad station, and real estate in that vicinity has been especially active of late owing to the fact that the railroad company is buying up property with the intention of building a new depot. Sloan & Co.'s factory now occupies a building 40 by 100 feet square and two stories high, which the company erected for its own use. New machinery has been installed, adding much to the company's facilities for carrying on its growing business.

Charles Augustus Seton, of C. Augustus Seton & Co., 43 Wall St., the brokerage firm, whose members were last week arrested on charges of larceny, recently bought two bills of silverware from the International Silver Co.'s store at 9 Maiden Lane, the amount being a little less than $1,000, for which payment was tendered in checks. The checks came back the next day from the bank with marks showing that they were worthless, and suit was begun against Seton to recover the price of the silverware. The papers in this suit were served on the broker about an hour before his arrest, and the summons being found in a pocket, when he was searched, the case was mentioned in the daily papers, whose reporters apparently were under the impression that the silver company's action, like the other proceedings against the firm, had to do with bond-floating operations. This was an error, as the International Silver Co. had no dealings with the firm, except the sale of silverware to Seton.

Creditors of Jacob Bikoff, Philadelphia, Pa., met Tuesday of last week in the Astor House, New York, where an attorney, representing the jeweler, made a statement of his financial condition. The liabilities were estimated at $6,800. The assets include fixtures valued at $700 to $800; outstanding accounts, $2,500. The attorney offered to pay 25 per cent. on the liability, 10 per cent. of which is to be in cash and the remainder

ROCK BOTTOM PRICES ON

DIAMONDS.

Our diamond prices are *rock bottom*.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it *promptly*.

CROSS & BEGUELIN

*Importers and Cutters of Diamonds and Precious Stones*

43 Rue de Meslay, PARIS Telephone, 2188 Cortlandt 17 Maiden Lane, NEW YORK

tes at four, eight and 12 months. This position did not meet with favor among creditors, who after some discussion re- ed to accept it, and asked for 30 per cent., uiring 10 per cent. to be in cash and the nainder in notes at three, six, nine and 12 nths. The attorney said that he was un- e to give a definite reply to this demand the creditors, but he would consult his nt and notify them at a later time. Mr. off began business in Philadelphia in 06.

S. B. Ross, of S. B. Ross & Co., 11 John , sailed for New York on the *Campania* turday.

A judgment in favor of L. W. Sweet & 37 Maiden Lane, was filed last Friday ainst Joseph A. Hoffman for $99.

Among the visitors to the office of THE RCULAR-WEEKLY in the last week were and Mrs. Thos. J. Routledge, Elmira, Y

Carl Rosenberger, of Cohn & Rosen- rger, 508 Broadway, will build a new $15,- cottage at Ocean and North Bath Aves., ng Branch, N. J.

The Simeon L. & Geo. H. Rogers Co., artford, Conn., is now settled in its New rk office, room 43, at 14 Maiden Lane, th Joseph Irons as manager.

The Electrolytic Art Metal Co., Trenton, J., has opened a sales office in the St. mes building, Broadway and 26th St., ere its line of gold and silver deposit re is in charge of Walter Goodman.

A certificate of incorporation was filed t week by the Geneva Clock Co., New rk, which is to have a capital of $5,000, d is to manufacture clocks. The incor- rators are: Isidor Lewis, Isaac Lewis, vid L. Schiff, New York.

A quantity of jewelry carried in the belt by Leopold Bruml, a passenger on the *Kronprinz Wilhelm*, from Bremen, was seized last week by customs inspectors. There were 10 brooches, an unset diamond, six gold chains and several other articles valued roughly at $600.

At the sale of the Brunswick Hotel site, Fifth Ave., 26th and 27th Sts., in foreclosure proceedings, last Friday, the purchaser was the Brunswick Site Co., the plaintiff in the suit, which bid $2,505,907. George H. Robinson, of the Gorham Mfg. Co., is one of the directors of the purchasing company.

A report was circulated last week that a pennyweight thief had succeeded in obtaining valuable rings from several uptown jewelers. At a Fifth Ave. house, the head of the house admitted that the thief had taken a $500 ring while making a petty deposit on a cheaper ring. An imitation stone ring was left in the place of the valuable article stolen.

Chester Billings & Son expect to open their new store, 255 Fifth Ave., across from the Waldorf-Astoria, next Monday. A large force of decorators is now at work putting the finishing touches on the interior. The show cases and other furniture are being placed in position and the stock will be introduced as soon as other preparations are complete. The store will contain all the usual departments of a high class retail jewelry establishment. Harry B. Billings will be in charge.

Edelhoff Bros. & Co. is the name of a new corporation which is now furnishing a store at 574 Fifth Ave. This store was leased early in the year by Chester Billings & Son, who intended to open there an uptown branch of their business, but subsequently they leased for that purpose a store farther south, on the same avenue, and have now given a sub-lease of the former premises to the new corporation. G. A. Edelhoff, the president of the corporation, is the son of C. A. Edelhoff, of Edelhoff & Rinke, importers at 22 Washington Pl. The mother of the president, A. G. Edelhoff, is the secretary and treasurer. The store is being fitted in mahogany, rosewood and bronze, and is to be opened by Nov. 1.

Some discussion is heard in the china district about the report that Secretary Shaw of the Treasury Department will appoint C. N. Burgess, assistant appraiser of the second division of Appraiser Whitehead's office. This division has charge of the importation of china, and Mr. Burgess is a brother of Wm. Burgess, a pottery manufacturer, of Trenton, N. J., who has been active in a campaign conducted by the domestic pottery interests for the purpose of the correcting of supposed undervaluations in imports of china and allied lines. It was reported that the importers may take exception to the appointment of Mr. Burgess on the ground that his sympathies would be so strongly with the domestic manufacturers. To a representative of THE CIRCULAR-WEEKLY several of the importers said that the supposed undervaluations have been at least in recent years almost entirely in cheaper grades of goods, and they did not believe that the trade in such lines as are handled by jewelers would be appreciably affected one way or the other by the appointment of Mr. Burgess, if it takes place. These importers said that they are as much interested as domestic manufacturers in obtaining fair valuations.

Forty watches and 20 lockets were distributed as prizes in the voting contest

which the *Daily News* of New York brought to a close last week. The awards were to the most popular election district captain in the Democratic organization in Manhattan and the Bronx, as determined by the votes. The prizes were presented at a banquet given last Thursday night in Shanley's Roman Court, at which speeches were made by Senator Grady and others. William J. Carey, 3 Maiden Lane, was a member of the committee in charge of the presentation exercises. Mr. Carey filled for the newspaper its order for watches and charms. The watches were American Waltham Riverside Maximus movements. The cases were of 14 karat gold, size 16, hand made, hunting style, plain bassine, with antique pendant crown and bow monogram in ribbon style, and inscriptions were on the inside. Solid gold vest chains matched the watches. The price of the watches and chains to the paper was $150 each. The charms were of solid gold, enameled, representing a tiger's head, with diamonds set in the eyes and a large diamond held between the platinum teeth. These charms, which are unusually attractive, cost the paper $60 each. Some captains received a watch, chain and charm, others a watch and chain, and still others a charm, according to the vote that they received.

Jagersfontein diamonds were advanced in price last week five per cent. by the London selling syndicate, according to a message received by cable by Fera & Kadison, the advance coming in time to increase the cost of a purchase made by the firm during the week. It is supposed that other importers who buy from the syndicate will receive similar notices, according as they request shipments of Jagersfontein stones. The quantity of Jagersfontein diamonds that has reached New York of recent years has not been large in proportion to the output of some other mines. One of the importers said that for four years until the present year no Jagersfontein diamonds were mined, according to the reports that prevailed. "I think," he said, "that the total imports of the Jagersfontein stones this year will not exceed 5 or 6 per cent. of the aggregate of diamond shipments, and certainly not more than 10 per cent. A certain class of high-grade trade, of course, insists on getting these white and blue-white stones, but because of their refractoriness there are disadvantages in handling them. There is more waste in cutting them than there is in the case of other kinds of diamonds. If we get out of a shipment of Kimberley or Wesselton stones 41 per cent. of fine gems, we get not more than 35 or 36 per cent. out of Jagersfontein stones. The prices of the Jagersfontein stones have been advanced from time to time, but not always at the same time, or at the same rate as other stones."

## Chicago Notes.

S. T. A. Loftis is in New York this week.

M. Newhouse has returned from a western trip.

Arthur Rovelstad, Elgin, visited this city, last week.

The Hub Loan Bank, David S. Levy, proprietor, has removed from 434 State St. to 386 State St.

Charles A. Garlick visited St. Paul and Minneapolis last week.

Creditors of the Marquardt & Scott Co. will receive their first dividend, Oct. 4. J. Bernstein's claim has been allowed.

C. B. A. Jerome, formerly of the Harris Co., has opened an office in the old Inter-Ocean building and is doing a diamond brokerage business. Mr. Jerome may possibly go to California for the Winter.

The offer of Clapp & Cowl to a compromise claim on a 25 per cent. basis will probably be accepted. In case, however, that no settlement can be effected the stock, appraised at $6,000, will be sold at auction Oct. 11.

A. Morck has sold out his jewelry business at 119 W. 24th St. to Wm. H. Hankan, and has embarked in business at 125 E. 22d St. Wm. H. Hankan is a brother to Max Hankan, 179 E. 22d St., and was formerly employed by him.

Geo. H. Harris, of the Harris Co., jewelers and loan brokers, 81 Monroe St., has reported to the police the loss of a two-carat diamond pin valued at about $300. Mr. Harris was on a West Side crowded car when the pin was stolen by a stranger.

M. J. Stanton, manager for the Walker-Edmund Co., and Miss Lottie Flagg, of Jackson Boulevard, were married Saturday. The wedding was private. After a two weeks' wedding trip in the east Mr. and Mrs. Stanton will be at home at 1157 Jackson Boulevard.

R. W. Scheedel, a retail jeweler, at 462 West 12th St., who died last week at that address, as told in the last issue of The Jewelers' Circular-Weekly, had been in business for about 20 years. It is believed the stock, which is small, will be sold, and the business wound up.

The police of the Chicago Avenue Station have recovered $3,000 worth of jewelry said to have been stolen by burglars and alleged to have been received by Frank Petorski, said to be a jeweler and pawnbroker at 133 W. 18th St. Petorski is charged with receiving stolen property and is held in bonds of $10,000.

A very unique piece of diamond jewelry is on exhibition in the show window of the Charles Moe Co., Adams St. It is a pendant composed of one large white brilliant weighing seven carats, a canary marquise diamond weighing 3¼ carats, a coffee marquise diamond weighing 3⅛ carats, and a blue white marquise diamond weighing 2⅞ carats. The pendant is valued at $5,000.

A watch charm out of the ordinary is worn by E. Coleman, a diamond dealer in the Champlain building. It is of roman gold, a little larger than a half dollar, and consists of a lion's head having two small diamonds for the eyes. The lion holds in his mouth a stone weighing 1¾ carats, and the edge of the charm is set with 42 small diamonds in a complete circle. The effect is very striking.

Louis J. Bohl, the diamond setter who was arrested recently in connection with Henry Hoffman, the alleged diamond smuggler, and who is now out on bail, was again arrested last week on the charge of obtaining money by false pretenses. It is claimed that he obtained $170 from Mrs. Hoffman, representing that he would secure a bondsman for her husband, but failed to do so. Bohl's case was continued until Sept. 28.

Thousands of dollars worth of property was stolen from the express companies during the late teamsters' strike. The Grand Jury has indicted a man named Roy Aldrich for stealing $231 worth of merchandise from the Newman Clock Co., in the Masonic Temple. The Unted States Express Co. was the name used by Aldrich in his swindling operation, but this company denies that Aldrich was employed by them during the strike. Aldrich's method was very simple. During the strike when drivers and collectors were changed every day Aldrich made the rounds of various offices, collected the packages and then disposed of their contents.

G. W. Sherman is disposing of his business in Victor, Colo.

## Kansas City.

TRADE CONDITIONS.

For four days, last week, there was a slu trade, due to rains in all parts of the s Travelers were waterbound between t mails were very uncertain. Normal weather c ditions again prevail, and the jobbers a th office and department aids are working overt Another prosperity sign is the fact that the b are already sending duplicate orders east for s plies for the Fall and holiday trades.

A. J. Sands, Lamar, Mo., replen stock here last week.

R. J. Furnish, Maryville, Mo., visited t jobbers here, last week, searching for elties.

Walter Jaccard, of the Jaccard Jewe Corporation, returned from his Europe trip, Monday, of last week.

Albert Willmun, a retailer in the Kan University town, Lawrence, was here, week, placing big orders for "frat" badg

Charles R. Moll has sold his retail bu ness at Gardner, Kans., and is now on t payroll of Frank Winkler, Kansas C Kans.

Miss A. Ganz, formerly with Char Mayor, a retailer of this city, has be added to the office force of the Edwards Sloane Jewelry Co.

C. P. Kionka, of Kionka & Stuhl, w return to Kansas City about Sept. 28. I business trip has been the most success in the firm's history.

G. S. Calhoun, whose watch sign i hung in Ottawa, Kans., for many years, w a recent visitor to this city. He is pl ning extensive improvements in his store

Ed. Girard has been installed as or clerk in the salesrooms of the Woodsto Hoefer Watch & Jewelry Co. Girard w formerly with the Edwards & Sloane Je elry Co.

Willard L. Wheedon, who sold his re jewelry business in York, Nebr., and w to Los Angeles, Cal., some time ago, p this city a visit, last week. His wife w with him. Mr. Wheedon is now engaged the stationery business and is planning add a jewelry line.

The store of Benjamin Peterson, 2 Washington Ave., Ogden, Utah, was brok into a short time ago by thieves who caped with about $300 worth of stock

## Omaha.

S. W. Lindsay has gone to Chicago on a ort business trip.

A. B. Hubermann has returned home om a three months' trip to Europe.

C. A. Nordhouse, who has opened a new ore in Wall Lake, Ia., was in this city last eek, purchasing his opening stock.

F. O. Furen, of the firm of T. L. Combs Co., returned home last week from urope, where he spent the past three onths.

T. L. Combs & Co. received the order ns year for 2,000 "Ak-Sar-Ben" souvenirs is to be a pin tray, of oval shape, and ade of sterling silver with the French gray ish.

The severe rain and wind storms of last week blew down the large clock in front of Fred Brodegaard & Co.'s store on N. 16th St., and also damaged the big sign in front of the store of Joseph Frazer.

Out-of-town buyers in this city last week were: K. C. Korns, Beatrice, Nebr.; H. Snyder, Plattsmouth, Nebr.; H. O. Martin, Cody, Wyo.; R. L. Powers, Grant City, Mo.; Harry Mann, Johnson, Nebr.; and Mrs. Owens, Sutherland, Nebr.

E. A. Weathers, who has been connected with the Bennett Co. for several years, and who recently took charge of the jewelry department in that store, was married to Miss Georgia Pauline Harpster, at White Cloud, Kans., Sept. 12. The couple will return to Omaha Nov. 1.

## Pacific Coast Notes.

S. P. Anderson opened a store at Paso Robles, Cal., last week.

W. J. Mitchell, Brawley, Cal., has just returned from a short vacation spent at the springs.

Thos. Canty, of Canty & Goodenough, Watsonville, Cal., has returned to his home in San Francisco, after a week's stay in Watsonville as the guest of his partner, N. A. Goodenough.

The store of J. Hanf, 3d St., Los Angeles, Cal., is being entirely remodeled. The old front of the store has been torn out and will be replaced with plate glass windows and display cases. The interior will be finished in mahogany with wall cases around the sides and in the rear.

# To the Jobbing Trade.

to the risk of mounting up your own diamond jewelry with the possible result of getting unsalable patterns in your stock?

We are direct importers of diamonds, and our ability to turn out desirable styles of mountings at satisfactory prices is well established, thus enabling you to avoid unattractive patterns by using our line of mounted jewelry.

If you have loose goods you want to mount we would be pleased to give you our advice as to how same can be mounted to best advantage.

**LEARN JEWELERS ENGRAVING**

"The Engraving School that Graduates Experts."
A fascinating, high-salaried and easily learned trade, taught thoroughly and practically by correspondence. Your instructor is the foremost authority and master workman in the world. We will teach the beginner better engraving by correspondence than he can gain in years of rigid apprenticeship. We will improve the skill of any engraver one hundred per cent. and make him master of the trade. The demand for competent engravers far exceeds the supply.
Send for handsome, illustrated prospectus.
**PAGE-DAVIS COMPANY.**
Suite 10, 90 Wabash Avenue, CHICAGO.

## San Francisco.

TRADE CONDITIONS.

Trade is now very satisfactory, in fact somewhat better than this time last year. The wholesalers are well satisfied with existing conditions throughout the west, for they are finding that the deficiency of crops existing in some sections is more than made up by good conditions elsewhere. Especially fine reports are coming in from the north, where the wheat crop is said to be the largest in years. Towns on Puget Sound are also flourishing, Vancouver, B. C., being the recipient of much praise on account of the very rapid progress which it is making.

---

Henry Wolff returned last week from his early Fall tip.

G. D. Schulze and wife, Dixon, Cal., are at present sojourning in this city.

Joseph S. Johnson, Concord, Cal., made a buying trip to this city, last week.

Chas. Haas, of Stockton, was here, last week, buying for his Fall trade.

W. R. Stammers, Selma, Cal., paid the wholesale trade a buying visit, last week.

Geo. Lewis, secretary of Shreve & Co., will leave in a few days for an eastern trip.

Geo. F. Blakeslee, Tonopah, Nev., has just left the city, after a rather extended visit.

C. J. Foster, of Shreve & Co., has returned from his European tour, after an absence of several months.

H. A. Minasian, Sutter Creek, made a brief visit to San Francisco the early part of last week, buying stock for his firm.

H. S. Dana, buyer for the gold department of Shreve & Co., left Saturday, Sept. 15, for a trip to the East in the interest of the concern.

Fred Davis and Al Cantor, well-known representatives of Nordman Bros., have just started on their respective trips to the Coast territory.

C. V. Mount, of Mount & Ross, Petaluma, Cal., paid the local jobbing trade a visit last week, when he made his selections for his holiday trade.

C. R. Goodenough, Colusa, Cal., is now in San Francisco, having come to pay the jobbers a visit for the purpose of replenishing his Fall stock.

F. Dobrowsky was in this city, last week, buying stock for the Golden Eagle Jewelry Co., Redding, Cal. Mr. Dobrowsky was accompanied by his wife.

Sim Englander, the popular Pacific Coa representative of J. Greenberg & Co., r cently completed one of his regular visi to the Coast and later left for the east.

The jewelers who visited the Admissic Day celebration at Sacramento, report ha ing had a very enjoyable time. The trac was well represented in the delegatic which the native sons of the Golden We sent to the celebration.

The name of D. S. Briggs, the we known jewelry salesman for Radke & C is being persistently mentioned as a pos ble candidate on the Republican ticket f the post of Assemblyman from the 37 Ward. Seers say if Mr. Briggs receives t nomination there is little doubt but that will be elected, as he is well known and immensely popular with all classes.

Ira B. Lothrop, formerly secretary a treasurer of the Rodman-Wise Co., jewele and opticians, Los Angeles, Cal., was a rested in this city, last week, on a char of felony embezzlement. There are t complaints against Lothrop. One charg that he embezzled $361 in cash and t other charges him with taking from t store a miscellaneous stock of goods v ued at $7,540.

Joseph Martin, convicted of burgla was recently sentenced to three years in t penitentiary at San Quentin by Super Judge Lawlor. Martin was formerly e ployed by Francis L. Cook, 1712 Maket He looted the place of business of his e ployer, secured nearly $7,000 worth jewelry and fled to Indian Territory was located there by Captain of Detectiv Burnett and was brought back to this c by Detective O'Dee.

Hammersmith & Field's new remode store, at 36 Kearny St., is now nearly co pleted. An attractive feature of the est lishment is the new front, which is of be tifully colored marble, with large plate gl windows surmounted by stained glass de rations. The walls and ceilings of the st have been newly tinted and ornament the Empire design being used with exc lent effect. The fixtures are all new and the most up-to-date pattern. New s glass show cases are among the other fe ures, and the whole is a work which p a high tribute to the designer's art.

## Cincinnati.

Lee Loeb, of Herman & Loeb, has returned from a trip through Ohio.

Sig. Strauss, of Lindenberg, Strauss & Co., has gone south on a business trip.

Mr. Lorch, of Letzler, Lorch & Co., Louisville, Ky., spent a few days here last week.

Joseph Hornback, of Joseph Hornback, has started on his regular trip among the trade.

Richard Welling, watchmaker for H. A. Rohs, Cynthiana, Ky., called on friends in this city last week.

Charles W. Hicock, of the Gorham Mfg. Co., who for some weeks has been laid up with typhoid fever, is reported as convalescent.

J. A. Bagby, Mt. Sterling, Ky., stated to friends here last week that he will soon return to Greenup, Ky., where he was formerly located.

D. Gutmann, of L. Gutmann & Sons, has returned from Canada and the east. Col. Ed. C. Pfaffel, of this house, is at present ill and unable to attend to business.

Carl Zoellner, son of Albert Zoellner, Portsmouth, O., stopped off in Cincinnati a few days last week, while en route to college in Michigan.

Charles E. Graham, of W. F. Fischer & Bro., Chattanooga, Tenn.; Edward Halladay, with H. C. Reed, Blanchester, O., and Mrs. J. A. Simpson, Blanchester, O., are learning engraving from A. C. Geiger, of the Clemens, Oskamp Co.

Richter & Phillips, 5th and Vine Sts., consider that their establishment had a narrow escape from being damaged a few days ago when a hoisting beam used in the erection of the new Havlin Hotel broke with a two-ton stone and came crashing against the side of the building in which they are located. Had not the stone shifted in its course the crash would have been greater and greater damage resulted.

Among the out-of-town jewelers who visited the Cincinnati trade last week were: G. E. Mosiman, of E. E. Mosiman & Co., Bluffton, Ind.; E. O. Collins, Franklin, Ind.; Frank C. Taylor, Carlisle, Ky.; W. H. Grosse, Dayton, O.; Walter Bentel, Hamilton, O.; Joseph Kern, Terre Haute, Ind.; J. Traugott, Indianapolis, Ind.; Asher Gotz, Columbus, Ind.; Philip Zoellner, Portsmouth, O.; Mrs. L. M. Kaelin, Nelsonville, O.

The sympathy of the trade is extended to A. M. Plaut, of the National Jewelry Co., Arcade; Joseph Plaut, 320 W. 5th St., and Morris Plaut, of Plaut & Co., 218 W. 5th St., in their bereavement due to the death of their mother, Mrs. Jeannette Plaut, who died Sept. 17 at the age of 70 years, at her home in Avondale. Mrs. Plaut was born in Mainz, Germany, and was the widow of the late M. A. Plaut, who was known for 40 years as a leading jeweler of Louisville, Ky. The funeral was held Sept. 20, and the interment took place in the Walnut Hills Cemetery.

## Cleveland.

F. B. Lewis, Colonial Arcade, spent two days in Chicago last week on business.

Webb C. Ball and two of his representatives attended the annual convention of the Traveling Engineers at Detroit last week.

Webb C. Ball has installed his time service on the Leavenworth, Kansas & Western railroad. He was in Chicago a few days ago, when arrangements to that end were perfected.

John Trapp, watchmaker at the Sigl Bros. Co.'s store, was presented with handsome silk umbrella by his associates the house Saturday evening, when he clos his work there to take another position.

In a suit for alimony brought agair Will G. Hildebrand, 263 Pearl St., by l wife, Judge Kennedy has issued a restrai ing order to prevent his selling the sto Hildebrand is charged with cruelty and no support in the petition filed.

Among visiting jewelers in the city t past week the following were noted: Jo Austin, Geneva; Fred Zang, of J. A. Zang Sons, Alliance; H. D. Pierce, Garrettsvill Walter G. Smith, Youngstown; Mr. Your love, of Austin & Younglove, Green Sprin C. Stausmyer, Fremont; F. R. Montgome Sandusky, and C. M. Wilson, Salem.

Nothing has been done yet toward a St organization of jewelers. In making t rounds among the local merchants, the C CULAR-WEEKLY correspondent has asked few of the most prominent what t thought of such a move. All of them ha indorsed it and say it would be a go thing, but so far none has seen fit to ta the initiative. It is believed, however, t if some one would take the matter up a work out a plan most of the jewel of the State would become interested. It probably true that they do not stand closely together now as members of so other branches of business, but there is reason for this. If any line of busin needs this it is the jewelry trade, beca when dull times or depressions of any k come over the country, jewelers are the fi to suffer.

W. O. Smith has sold out his busin in Sterling, Kans., to S. J. Gray.

TRADE CONDITIONS.

usiness was enlivened, last week, because of ndreds of visitors who came to attend the an l meeting of the Scottish Rite Masons of the thern Masonic Jurisdiction of the United es, the biennial convention of the Supreme ge Knights and Ladies of Honor, and the na- al convention of the Rural Letter Carriers' ociation. Souvenirs and novelties were in great and. Collections are reported satisfactory and nufacturers are working overtime trying to keep with orders.

Horace A. Comstock has returned from a ort visit at Tippacanoe.

A. R. Gray, of Gray, Gribben & Gray, nt last week in Chicago.

Emil Kernel, watchmaker for Carl L. st, who was seriously ill, is reported to somewhat improved.

Charles Mayer, of Charles Mayer & Co., companied by his family, has returned m the North, where he spent the mmer.

Charles J. Marson, of Cambridge City, l a buyer here, has completed extensive provements in his store. A well- ipped workshop has been added.

Charles Mayer & Co. have erected a ndsome E. Howard St. clock in front of r store on W. Washington St. The l of the clock, which is three feet in ameter, is supplied with an automatic itch which turns on and off electric il- mination.

Among the out-of-town jewelers who vis- d the trade here last week were: George emons, Greenwood; J. W. Hudson, Fort- le; J. A. Meissen, Cicero; F. Penning- n, Knightstown; Bernard Maier, Edin- rg; J. A. Pickett, New Castle; J. Henry ith, Greenfield; James O. Lutz, Zions- le; J. Meyer, of J. Meyer & Son, Elwood; S. Orr, Greenfield, and Joseph Hummel, Muncie.

Justice of the Peace Smock decided, last ek, that title to a ring bought on the in- lment plan remains with the jeweler til all payments are made. May Davis ught a diamond ring of Mayer Swartz, Illinois St., for which she was to pay 17. After making payments in the sum $6 she gave the ring to Maurice Sullivan. artz sued Sullivan for recovery. Having lost the ring, as he claimed, Sullivan was instructed by Squire Smock to pay Swartz $117, or the full purchasing price. The de- fense has appealed the case.

Gustav Joseph, a jewelry salesman, has sued the local Traction & Terminal Co. for $3,000 damages. In his complaint he says that while waiting in the Terminal sta- tion for a car to Dayton, he was approached by an officer of the Traction Co., who knocked him down, thereby injuring him and causing him to miss his car. He asks the damages for injuries, loss at being com- pelled to forego certain business engage- ments and for humiliation. In its answer to the complaint, the Traction and Terminal Co. avers that Joseph was intoxicated and noisy, and that to subdue him the officer had to exercise force.

## Columbus, O.

F. W. Wallis has returned from a 10 days' vacation to Mackinac and Sault Ste. Marie.

E. J. Goodman, of Goodman Bros., re- turned, last week, from a vacation spent in Canada and Michigan.

W. G. Bancroft, of the Bancroft Bros. Co., returned, Monday, from a trip to New York, where he purchased new Fall stock.

Edna Luchtenberg, aged 10, died, Friday, of tuberculosis, from which disease her mother died only 10 months ago. She was a daughter of Richard Luchtenberg, watch- maker in the store of his brother, G. Luch- tenberg.

P. C. Harris, of Harris & Co., opticians, was married Wednesday evening to Miss Ada Junk, daughter of B. W. Junk. The wedding took place at the bride's home. Mr. and Mrs. Harris have taken a home on Highland Ave.

Chas. Smith and Chas. Burnett, who were implicated in the recent robbery of the store of I. N. Pollack, Ashland, Ky., from whom about $500 worth of stock was stolen, have been taken into custody in Williamson, W. Va., and sentenced in the Circuit Court, at Catlettsburg, Ky., to four years' imprisonment in the Penitentiary. Some of the plunder was found in their possession, and they finally revealed where the rest of it had been concealed.

## St. Louis.

William Wolfsberger, foreman of the factory of Herman Mauch, 507 Franklin Ave., and Miss Alvina Sigrist, St. Louis, were recently married.

Goodman J. King, president of the Mermod, Jaccard & King Jewelry Co., was in London, all of last week. He departed for Amsterdam the early part of this week. He expects to sail for home about the first of October.

W. K. Bergfeld, of the H. G. Bergfeld Jewelry Co., came in from a trip in Missouri, recently, because of the floods. He was forced to ride overland 32 miles.

The Whelan-Aehle-Hutchinson Jewelry Co. furnished the loving cup which was recently presented by his friends to Thomas Maxwell, with the Samuel Cupples Woodenware Co.

George S. Stieffel, who was manager of the exhibit of Mermod & Jaccard, in the Varied Industries building at the St. Louis World's Fair, is now connected with Frederick Drosten, 7th and Pine Sts.

Ernest A. Niehaus and Mrs. Katherine Niehaus were married here, last week. Mrs. Niehaus is the divorced wife of her husband's brother. Frank H. Niehaus, of 1726 Market St. When F. H. Niehaus sued for divorce his brother was named as co-respondent. At present there are five brothers of the Niehaus family in St. Louis and two more in Germany.

Among the visiting jewelers in St. Louis, last week, were: C. F. Gash, Fredericktown, Mo.; A. G. Elliott, of W. B. Elliott & Bro., Camden, Ark.; H. E. Kay, Cape Girardeau, Mo.; Mrs. M. A. Bach, Taylorville, Ill.; A. W. Weigand, of Weigand & Bro., Shipman, Ill.; Fred Simon, Collinsville, Ill.; H. D. Jones, Trenton, Tenn.; T. C. Woodman, Greenfield, Ill.; Mrs. J. E. Ketche, Morrillton, Ark.; H. Ferguson, Maldo, Mo.; Jacob Bersche, Waterloo, Ill.; W. Wheeler, Palmyra, Ill.

The store owned by the William F. Muller Jewelry Co. at 1726 Olive St., was robbed, last week, the burglars sawing their way through two-inch steel bars. After helping themselves to silverware, the thieves attempted to break into a large safe, where valuable diamonds and jewelry were stored. The articles, which were taken from the show case, were valued at several hundred dollars. The theory of the police is that the thieves secreted themselves in the store of the store some time during the evening before, and waited until the store was closed.

Mighty Men O' The Hammer.

America's Best Known Auctioneers.

# The Man Behind the Gun
## or
# The Men Behind the Flag.

When a firm holds first place for a period of more than twenty years, during which time hundreds of jewelry auctioneers have come and gone, it proves not only their commercial standing, but their qualification as salesmen. The best reply that we can make to some adverse criticism that recently appeared in a Trade Journal relative to auctions, is our list of firms, whom we have made sales for in years past, who to-day are leaders in their various cities. Among the many are the Mermod-Jaccard Jewelry Co., St. Louis, Mo.; Chas. Crankshaw, Atlanta, Ga.; Wm. Beck, Sioux City, Ia.; A. M. Hill, New Orleans, La.; Sigler Bros. Co., Cleveland, O.; G. A. Schlechter, Reading, Pa.; The Parmlee Bros. Co., Los Angeles, Cal.

It is not the business that makes the man, but the man that makes the business. Our methods are to-day as they always have been—to build up a firm's trade and obtain money at the same time by closing out undesirable merchandise on a commission basis. That we have been successful, our credentials speak for themselves. The list below cannot be equaled by all others now engaged in the business combined.

More than 100 others, and the jobbers from Maine to California.

We are in the market with the cash to buy anything and everything you have in the way of merchandise in very large or small lots. Let us know whether you have anything in jobs, discontinued lines or goods that for any cause you are desirous of cleaning up on for cash. We will buy jewelry stores out complete in any part of the country.

We are in a position to make use of anything you have at a better price than you can obtain elsewhere. Send samples, price, etc., or wire us and we will have our buyer call on you.

Have you any specialties in your line that we can use to advantage in making auction sales?

**BRIGGS & DODD,** 45 and 47 Plymouth Place, CHICAGO, ILL.

## Philadelphia.

Ed. Sickles, of M. Sickles & Sons, is traveling in the east on business.

Joseph K. Davison, 718 Sansom St., is back from a four months' tour of the West.

Hollis G. Kelly, watchmaker, for B. L. Coder, Oxford, Pa., was married last week.

J. Burroughs Robertson, of M. Sickles & Sons' material department returned last week from his honeymoon trip.

Charles Diesinger, the Samson St. diamond dealer, has closed his Atlantic City cottage and returned to the city.

John Lohmeyer, watchmaker, has resumed his duties with Riggs & Bro., 3d and Market Sts., after a month's illness.

Another marriage in the trade last week was that of Fred Whitely, 5335 Germantown Ave., a retailer, to Miss Ott, of Bustleton, Pa.

J. H. Wheeler, Randolph, N. Y., who has finished a course in watchmaking, has accepted a position last week in Frederick, Md.

Charles M. Beerhalter, 719 Sansom St., is looking for a location somewhere in the northeastern part of the city, to open a retail store of his own.

Victor C. Dakin, who had until recently been connected with the estate of Thomas Liggins, 11th St., above Girard Ave., has entered the real estate business.

John C. Ober, Johnstown, Pa., whose store was burned out recently, was in the city last week arranging to re-establish his business and prepare for Fall trade.

Out-of-town retailers buying here in wholesale district last week included: D. H. Krause, North Wales, Pa.; E. K. Bean, Lansdale; J. Harry Holt, Mt. Holly.

I. Bedichimer & Co. have almost completed the furnishing and decoration of their new store, 1020 Chestnut St., and will move there from 11th and Sansom St. in a week or so.

Herman Diesinger, a wealthy retired jeweler, who had been in New York since his return from abroad, is in this city and has taken apartments for the Winter at the Frontenac.

Karl Kempter, 425 Poplar St., is receiving the felicitations of his friends in the trade on the fact that Mrs. Kempter has after 10 years of married life presented h with his first heir.

L. P. White, J. Warner Hutchins a some guests from the Philadelphia Jewele Club, went to Atlantic City, last week, formally close the Ours Club. A shooti tournament was one of the features of t festivities.

The condolences of a number of frier in the trade in this city were last week c veyed to the members of the family of t late Harvey Feldman of B. J. Feldma Sons, Franklin, upon his death from ne algia of the heart.

In the note describing the illustration the tiara designed by Harry Pollard, wh appeared in the last issue of THE CIR LAR-WEEKLY, by a typographical error Pollard's address was given as 101 Chest St.; this should have read 1011 Chest St.

The latest matriculants at the Phi ac phia School of Horology include: W Powell, Emporia, Va.; W. F. Evans, Savage, Md.; W. B. Wallace, Jr., Lexi ton, Va.; G. B. Pruett, Oakland, Col.; E. Hollis, Martinsburg, W. Va.; R. E. St Keene, N. H. G. L. Newman has left school to go in business for himself at old home in New Bremen, O. G. L. R ford, Tuscaloosa, Ala., has gone into bi ness with his brother.

Mary Devine, 15 years old, who was ployed in Simons, Bro. & Co.'s jew factory at 614 Chestnut St., was shorn her luxuriant brown hair, and her scalp torn from her head, last week. Miss vine while standing near a lathe on afternoon of Sept. 19 stooped to the fl to pick up something, when a strand of long hair caught in a flywheel. She instantly drawn to the floor. Her scre attracted the foreman, and the machin had to be stopped to release her. The conscious girl was hurried to the Jeffer Hospital, where it was found that her s could not be sewed up.

William Wildemore, who, for a qua of a century had been connected with old jobbing house of L. A. Scherr & which went into bankruptcy about se years ago, died and was buried in this c last week. Mr. Wildemore had been p tically retired on account of ill health s

old firm discontinued, but was nevertheless a figure in the Sansom St. trade. was very widely known and much liked his genial companionable and other able qualities. Death was due to dropsy m which he had long been suffering. neral services were held Wednesday m his late home, 612 Gaul St. He was a mber of St John's Lodge, 115, F. & A. which attended the funeral. Mr. Wildere, who was 65 years old, was a brother Jacob Wildemore, City Commissioner, l a Republican ward leader.

## Lancaster, Pa.

A. Huber, of the H. S. Meiskey Co., is eiving the congratulations of his friends the arrival of an heir.

Charles J Kinzer, Bluefield, W. Va., opped over in Lancaster last week on his y to New York on a buying trip.

C Martin, Duncannon; Jacob Fisher, zabethtown, and H. A. Hershey, Parkesg, visited the local trade last week.

Oscar M. Lowrie, now of Norfolk, Va., merly of the local jewelry firm of Keller Lowrie, is visiting his parents in this city.

Jeorge H. Danner, Manheim, a few days purchased a rare old clock in York nty It was made in Switzerland 125 rs ago.

Ezra F Bowman's Sons are erecting an proved fire escape on their factory. Hor- Palmer, an engraver for this firm, is on rip to New York.

B. Frank Harshey, who was with Augus- Rhoades temporarily during the Sum- r, has returned to his regular position h John B. Roth, Jr.

Williard Bush, formerly of Lancaster, C., was in Lancaster last week with his de. They are en route to New York, ere he is to visit the trade.

Thomas C. Mullenberg, representing the S. Meiskey Co., has returned from a three months' trip to the South, and Frank A. Huber, of the same firm, left Wednesday on an extended trip.

Several men employed on the Pennsylvania railroad were arrested Wednesday near Safe Harbor for robbing Nicholas Sylvester, a jeweler, of watches and jewelry valued at $250. Detective William Wittick recovered some of the stolen property.

L. C. Reisner, trading as L. C. Reisner & Co., who recently went into bankruptcy, has applied to the United States District Court for a discharge from all his debts. A hearing on this subject will be held in this court at Philadelphia Oct. 6, at 10 A. M., at which time creditors may show cause why the discharge should not be granted.

## Rochester.

M. L. Lowenthal, with Philip Present & Co., who has been in from the road to restock, left on his second trip last Monday.

Solonsky Bros. will open a new jewelry store in this city about the middle of October. The store will be located at 52 Clinton Ave., N. Solonsky Bros. were formerly in the retail jewelry business at Lestershire, N. Y. They will carry a general line and will cater to the credit and cash trade. The store will be 55 feet in length and about 15 feet wide.

Local merchants are much interested in the proposed new union trolley station and the consolidation of the trolley lines entering Rochester. At present there are but five lines entering the city, but it is probable that within a few months there will be several more. The suburban lines bring considerable business to the city, and should the consolidation take place, lowering the fares and giving access to some of the lines within a few miles of Rochester, merchants here think that trade will be boomed considerably. The plans as talked of now will connect the city with Buffalo and Syracuse and

## *Telephone Orders . .*

Are becoming more and more important in all lines of trade.

Nearly all the people of means have telephones in their homes and a large percentage of the buying in all lines of business is done by telephone.

A store without adequate telephone service closes its door to this high-class business.

Call 9010 Cortlandt, and ask for information regarding shopping by telephone.

***New York Telephone Co.***
***15 Dey Street***

also the smaller towns and villages to the north and south of Rochester. By centralizing the control of all the divergent lines Rochester will be made the center of the entire system.

"Pete" Rauber, the imitation diamond vender, is again being sought by the police. One evening last week "Pete" quietly started doing business on Main St. Near Stone St. he found a man whom he induced to buy one of the "phony" stones. After the man had paid his money he became suspicious and demanded that "Pete" return the cash, saying he did not believe the diamond was worth anything. Rauber asked him to cross the street to a hotel, where he would return the money. As soon as they were in the hotel Rauber sneaked out of a side entrance and ran up the street and escaped.

## Boston.

Richard Harkins, formerly in the employ of E. A. Cowan, is now with F. B. Chase, of the Marlboro Building.

J. W. Goldberg, Alexandria, Va., has been in Boston during the past week on a business and pleasure trip.

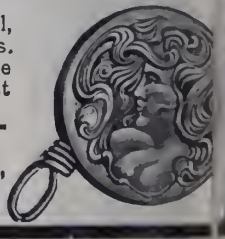
E. A. Cowan, of the Jewelers' building, who is traveling in the South, fortunately escaped injury, although a passenger on the "Davy Crockett" flyer that was wrecked recently between San Antonio and Houston, when the engineer and fireman of the train were killed.

The Montreal house of Smith, Patterson Co., the Summer St. jewelers, is to have new quarters early in the new year. A store and factory for the concern are under construction on St. Antoine St., next to the factory and salesrooms of the Gorham branch in that city.

Joseph Alpert, 5 Endicott St., is reported as missing, and several dealers are regretting the amount of credit which they extended to the young man. It is said that one dealer in the vicinity of Alpert's store trusted him to the extent of upward of $5,000 in diamond goods, and that several of the members of the trade in the Jewelers' building and other sections of the jewelery district suffer by his operations. An attachment has been placed upon his effects, but they are of small value.

Charles W. Johonnot, who had been for 19 years the head salesman and watchman for the late Charles W. Beals, has purchased from the administratrix the business which was established at 11 Milk St. upward of 30 years ago by Mr. Beals. It is a unique establishment in the trade, having a specialty of odd pieces of jewelry, and antique gems and curios, and Mr. Johonnot had been for years the expert buyer for Mr. Beals in this line, so that it seems especially fitting that he should succeed to the business with which he has been so long identified.

The thieves who recently broke into the store of Thomas W. Swan, Franklin, N. Y., were captured recently. The man arrested was Arthur Taber, who implicated two others. The accused are all boys of more than 16 years of age. The stolen property has been recovered.



## It's the Little Things that count.

The dainty little things that appeal at once to the casual observer. If it's useful, as well as ornamental, so much the better. Here is a LITTLE THING, so very useful and so pretty in design and finish, that you have but to show one to make a sale, and it yields a BIG PROFIT. It is called

## National Law Popular.

### elers in All Sections Favor Measure gainst False Marking of Gold and Silver.

HE CIRCULAR-WEEKLY'S bill to forbid rstate commerce in gold and silver im- perly marked, not only has met with or by the trade and public, but already ears to be strongly backed by the press various sections. Within the past few ks, among other papers, the Trenton J.) *Gazette* and the Jersey City *News* contained stories of nearly two col- ns in length, giving the substance of the the history of the movement which led o its being drafted, and favorable com- nt as to the general scope and purpose he measure.

HILADELPHIA, Pa., Sept. 20.—THE CIRCU- -WEEKLY'S bill meets with general ap- val in this city among the leading mem- of the trade:

derick Thomas, of J. E. Caldwell & Co.: h national legislation regulating the marking old and silver is certain to advance the inter- of jewelers of this country."

m. H. Thompson, Jr.: "I am in favor of the but although the traffic in spuriously marked and silver should be prevented, I am at a to know how any law, no matter how well ted, would prevent the conditions all retail lers have had to face in the past. A national would certainly be of more avail than State , but I doubt that it would be lasting in its ts."

seph B. Bechtel, of J. B. Bechtel & Co.: "This appeals to me very strongly. There is too h of this done even in our own city, but it ld especially apply to the manufacturers of east, not only importers, but those who deal in estic goods exclusively as well. It seems to hat such an act has long been demanded. We had to contend with the results following unfair and dishonest marking of gold and silver a long time."

Franklin Davison, of J. K. Davison's Sons: s law should have been passed years ago. have always been cordially in favor of the nal regulation of the marking of gold and r, as I am sure all other legitimate jewelers been. Anything that will insure a standard be welcomed."

Warner Hutchins: "I contend a law like this racticable and very necessary. I have always d it. It is certain a national law will be re- ted infinitely more than a State or city law. rs ago I advocated such an act. The trade de- ds some such protection as is accorded jew- s in France, Germany and other European ntries. I am heartily in favor of THE CIRCU- LAR-WEEKLY'S bill, and I am sure it will have and deserves to have the support of the entire trade. It should not only be passed but enforced rigidly."

D. V. Brown: "It's a good bill. It is a safe- guard to all classes of the trade and to the con- sumer as well. I should like to see it enacted into a law."

LANCASTER, Pa. Sept. 20.—In addition to the comments of local jewelers, already published, the following opinions have been expressed on THE CIRCULAR-WEEKLY bill:

W. W. Appel: "Such a law has long been needed. It would drive out the rascals in the trade. Jew- elers are compelled to rely on the honesty of manu- factures and are often fooled."

John J. Bowman, of Ezra F. Bowman's Sons: "We heartily endorse the bill, as it would prevent unscrupulous manufacturers stamping low grade goods as 14 karat gold. THE CIRCULAR-WEEKLY'S efforts to have such a bill passed are appreciated by the trade."

George R. Weber, of Louis Weber & Son: "Such a law would be highly beneficial to the trade, be- cause it would shut out spurious goods. Dealers and their customers would alike be protected."

CINCINNATI, O., Sept. 20.—Jewelers in this city are greatly in favor of the proposed stamping legislation and heartily endorse THE CIRCULAR-WEEKLY'S bill as a move in the right direction. Among the many opin- ions expressed were the following:

The Frank Herschede Co.: "Certainly we are very much in favor of having a national law for the honest stamping of all gold and silver goods."

Albert Bros.: "We endorse most firmly the ac- tion THE CIRCULAR-WEEKLY is taking regarding the stamping act. It is something the jewelers have wanted a long time."

J. K. Bingaman, of Bingaman & Co.: "I heartily co-operate with THE CIRCULAR-WEEKLY in the efforts to have passed this Fall in Congress the bill regarding the marking of all silver and gold jewelry according to the actual quality of goods."

Gebhardt Bros.: "We have always upheld this idea with our work and have in the past positively refused to stamp goods (namely jewelry) other than quality, even when so ordered, and know that if such a law were passed it would be a positive benefit to all honest and reputable houses."

The Dorst Co.: "We believe the efforts of THE CIRCULAR-WEEKLY to have a national stamping act passed a move in the right direction, which will have the support of all reputable manufacturers."

The Clemens-Oskamp Co.: "We favor any act tending to defeat unlawful pracitices of unre- liable manufacturers. Goods should be stamped according to their fineness and this stamp should mean what it says."

Jos. Noterman & Co.: "We are heartily in favor of any law to prohibit manufacturers from stamp- ing gold and silver goods in a way to indicate another than their quality. It would be a great protection to honest jewelers and public as well."

## UNITED STATES PATENTS.

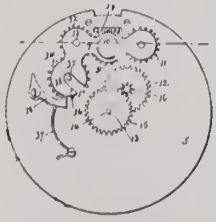
ISSUE OF SEPT. 12, 1905

**799,038.** FOUNTAIN-PEN AND PENCIL HOLDER. William F. Duryea, Brooklyn, N. Y. Filed March 16, 1904. Serial No. 198,497.

A device for detachably securing to wearing-apparel, a fountain-pen, a pencil, or like article.

the same consisting in the combination of a clasp, a spiral or coiled spring attached to said clasp and adapted to pass around said article to hold the clasp in position thereon, and a reinforce rod or wire extending loosely through the interior of said coiled spring and being substantially unattached or free to permit practically unrestricted expansion and contraction of said spring.

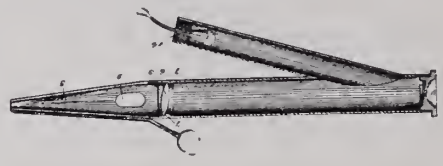
**799,056.** EAR-RING. Mathias Huber and Charles Huber, Chicago. Filed Oct. 24, 1904. Serial No. 229,772.



An ear-ring comprising a looped wire having its

two ends projecting in the same direction, one end adapted to pass through a hole in the ear and projecting a considerable distance beyond the other and provided with a screw-thread, a flat clamping-piece pivotally connected to the short end of the loop and provided with an elongated opening through which the long end of the loop passes and a nut on the screw-threaded end of the loop adapted to engage said clamping-piece so as to force it against the ear, the elongated opening permitting adjustment of the clamping-device along the threaded portion to provide adjustment for different-sized ears.

**799,087.** STEM-WINDING AND STEM-SETTING WATCH. William E. Porter, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed Dec. 6, 1904. Serial No. 235,725.



In a stem-winding and stem-setting watch, the

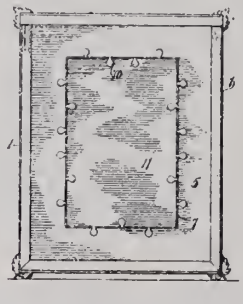
combination with a movement-plate thereof, of a spring-barrel, an oscillating winding and setting yoke, a longitudinally-movable winding and setting stem and a setting-lever connected at one end with the said yoke for swinging the same, operated at a point between its ends by the said stem and having its opposite end furnished with a pivot entering the said movement-plate between which and the spring-barrel the pivot end of the yoke is held against displacement.

**799,114.** SPECULUM. Crispus D. Tracey, Little Rock, Ark., assignor of two-thirds to Margaret Barnhart, Dunkirk, Ind. Filed April 27, 1905. Serial No. 257,709.

A speculum embodying in its construction a main

tube and a diaphragm-mirror and double-convex lens arranged therein and disposed at an angle to the long diameter thereof, and means for supplying light to the mirror.

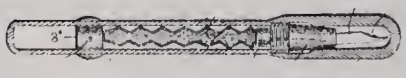
**799,133.** BRACELET. Henry R. Baker, North Attleboro, Mass., assignor to the R. F. Simmons Co. Filed May 23, 1905. Serial No. 261,771.



A bracelet comprising a plurality of wings hinged together, the hinge consisting of an inter-

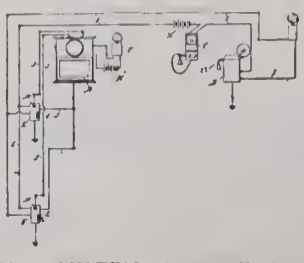
gaging tongue and lugs within the end of one wing, and a pivot-pin traversing the tongue and lugs and terminating within said wing.

**799,291.** PICTURE-FRAME. Joseph Babst, Hoboken, N. J., assignor to William Schimper & Co., Hoboken, N. J. Filed May 19, 1905. Serial No. 261,096.



A frame comprising a single strip of metal bent to form a front and sides extended rearwardly

therefrom intermediate the inner and outer edges of the front, the said sides being provided with locking lugs or ears along their rear edges.

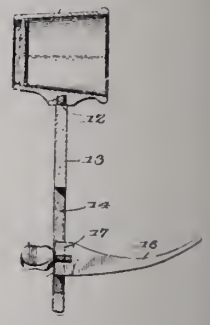


**799,297.** FOUNTAIN-PEN. Joseph F. Betzler, Akron, O. Filed April 3, 1905. Serial No. 253,619.

In a fountain-pen, the combination of a barrel, a corrugated, longitudinally-collapsible filling-tube,

said barrel and tube permanently assembled, a nozzle for a pen-nib and feeding means, and an operating device for the filling-tube embracing and movable on the barrel and connected with the collapsible tube for contracting and expanding the same longitudinally.

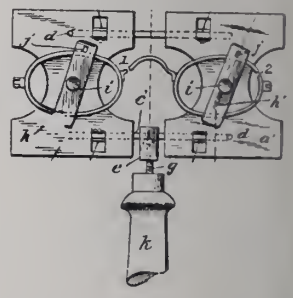
**799,422.** WATCHMAN'S RECORDING AND



ALARM SYSTEM. Albert E. Waggoner, Grand Rapids, Mich. Filed July 13, 19[0]5. Serial No. 165,221.

The combination of a watchman's clock havi[ng] means for recording various times, a ticker havi[ng] means for recording marks to indicate the va[rious] ous stations, a series of stations, separate mea[ns] for operating the clock and ticker located at ea[ch] station, and means at each station for simultaneously operating said means.

**799,444.** EYEGLASS AND EYEGLASS HOLDER. Henry F. Brown, Bethlehe[m] Pa. Filed Nov. 15, 1904. Serial No. 232,8[...]



An eyeglass-holder comprising a lens-support[ing] frame, a vertical standard carried by the fra[me]

and provided with a longitudinal slot, a vertica[l] adjustable mouthpiece having a terminal s[tud] adapted to engage the walls of said slot and [de]fining oppositely-disposed shoulders for engagem[ent] with the adjacent face of the standard, and me[ans] for clamping said mouthpiece in adjusted positi[on]

**799,532.** SPECTACLE-SOLDERING CLA[MP]. William E. Fenstermacher, Beloit, K[an.] Filed Sept. 30, 1903. Serial No. 175,[...]

In a jeweler's soldering-clamp, a table consis[ting] of two plates, rods extending between the sa[id]

and frictional bearings for the rods whereby [the] plates may be brought and held nearer togethe[r] farther apart and a clamping-bar on each plate.

**799,576.** EYEGLASS-HOLDER. Andrew Robbins, Rohbinsdale, Minn. Filed May [...] 1904. Serial No. 208,651.

The combination, in an eyeglass-holder, of a [...] clamp consisting of two parts hinged together [...]

the center and adapted to fit and rest upon the p[...] and the sides of the bridge of the nose of [...] wearer, and a spring secured above the hing[e] of said clamp and extending over and engaging [...] part of the clamp.

**799,612.** ATTACHMENT FOR SPOONS, FORKS, AND THE LIKE. James Moore, Greathend, Kans. Filed Aug [...] 1904. Serial No. 221,828.

As a new article of manufacture, an attach[ment]

for spoons, forks or the like consisting of a piece of wire bent so as to form a spring

dted to be slipped upon the shank of the spoon rk from the side, said wire so bent that each g of the clip will be composed of two strands, end of the wire bent so as to normally pro- into the clip between and beyond the inner of the same to form a spring for holding the hment upon the shank, the other end of the extending outward from the clip portion, then upon itself to form a loop adapted to stand at angles to the shank of the spoon or fork, extend rearwardly therefrom.

## DESIGNS.

36. BADGE. Richard O. Bolt, St. Louis, Mo. Filed July 17, 1905. Serial No. 270,-

143. Term of patent 7 years.

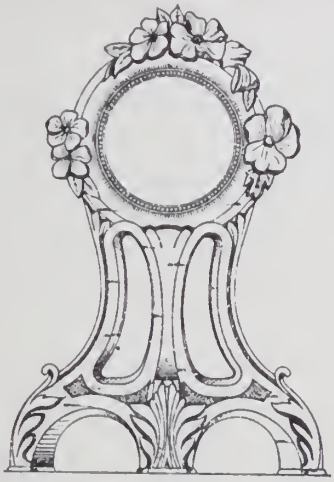
37. BADGE. George H. Baker, Brooklyn, N. Y. Filed Dec. 5, 1904. Serial No. 235,-

637. Term of patent 7 years.

38. BADGE OR SIMILAR ARTICLE. Willis Percy Carruthers, Oberlin, O.

Filed Aug. 8, 1905. Serial No. 273,306. Term of patent 7 years.

39. BADGE OR PENDANT. William D. Murray, Plainfield, and Frederick B. Schenck, Englewood, N. J., assignors to the



International Committee of Young Men's Christian Associations, New York. Filed July 3, 1905. Serial No. 268,288. Term of patent 14 years.

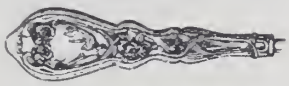
40. CLOCK-FRAME. Stanley M. Lawson,

Cincinnati, O. Filed March 20, 1905. Serial No. 251,152. Term of patent 3½ years.

41. CLOCK-FRAME. Stanley M. Lawson, Cincinnati, O. Filed March 24, 1905. Se-

rial No. 251,891. Term of patent 3½ years.

47. HANDLE FOR SPOONS, FORKS, AND SIMILAR ARTICLES. Frederick Habensack, Sag Harbor, N. Y., assignor to



the Fahys Watch Case Co., New York. Filed Aug. 3, 1905. Serial No. 272,613. Term of patent 7 years.

48. BACK FOR BRUSHES OR SIMILAR ARTICLES. Theodore W. Foster, Provi-

dence, R. I. Filed July 27, 1905. Serial No. 271,552. Term of patent 7 years.

49. HANDLE FOR BUTTON-HOOKS OR SIMILAR ARTICLES. Theodore W. Fos-

ter, Providence, R. I. Filed July 27, 1905. Serial No. 271,554. Term of patent 7 years.

50. HAT-PIN. Saghatiel G. Mandalian, North Attleboro, Mass., assignor to Casper

& Mandalian. Filed June 12, 1905. Serial No. 264,960. Term of patent 7 years.

52. POCKET SAFETY-CLIP FOR FOUNTAIN-PENS AND PENCILS. Moses H.

Duryea, Hackensack, N. J. Filed April 19, 1905. Serial No. 256,495. Term of patent 3½ years.

## TRADE-MARKS.

PUBLISHED SEPT. 12, 1905.

[The following trade-marks have been adjudged entitled to registration under the act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

SER. No. **1,114.** WATCHES. ELGIN NATIONAL WATCH CO., Elgin and Chicago, Ill. Filed April 11, 1905.

**ELGIN**

The word "ELGIN."

SER. No. **2,865.** WATCHES, WATCH CASES, AND WATCH-MOVEMENTS. E. HOWARD WATCH CO., Riverside, N. J., and Waltham, Mass. Filed April 24, 1905.

E. Howard & Co.

The letter, word, character and abbreviation, "E. HOWARD & CO."

SER. No. **3,907.** TABLE SILVERWARE. TOWLE MFG. CO., Newburyport, Mass. Filed May 1, 1905.

The representation of a lion rampant on the letter "T."

SER. No. **8,982.** FOUNTAIN-PENS OF THE SELF-FILLING TYPE. THE CONKLIN PEN CO., Toledo, O. Filed June 24, 1905.

The representation of a hand holding a fountain-pen in an ink-well, with a cuff and a portion of a coat-sleeve showing at the wrist.

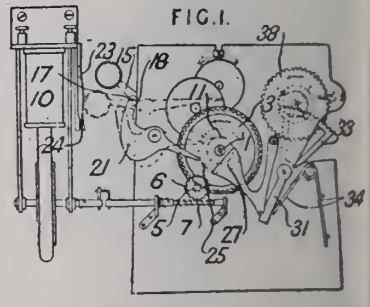
## BRITISH PATENTS.



ISSUE OF SEPT. 6, 1905.

(ABRIDGMENTS OF SPECIFICATIONS, 1904, FROM *Illustrated Official Journal.*)

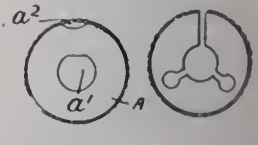
**10,818.** CLOCKS. G. D. BARILE, Varnato, Bie Italy. May 10.

*Winding-Mechanism.*—The movement being train with the arbor 1 of a toothed barrel 3 latter is turned, to wind up the mainspring weight, by means of an electromotor 10 and w

FIG. 1.

gear 6, 7. Normally, a heavy lever 15 is ported by a pivoted prop 18 which ends in a p engaging a notch in the lever, but, when a pi on a disk on the barrel arbor lifts the l slightly, the prop drops till a pin 21 on it st the frame-plate. The lever accordingly dr ps w the pin leaves it, and presses the electri con 23, 24 together to complete the circuit of the tromotor. The winding then proceeds till a 25 on the barrel has raised the prop and again into the engaged position.

*Striking-Mechanism.*—The striking-train 38 l driven by a spring 34 on a toothed sect r 33 tail 31, the latter is put by an arc-shaped 27 which is wiped by the pin 25 on the win wheel 3. In a modification, specially suita le turret clocks or other large clocks, the r the striking-train gears into the winding p and is in the same plane as the barrel movement.



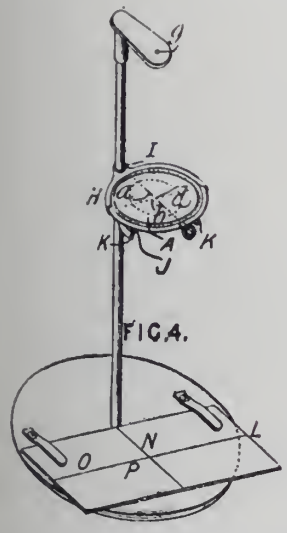
**10,856.** TABLE FORKS. C. B. OGG, Home Upper Warlingham, Surrey. May 11.

The outside prong is beveled so as to cut pastry, etc.

**10,931.** RESERVOIR PENS. A. F. COLE derminster. May 12.

Relates to a device for readily unscrewi nib-holding portion of a reservoir pen fro

FIG. 2. FIG 10.



main portion. The collar A shown in Fig one or more internal facets $a^1$ which engage similar facets on the pen, thus enabling th

rtion to be unscrewed. The exterior edge of e collar is roughened, and, in order to more sily locate the facets $a^1$, similar facets are pro- ded at $a^2$ disposed in the same radial direction. odifications are described, in one of which the llar has an oval aperture for use with pens of oval-shaped section, and in another the collar adapted to a pen provided with a series of shal- w flutings, which also enable the pen to be ipped more easily in writing. The collar may also ve a quick-threaded screw formed on its internal ge so as to engage with a similar left-handed rew on the pen. Fig. 10 shows a form of collar apted to be closed to embrace a pen of any sec- on. The provisional specification states that the llar may be closed also by a cam arrangement, a per screw arrangement, and after the manner a closing chuck or closing pencil protector. also states that the pen and collar may be con- ructed in a "ratchet" fashion, so as to permit un- rewing only by the collar.

**1,069.** TESTING LENSES. H. H. Lake, Middlesex.—(F. Hamilton, Providence, R. I., U. S.) May 13.

Relates to apparatus for testing cylindrical and ismatic spectacle lenses. A transparent circular

sk A, with a graduated edge, is mounted to otate in a frame H carried by a standard I. This andard is fitted with a peep-hole *g* at the top, nd at the bottom with a white card ruled with ectangular lines N, O. The disk A is also marked ith rectangular lines *a*, *b*. Preparatory to testing cylinder, the card L and disk A are adjusted ntil, as seen from *g*, the lines N, O lie behind the nes *a*, *b*. The lens to be tested is then placed n the disk A, which is rotated until the lines N, ) and *a*, *b* again coincide. The inclination of the xis of the cylinder to the axis of shape can then e read off. Neutralizing-lenses may be placed in rames J, K. For testing prisms, the lines *a*, *b* re graduated in millimeters. The lens to be tested s placed on the disk A, and its spherical and cyl- indrical components neutralized. The displacement of the point *d* with respect to the point P, as seen from *g*, is a measure of the prismatic power, the rectangular components of which can be read off on the graduated lines *a*, *b*.

**11,216.** WEDDING-RINGS. F. Kammerer, Pforzheim, Baden, Germany. May 16.

Plated wedding-rings are formed by bending a disk of the plated metal into a cup. A small perforation is made in the center of the bottom and the inner wall is formed as shown in Fig. 4. The inner wall may also be made as high or higher than the outer wall. The higher edge is then bent down as shown in Fig. 5, or the two edges are bent together and soldered.

*Complete specifications accepted Aug. 30, 1905.*

1904.

**23,236.** THIMBLE. Griffith.

1905.

**11,887.** NECKTIE-HOLDER. Woodyatt.

**12,395.** CANDLESTICK. Binns.

*Applications filed Aug. 21 to Aug. 26, 1905.*

**16,884.** COLLAR-RETAINER. Fernand Salmon, 48 Lillie Road, Fulham, London.

**16,914.** WATCH-WINDING INDICATOR. Fred McIntyre, Southampton Bldgs., Chancery Lane, London. Complete specification.

**16,959.** SAFETY CLIP FOR BROOCHES. Sam Mendel, 55 Market St., Manchester.

**17,066.** COLLAR-RETAINER. Fernand Salmon, 48 Lillie Road, Fulham, London.

**17,077.** TIME-RECORDER. Peter MacMaster, Southampton Bldgs., Chancery Lane, London.

**17,117.** CRUET AND CRUET-STAND. C. A. Schierwater, 10 St. George's Crescent, Liverpool.

**17,203.** FOUNTAIN-PEN. F. C. Edgar, 29 Sydenham Road, Cotham, Bristol. Complete specification.

**17,271.** STUD. John Williams, 48 Corporation St., Birmingham.

### Elias N. Chiz, Worcester, Mass., Files a Voluntary Petition in Bankruptcy.

Worcester, Mass., Sept. 21.—Elias N. Chiz, an Armenian manufacturer of men's suspenders, who also did a large business in jewelry, filed, last week, a voluntary petition in bankruptcy.

An attachment on his stock was recently placed by a cousin, and this was supposed to be a friendly proceeding. Directly afterward another creditor placed an attachment on a $400 claim. Then followed the bankruptcy proceedings.

It is reported that a considerable quantity of the jewelry has been sold in New York.

Leon C. Skinner, with J. A. Schrott, Herkimer, N. Y., and Miss L. M. Walrath were recently united in marriage.

**A Press and They're On!**
**A Press and They're Off!**

The most practical Eye-Glass holder in existence—the double-pin attachment keeps it from turning sideways. No points or rough edges to tear the lining of the coat. Prevents loss or damage.

THE HOROLOGICAL REVIEW

## ore About Escapements of Clocks and Watches.

ranslated for The Jewelers' Circular-Weekly from the *Almanach de l'Horlogerie.*)

Part II.*

*(Continued from issue of Sept. 20.)*

AS in the recoil escapement, dead-beat escapements have been attempted with o wheels. Fig. 14 exhibits one, of whose ventor we have no knowledge. The two heels R, R, fixed on the same arbor, carry

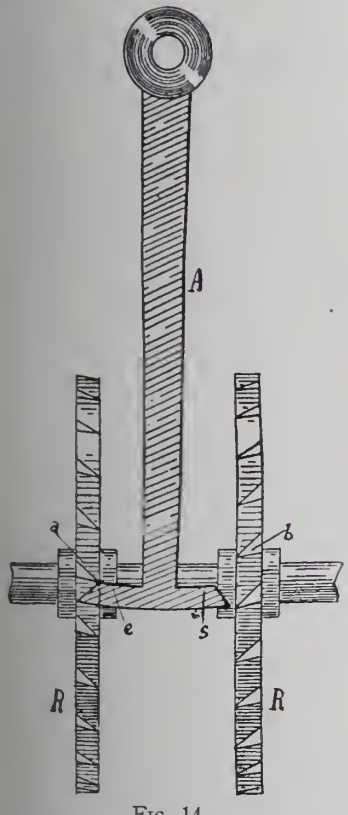

Fig. 14.

iangular teeth, working alternately the ver A, which has the form of a reversed , and which moves between them; the orking of the escapement thus arranged is ill the same. In the illustration the tooth of the left wheel is commencing to slide er the corresponding inclined plane. Th

*Part I. was concluded June 29, 1904.

lever, pressed back toward the right, will be ready to receive on the other side on its locking face *s*, the following tooth *b*, of the right wheel.

Another arrangement of the kind, but in which the wheel turns on two different ar-

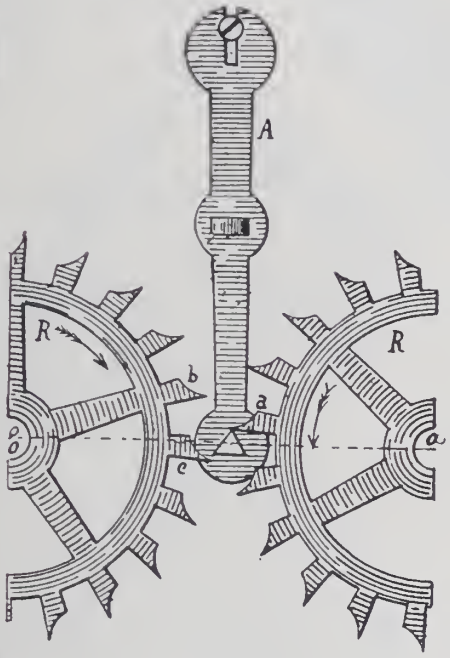

Fig. 15.

bors, is seen in Fig. 15. This contrivance recalls that of a recoil escapement we have previously shown. It is due to the horologist Brocot, the inventor of a well-known escapement, of which we shall speak further on. The escapement piece is also formed of a single arm, which carries at its lower extremity a triangular pin, of which two sides serve as lifting planes. This arm is adjusted on its arbor in such a way that it is possible to cause it to ascend or descend without changing its pivoting point.

If the arm is brought down so that the top of the pin, where the lockings are effected, is at the height of the line *o, o*, joining the centers of the wheels, there will be no recoil. The pin being higher, as seen in the drawing, it can be seen that the wheels will undergo a recoil movement during the supplementary arc. The construction was invented for the purpose of giving at will a certain recoil that might correct deviations in the rate.

This escapement made its appearance at the Paris Exposition of 1839, and Saunier tells us that, being adjusted without recoil, it caused a deviation of 17 seconds in 24 hours, whilst, with a certain recoil indicated by experience, the deviation was only 1 or 1½ seconds, and that the oscillations of the pendulum were more extended.

In Figs. 16, 17 and 18 are three escapements invented by Thiout, the renowned French horologist, and author of a treatise on horology published in 1741.

The first of these escapements (Fig. 16)

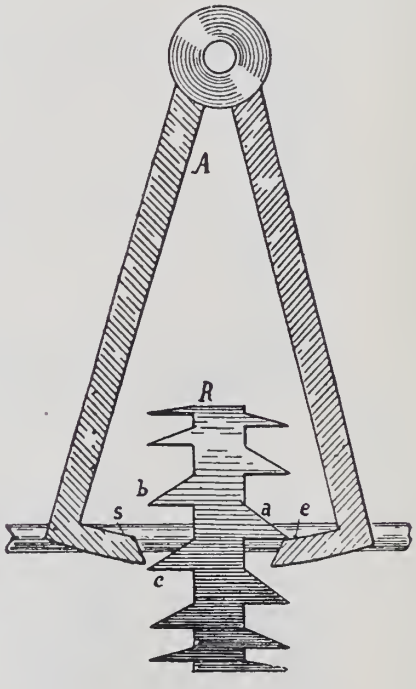

Fig. 16.

is composed of a wheel having a double teeth-range and a lever working edgewise with this wheel. In examining the form of the lever, the arrangement on the inclined planes, the mode of action of the wheel, which works in the same direction on the two pallets, one cannot help noticing a similarity to the pin escapement, which

was invented about the same period, and of which we shall speak later.

The working of this mechanism is effected in the same manner as in the Graham escapement, except that the action of the

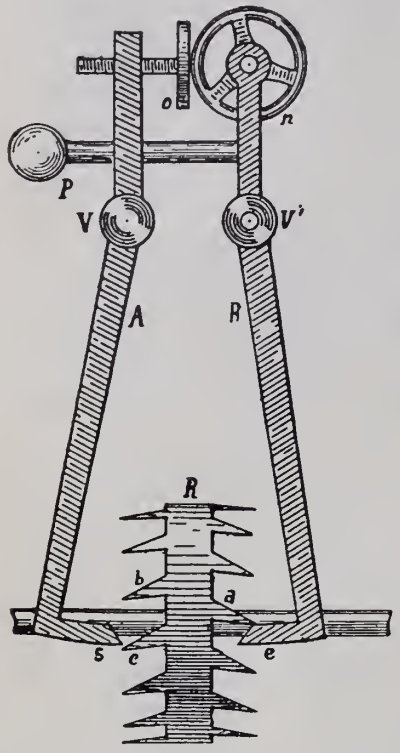

Fig. 17.

wheel on the pivots of the lever takes place in the same direction. But this advantage is annulled by the considerable friction produced on the lockings.

Thiout has complicated the escapement

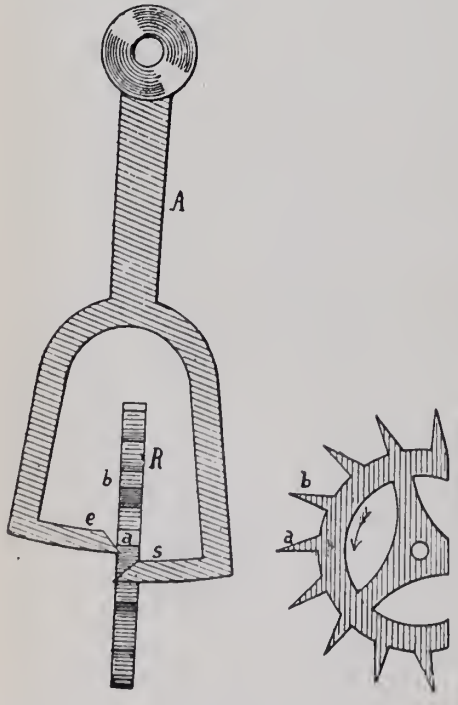

Fig. 18.

by giving it two pallets, each pivoting on a different arbor (Fig. 17). This construction resembles that of a recoil escapement we have previously described, and its author designed it especially for large clocks. The fork is fixed on the arbor V of the pallet A, and the pallet B follows all the movements of the first by means of the counterweight P, which serves to maintain the friction roller *n*, constantly pressed against the roller *o*. The adjustment of the escapement is accomplished by means of the screw on which this roller is adjusted. The establishment of the two arms of the lever on two different pivoting points causes a complication without advantage.

All escapements, recoil or dead-beat, constructed on this principle, have been soon abandoned. Such was the case with this one, and Thiout was the first to recognize that the mechanism, like the preceding, was not satisfactory. He himself states that preference should be given to that represented in Fig. 18. This is certainly preferable, for the lockings are secured under better conditions. In order that the working should be more readily understood, we have given on the right a front view of the wheel. The tooth *a* is about to operate the lift on the inclined plane of the left, and fall on the locking *s* to give the impulse in the opposite direction. It will then be the turn of the tooth *b* to effect its purpose after being locked at *e*.

We now come to the Brocot escapement

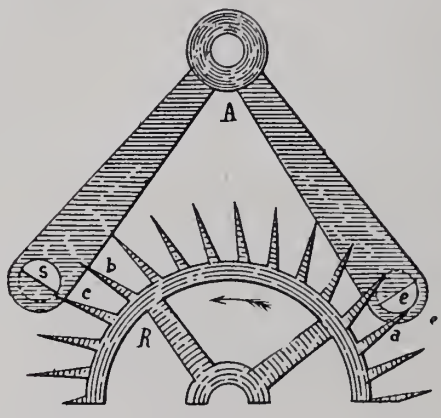

Fig. 19.

illustrated in Fig. 19. Here the pallets consist of two semi-cylindrical pins, on the rounded part of which the pointed teeth of the wheel make their lockings, and then slide off to produce the impulse. The lifting faces are formed on each side by the rounded form of the pins or rollers. As seen, the tooth *a* is locked against the pin *c*, its point will slide on the rounded part, thus pressing back the lever. The tooth *b* will then come into locking against the roller *s*.

*(To be continued.)*

---

Hale & Co., Bluffton, Ind., have dissolved, and the business will be continued by E. B. Edmunds.

In Pittsburg, Pa., is a clock repairing establishment bearing the unique title "Clock Hospital." Among the timepieces which are received are some of great historic interest.

Frederick J. Eygabroat, president of the Eygabroat-Ryan Co., Lawrenceville, N. Y., died recently at his home at that place, of typhoid fever, aged 30 years. Mr. Eygabroat for several years had been connected with J. Hoare & Co., Corning, N. Y. He is survived by a widow.

## Clocks and Their Striking Chimes

AMONG the numerous varieties clocks are tower clocks, hall cloc mantel clocks, iron clocks, brass clocks a wooden clocks. Wooden clocks were fi made in the Black Forest in the 17th ce tury, about the year 1660, where their ma ufacture continued under the difficulties war and alternating peace for about t centuries. In the year 1730 the first cuck clock was made; in 1750 the first tow clock was finished, made entirely of b wood; in 1768, glass bells for striking clo were introduced, which circumstance led the making of chime clocks.

In the first half of the 19th century Bla Forest clocks were peddled throughout G many by the identical makers of the Within a few years of the memory of liv individuals Eli Terry began the manuf ture of wooden clocks with a saw, a c pass, a drillstock and a jackknife in the w and rocky hills of Connecticut, where made the wheels of apple tree wood, plates of oak wood and the shafts and p ions of snake wood; the pivot holes w bushed with ivory and box wood, wh bushes needed hardly any oil. In the y 1810 he sold his factory to Seth Thon and Silas Hoadley, two of his leading wo men. What a change within a century!

Tower clocks are placed in elevated tions, such as public buildings and chu steeples. Some have several dials. Most them strike the hours and some of th the quarter hours. Well endowed chur supplement these clocks with carillons playing on diatonic bells, rendering tune of familiar hymns and chimes while more liberally fitted up churches have clo which play compositions of the old co posers. These carillons consist of from to 40 bells, which are stationary and played on by a clavercine, a sort of p keyboard, fashioned somewhat like a pi The player strikes the keyboard wit gloved fist and by a mechanical contriva the hammer falls on the rim of the bell at once is lifted away.

Another instrument is used when carillon does not consist of more than bells. It is contrived on the principle the well-known musical box. A large n ber of wooden or metallic pegs are fixe a revolving drum, where they are faste When made of metal they are fastened the inside of the drum by means of n This revolving drum contains number holes for shifting the pegs for adaptin to play new tunes. This device is a matic and, although the resulting tones not as clear as when struck by hand, possible to arrange more difficult music it.

The carillon reached its highest deve ment in the 18th century, in Belgium, u the famous Mathias Van den Gheyn, w music, after his death, could not be rende by any of his successors. In Europe, clavercine method with the striking p is now perfected by electricity, and an or performer may play any part of suit music.

During the early part of the last cen and later it was the custom of Eng watch and clock makers to make ind vually long case-weight and pendulum c which collectively came into use all

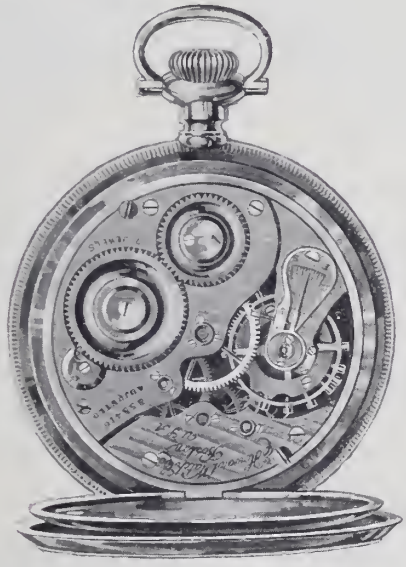
England. These clocks had second pendulums and struck the hour. On account o their unwieldy size they did not find places in any other part of the dwelling than the halls, from where the striking of the hours could be heard all over the house. These clocks were justly called "hall clocks."

These clocks were substantially made kept good time, and soon attained the reputation of being reliable and indestructible Similar and equally excellent clocks were soon made in Holland, Belgium and other places bordering on the North Sea and the Baltic. The striking of some of these clocks was so loud and harsh on their unmusical bells that an attachment was made to them with a hand pointing to a small dial, engraved *"strike"* and *"silent,"* which enabled the owner to stop the striking during the night time and, by pulling a string cause the clock to repeat the hours at any time.

For public places and stations these clocks were made to strike the quarters on ding dong bells, which soon developed a musical improvement and caused an attachment of eight bells to be made, on which chimes were played, of which the Cambridge chime became the favorite. This led also to the playing of chimes in churches and in tower clocks. Among these was the great clock of Westminster. These Cambridge chimes were founded on a phrase of the opening symphony of Handel's air, "I know that my Redeemer liveth," and were arranged by Dr. Crulch for the clock of Great Mary at Cambridge, in 1793.

The playing of the chimes on cast bells of copper and tin soon failed to satisfy musical critics, as these bells at times showed not only a grating sound, but also changed their pitch on account of molecular disturbance. Owing to the latter defect they had to be retuned. This can be done either by turning away the edge of the bell, which will raise the pitch, or by turning away from the back of the basin, which will lower the tone. The competition of dealers in chiming house clocks soon caused the use of composition bells to be superseded by the adoption of the sweeter toned cathedral gongs, which had been in use for some time, but the properties of which were little understood.

The cathedral gongs were henceforth of very fine steel, bent in a volute curve, the blade of which had to be tapering, having its thin end at the point of attachment and the thick part at the free end. The tap of this gong had to be continuous and without the slightest interruption if a melodious tone was desired, free from any jarring noise. These gongs did not have to be hardened, but needed careful tempering after blueing, which latter operation was performed by radiation on glowing peat or turf, which retained embers for a long number of hours, *i. e.*, from night till morning. The gradual cooling of a gong on the turf would accomplish the tempering most admirably and produce resonance.



Gongs were generally fitted on a solid piece of brass, resting on a slender rod the foot of which was attached to a sounding board. Here we have a worse state of affairs in interfering with the continuous correct pitch than with the cast bells. Consequently another improvement in the strik

# HOWARD COMPLETE WATCHES

**(16 Size Only)**

THE Howard Watch is a *complete* watch—more than a combined movement and case. It is *complete* in its adjustment—adapted to all conditions of weather and wear; *complete* in its jeweling—no vital bearing exposed to metal friction; *complete* in its faultless mechanical construction; *complete* in its finish—exquisite as the work of a lapidary; *complete* in the method of packing, both for safe transmission and effective show-case display; *complete* in system of marketing—from the factory to the pocket, an honest and fair deal all around; *complete* in its splendid success as a profitable seller and as a reputation-builder for the jeweler. If you have not ordered, *write now* for our booklet giving full description and prices at which the *Howard Complete Watches* are sold to the public; also list of jobbers from whom they may be obtained.

ing of these chime clocks, the introductio of the tubular bells, was most welcome These consisted of long brass cylindrica tubes, which had their respective tones, ac cording to length, diameter and thickness It is asserted by some that the idea o these tubular bells was suggested by a mu sical toy, which was constructed of sma brass tubes, played on by children by leather covered hammer. However this ma be, a patent was secured, which was fo lowed by a number of others, coverin claims for improvements.

This competition accentuated the mer of the tubular bells, which must be sai to possess charming sweet and resona tones, excelling all previous efforts in th direction. The fitting up of chiming ha clocks with these bells is novel and jew elers were recently afforded an opportun of clearly seeing how this was done in a exhibit made by a firm of New York clo importers (Harris & Harrington), who fi ted up a sample movement for exhi tic at their place of business, where they al showed how an old clock may be adapt for these new bells. H. R

### An Old Neuchatel Watch.

IN a recent report Ch. Huguenin, D rector of the Horological Section of t Technikum of Locle, Switzerland, furnish the following interesting data regarding antique timepiece, which we in turn trar late from the *Revcu Internationale d'Ho logerie:*

The products of the early Neucha watchmakers are exceedingly rare, hen the acquisition of a watch from that per may be considered a stroke of good fo tune. The Horological Museum at Lo is the lucky recipient through the ge erosity of one of its patrons, Fr Henchoz, of a watch bearing the name D. Jean Richard and embodying cert features which claim our special attenti

The watch in question is enclosed in thick case, which shall be described lat Only the movement has been reproduc It has been photographed in such a way th the most interesting details are visible a the photographs show the actual size of t original. It has been very interesting compare this piece with another wat made by Daniel Jean Richard, which h been in the possession of the L'Hardy f bois family at Colombier since the co mencement of the 18th century, at wh time it was presented to Pastor De Bely the community of Locle. Jules Grossm the well-known authority of Locle, h studied the watch donated by F. Hencl very closely, and avers that he has nev seen such an old piece of workmanship, a it cannot be gainsaid that these crude d tails constitute one of the first attempts watchmaking made in Neuchatel

Passing along to a detailed study of t mechanism, let us say that the lower pla 44 millimeters in diameter, is fixed ecc trically by two screws on a larger plate, as to bring the staff of the center wheel the middle of the dial. It is a matter conjecture whether this awkward dispo tion is due to the inexperience of the mal or perhaps was the result of an alter transformation.

Four pillars fashioned by means of

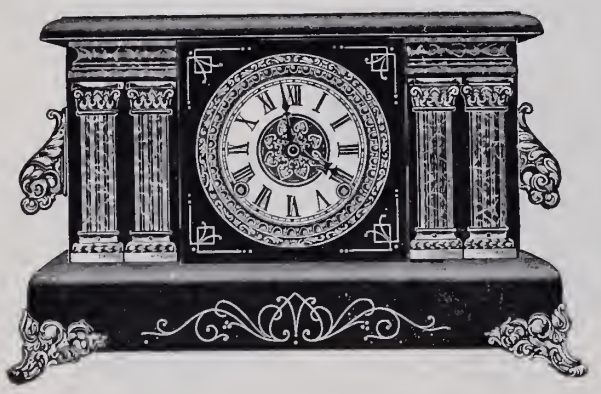
file separate the plates. One of them, however, has been replaced no doubt at a later date by a turned steady-pin, viz., the one seen in the upper figure.

The movement is composed of the barrel, the fusee, two wheels with their pinions and a verge escapement. The wheels are crossed by three arms in the shape of sage leaves, only the center one being plain. The handwork is readily recognized in the rounding off of the teeth in a very pronounced form of barleys. Several teeth have been replaced with solder. The execution of the pinions of eight and of six leaves is as rudimentary as that of the wheels.

Let us now examine the steel balance, which, though light, has a relatively large diameter (24 millimeters), and possesses only two arms. One of them is provided with a shoulder in which is fixed a bristle which at that time took the place of the balance spring. Before the invention of the latter, which by some is attributed to Huygens, in 1674, and by others to the Abbé Hautefenille, or Doctor Hooke, this very flexible material was made to oscillate between two stop-arms and to produce the back-and-forth motion of the balance. With such contrivances the regulation of a watch could not have been an easy task, and it may be observed that it had become necessary to increase the weight of the balance by means of solder.

So far as we know the rare watches of Daniel Jean Richard which have remained in Switzerland are provided with a balance spring, from which it may be concluded that

TWO EARLY NEUCHATEL WATCH MOVEMENTS.



the one under discussion here is still older. The working of the teeth on the pallets of the verge is regulated by means of a brass screw which turns one of the escap pinions.

The transmission of force from the ba rel to the fusee is accomplished by mea of a gut-string, which primitive org watchmakers were soon forced to repla by the more durable and stronger ste chain, whose invention is ascribed to Gru a citizen of Geneva. In the main sprin which was doubtless replaced at vario times, appears the name "Alfred Jeanne Robert, 1870."

The barrel arbor carries a small whe moved by an endless screw by means which the spring is wound. The strain this accessory mechanism has split the pl from the edge to the center, gravely co promising the rate of the watch. This quired radical repairing. After havi drilled two holes, the watchmaker rivet down a strong steel clip, which holds t two parts securely in place.

The piece is furnished with the us stop-work found in fusee watches. T considerable height of the movement, mm., and consequently that of the tu have made it possible to adjust the c very simply on a polished stem f arbor. The maintaining spring is not m use of, but then the precision of these struments was not sufficient to warrant employment of such an organ.

The screws, springs and other small p have the same appearance as those f

Daniel Jean Richard watch cited abo The bristle, of which we have alrea spoken, destined to regulate the wat passes through a semi-circular opening the cock. The widening of the balance a to which it is attached is plainly visible our illustration. The engraving of the pl with the numerals 1, 2, 3 and 4 in the ch acters of the period are also percepti through the aperture.

An indispensable organ, however, is sent, namely, the fork, designed to limit extent of the arcs of the balance. A de ration done by means of the graver acanthus leaves and birds, covers the up part of the cock; it is plain, while the pi is pierced.

Surrounded by an engraved m name Daniel Jean Richard appears on large plate in characters identical with th of the inscription D. J. R., 1729, of house which that able watchmaker oc pied in Locle (house of F. Henchoz-Hug nin, situated on the "Monts"). The up plate bears the name "Meyronne," wh may have been that of the owner of timepiece, although this is not certain.

The brass case, 58 mm. in diameter 34 mm. thick, with dust cap, is so worn t it is almost impossible to form an idea the decoration on it. Upon clo spection, however, one will come to conclusion that the outlines of a dragon be made out.

The joints, stem and bow are very cru ly made. Barring a cannon-pinion adju on the long arbor of the centre wheel th is nothing left of the motion work, or the hands and the dial. All the brass p are fire-gilt and have resisted the actio time relatively well.

Hence, after considering the difficul which had to be overcome by the builde this old watch, constructed without all ingenious means at the disposal of the m ern craftsman, without machines or e the necessary indication for making tools requisite for the difficult undertak we must pay due homage to the consti tor of this timepiece, who succeeded, des all the odds against him. Daniel J Richard became the father of an indu to which the Neuchatel mountains owe t r prosperity and rich development.

## Horological Notes.

AMONG many recent additions to the teresting collection in the Histor Society building in Canandaigua, N Y clock that once hung on the wall of the Phineas Bates tavern that was loc across Main St. from the Granger p there. It is of quaint design, and th probably a hundred years old ticks off time as merrily and accurately as whe told the hours at the popular hostelry T interesting clock has been in the posses of the McJannett family in that town s 1840.

An old reconstructed hall clock is ow by Henry Clapp, Monterey, Mass. Acc ing to a fashion that prevailed among cl tinkers, a notation was made on the ba of its dial under date of March 16, 1774 dicating that it was cleaned and repa then for the last time.

no advertising whatever, being used insively as memorandum and calendar es.

n the left of this are shown two pages n the 12-page booklet of the George Bell Denver, Colo. The cover pages are of own tint, relieved by a scarabaens de- in robin's-egg blue, set in a background golden rod, with a conventional black ler. The purpose of this booklet is to se interest in the symbolism of gems.

### The Judicious Use of Advertising Space.

THE promiscuous advertisements illustrated below, of different sizes and used in single column, double column and triple column space, are presented to the reader principally to show the various ways of utilizing advertising space, upon the proper use of which successful advertising depends.

Advertising space is most profitable to the advertiser when it is used continuously. When serial advertising is done the ads. should follow regularly, one after the other,

Given the right advertising medium, unsatisfactory returns are due to the injudicious use of the space of that medium, which means that either the advertising has been spasmodic (not continuous), or else the text has not impressed the reader, so that the latter's attention and subsequent interest may be arrested psychologically. This latter expression is intended to signify that wonderful mental process by which alone the reader becomes first interested and finally a buyer, and by means of which, moreover, powerful advertising (and to be powerful it must be continuous) makes men

A PROMISCUOUS COLLECTION OF ADVERTISEMENTS SHOWING HOW DIFFERENT JEWELERS ADVERTISE AT THE SAME SEASON OF THE YEAR.

e text is dignified in tone and the me- nical make-up is excellent. The borders ch embellish several pages are printed rather striking color combinations and Assyrian, Egyptian and *art nouveau* in *tif*. "If you would buy a watch, buy a d one," is the catch phrase of a unique page folder, 27/8x5 inches, illustrating the n model watches of Henry Birks & Sons, ntreal. The half tones showing several es of these watches are sharp and clean and the originals have been judiciously cted. The typographical arrangement is asing.

---

he man who does not believe in adver- ng nowadays is considered by thinking n as ridiculous as the modern atheist.

and should not be used at random or only at long intervals.

The text of an ad. should be weighed as carefully as that of a lawyer's brief. As a veteran advertiser once remarked, rather epigrammatically: "Any one may say anything in any old way, but every one cannot say everything in the right way at the right time." Consequently an effective ad. cannot be written without intelligence, knowledge of the article advertised, good judgment and a certain amount of literary ability.

Advertising space may be likened unto a field which, supposing the soil to be fertile, will yield a good or a bad crop, according to the way in which it is tilled and the care and attention bestowed upon it.

feel that they really know a product which they have never really seen. Briefly, it makes a reader intimate with an advertised product.

The first advertisement illustrated herewith, that of the C. Preusser Jewelry Co., Milwaukee, Wis., occupied a space of five inches, double column. That the space was used to advantage was subsequently demonstrated by the desirable returns. This concern recently used a series of advertisements similar in style and make-up to the one illustrated herewith.

"At your service" is the apt catch phrase of the advertisement of Frederick S. Ayres, Elmira, N. Y., who informs prospective tourists and vacationists that it would be well to have their clocks, watches and jewelry re-

## Retail Advertising Department.

paired by him before they go away.

As told in THE CIRCULAR-WEEKLY, Aug. 30, 1905, George T. Brodnax, Memphis, Tenn., has a novel mode of meeting department store competition, his advertising methods being quite as effective and up to date as theirs, at the same time evincing the dignity which should mark the jewelers' publicity. The Brodnax ad. shown on page 103 is well worth careful study for the above-mentioned reason. It was used in a space of nine inches, double column.

The B. H. Stief Jewelry Co., Nashville, Tenn., tells what may be purchased in the way of signet rings in a well-constructed advertisement of six inches, double column. The line border, although not original, is a serviceable one for newspaper advertising.

Albert Pfeifer & Bro., Little Rock, Ark., are extensive advertisers, and the six-inch, double-column ad. in the group is only one of their convincingly written announcements which appear in the local newspapers regularly.

The Mermod, Jaccard & King Jewelry Co., St. Louis, Mo., uses a large amount of newspaper space, and its ads. appear in the daily newspapers continuously and regularly. Prices are invariably quoted and usually set in heavy-faced type. The present ad. occupied eight inches, triple column.

The A. Graves Co., Memphis, Tenn., has a unique scheme of enlivening trade, as explained in its ad. of five inches, double column.

Schwarzschild Bros., Richmond, Va., show the advisability of purchasing diamonds as an investment, in a space of four inches, single column. This is a small ad., but informative and attractive. Compare this advertisement with that of F. B. Strawn & Bro., Cleveland, O., and with a little thought you will see that the argument of the first is the one most likely to attract prospective buyers. The first ad., it is true, is not as attractive typographically as the second, but the suggestion of saving, *i. e.*, the appeal to the money-acquiring instinct, is what counts. The Strawn ad. is just one-half an inch larger than the Schwarzschild announcement.

The advertisement of Charles S. Stifft, Little Rock, Ark., calls attention to the birthstone for September in a well-set ad. of three and three-quarter inches, double column.

C. E. Gifford & Co., Fall River, Mass., are "featuring" ladies' watches in a double-column advertisement of five inches. The statement that there are 70 years of reputation behind every watch sold by the firm ought to inspire confidence in prospective purchasers.

### Almost Cannot Avail.

IN the window of a West Side pawnshop is what appears to be a diamond ring, says the New York *Sun*. The pawnbroker, with an unusual amount of humor and truthfulness, has the following sign attached to it:

"Almost a diamond. Price, $3.50."

About the only establishment that makes money without advertising is the mint.

*Catch phrases, descriptions and arguments which retail jewelers and opticians have used in their newspaper advertisements.*

DOES it Pay to Handle Diamonds in Asheville?—During the past four months we have made some very large purchases of diamonds for spot cash, and during this time we have also made some rather large sales of diamonds, some of the largest of the sales amounting to several thousand dollars. We have also the satisfaction and pleasure of knowing that all our customers received good full value for their money, and also got exactly what they thought they were getting. We also know that the diamonds were priced lower than most houses offer them for, because in some of these sales, especially those sales made in the larger cities, we came in competition with some of the largest diamond houses in the United States. The reason why we can undersell these large houses is very simple. Their business is so enormous that they have to depend upon employed agents to do their buying, while our Mr. Field, who has had nearly 30 years of experience in all the branches of the jewelry business and has made a life-long study of jewelry and silverware, gives all these matters his personal supervision and attention. Our chart for grading and registering diamonds, which was put into use this winter, after many months of labor, we believe to be the most complete and satisfying to both ourselves and customers of any system now in use. We consider it is only fair to our Asheville papers to say that we attribute a part of these sales to our advertising in the daily newspapers of this city. Arthur M. Field Co., leading jewelers, Asheville, N. C.

The housewife of standing and taste properly prides herself upon the setting of her table. If her napery and silver should be above criticism, especially so should be her table glass ware. This is merely the expression of correct prevailing taste. Our cut glass must be seen to be appreciated. It is rich, clear and brilliant. Extremely low plain figure cash prices prevail in this and the other departments of our establishment. Visitors most welcome.—J. N. Mulford, Memphis, Tenn.

Your Eyesight—The old saying, "an ounce of prevention is worth a pound of cure," is still true. Eighty per cent. of all nervousness, headache, granulated eyelids, weak eyes, watery eyes, cross-eyes, styes, and many other so-called diseases are due to eye strain, without noticeable loss of vision. We remove the cause, Nature does the rest. We are permanently located at 425 Colorado Ave., Colorado City, and employ a first-class optician a doctor of optics, who has charge of optical department. We charge no fa prices for first-class work and give yo positive guarantee to refund money if we is not satisfactory. We make a specia of fitting up bad cases that other optici fail on. If you cannot call at our off call us up on 'Phone Blue 261 or 59 on El Paso 'phone, and we will call at y home and fit you up. We don't m house-to-house canvass. Consultat free. The J. H. # STORE KEEPING DEPARTMENT.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

**PRIZE ESSAY COMPETITION, No. 16.**

SUBJECT:

## How and Under What Conditions Should Auction Sales be Conducted?

HE manner in which the question is stated predicates that there are times and conditions under which it is proper to duct such sales. I do not think I err when y that were a consensus of the jewelry lers, manufacturers and jobbers taken large majority would be found to hold the conviction that circumstances and ditions would have to be pretty desperbefore an auction sale would be justile. While I do not entirely agree with , I do believe that an auction sale, unless ified, may prove a boomerang, return- to smite its thrower, while doing no age to anybody else.

onceding that there are times when auction sale is the wisest remedy, it is strange that that remedy is generally med a desperate one.

ut, before considering them, two other s confront one: One of these is, that etimes an auction sale of one's stock is voidable, as, for instance, when a dealer ing died and left heirs who are minors, court orders the stock disposed of as n and as quickly as possible. There is other way as speedy as an autcion sale, ce, obeying the order of the court prac- lly, an auction sale is held.

hen there is the question of the auceer. On him depends the result, as to ether the sale is a disastrous sale, or ether the dealer can come out all right. must remember—the dealer must—that can scarcely dare to hope to come out an auction sale ahead of the game. If sale is a dishonest one, though he might sibly make a good showing pecuniarily, would lose so greatly in reputation that he desired to continue in the line he uld find it to advantage to open a store a different community, one in which he absolutely unknown. He can never hope do business that is worth while at the stand. If the community once withws its confidence it will never extend it in.

ut if, having a valid cause for an aucn sale—not even being required to hold as in the case cited above—he chooses an honest auctioneer, one whose name is synonymous with fair dealing and whose reputation is above all reproach and who scorns to descend to tricks, the dealer may, though somewhat of a pecuniary loser, come out ahead in the end.

How and under what conditions should auction sales be conducted?

Let us pre-suppose that the dealer is a man who is well and favorably known to his community by reason of a long career of square dealing. He has, unfortunately, through these years, been acquiring, season by season, a little more of old stock and, having wavered about having this melted up or disposed of, has become more and more congested and restricted in facilities and opportunities.

At last comes the parting of the ways, and there is nothing ahead of him save the alternative of disposing of his old stock at a sacrifice, or bankruptcy. His store has every year been displaying less up-to-date wares, has less room for new stock, and his credit has necessarily been getting poorer. This latter indicates, too, why the jobber and the manufacturer are only, in a lesser degree, interested in the matter.

Having at last come to the sensible conclusion, under the circumstances, of disposing of his stock, or at least the undesirable part, by auction sale, let him go at it with the determination of "hewing to the quick" and of honestly taking the public into his confidence. His first step will be to secure an honest auctioneer—there are such—one whose reputation is above reproach, and who it is known will not lend his name to questionable or tricky methods.

Thereupon let the intended sale be given all the publicity possible, advertised in all the ways that will commend itself to judgment.

Let the sale be open and above board. Do not let there be any goods "rung in"—absolutely none.

Then, when the sale is on, pursuant to the policy of "taking his medicine," let the auctioneer make an absolute sale of every article that is put up, no matter at what loss. Let none of the goods be withdrawn after they have once been offered. And, more than this, if, during the course of the sale, owing to the enthusiasm of the moment, it is seen that an article is getting dangerously near the ordinary selling price, let the auctioneer see to it that it is quickly disposed of before it has reached any price that will throw the shadow of a suspicion on the dealer, that he is making money in this questionable manner. If the dealer is to come out with an unimpaired reputation he can only do so by making such an obvious sacrifice. Even thus the ungenerous part of the community may not at first be disposed to do him simple justice. But in the end, having throughout pursued such a policy, the dealer's honorable course will have forced recognition.

This plan or policy may seem utopian, even quixotic. But "desperate diseases require desperate remedies." Furthermore, in spite of all that is said, the world is getting better and business honor is enforcing a higher standard. Then, too, honesty, nay, honor, is daily receiving the tribute of consideration as the best policy in the end, for the experience of most concurs in agreeing that such a course is in the line of enlightened self-interest. F. S.

### Echoes of a Western Philosopher.

BREVITY in advertising, like the short cut across fields, is the right thing if it takes you to your objective point.

When a ship starts to sail around the world it is not what she does the first week that takes her around, it's the last week, as in advertising.

You can't always tell by looking at a frog how far he can jump, and the best way is to let him jump, just as you should try out your advertising.

Many merchants who never advertise have a pet theory that they fear will be killed by practical test—and they give you some other reason.

The new dress even with the same eyes and hair has made the young man come to the front with the ice cream soda—does your advertising need a new dress?

Original advertising, like an original airship, is all right going up—it's the landing that hurts.

You never saw a bull dog let loose except to get a better hold—the good advertiser doesn't know of any vacation time.—*White's Sayings.*

# MURINE

## Optical Aids

Have Stood the Test of Time and Criticism

### Gone to success on the wave of good opinions of Physicians, Opticians and the People

*Murine rapidly reduces an Inflamed Eye to its normal condition preparatory to its proper measurement for Glasses.*

*Murine Clears the Transparent Media and obviates the use of a dangerous Mydriatic.*

*Banene Stimulates the Blood Supply which nourishes the Eye, removes Floating Spots, strengthens vision, and with Murine greatly aids those wearing Glasses, hence their value to the Optical Profession.*

THE maximum per cent of those ordering Glasses seek your aid only after continued urgings from over-worked and defective Eyes—urgings that have left inflamed tissue and local irritation. Correct Eye Defects with Properly-fitted Glasses. Correct Effects of Defects with *Murine*.

**Properly-fitted Glasses and Murine Promote Eye Comfort**

## Banene

**This preparation should be in the hands of every Refractionist**

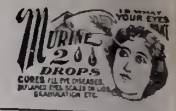
*STIMULATES the circulation of the blood supply that nourishes the Eye*, clears the retina of congestion, removes the causes of floating spots, dimness of vision, cobwebs, and an *inability to wear glasses with comfort.*

**Banene absorbs opacities of the Crystaline Lens—Cataract and in many cases renders an operation unnecessary**

## Murine Eye Salve

**(Unguentum Hydro-Murine)**

*A REMEDY FOR THE EYELIDS*



**Restores lost Eyelashes and promotes a healthful growth. Cures Cysts, Styes and Ulcers**

THE Eyelashes often fall out in consequence of neglected disease, both at their roots, and of the Lubricating Glands which open near them, resulting in a thickened and crusted condition. This condition is intensified by an *Error of Refraction*, and properly-fitted Glasses should be worn in addition to applications of *Murine* and *Murine Eye Salve.*

NOTE—The law does not confine the sale of these preparations to any class. Jewelers and Opticians have a right to sell them, but not the right to compound or administer.

# The Optometrist's Catechism.

SERIES OF QUESTIONS AND ANSWERS ON ELEMENTARY OPTICS, IN CATECHETICAL FORM.

By E. Le Roy Ryer.

Copyright, 1903, by The Jewelers' Circular Publishing Co.

(*Continued from issue of Sept. 6, 1905.*)

REFRACTION.

-(592) What conditions determine the nt of refraction or bending that a ray ght will undergo when it passes ob- y from one medium into another?

-The refraction will depend partly

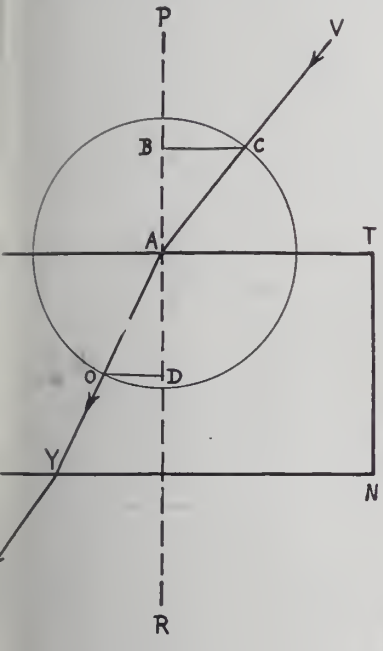

Fig. 43.

the difference in densities between the media and partly upon the angle at the ray enters the second.

-(593) What is (1) the "Incident (2) the "Refracted Ray"?

-Incidence means the course of a body y in relation to a surface upon which ikes, and therefore in optics we call ay that strikes the refracting medium the outside the incident ray. The ray, passing the surface and entering the ım is called the refracted ray. Thus g. 43, V,A, represents the incident ray ng the surface W,T, of the slab of W,F,N,T; and A,Y, represents the re- d ray.

Q.—(594) What is (1) the "Angle of Incidence"; (2) the "Angle of Refraction"?

A.—The angle of incidence is that angle formed by the incident ray and the perpendicular erected to the surface at the point of contact. The angle formed by the prolongation of the perpendicular and the refracted ray is the angle of refraction. In Fig. 43 V A P represents the angle of incidence (not VAT, as is often assumed) and YAR, indicates the angle of refraction.

Q.—(595) What is the "Index of Refraction"?

A.—The index of refraction is the ratio of the sines of the angles of incidence and refraction, for a ray of light passing from one medium into another; (2) the index of refraction is the relative density of a substance of the comparative length of time required for light to travel a definite distance in different substances; (3) the refractive capacity of any medium, as compared with that of air, is still another definition for the index of refraction. Sometimes the refractive index is estimated by using a vacuum as a standard, but ordinarily when we speak of the refractive index of any medium it is customary to consider its refractive value compared to that of air.

Q.—(596) What is meant by the "Absolute Index of Refraction"?

A.—The density or refractive power of any substance as compared with a vacuum, instead of with air, is termed the absolute index of refraction.

Q.—(597) How may the index of refraction of a substance be found?

A.—The rule is "divide the sine of the angle of incidence by the sine of the angle of refraction." The application of this rule may be demonstrated as follows: In Fig. 43, V A represents a ray of light passing from a rarer medium (air) into a denser medium (glass). Erect the perpendicular P R to the surface W T and with A as center draw a circumferance with any radius. From points C and O draw, respectively, lines C B and O D perpendicular to P R. Thus B C is the sine of the angle of incidence and O D is the sine of the angle of refraction, and dividing B C by O D gives the index of refraction in this case, for, as the rule states, the quotient obtained by dividing the sine of the angle of incidence by the sine of the angle of refraction is the refractive index.

Q.—(598) What are some of the more important indexes of refraction?

A.—

| *Substance.* | *Index of refraction.* |
|---|---|
| Air | 1.00029 |
| Water | 1.333 |
| Cornea | 1.3333 |
| Crown glass | 1.5 |
| Flint glass | 1.58 |
| Canada balsam | 1.532 |
| Rock crystal | 1.55 |
| Diamond | 2.47 to 2.75 |

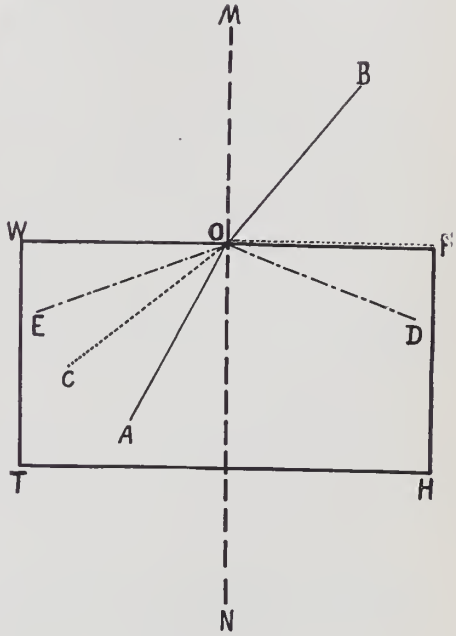

Fig. 44.

| | |
|---|---|
| Aqueous humor | 1.3365 |
| Vitreous humor | 1.3365 |
| Crystalline lens | 1.41 |

Q.—(599) What is "Total Reflection" and "Critical Angle"?

A.—Total reflection is the reflection of light incident at an angle greater than the critical angle. The critical angle is that angle of incidence which just permits a ray of light in a dense medium to pass out into a rarer medium. The following serves to illustrate these definitions: In Fig. 44, W T H F represents a jar of water and A O a ray of light passing from this denser medium into air above the surface W F. The ray A O is bent from the perpendicular toward the point of incidence B in the

# Optical Department.

air. It is evident that as the angle of incidence in the water becomes greater the angle of refraction in the air will increase correspondingly until it is equal to 90°. Thus if the ray start from C, it will have an angle of refraction equal to 90°, that is, the ray C O will skim along the surface to F.

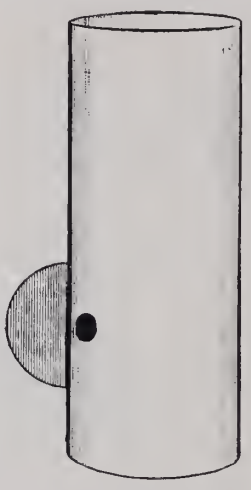
Therefore when the incident angle in the water (or other denser medium) is such as to cause the ray to become parallel to the surface, it is called the critical angle, and in this case C O N is the critical angle. If this angle increases or, in other words, if the angle of incidence in the denser medium becomes greater than the critical angle, the ray will not pass out of the denser medium at all, but will be totally reflected at O back into the denser medium; thus if the ray proceed from E, Fig. 44, it will be totally reflected to D. The critical angle from water into air is 48° 35′. Phenomena of total reflection only occur in instances where light passes from a denser toward a rarer medium.

*(To be continued.)*

## What Tint Is the Best to Prescribe When Colored Lenses Are Called For?

WHEN colored lenses are under consideration the choice usually lies between green, smoke and blue. Green offers the eyes the greatest protection against heat rays, but does not protect them as well from blue rays, and also diminishes the light to a considerable extent. Smoke is good where the main object is to reduce the intensity of the light and are superior to blue or green in so far as they do not produce false color effects; that is, a light shade of smoke will still permit you to recognize colors as with the naked eye, whereas blue gives a bluish tinge to everything and will give you a false idea of blue objects particularly; with a red glass you may look at a red line drawn on white paper and not see the line at all. Red is in most cases irritating.

Amber-yellow is perhaps as useful and beneficial as any. Yellow, as obtained through amber-yellow glass, affords little protection against heat rays, but almost perfect protection against the chemical rays, and this without impairing vision. It also counteracts chromated aberration and softens dazzling reflections. With this kind of lens there is less photophobia and pain felt by a patient under examination than when no lens is used. It is suitable when the oblique method of illumination is being employed. The effect on vision is that in about 60 per cent. of the cases there will be no change noticed, while 35 per cent. will be improved, and 5 per cent. diminished. The eye soon adjusts itself to the new color values.



Asthenopia is often relieved by wearing the yellow lenses and many slight irritations of the lids, such as slight conjunctivitis, are often subdued, and one very valuable feature is that they can do no harm, whereas dark shades of smoke or blue reduce the light intensity so greatly that upon removing them the wearer's eyes have become sensitive to and unable to bear the ordinary light of day. E. L. R.

## An Originally Constructed Shield for the Eye in Skiascopy.

I HAVE found that the continual use of the retinoscope tires my left or unused eye to such an extent that some days I have been unable to continue at the work, says J. N. Rhoads, M.D., in the *Optician and Photographic Trades Review*. In trying to overcome the difficulty I constructed a sheet-iron shade with a half-inch brass tube attached at right angles, extending about two inches. I fixed a carrier upon this tube upon which to hang my retinoscope.

The result was a great relief to my eyes, but the tube seemed to be too much in the way. Then I made another one with a lip extending out about an inch and a half, as shown in the illustration, and I found that it worked perfectly.

This shield, or lip, permits the user to get close to the source of light, which, of course, enables him to get more light, and

SHIELD FOR RELIEVING EYESTRAIN WHEN USING THE RETINOSCOPE.

allows him to move away to any distance without the light shining into his left, or unused eye. It also allows the refractor to keep both eyes open while using the retinoscope. An eye shield should be attached to all shadow test shades, whether they contain an iris diaphragm or not.

I know this shade will take a great strain off the retina, and any one using it will wonder how they ever got along without it. It will, in truth, much shorten the time consumed in shadow testing, and, thereby, will be quite a gain as well as a comfort to the patient.

---

The Huteson-Hannay Co., wholesale and retail opticians, Chicago and Omaha, which recently opened a branch store in Seattle, Wash., has just completed equipping its Seattle establishment at the corner of Second Ave. and Union St. with native Philippine woods throughout. The optical fitting rooms, work-room and show cases are finished in the regulation dark mahogany color, and the window fixtures as seen from the street are finished in the natural color of the wood, which is a bright reddish yellow. A great deal of interest has been aroused throughout the country in these Philippine hard woods, which have been exhibited quite extensively at both the St. Louis and the Portland expositions.

## Making the Most of One's Profession

IT is well for the optometrist to look occasionally a little beyond his own immediate sphere, and this is particularly the of the man who is just starting upon career. Color, for instance, forms an portant division in the study of light, ye is frequently entirely neglected on ground that it cannot be applied pra- cally in regular routine, optometrical w This is certainly working from a false b because it does not require very keen s tiny to discern that it is the thorough derstanding of each and every branch any particular subject that carries above the average man, who knows the "practical points." The man who kn only that which is used daily in ordi practice is like a man who knows his al bet and vocabulary, but who never en the realms of literature.

Another advantage of viewing the practical parts of one's work is the rec tion, to say nothing of the scope, it affo One should give attention to the anci notions concerning light; to the var theories of light; to the discussions going on as to what the luminiferous e really is; to the production of color; to effects the different colors produce various conditions; to the manner in w Finsen cured lupus and ameliorated th fects of smallpox, by using simply red violet light; to the manner in which stroke has been avoided by lining clothes and hat with yellow material; coming closer to our regular work, to variability in visual acuity when estim with black letters on a white field, w letters on a black field, or, as has suggested by Ryer, red letters on a w field.

These considerations, indeed, are impractical ones, but rather such that create a livelier interest in one's work, inate the "dry-as-dust" features, and g terially toward producing the rea practical worker.

Let the beginner but lay out a y study along these lines and follow it, he will find at the end of that time he has advanced far into the front r Above all, do not forget that you can exceeding practical as to be impracti

## Progressive Myopia.

ACCORDING to Liebruch progre myopia is the result of an increa the interpupillary distance due, prim to a too great separation of the inner tal walls. This malformation of the structure, he says, is the essential he tary element of myopia, which gives to a disturbance of the relations bet the accommodation and convergence

He claims that the only positive rem against the progression of myopia prisms and necessary precautions a light, position (posture of patient), and clearness of print, etc. *In the stages of myopia he uses only weak pr* In advanced cases he adds concave l and believes that the total correctio myopia succeeds only in those cases w the eyes are not too widely separated

**BELAIS & COHN,**
13 DUTCH STREET, - NEW YORK.

[*Answers are also solicited from our reade rs to the questions published on this page.*]

QUESTION No. 1320.—**To Bleach Ivory.**—*Please give me a simple way of bleaching ivory.* *O. A.*

ANSWER:—Wash the ivory carefully with liquid ammonia, then soft water and finally apply a solution of hydrogen peroxide.

QUESTION No. 1321.—**Dextrine Mucilage.**—*Kindly give me a formula for a mucilage that I can use to paste labels to glass.* *F. H.*

ANSWER:—All mucilage will not hold to glass, and perhaps the simplest and best is made by dissolving in hot water a sufficient quantity of dextrine to furnish a paste of the consistency of honey. Before applying it to the glass the latter should be slightly moistened.

QUESTION No. 1322.—**To Clean Plate Glass.**—*How can I clean plate glass and the glass in show cases?* *T. J.*

ANSWER:—To clean glass effectively, so it will attain a gloss, use a semi-liquid paste of calcium of magnesia in purified benzine. Apply it with a cotton cloth.

QUESTION No. 1323.—**Solution for Cleaning Metal.**—*Kindly give me a good solution for cleaning metal.* *T. A. B.*

ANSWER:—There are a number of liquid mixtures for polishing metal. Two of them are as follows: (1) Water, 20 parts; alum, 2 parts; tripoli, 2 parts; nitric acid, 1 part. (2) Water, 40 parts; oxalic acid, 2 parts; tripoli, 7 parts.

QUESTION No. 1324.—**Brass and Coloring Dip.**—*Please give me a good dip for brass—one which can be used for coloring.* *S. B. S.*

ANSWER:—Nitric acid is a most powerful solvent. Acting on the zinc and copper, the surface assumes a warm tone, shading more or less into a reddish yellow. The color may be varied to some extent by using aqua fortis of different strength, depending on the component metals being dissolved in different ratios by acids of varying densities. Nitric acid containing a certain quantity of nitrous acid is capable of producing different shades of color. Dilute the acid until the scale can be removed by rubbing. Then rinse well and place in stronger acid, and again in strong nitric acid for a few seconds. Then wash in water and dip in water containing dissolved argol. Finally dry in hot sawdust.

QUESTION No. 1325.—**To Mend Broken China.**—*How can I make a cement that I can use for mending broken china?* *C. D.*

ANSWER:—A cement said to be very reliable and suitable for mending the most delicate pieces of china ware is made in the following manner: Take some quicklime, powder it, and pour on this the white of an egg. A whey of vinegar and milk in equal parts must then be made and added to the lime and egg, after which the whole must be well beaten and slightly warmed. The broken edges of whatever is to be mended must be exposed to heat for a few seconds, after which the cement may be applied in only a very thin coat. The broken edges should be pressed well together and when the cement has dried the parts will adhere firmly.

QUESTION No. 1326.—**Platinum.**—*Will you please give me some information about platinum. The first time I tried to work this metal I could not even melt it. I first used borax as a flux and then I used cyanide of potassium, but still I could not melt it. I had only a small quantity, 3 dwts., and I had it placed in a dug-out place in charcoal with a piece of charcoal placed alongside of it so as to keep all of the heat confined directly on the platinum. I used a large flame from a gas burner and a large blow-pipe. The heat would have melted any piece of gold or silver 10 times the size of the platinum, but not a particle of the latter melted. Please tell me how I can melt it and how to work such metal?* *W. L. E.*

ANSWER:—Platinum cannot be melted by heat such as is generated by a charcoal fire. A charcoal fire can melt fine and alloyed gold. Fine gold will melt under a heat of 1045° C., and alloyed gold requires a heat proportionate to the amount of alloy it contains. Platinum requires a heat of 1775° C. to melt It. Such heat can only be produced by a chemical apparatus called an oxyhydrogen blow-pipe, which was invented by Dr. Robert Hare, of Philadelphia, Pa., in 1891, for the purpose of producing a very high temperature by burning hydrogen and oxygen together. Such an apparatus may be purchased from dealers in chemical apparatus. For a jeweler who needs only a small quantity of platinum, it is best to purchase from an assay office, who will furnish it in any desired form. The jeweler may sell his cuttings and scraps to the same office in exchange.

QUESTION No. 1327.—**To Bend Tubing.**—*I have some half inch brass tubing that I want to bend into a semi-circle. I tried to do this with a piece, but it kinked so that I could not straighten it again. How must I proceed?* *S. P. D.*

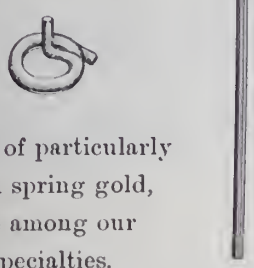
ANSWER:—If the tubing has thick walls it will bend by filling with sand and corking up both ends of the tube. But to m e a perfect bend it is best to fill the tube wh molten tin or lead. After bending, e metal must be melted out again. If e tubes are to be cut into any lengths a r bending, it is best to saw them before e metal is melted out. In bending, the s n of the tube should be kept on the ins e, otherwise the seams may open during e process of bending.

## Process for Obtaining Matrices for Sil r-Galvanoplasty.

THE means at our disposal in silver vanoplasty are much less perfect more difficult to employ than those ada to the copper galvanoplastic art, says *Metallarbeiter*. In the latter case we duce simple salts, while to effect the s thing in silver we are compelled to r use of double salts, such as potassium c ide and nitrate of silver. One of the g est inconveniences of the silver galv plastic process is the alkaline reactio the bath. This action completely shuts a lot of materials, particularly the fatty stances, which are attacked by the bath rendered soapy. Moreover, these solu are poorer conductors of electricity, for this reason it is necessary to app much stronger metallic covering than i dinarily obtained when the forms are ered with black lead.

The use of nitrate of silver or gold ride, which would be dissolved by the and be reduced to metal, is therefore pr ited by this process. When it is a c tion, therefore, of obtaining a silver of a non-metallic object offering any culties we are obliged to have recours other expedients.

To obtain, then, a deposit satisfacto every particular, we must proceed in following manner: "Carefully cover imprint from the model to be copied good black lead, and hang it in an a lated copper bath, where it will recei deposit of copper. Having thus obtai thin film of copper upon it, wash it e fully and thoroughly and hang it in a st silver bath; the silver will begin to de upon it immediately and in a short will cover the whole uniformly. The is simple. Having thus obtained the s in the shape and thickness desired ther mains nothing but to dissolve the thin per film, which is easily accomplishe dropping the object in a dilute nitric bath, where it may be allowed to re for a length of time, depending upo amount of the copper deposit. The s finally remains pure.



A formula for the silver bath is: grammes of nitrate of silver, 100 gran pure potassium cyanide and 1 litre of w

For forms which do not present much high relief work, black lead or D. metal, may be advantageously used. S is easily deposited upon this latter and as easily separated from it. Place th ject to be copied in a horizontal pos cover it with a thin leaf of lead; upo put soft gutta percha, and put in a p The lead will give to the pressure w tearing, and it may also be easily d gaged from the form. Instead of leaf we may also use leaf gold or silver leaf

## Faience and Majolica.

(From a paper read by S. J. Burt before the American Ceramic Society.)

"HEN we read of cast or wrought iron we know what is meant, but when ead of faience, majolica, china or por- n, are there any two of us who have tly the same conception of what is it? I think you will all agree with me ie desirability of our terminology mean- something definite, but how is it to be mplished? Clearly not by any one per- attempting to lay down the law, but er by a free discussion aiming to arrive definition satisfactory to at least the rity. It is my purpose here to state views merely on what the two words ice and majolica should stand for. Of se, no one could give a definition that ld not leave a great deal to be justly against it, but let us try to reach that ition which is open to the least just cism. The Century Dictionary says of ice that it is a fine kind of pottery or henware, glazed and painted with de- s. The term is loosely used for any e between porcelain and common un- ed pottery. The distinct part of this alled definition is that the word is loose- sed and means practically anything. Of olica it says: "Decorated enamelled pot- . especially of Italy, from the 15th to 17th century." Here we have something nite, namely, majolica is enamelled ware. bster is even more hazy. He says faience ns everything, even porcelain. How eless this is! Here we have earthen- e, pottery, faience and majolica, all ning the same thing. In fact, all writ- on pottery that I have ever read fail make any distinction clearly defined be- en faience and majolica. There seems e a tendency to drop the word majolica gether, except where referring to the Italian ware, and to use faience for all ery except china and porcelain. This especially true with French writers. ugniart, for instance, classifies pottery two main groups, one with soft body at is, not vitrified body), the other hav- hard or vitrified bodies. Under the first d he speaks of "common faience," and nce with a tin enamel, while under the ond he speaks of "fine faience." Deck, mmenting on this, justly claims that the ne s of the product does not necessarily end upon the character of the body, and s he would dislike to call faience of Rouen and Urbino common. Note that it doesn't worry him in the least to call both these faience, although both are without any doubt majolica. He then goes on to say: "In default of a more generic name, I consider all pottery having an earthy fracture faience," and explains further that it may have a glaze or an enamel. So he calls the clear glazed ware of Palissy and the beautiful Henri II. ware faience, and the enameled Rouen ware the same. Our own Professor Binns in his most delightful book, "The Story of the Potter," as far as I can see, makes no distinction between faience and majolica. He says, referring to the old Italian ware: "The name majolica, given by universal consent to these enameled wares," and tells how the Moors abandoned their clear alkaline glazes on reaching Spain, and made tin enamelled ware instead. Later we find him, as all other writers, speaking of a faience of Rouen, although he tells us that it is technically the same as the Italian majolica, except that cobalt was mainly used in the decoration. In fact, I must freely confess that in the view I am about to give you I fear I stand alone. However, I feel my argument is good, and trust I may be able to convince you.

When we speak of majolica, what product is first suggested to our minds? Undoubtedly Italian majolica. That this distinct class of ware is majolica we all agree. Then let us see what are its peculiar characteristics. In the first we note that it is made of a very crude body, which is always so charged with iron that it never burns white, and is often almost red. Taking next the glaze, we find it is not glaze at all, but is an enamel. Here I come to another case of lax definition, the indiscriminate use of the words "glaze" and "enamel." An enamel is always opaque, and a glaze transparent, so I claim it is wrong to call an enamel a glaze, or vice versa. Returning, however, to the subject in hand, we find we have a crude colored clay body, covered by an opaque, generally white, enamel, and that there is no question about this being majolica. The first porcelain brought to Europe from China by the Dutch must have seemed to the potters at that time perfectly marvelous, because it was pure white throughout. Such a thing as kaolin, a clay that would burn white, was absolutely unknown to them. Naturally this porcelain brought high prices, and our Dutch home potter was in despair until he discovered how to make an imitation of it. This he accomplished by covering his coarse yellow to red body with an opaque white enamel, upon which he painted copies of Chinese designs. However, his product was never porcelain, but merely majolica. That is, he concealed his colored body with enamel, and then painted on this enamel. The fact that he often put a final clear glaze over his painting did not alter the case. The so-called Rouen faience was of the same character, and, therefore, is a majolica. My definition of majolica is, therefore, pottery in which the body, of colored clay, is concealed by an enamel. If any potter should be so foolish as to pay for white clay and then cover it with an enamel, he would still be making majolica.

With faience the case is not nearly so clear. The word is derived from Faenza, a town in Italy, where pottery was made as far back as 1300 A. D. Now, unfortunately, this pottery was technically identical with Italian majolica, and so the word was also used, meaning this ware, and is so used to-day. If majolica clearly defines the class of ware of which we have been speaking, why confuse ourselves by also calling it faience, especially as these names in this case are absolutely identical in meaning. Is it not better to let faience stand for a distinct group of its own? With this in view I define faience as pottery in which the colored clay body is covered by a transparent glaze. The faience potter may use a highly colored clay, as in yellow ware, or he may use clays closely approximating white, as in Rookwood, but he always glazes it and never enamels it. Here some might claim that ware such as Rookwood could not be called faience, as it conceals the clay color proper with colored clay slips. But the distinction I draw is in the use of an enamel or a glaze, and Rookwood uses glaze, and is, therefore, a faience. If you care to make white glazed brick, you can either make majolica brick or faience brick. If you cover your clay with white enamel you will make majolica brick, while if you give a white slip face to your clay and then use clear glaze you will make faience brick. In the two definitions I have given you you will note that both have colored clay bodies. In the case of majolica I explained that a white body would never be used, as it would not pay to hide the fact if you were paying for such good clay. In the case of faience I say "colored body," because here, when absolutely pure white is used, I consider that

we have passed out of faience entirely, and are now making either china or porcelain.

One of the main objects of this classification is to give a better understanding of the possibilities of decoration in the two classes. Pottery decoration I divide into four classes: First, modeling or incising the clay body; second, coloring the clay body before or after firing; third, coloring the glaze or enamel; fourth, coloring on the glaze or enamel. We see at once with our definition of faience that all classes of decoration can be used either separately or combined, as desired, while with our definition of majolica we see that the great second class cannot be used. This second class, that of applying color to the body, includes, first, the use of the color natural to the clay, as in yellow ware; second, applying colored slips; third, all print or transfer work; in short, what we understand as underglaze decoration, all of which would, of course, be valueless under an enamel. So that faience stands for underglaze decoration, while for our main decorative effect in majolica we are driven to the fourth class, that of color on the glaze, or, as it is generally known, overglaze decoration.

In these two great pottery groups I know of no better examples than the Italian majolica and the Rookwood faience. I think you will agree with me that it would be as well to call a German a Chinaman as to call both of these wares majolica or both faience, or to say that ware with an opaque enamel and overglaze decoration was the same as ware with a clear glaze and underglaze decoration. Let me, therefore, repeat my definitions, which I trust may meet the approval of the society: Faience is tery in which the covered clay body is ored with a clear glaze; majolica is tery in which the colored clay body is cealed with an opaque enamel.

## Notes on the Columbian Emerald Mi

AMONG some recent news items rece from the South American repu we have one to the effect that, while t are many mines of all classes of min in the Republic of Colombia there ar emerald mines alone, this being the precious stone mined in that Republic. L quantities are taken from the Muzo m situated 10 miles by mule road from Magdalena River and 670 miles from Atlantic coast.

The revenue derived by the Colom Government from the rental paid for working of these mines has ranged du the past three years from $250,000 to $ 000 a year. These mines were discov by the Spanish in 1555, and have worked intermittently since that date, only of late years on a large scale. E ald mining was a government mono up to some 15 or 20 years ago, when monopoly was abolished, the Governm reserving for itself the Muzo group. A five years ago a mine, worked very ex sively 200 years ago by the Spaniards, rediscovered by means of old records, according to expert reports, is likely compete with the Muzo group in pro tion.

# THE RAMBLER'S NOTES

**ARTISTIC BRONZE WORK WELL PORTRAYED.**

UNDER the title, "American Art in Bronze and Iron," a new number of a handsome catalogue was recently issued by the John William Bronze Foundry and Wrought Iron Works, 556 W. 27th St., New York. The catalogue gives a brief sketch of the progress in the art of sculpturing in bronze since the company extended its sphere, years ago, from the production of ornamental metal works for architectural purposes to the reproduction of the work of sculptors. For a time the company accepted only the small models, such as busts, statuettes and medallions. The year 1892 saw a further step upward, for in that year a beginning was made in the large pieces which in large numbers have been undertaken and successfully cast since that time. The Congressional Library bronze doors at Washington were the first large pieces which the company produced, and soon thereafter the foundry was enlarged in order to provide facilities for this kind of work. The company points to the confidence, made manifest by the American sculptors in tendering to it the contracts for repeating in bronze many notable works, as proof of its success in this field. A number of important pieces, produced in recent years, are beautifuly illustrated and described in the catalogue. Included among these is the portrait of Robert Louis Stevenson, and another of Robert Charles Billings, Augustus St. Gaudens modeling both these works. The bas relief of Stevenson was modeled in 1887 during the author's illness in New York, and is perhaps the most satisfactory of all his pictures. The sense of invalidism is brought out tenderly and sympathetically in this work, which represents the novelist reclining on a couch, with open manuscript in front of him. Another no- ble piece of bronze made by this comp is the figure "Evening," of which F. W ington Ruckstuhl is the sculptor. e original may be seen in the Metropoli Museum of Art. A third interesting ample is "Lion in Love," representing "King of the Forest" as a devoted cap e to the maiden standing beside him; Hinton Perry was the sculptor. A bro e tankard, entitled "Mermaid and Fish modeled by Enid Yandell, is beautif executed, as shown by an illustration. O r splendid works of art are the bronze gr "Indian in Canoe," John Francis Br sculptor; and the bronze andirons, typ ing "Labor and Science," modeled by He Linden. The catalogue is handsomely pr ed and all the illustrations are brought in the most effective manner by rich h tones.

*

**A NEW LINE OF ENGLISH CHINA.**

A NEW line of E lish bone c is being introduce this market by Ro Slimmon & Co., 96 Church St., under name of the Royal Coleton. These imp ers have not heretofore made any sp effort to reach the jewelry trade, but are confident that this new line of h decorated ware will appeal to the most ticular class of buyers. The samples not as yet complete, but those already ceived bear out the strong endorse that the company gives the product decorators in their flower painting gilding adhere closely to conventional st ards and at the same time show a comm able originality in treatment, so the re will appeal to people of taste. The Co blue in some of the plates will please t who look for a striking effect, heightene contrast with the gilding. A line pure white china will be shown, and supply a demand from amateur china p ers. The company, among other l shows a pleasing selection of Bristol ware, hand painted in green and nat fruit colors with bold border effects. ware comes from the factory of Poun & Co., Bristol, England.

## How Tortoise Shell Is Imitated.

SO skillful have become the manufacturers of imitation tortoise shell comb that even people in the trade do not always find it easy to determine readily whether a specified article is of genuine shell or is imitation.

A reporter of THE CIRCULAR-WEEKLY recently asked several manufacturers how a retailer is to distinguish between the real and the imitation shells. One manufacturer said that, as most of the imitations are of celluloid an easy test is to scrape off a little of the material and apply a match. If the comb is celluloid the material will burn off in a flash, but if it is shell it will burn slowly with an odor, as do all bony products. Mr. Rice, of Rice & Hochster, who has been a lifetime in the business of manufacturing combs, said:

"Celluloid makes the best imitation of tortoise shell. It has the requisite hardness and luster, and approximates so closely to the real shell that, although I have handled both products many years, I cannot always tell one from another at a glance. Of course, I can do so by making a close inspection. The ability to distinguish shell from celluloid by the appearance can only be acquired by years of experience in handling both.

"The principal way in which celluloid is revealed is in its susceptibility to the influence of heat. Hold a celluloid comb in your hand and the heat of the body will cause the teeth, after a few moments, to give a trifle, and there is not the elasticity or springing back that you will observe in a real shell. Tortoise shell will not bend or be less subjected to heat at the boiling point. There is, of course, a great difference in the celluloid employed in manufacturing combs, and some of the combs that are put out under that name are not entitled to the designation. Even when the celluloid is of the highest grade it then should be seasoned from three to 12 months in order that there may be no danger of it shrinking.

"The sale of celluloid combs has increased greatly in recent years because of the excellence of the celluloid imitations of tortoise shell. The difference in price is, of course, most important, and varies according to the style of comb and the amount of workmanship. In the genuine tortoise shell much of the value depends on the workmanship, the carving, the inlaying, jeweling and other ornamentation."

Mr. Rice showed the reporter some tortoise shell combs which cost 10 or 15 times as much as fair imitations in celluloid. On the other hand, in plainer lines an excellent celluloid substitute will come much closer in value to the genuine shell.

As to horn combs, it is said that too many are now being made. While horn has some pleasing qualities, yet it is claimed this material is not so well fitted for the purpose as celluloid, besides costing more. Horn has been getting scarce of recent years because of the fact that the farmers are now so widely raising hornless cattle. In the last 10 years the price of horn has gone up very rapidly, and is now three times what it was a decade ago.

Other imitations of tortoise shell have been placed upon the market. One is made of milk or cheese by a secret process.

## GERMAN ART EXPRESSED IN ROYAL WEDDING GIFTS.

HE recent marriage of the Crown Prince of Prussia to the Duchess Cecilia of cklenberg-Schwerin was the occasion of, will continue to result in, the manufac- of many beautiful examples of the art the modern silver and goldsmith, for pieces presented as wedding presents are eedingly numerous, and some of them, as the silver service presented by the ious cities, will not be ready for some nths. Among the beautiful presents pro- ed for the occasion was the elaborate le ornament illustrated herewith, which s offered by the free city of Hamburg.

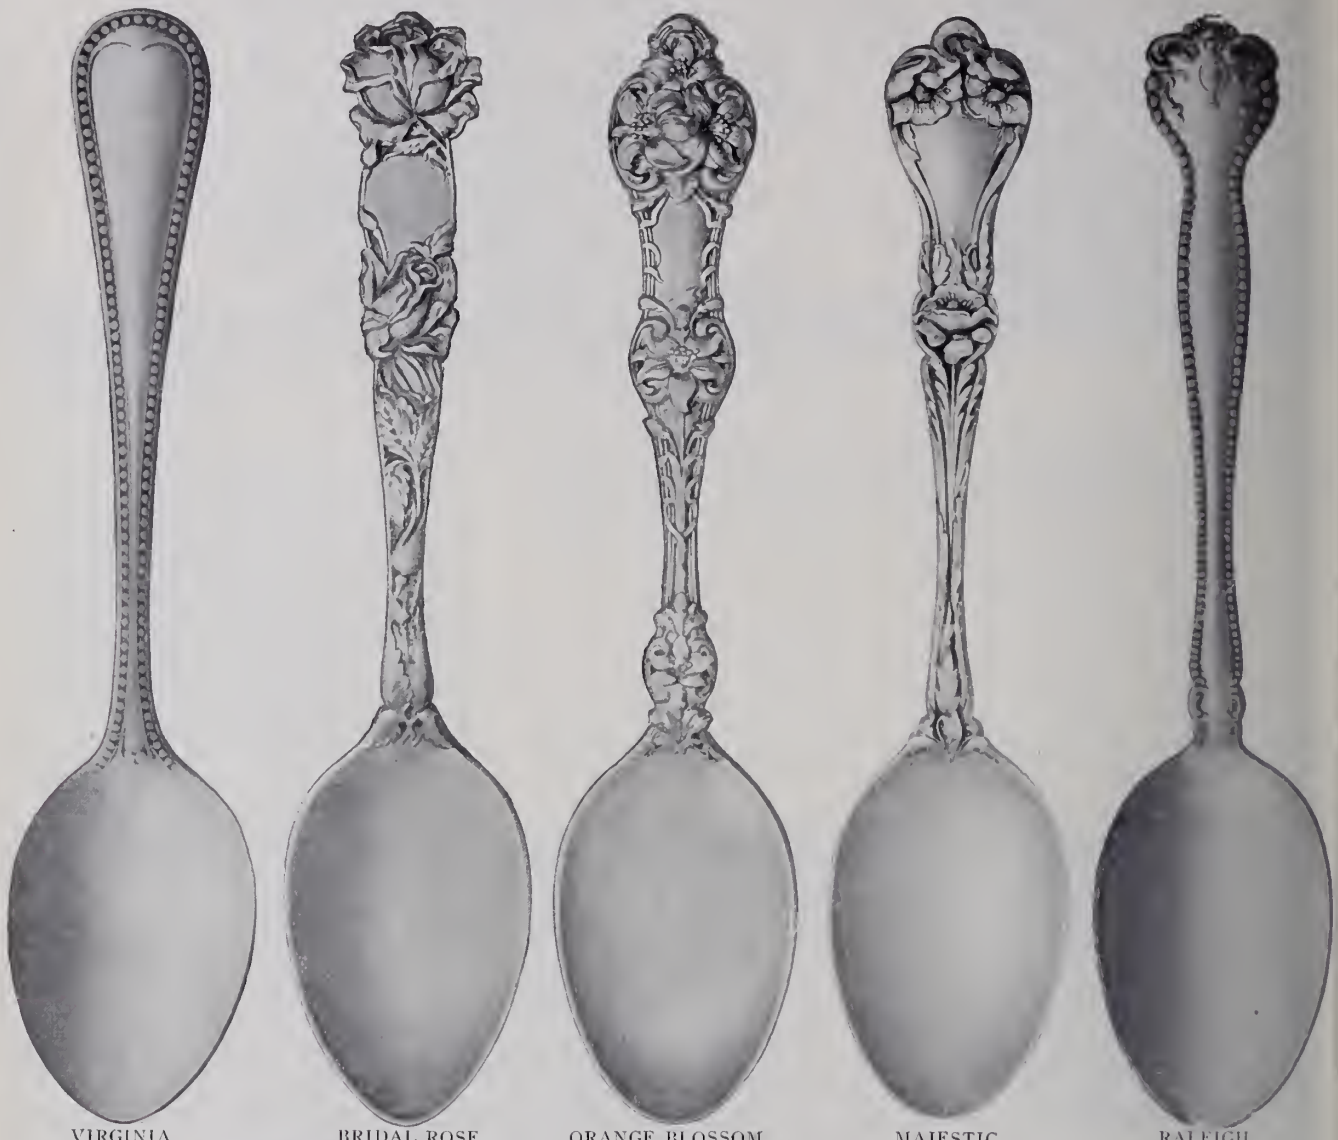
he piece was manufactured by Alexan- Schoenauer, Hamburg, and is in the m of a boat, the exact model of the ft used by the villagers of Vierlander, ose choice fruits and vegetables are de- red to the great city every day. The dding gift is in every detail an exact del of one of the boats which carry these ducts daily down the river, and contains only a representation of the usual cargo, also beautifully modelled figures of the sant and boatman who accompany the ft. The stand on which the boat rests a raised design of daisies.

SILVER TABLE ORNAMENT PRESENTED TO THE CROWN PRINCE AND PRINCESS OF PRUSSIA BY THE CITY OF HAMBURG.

### Pearls and Pearl Shells.

(RANDOLPH I. GEARE in the *Scientific American.*)

SPEAKING generally, the substance forming the inner layers of the shells of any nacreous mollusk is termed "pearly." In the mass it constitutes what is known as "mother-of-pearl," while in the form of a detached lustrous concretion it is a "pearl." Dr. W. A. Herdman, of the University of Liverpool, England, in reporting recently on the pearl-oyster fisheries of Ceylon, makes some very interesting statements as to the origin of pearls, from which it appears that some pearls, or pearly excrescences on the interior of the shell, are due to the irritation caused by boring sponges and burrowing worms. It would seem that minute grains of sand and other foreign particles gain access to the body inside the shell, which are popularly supposed to form the nuclei of pearls, only under very exceptional circumstances; in fact, only one pearl out of a large number which Dr. Herdman decalcified, contained in its center what proved to be beyond doubt a grain of sand. It is only when the shell is injured, as by breaking off or crushing the projecting "ears"—thereby enabling some fine sand to work in—that such organic particles supply the irritation which gives rise to pearl formation. Another class of pearls, found in the muscular tissue of the animal, are from infected oysters with these worms.



The true pearl oyster (*Meleagrina margaratifera*) is found chiefly in the Indian Ocean, the Red Sea, the warmer parts of the South Pacific, the Gulf of California, the Caribbean Sea, and other bodies of water. The local conditions, supply, etc., vary greatly in different regions of the world.

The pearl fisheries of India have long been famous. The most important are in the Gulf of Manar. On the Ceylon side the fisheries were very profitable in 1903 and 1904. The seasons are irregular here, as elsewhere, owing to the frequent disappearance of the oysters before they reach the proper age of production, which is four to six years.

Among other localities where pearl fisheries are carried on may be mentioned the Merguian Archipelago under the government of Burma, the lower end of the Red

LEATHER. IVORY.
EBONY. SHELL.

**MODERATE PRICES**

**SUPERIOR EFFECTS**

**A WONDERLAND OF DESIGNS.**

THERE IS A STYLE about Schickerling products that makes each article a veritable "piece of jewelry." In appearance they are equal to the best importations, and in workmanship they are superior. As several distinct lines are produced at graded prices, it is always possible to meet requirements as to style and cost. The same artists that design the more elaborate pieces are employed also on the less expensive ones. Thus the element of style is never lacking, and the simplest piece has its own distinctive points of merit.

A popular and moderate-priced line is made in 14 karat. The range of showings in this class is very comprehensive both as to designs and pieces included. With and without jewels. All finishes. In our line of Enamel Jewelry 18 Karat is used exclusively. The floral and other effects in this line challenge comparison. The high-grade Diamond-Platinum Jewelry of this house has long stood pre-eminent. Exclusive designs. Thus a review of Schickerling Jewelry shows a range that is "WIDE AS THE DEMAND."

## Pearls and Pearl Shells.

(*Continued from page* 1.)

, the Persian Gulf, the waters around Molucca Islands, in the neighborhood of zibar, and on the west coast of New edonia. Nearer home are the fisheries La Paz, in Lower California, British nduras, Panama, along the coast of ador and of Peru; and in the lower f of Maracaibo. There is also a flourng pearl fishery on the northern coast Australia, where a large fleet of ves- is employed, and another extensive intry has lately been reported in the neighhood of Thursday Island, north of eensland.

he gathering of pearls from fresh-water lls has been carried on for centuries on continent. When De Soto was made vernor of Cuba it was agreed that one- of all treasures won in battle, includ- *pearls*, should be given to the Spanish wn, and on one occasion his men are l to have obtained 350 pounds weight of rls from Indian graves in Cutifachiqui. e value of pearls from fresh-water shells ies greatly, depending on their size and or. One pearl from a fresh-water mus- was sold for $1,500, while a round, pink rl from Tennessee brought $650. One the finest pearls ever collected in the ited States was the "Queen." It had a utiful luster and weighed 93 grains. It s found near Paterson, N. J., in 1857, was sold to the Empress Eugenie for 00. To-day it is probably worth $10,-

earl fishing in the United States has n carried on in many States, including ntucky, Tennessee, Texas, Wisconsin, Il- is, Arkansas, Missouri, Georgia and nsas.

he manufacture of ornamental objects, h as pocketbooks, hand satchels, jewel es, etc., from pearl shells has, during nt years, become an important indus- and, with their iridescent shades of non, purple, pink and cream, very beau- l articles are made.

he pearl button industry has increased ensively during the last eight years, and eral factories, especially in towns in a and Illinois bordering on the Mis- ippi River, are now in operation. The ncipal species of fresh-water mussels ose shells are used in their manufacture he "niggerhead" (*Quadrula ebena*), while eral varieties of "sand shells" are also ployed, including the "yellow" (*Lamp- s anodontoides*) the "black" (*L. rectus*), l the "slough" (*L. fallaciosus*). One of best shells is the "deerhorn" (*Tritigo- verrucosa*), and another favorite is the tterfly" (*Plagiola securis*). The pearl ton industry in the United States began 1891, the first factory being established Muscatine, Ia. The largest factories turn as many as 1,000 gross of finished but- s a day, the average price obtained be- 35 to 40 cents a gross.

---

ive venders of bogus jewelry were forced leave La Porte, Ind., last week, by Chief Police Cochrane, of that place. No ar- ts were made, but the men were threat- d with prosecution if they remained in city.

# Modern Ring Making

Life Studies of Larter Workmen

ILLUSTRATION NUMBER EIGHT

THE FINISHER

¶ The last step in Modern Ring Making, but not the least important, is to put upon each ring the finish the pattern requires to bring out all of its fine points.

¶ It is money wasted to have fine designs and carefully cut dies unless the ring is finished so that none of its beauty is lost.

¶ Our Finisher, who has had many years' experience in our own factory, treats each pattern with such care that the finish is one of the characteristics of the Larter Rings.

¶ Made for Man, Woman and Child.

## A Valuable Report on the Precious Sto of California.

GEMS, JEWELERS' MATERIALS, AND ORNAMEN STONES OF CALIFORNIA, BY GEO. F. KUNZ, A. M. Issued by the California State Mining Bur Ferry Building, San Francisco, Cal. 12mo, pp Published at Sacramento by W. W. Shan Superintendent of State Printing. Price, 5 postage, 6c. extra.

THIS comprehensive report on the minerals of California was issued cently by the Mining Bureau of that St and the State minerologist, Louis E. bury, in transmitting the book to the bu highly praises the work of Dr. George Kunz, of Tiffany & Co., New York, in lecting the data and compiling the vol

In his introduction, Dr. Kunz calls at tion to the several stages in the deve ment of California, first as a region of g then as a great agricultural and fruit gr ing State and lastly as the home of won ful richness in gems and precious sto Although the discoveries have been rated from time to time as they occu the annual reports of the United St Geological Survey, yet until the appear of this volume there has been no syste statement of the gem production of State, beginning with the early deve ments. The hope is expressed that present work may give an impetus to ther discoveries and advances.

The developments in this line in the four years, especially in Southern fornia, are pronounced phenomenal. the writer says that they have not been alleled by those in any other country. he believes that they have only comme and that in a few years many new and portant discoveries will be made so California may become known as on the greatest gem producing countries i world. The total value of the gold. and minerals of California that have diffused to the world is estimated at 000,000,000.

A curious fact, stated by the autho that the people of California as a w seem to have less interest in the gem erals, and know less about them tha the residents of Russia, Spain or Gern The gems are better represented in the seums of New York, London and P than in in the museum of the State w they are found.

The distribution of gem materials in fornia is outlined in a general way by author. He describes the gold regio the central and northern counties the western borders of the Sierra Ne where are found gold quartz, used for elry and ornamental work, and the fe interesting diamonds which occur in gold-bearing gravels of the surface pl and old river beds.

Tulare County, centering around V where the recently developed chryso mines occur, is the second region descr The third is the desert section in the s west bordering on Nevada and Ari where occur the turquoise mines. fourth section, declared the most re able gem region of the State, is that veloped within a few years in San D and Riverside counties, where occur minerals among the gem tourmalines the gem spodumenes are prominent.

lon to this region the author speaks of tl finding of other gems besides those mentioned, as follows:

sides these, other gem-minerals have lately bc found in adjacent or associated workings, especially topaz, transparent epidote and axinite, p , green and hlue beryl, and essonite garnet—tl whole forming an assemblage of such minerals tl is scarcely, if at all, equalled anywhere in the w d. Many of these mines are as yct only p pects, or trial openings; hut the indications a that the region is full of possihilities. Lack o water and fuel are the chief obstacles thus far tc much more extended development.

general, it may be said that throughout the g itic region of San Diego and Riverside coun- tl there is a widespread prevalence of an igneous r of gray color which is generally called a dite, with a little disseminated quartz and mica (tite); some samples, however, Prof. T. C. Hkins, whose account is quoted further on, dc- tcrmined to be gahhro rather than diorite. This r , and the granite, appear in a series of ridges, o nountains, with a prevailing north and south c se, and are traversed hy dikes, or perhaps, a Prof. Hopkins thinks, veins, of pegmatite—very c sely crystallized granite. These have a general c ction of northwest and southeast, and dip s hward or southwestward at varying angles at d rent points. It is in these pegmatite veins or d s, which vary more or less in their structure, possess great general similarity, that the gem- n erals are found.

After showing the importance of the dis- c eries and their general character, Dr. Kunz gives an historical outline, which t ows light on the circumstances under v ich the gem mining industry is growing, a l reveals some of the possibilities in store f those who persevere. Back in 1872 the f t discovery of colored gem tourmaline i the State was made by Henry Hamilton i Riverside County at the southeast slope c Thomas Mountain. In the course of s ne years, mining was begun in three lo- c ities hereabouts with results more or less s isfactory. The early specimens were t en out quietly, and the locality was not c ulged for some time, so that this activity s unrecorded in the early lists of Cali- nia minerals, given out by the State au- t rities. As recently as 1884 the official p lications contained no reference to these c coveries, but Dr. Kunz says that he has s itive knowledge of the facts and has a s cimen obtained prior to 1873.

Further discoveries are recorded as fol- ys:

he second important discovery in this region made, or at least announced, 20 years later, 1892, hy C. R. Orcutt—the great locality of ia minerals at Pala. Some allusions to red rmaline from uncertain sources in this part of State had appeared hefore, hut nothing very cific. In the list of California minerals pre- ed by Prof. William P. Blake in 1880-82, and quoted in that of Henry G. Hanks, puhlished 1884, references are made to the recent discovery rubellite, for the first time in the State, asso- ed with lepidolite, "in the San Bernardino ge, southern California." The general descrip- is precisely that of the Pala specimens, hut location is very indefinite. Mr. Hanks refers the same association under lepidolite, and men- ns a specimen in the State Mining Bureau, from Diego County, and remarks that "this may some future time he found profitable to ex- ct lithium from it"—a prediction abundantly ified now. Mr. Orcutt, however, was the first make the locality known.

* * * * *

The next most important discovery was made years later, in 1898. This was the wonderful sa Grande locality, some 20 miles southeast of la. There are various stories ahout the Indians ving known it for many years, hut the fact that ne of the highly colored crystals are found in dian graves in the vicinity, suggests that they y have heen known and valued perhaps for a ry long time. The ledge in which they occur exposed by erosion on the side of the moun- n, and the natives had certainly learned where

to find crystals and had them in their posses for some years before the whites knew anyt about them. It is even said that they had lea how to do a little rude blasting, and thus to r the cavities in which the minerals occur. It not until 1898, however, that this now fan locality was made known to the world.

* * * * *

For several years, these above noted were only gem mines of this region, and their pro was highly esteemed. But in 1902 began a su sion of new discoveries that have attracted attention. On Pala Chief Mountain and on art Mountain began to be found not only fin ored tourmalines, but the novel and remark gem-spodumene, designated as kunzite. This named mineral was found by Frederick M. Sic at what is now known as the White Queen on Heriart Mountain, east of Pala, early in it is claimed, indeed, that he had obtained or two pieces some time before, but it was identified. In July, 1902, Mr. Sickler visited Diego and Los Angeles, and showed specimen local jewelers and collectors, none of whom cognized it. The first determination was mad the writer, from specimens sent by Mr S early in 1903.

The great Pala Chief Mine, which has give name to the middle one of the three ridge mountains at Pala, and has yielded magnif tourmalines and the largest and finest gem-sp mene crystals, was located in May, 1903, by J A. Salmons, John Giddens, Pedro Peiletch Bernardo Heriart. The actual discoverers probably the two last named, the Basque pectors, who had already been working an cating claims with the two Sicklers, father son, on Heriart Mountain, the ridge a little t east. Mr. Salmons has been the principal oper however, of this very notable mine.

* * * *

Meanwhile, Sept. 8, 1902, gem-tourmaline been discovered on Aguanga Mountain, some miles south of Oak Grove, by Bert Simmons. locality lies nearly east from Pala and south that at Coahuila, next to be mentioned, and equally distant from the two, some 15 m Kunzite has since been found on the same cla

May 30, 1903, Mr. Simmons discovered both ored tourmalines and kunzite in Riverside Co scene 10 miles west of the old Hamilton (first) covery. The locality is on Coahuila Moun about 20 miles northeast of Pala. The mine for some time known as the Simmons Mine has been sold to E. A. Fano, of San Diego, is now called by his name. This is one of most promising and productive mines of region.

The discoveries at and around Ramona foll in rapid succession, in 1903. Some had been several years earlier, but they had not attr much notice. Essonite garnet was reported Ramona in 1892, by D. C. Collier, and also epidote. Much of the essonite found here is of rich color and fine gem quality.

Several mines, with this "hyacinth" variet garnet and more or less of beryl and tourm were located in May, July and September, 19

Oct. 3 of that year, topaz was discovered in same vicinity by James W. Booth and John Farley. This was a novel and important add to the gem products of the State. The cry are of various sizes, some of them large, transparent, and range from colorless to shades of blue, much resembling these from old and well-known locality at Sarapulka in Ural Mountains.

As to the future and what it has in s for the industry, Dr. Kunz says:

In regard to the future of precious stone m in southern California, although the great dea output of to-day is not adequate for the w demand, it will require possibly a change fashion or new adaptability of materials to sume all the semi-precious stones that are to develop if mining is continued in this line much more energy. California as a tourist sort has the advantage over many other place being an attractive country, drawing many th sands of strangers, who are generally more less affluent, and if the precious stones them are handsomely or quaintly cut, and are in instances what they are represented to be, t is likely to be a large demand created in this Unfortunately, at other places in the United St foreign or artificial minerals have been substit for native material. If the smoky quartz, dolite, and like minerals were worked up desk weights, seals, charms, etc., a great quan

could also be sold not only in California, but el where. It was the development of an industry l this in the Ural Mountains of Russia, brou about by Catherine II. sending two lapidaries that region, that led to the employment of fu 1,000 people in the Ural district. As the chry prase, the turquoise, and the tourmaline of C fornia, when not of fine gem quality, have h cut into crude beads of East Indian type, i small forms of mosaic work, and the like, large quantity of this material has found a defi market in Europe as well as in the United Sta that otherwise would have been a loss in mini The development of proper lapidary interests this kind will surely do much to sustain the min of gems in California and add appreciably to wealth of the gem regions.

* * * * *

A large number of the many varieties of preci and semi-precious stones and rare minerals found in California, and systematic search increase the production until California takes h rank as a gem State. In 1901, California p duced quartz crystal to the value of $17,500, t maline to the value of $20,000, and turquoise o $20,000; the lepidolite amounted to $27,500, g quartz, etc., over $50,000; mother-of-pearl pearls over $15,000, and souvenir material p ably over $20,000. The grand total amounted nearly $175,000. In 1903 kunzite was produce a value of $20,000; tourmaline, $20,000; chr prase, $15,000; turquoise, $40,000.

Treating of the diamond discoveries, points which recall at first sight the mond mines of Brazil and South Afr such as similarity in rock and gravel for tions are discussed. The writer conclu that these relations, so far as ascertai are not important and afford no basis assuming a similar richness of yield or identity of geological yield.

Considerable attention is given to work now being done by the various m ing companies in different parts of the St Results already accomplished by each c pany are given with details as to the mi the advantages and difficulties being countered and facts in relation to the chanical appliances, machinery and ployes. The book is illustrated with tures of the most notable gems that h been found, and of views in the mining tions. There is a full page auto-print kunzite crystal made by exposure to Röntgen rays for five minutes and t laying the crystal upon a photographic pl The book is one of a series which the S Mining Bureau distributes.

### Trunk of Salesman for Chicago Jewelr House Stolen and Rifled of Contents at Leeds, S. Dak.

CHICAGO, Sept. 30.—A. M. Shepar western traveling salesman for A. C. Bec en, of this city, lost a trunkful of jewel at Leeds, S. Dak., two weeks ago, und peculiar circumstances. Mr. Shepa stopped at the Parker Hotel at Leeds a notified the day clerk of the hotel to se his trunk down to the depot in time f the midnight train. Upon learning th this train was usually some hours late, M Shepard notified the clerk that he wou not leave on the midnight train, but w leave the following day at 2 P. M. It a pears the clerk disregarded Mr. She instructions and sent the trunk to the de that evening without Mr. Shepar knowledge. When Mr. Shepard found the next morning that his trunk had alrea gone to the baggage room, he went to depot to check it, but it could not found.

Some time later the trunk was fou a good distance away from the stati among a clump of bushes. It had be opened and rifled of most of its conte Some of the cheaper grades of jewelry w found in the trunk and pieces were a scattered on the ground. The entire c tents of the trunk are valued at $8,0 About $6,500 worth of jewelry, mos loose diamonds, was stolen.

An investigation showed that the tr was not delivered to the baggage ro of the depot, but was left outside on platform. The company is insured in Jewelers' Safety Fund Society and i member of the Jewelers' Protective Un which has Pinkerton detectives working the case.

### Courts Asked to Decide Question as to When Hat Pins Are Jewelry.

An appeal to the United States Circuit Court was taken last Thursday by the Collector of the Port of New York from a decision of the Board of United States General Appraisers on the classification of hat pins imported by I. Emrich & Co. The Board had before it a large number of cases involving the duties on hat pins of various kinds. The importation of the various articles in controversy began back in 1898, and has continued since. Each importer filed numerous protests from duties assessed on the shipments received during these years, so that the total number of cases runs into the hundreds.

The hat pins imported by I. Emrich & Co. had plain heads, made in beads of glass or paste, generally in imitation of jet or white pearls, but some of the beads were of transparent and green glass. These pins the Board classified as manufactures of glass, dutiable at 45 per cent. ad valorem, reversing the decision of the Collector, who had classified the merchandise as jewelry, dutiable at 60 per cent. The Government, not satisfied with the decicision, now takes the case to the courts.

It is expected that some of the importers will appeal in cases in which the Board decided that hat pins were jewelry. The attorneys for the importers, when the decisions in test cases were made known, showed an inclination to accept the conclusions of the Board all around, but a new face is put on the subject by the attitude of the Treasury Department in beginning this fight in the courts in one of the ca[s]. The expectation is that the importers [will] now appeal in some of the cases decid[ed] against them in order to renew the c[on]-test along substantially the same lines [as] when the cases were argued before [the] Board.

General Appraiser Sharretts wrote [the] opinion for the Board in all the cases. [The] principle which he followed was that w[here] the pin heads were made in imitation [of] precious stones or showed artistic w[ork]manship in carving or enameling, they [were] dutiable as jewelry, but in the case of [those] with simple bead heads of glass or p[aste] he held that they were not jewelry. S[uch] articles, he said, are commonly bough[t] notion or dry goods stores and, accor[ding] to the testimony of both domestic manu[fac]turers and importers, were never rega[rded] in the trade as jewelry. The other [kind] of pins, he said, are regarded as jew[elry] both by the manufacturers in the U[nited] States and by the importers.

An official familiar with the situation [says] that the Board's decisions will, wit[hout] doubt, be confirmed by the courts, and [the] Government, in directing an appeal, is c[ausing] ing unnecessary expense, with some att[end]ant discomfort to the manufacturers.

---

Fire destroyed the jewelry factory o[f] Wm. C. Finck Co., Elizabeth, N. J., Tue[sday] of last week. The flames broke out [at] A. M. The blaze had gained [a] headway before the firemen arrived, an[d] entire building was gutted. The losses [are] roughly estimated at $25,000.

## National Law Popular.

### Jewelers in All Sections Favor Measure Against False Marking of Gold and Silver.

THE CIRCULAR-WEEKLY'S bill to forbid interstate commerce in gold and silver improperly marked, continues to meet with general approval. Among the recent comments on the measure are the following:

UTICA, N. Y., Sept. 28.—Local jewelers are practically unanimous in favor of the law which will forbid interstate commerce in falsely marked gold and silver ware. Some of those who are urging the passage of the law believe it should go even further and have it provide a severer punishment for any one who marked 14-karat ware when it is not up to the standard.

W. B. Wilcox: "There is a lot of this false marking, especially in cheaper wares. Some articles which have a 14-karat mark will not assay over 10 karats. This deception is generally practiced in making gold rings and chains. None marked 14-karat ever run over that, while many run down to 10-karats, while articles marked 10-karat often run down to 7 karats. The only remedy that I have found is to deal with good houses. We buy our stock of good houses, whose wares show the highest assays. There is occasionally some 10-karat ware falsely marked, but the deception is mainly in the articles marked 14 and 10 karat. This agitation is increasing trade among the good and square manufacturers."

Evans & Sons: "All good, honest business houses are in favor of the proposed legislation. Anything that will insure the proper marking of gold will meet with general approval."

G. Will Payne: "I am very much in favor of legislation. If its provisions can be enforced to the letter much good will result."

SAN FRANCISCO, Cal., Sept. 27.—THE CIRCULAR-WEEKLY bill has many friends in this city. In fact, no jewelers are opposed to it and the great majority heartily favor its passage.

F. H. Levy, president of M. Schussler & Co.: "I think that all goods should be exactly what they are marked, and I heartily commend the action of THE CIRCULAR-WEEKLY in introducing such a bill. Such a law will be of benefit to the legitimate jewelry business, both wholesale and retail, but it may hurt a lot of 'fake' jobbers and retailers, and by so doing put the trade on a more equal basis, giving those who are trying to conduct a legitimate business some encouragement to do so."

A. Judis, of the Alphonse Judis Co.: "We are decidedly in favor of making the marking of gold and silver jewelry represent the exact quality of the goods, and wish to indorse the crusade now being made by THE CIRCULAR-WEEKLY. Such movements, if successful, tend to place the trade on a higher level."

Mr. Huggins, manager of A. I. Hall & Son: "I believe that the movement started by THE CIRCULAR-WEEKLY toward the passage of a law forbidding interstate commerce in falsely marked articles of gold and silver, is a good one and one which will result greatly to the advantage of all who are doing a square business. A good many firms have already begun stamping their gold jewelry with their trade-mark guaranteeing the quality. I sincerely hope the law will be passed, and I wish to commend the action of THE CIRCULAR-WEEKLY."

### NATIONAL STAMPING LAW.

There seems to be a demand for a national stamping law regulating the manufacture and sale of properly marked gold and silver. While the laws of the several States are good as far as their jurisdiction extends, nevertheless, the fact that many goods are manufactured in one State, distributed in the other, and sold in a third, makes especially desirable a law that will put the manufacturer, wholesaler and retailer on a common basis. The main object to be accomplished is to make illegal the shipment of improperly stamped articles, including also articles bearing no stamp at all.

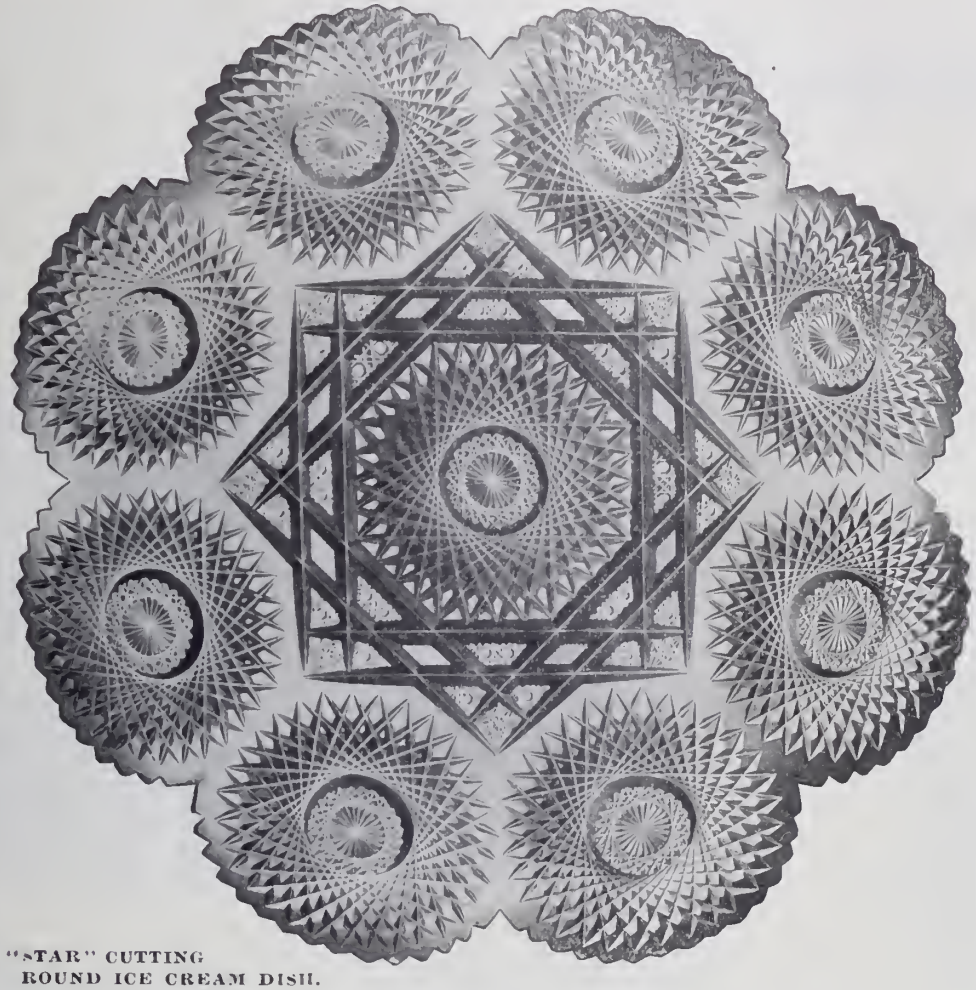
Now that the need for such national legislation is apparent to all, the next and most difficult task is to frame up and secure the passage of a suitable law that will pass muster with the judiciary and also run successfully the gauntlet of committees. THE JEWELERS' CIRCULAR-WEEKLY has framed such a bill to be presented to the next legislature which is calculated to meet all the above requirements. While it is probable that a majority of the trade are not versed in the technicalities of law, suggestions are invaluable to those having the preparation of the bill in charge, but so far as presenting to our representatives in Congress the necessity of such a law, the trade is all powerful and can secure the passage of the bill.—*The Milwaukee Jeweler*

### Contract Awarded for Silver Service for U. S. Cruiser "Maryland."

BALTIMORE, Md., Oct. 2.—The contract for the silver testimonial for the cruiser *Maryland* was awarded this morning to Samuel Kirk & Sons Co. The service is to consist of 48 pieces and will cost $5,000. Thirty-one of the pieces will represent the counties of the State, and besides these there will be 12 punch cups, representing the first 12 colonial governors. There will also be three ladles and servers.

There is to be chased on each piece a design representing great historical and civic events in which the State of Maryland has played an important role, and each piece will also be suitably inscribed. The scheme of the design is to denote "hospitality . . . plenty."

The contract requires that the service be completed within six months. The Kirk concern also designed the silver service presented to the cruiser *Baltimore*.



A. H. Bahans has moved from Ainsworth to Columbus Junction, Ia.

## Man Arrested in Baltimore, Md., Believed to be Wanted in Several Other Cities for Passing Bogus Checks.

BALTIMORE, Md., Sept. 29.—The local police believe they have made a good capture in the arrest of James R. Reed, alias Lamson, alias Best, a bogus check man, who they think has been at work successfully in Buffalo, Youngstown, O., Pittsburg and Philadelphia, and possibly New York. The arrest was made through the foresight of George Walker, whose jewelry store is located at 24 W. Lexington St. and on whom "Reed" attempted to pass a bogus check in return for a handsome diamond brooch.

The man entered Mr. Walker's store about five days ago to look at some diamonds, and took a fancy to a brooch, the price of which was $300. He arranged to buy it, requesting that it be cleaned, and offered to pay with a check, stating he was in the commission business on Light St., with offices in the Continental Trust building. Mr. Walker became suspicious, and under a pretext left his customer long enough to quietly call up the captain of detectives, notify him of his visitor and as advice. The captain told him to proce with the sale, but not to accept the chec The final settlement for the brooch w postponed until Wednesday, when the ma returned to complete the sale. The broo seemed satisfactory, but when a check f $375 was offered, signed "James R. Reed the jeweler asked time to learn the validi of the check. It was purported to be ce tified by Magruder Powell, cashier of t National Bank of Commerce, and w drawn to the order of Mr. Walker. Re was then arrested by two detectives w were lurking in the neighborhood for hi

JAMES R. REED, ALLEGED CHECK SWINDLER, ARRESTED AT BALTIMORE, MD.

When searched at headquarters two a ditional checks were found, and he al attempted to destroy several on the w but was prevented.

A search of his rooms at the Eut House, where he had registered as C. Hackett, revealed other checks signed James R. Reed, and a dress suit case co tained a number of blank checks and t rubber stamps, one being marked "The N tional Bank of Commerce" and the oth "Certified Check," ink pads, etc. Thirty r ceipts from business houses in the cit

named above for jewelry and silverware were also found, made out to the name of "D. C. Best," which name the accused evidently used in other cities.

As soon as his arrest became known here other charges were registered against him by I. J. Brown, 428 E. Baltimore St., from whom he attempted to secure a brooch worth $350, and by fur merchants, etc. A number of pawn tickets issued by pawnbrokers in New York and other cities were found among his effects. The prisoner was given a hearing before Justice Grannen at the Central police station yesterday, and was committed to jail to await the action of the Criminal Court on four charges.

The alleged bogus check operator is about 30 years old, of slight build and has blue eyes and a light mustache.

### Stock Valued at $3,000 Stolen from San Francisco, Cal., Jewelry Store.

SAN FRANCISCO, Cal., Sept. 27.—A thief or thieves walked into F. H. McConnell's store at 14 Post St. at an early hour Friday morning and walked away with a box of jewelry which a clerk had just taken from the safe deposit vaults. The jewels consisted of watches and an assortment of diamond, emerald and ruby rings, valued in all at $3,000.

The store from which the missing valuables was stolen is jointly occupied by Mr. McConnell and the real estate firm of Hooker & Lent. F. A. Leonard, the clerk who brought the box containing the jewelry from the safe deposit vault, placed it on a shelf in the store and then stepped out for a moment, leaving the store in charge of the clerk in the real estate office. When he returned, a few moments later, the box containing the jewels was gone and the clerk who had been left in charge could give no clue to its disappearance further than that a young man had called during Leonard's absence and had asked to see their rental list.

The clerk told him to help himself and then paid no further attention to him. The police have obtained a description of the young man and he is as yet the only suspect. They believe that the job was done by those thoroughly familiar with the business and that the clerk had been shadowed for weeks prior to the robbery on his daily trips from the deposit vault.

Mr. McConnell has offered a reward of $1,000 for the return of the booty, and no questions will be asked. He says that the greater portion of it is of more value to the owner than to anyone else.

A. Hurley, McCurtain, Ind. T., moved recently to Chant, in the same State.

Isaac Cohen has succeeded to the business of Mrs. H. Cohen, Victoria, Tex.

Mrs. Matilda J. Stone, St. Joseph, Mich., has been succeeded by Cochran & Stone.

The latest arrival in the field of jewelry trade journalism is the *Milwaukee Jeweler*, published at Milwaukee, Wis. The first number, which is dated September, is a 16-page sheet, fairly well filled with interesting news and technical matter, and no doubt its successors will be even better. The paper will appear monthly and is edited by Carroll W. Smith. The business manager is Franklin Thomson.

### Recent Customs Decisions on Protests Involving Precious and imitation Stones.

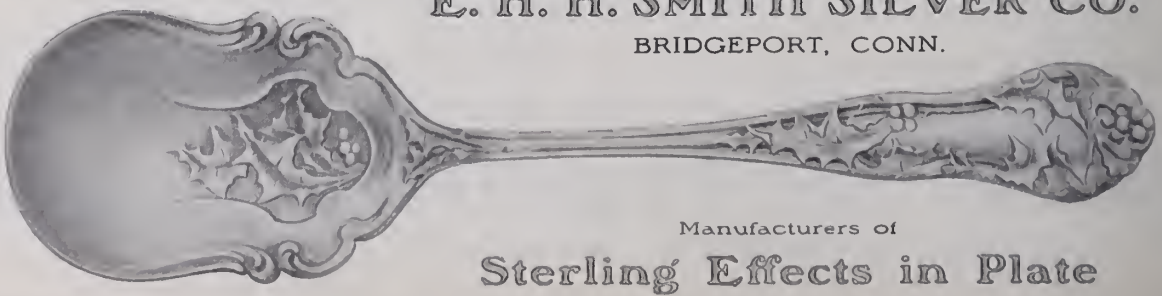
Among the decisions by the Board of United States General Appraisers published last week by the Treasury Department are the following:

PRECIOUS STONES—IMITATION PEARLS DRILLED.—Protests, etc., of James E. Caldwell & Co. against the assessment of duty by the Collector at Philadelphia. On the authority of G. A. 5776 (T. D. 25549), the Board held certain crystal rondelles and drilled opal balls to be dutiable as precious stones cut but not set, under Par. 435 Tariff Act of 1897. Certain imitation pearls drilled were held to have been properly classified as beads under Par. 408.

PRECIOUS STONES—HALF PEARLS.—Protest of Rud. C. Hahn against the assessment of duty by the Collector at New York. Protest sustained on the authority of G. A. 6097 (T. D. 26586) and G. A. 5914 (T. D. 26013), relating to precious stones cut but not set (beads and rock-crystal balls), and half pearls.

IMITATION PEARLS.—Protests of R. Buhle against assessment of duty by the Collector at New York. Protests sustained.

PEARL BEADS STRUNG.—Protests of H. Wolff & Co. against the assessment of duty by the Collector at New York. Certain beads, temporarily strung, were held to be dutiable as manufactures of the component material of chief value, as claimed by the importers.



HALF PEARLS.—Protest of Louis Strasburger's Son & Co. against the assessment of duty by the Collector at New York. Protest sustained on the authority of G. A. 591 (T. D. 26013), relating to half pearls.

MILLINERY ORNAMENTS—IMITATION JET.—Protests of Morris Goldberg *et al* against the assessment of duty by the Collector at New York.—The Board sustained the importers' contention that certain millinery ornaments and paste articles in imitation of jet should have been classified as manufactures of the component of chief value.

---

I. G. Dillon & Son, Wheeling, W. Va., recently celebrated the 30th anniversary of their business career. The original member of the firm, I. G. Dillon, learned the trade of watchmaker and engraver with the late C. P. Brown, of Wheeling, in 1868. He was admitted as junior partner in business with Mr. Brown in 1872, and in 1875 he engaged in business with W. A. Turner under the firm style of Turner & Dillon. Mr. Turner finally retired, and I. G. Dillon assumed entire control.

### Arrest of Italian Couple Solves Mystery Surrounding Several Robberies of Maiden Lane Firms.

An arrest was made last Thursday which seems to explain at least one of the burglaries that recently occurred in Maiden Lane, and also throws light on a considerable amount of stealing of silverware and jewelry that had not been previously reported. Antonio De Sisto and his wife, Angelina De Sisto, who live on the first floor of the tenement building at 15 Roosevelt St., and whose occupation for 15 years has been to go through Maiden Lane, picking up rags and papers, are accused of committing the burglary in the salesrooms of Isaac W. Cokefair, 25 Maiden Lane. In the Tombs Police Court the couple were held for further examination.

It will be recalled that on the night of Sept. 20 this store was entered and plated ware to the value of approximately $300 was taken. No force was used in gaining entrance, the thief or thieves apparently picking the lock or using a false key. Inside the store nothing was disarranged, but a quantity of knives, forks, spoons and other plated merchandise was taken from the cases. The door was locked when the porter arrived in the morning, indicating that the thief must have taken time on going out for the purpose of locking it.

Detectives Nugent and McGinnis immediately began an investigation. In searching the premises they discovered a piece of Italian newspaper, and on making inquiries they learned that an Italian rag picker and his wife came into the district every morning to gather up the waste paper, which they carried away in bags. A visit to the rooms of the couple was then made by two Italian officers, who impersonated inspectors of the Board of Health. The place was indescribably filthy, being littered with bags and bales of paper and all sorts of rubbish. On examining some of the bags the detectives discovered inside quantities of silverware, and the couple were then placed under arrest.

A truck load of silverware and dry goods was taken to the police headquarters in Mulberry St., and a number of the storekeepers in Maiden Lane were notified to inspect the property for the purpose of identifying it, the conclusion being reached that the Italians had been systematically stealing for some time from several stores. Included in the property seized by the detectives was a quantity of silverware stamped with the name of the Derby Silver Co., and other silver bore the stamps of the Gorham Mfg. Co., the Reed & Barton Co., Rogers & Bro. and the Wilcox Silver Plate Co. There were cases of spectacles from the Julius King Optical Co. and the Spencer Optical Co. Shirtings, hats and other articles of men's wear were found with the marks of John Forsyth, W. P. Andrews, D. H Arnold & Co. and Dunlap & Co. The police valued the lot of merchandise at $2,000. Two bank books in Mrs. De Sisto's name showed deposits to her credit in the Bowery Savings Bank and the Emigrant Industrial Savings Bank aggregating nearly $6,000.

Mr. Cokefair went to the police headquarters and at once identified a considerable quantity of the Derby silverware and articles that were stolen from his store on the night of the burglary. A representative of the Gorham Mfg. Co. identified a carving receiver and one or two other small articles and other merchants also went up and claimed their property.

Geo. W. Shiebler & Co. sent a representative to inspect the silverware in the hope of finding some of the articles taken from the firm's window on the night of Sept 7 but they were unsuccessful. It is, of course possible that the thieves had sold the stolen articles and the metal may have been melted. The robbery at Geo. W. Shiebler & Co.'s store was of the window-smashing kind. Detectives believe that the old couple if they did not actually commit this robbery, at least had a hand in it. The supposition is that perhaps some younger Italian broke the window and that the silver was carried away in the usual bags.

It is suspected that most of the stolen articles were taken by the Italians in the basements of the several establishments

which they visited for the purpose of gath ering the waste paper. The practice of th couple was to go to Maiden Lane early i the morning, usually about daybreak. A soon as the porters opened the trap door leading to the cellars the couple went dow and took each day the bag which they ha left the day before to receive the paper

In some of these cellars repairing is don and the shipping departments are activ here. It is said that a couple going in an out as the Italians did, without espionag could have no difficulty in grabbing article of silverware or jewelry, now and then, an secreting them in the bags. Then the could walk out with the bag before the ey of the owner and his clerks who woul suspect nothing. It is regarded as likel that the robbery of Mr. Cokefair's store too place before daylight, and this was also th case in the Schiebler robbery.

The police now say that the Maiden Lan storekeepers have themselves to blame i part for their losses. It is pointed out th there is danger in allowing rag pickers t go to and fro in cellars containing valu able wares, unless close watch of their a tions is maintained. Some of the Maide Lane concerns have no stairs leading fro the sidewalk to the cellar, and outside are not permitted to enter. This syste police regard as preferable to the othe Another point made by the police is th the street lamps do not provide sufficie light for the interior of the stores, and th lamps should be left burning in the in ide

### Man and Woman Swindlers Recognize at Pittsburg, but Escape Police.

PITTSBURG, Pa., Sept. 28.—Two clev swindlers, a man and a woman, the san parties who attempted to work a cred game in New York, dropped into Pittsbu a few days ago and escaped the vigilance the police. The pair was recognized by New York traveling man as a couple wh represented to various wholesale jew ers in New York and elsewhere that th were about to open up a store. Their pr mary object was, of course, to get cred and then leave the town, taking the boo with them.

The Pittsburg detectives were notifi of the presence of the couple here, the r port coming direct to Acting Superinten ent of Detectives James Eagan, who se several of his men to the Hotel Henry round up the couple. The pair, howeve had evidently recognized the New Yo traveling jewelry salesman (whose nam the detectives will not give), for the coup got away without, however, being able work their tricks here. The detective for notified the wholesalers to be on the loo out for the pair. The woman is describ as being 40 years old, wearing a light wa and dark skirt. She has auburn hair, whi makes her all the more conspicuous. T man is 5 feet 8 inches tall, has a Rom nose, dark complexion, dark hair and wea patent leather shoes with white buttons.

Detective Eagan says that a couple a swering this description is wanted he and if his men had run them down th would have been arrested and held pendi developments on the local charge. It believed that the couple will attempt to g goods elsewhere, so jewelers in all secti are warned to be on the lookout for them

### Chicago Loan Brokers Arrested on Charges by E. A. Rich, Exonerated by Court.

CHICAGO, Sept. 30.—L. Bauman, of the Bauman Loan Co., and D. M. Bernstein, of the United States Loan Bank, who were arrested last week on warrants sworn out by E. A. Rich, of the Elmer A. Rich Co., were discharged to-day in Justice Johnson's court, where the cases were tried. Both men were charged with knowingly concealing stolen goods.

The case is the outcome of a transaction between the Elmer A. Rich Co. and Mrs. Louis Berg. Two weeks ago Mrs. Berg got $2,500 worth of jewelry from Elmer A. Rich Co. on memorandum and pawned them with Bauman and Bernstein. The court held that the woman's taking the goods on memorandum did not constitute larceny, theft or burglary. It was shown at the trial that Mrs. Berg had taken thousands of dollars' worth of diamond jewelry on memorandum and had returned these several times after failing to sell them.

This does not end the case. Mr. Rich will bring an action in replevin to gain possession of the jewelry. S. T. A. Loftis of Loftis Bros. & Co., has offered Mr. Rich the services of his attorney free of charge and the outcome of the case will be watched with interest by all jewelers.

In the meantime D. M. Bernstein and L. Bauman say they will sue Mr. Rich for false arrest and defamation of character. All the loans when made were duly reported to police headquarters.

### Reappraisements of Silverware, Coral, Horn Combs, Etc.

Reappraisements of silverware and articles of jewelry were announced last week by the Board of United States General Appraisers as follows:

Silverware from G. Volterre, Rome, exported Feb. 16, 1905, entered at New York (File No. 34704); findings of Fischer, G. A.; 557 ounces entered at $300, advanced to $678 for all. Add packing.

Manufactured coral from Francesco de Simone Naples, exported Aug. 2, 1905, entered at New York (File No. 36392); findings of Sharretts, G. A.: 1,000 fili spezzato, entered at 7, advanced to 10 lire per 100 strings; 191 portorentagli, entered at 30, advanced to 40 lire per string. Add packing.

Silverware from John H. Hammond, Bremen, exported June 20, 1905; entered at New York (File No. 36070); findings of Board No. 5: 1 case silverware, entered at 500, advanced to 1,791 marks for all.

Horn combs from Birmingham, exported May 19, 1905, entered at Newport News (File No. 35852); findings of Board No. 1: 2 gross combs carded, 1129, entered at 24/6 per gross; 2 gross do., 267, entered at 39/- per gross; 2 gross do., 347, entered at 45/- per gross; 1 gross do., 1024 entered at 54/- per gross; 2 gross do., 670, entered at 40/- per gross; 2 gross do., 669, entered at 36/- per gross. And similar goods. Discounts 5 per cent. and 5 per cent. Reappraised at same prices, less discounts 5 per cent. and 2½ per cent. Add cases.

W. G. Mohris, Victoria, Tex., has discontinued business.

# For People of Good Taste but Slender Purses

THE 10K LINE WITH A 14K APPEARANCE

Our stylish, well-made 10 K. Line is exactly what the jewelers have needed. Very often sales are postponed, or even missed, because an article is too high in price. Our line overcomes this feature, as the designs, finish and workmanship are equal to high-grade 14 K. pieces.

Kohn & Co

Camp and Orchard Streets, Newark, N. J.

## Baltimore.

William F. Jacobi, of Jacobi & Jenkins, is at present on a trip in Europe.

The old clock post at the southeast corner of Baltimore and South Sts., where stood the *Sun* building previous to the fire, was knocked down, last week, and broken to pieces. The old post was quite a landmark, and since the great fire no clock had been placed in it.

The National Badge & Button Co., for making all kinds of badges, buttons and medallions, has been incorporated by John James Funk, Gerhard J. Hauptmann, George F. Stedman, James H. Alford and John G. Schlipp. The authorized capital stock is $5,000, divided into 100 shares of $50 each.

Gen. J. Stuart MacDonald, president of the J. S. MacDonald Co., was unanimously elected chairman of the Republican City Committee of Baltimore, last week, having succeeded Stephen R. Mason. Gen. MacDonald was talked of for the position for the past week, and when approached by his friends declined to consider the matter at first, feeling it was entirely too much of a sacrifice for him to make, but pressure was brought to bear upon him from all parts of the State and he finally consented. The position is an important one in Republican politics. The General has been well known in local politics for some time past and has always borne a clean reputation, and is estimated very highly by all who come in contact with him. All the Baltimore papers speak very highly of the appointment.

## Utica.

Creditors of the M. S. Benedict Mfg. Co., East Syracuse, will decide at a meeting to be held before Referee Stone at Syracuse Oct. 9, whether or not the plant shall be continued in operation by the trustee, the Syracuse Trust Co., until Jan. 1. The trustee is operating the plant subject to further orders of the United States District Court in this city. The examination of Harry L. Benedict, principal stockholder in the bankrupt company, will be taken up at the adjourned hearing. It is believed the examination of Mr. Benedict will be quite lengthy.

Samuel Orbach, the local bankrupt jeweler, signed, about 30 days before he failed, a bail bond for a local gambler, who left town just before his trial. With him on the bond was John Hinkstone, of Ilion. After Orbach failed and Hinkstone thought he would be liable for the $2,000 he asked the courts to make his share of the liability $500, claiming that he did not know when he signed the bond that he was liable for a larger sum. Seward Miller, the referee, has held that the gambler's bail should not be remitted and Hinkstone will have to settle. Orbach has been held for the Grand Jury on a charge of perjury, because of sworn statements as to his assets when he qualified upon the bond.

The store of R. M. Dempsey, Madisonville, Ky., was destroyed by fire last week.

A. L. Slocum, who recently started in the retail jewelry business in Middleville, N. Y., has sold out and moved to Ilion.

# United States Watch Co.'s O Size Lever Set in ROYAL 20 Year Cases.

At this season of the year, and continuing until after the Holidays, when the demand for O size watches is the greatest, and the supply invariably inadequate, it will be well to bear in mind the discontinued movements of the United States Watch Co. in O size, Lever set 7, 11 and 15 Jeweled Grades, which are being sold, fitted complete with Royal 20 Year cases, of elaborate designs, at special reduced prices that cannot fail to be interesting. These movements are giving perfect satisfaction, and are the equal, grade for grade, of any other make.

**At Special Prices.**

This is an ***extra profit*** opportunity that rarely comes, and will require early action. ***Quick delivery just now.***

## Rochester.

TRADE CONDITIONS.

September was a busy month for jewelrs. Local merchants report increasing sales and a splendid outlook for the remainder of the year. Sales are said to be far ahead of those for the same period last year, and a most successful season is looked for.

Philip Present spent several days, last week, at his new store in Buffalo.

Judgment was taken by default in Municipal Court, last week, by M. I. Danks against Harry Bump for $11.10.

M. Present, of Philip Present & Co., is suffering from an injury to his knee. The knee has been put in a plaster cast and Mr. Present hopes he will soon be over his trouble.

The news of the recent death at Buffalo of Charles Hamlin Stilwell was received with regret in this city. Mr Stilwell at one time conducted a jewelry store here in Smith's Arcade.

Morris Rosenbloom has returned from an extensive trip east and south Mr Rosenbloom reports an excellent condition of trade in the sections which he visited Mr. Levinson, of M. Rosenbloom, is also in from the road.

Bastian Bros.' new factory on Mt Hope Ave., is practically completed, and it is expected, will be in full swing within a few weeks. New machinery is being put in and already 200 persons are at work in the plant. When complete, the working staff of the firm will consist of about 400 persons. The building is three stories high of brick, 135 x 50 feet. The firm own other property adjacent to the new building and plans are already under way for an addition to the present building. The celluloid department, which is but a branch of the business, will have a capacity of 250,000 celluloid buttons a day. Bastian Bros. may well be proud of their new plant. It is the only factory in this section which can be fairly compared with the large plants at Attleboro, Mass., and Providence, R. I.

## Buffalo, N. Y.

Geo. H. Striker, 1883 Niagara St., has consented to be a candidate for Alderman of the 25th Ward on the Democratic ticket.

A detective recently arrested Otto Ross, William Johnson and Gordon C. Low whom he found offering jewelry at bargain prices. The police claim that the jewelry is part of the proceeds of the robbery which took place Sept. 9. Ross was charged with grand larceny and the others were held as suspicious persons.

Louis Byrnes, who said he was a traveler for a New York jewelry house, complained last week to the police that he had been robbed of a satchel containing eight dozen watches, two dozen gold chains and a quantity of jewelry by a well-dressed man whom he met at the Lehigh Valley station. The man, who claimed to be a New Yorker, got into conversation with Byrnes, and the latter, when he went to the baggage room to get his satchel, was told that the stranger had been there before him and claimed it.

Albert Hertze, an itinerant vender of jewelry, died recently at the city hospital in Kingston, N. Y.

# CROWN

**Raised Gold Ornamented**

# CASES

**(Guaranteed 25 Years)**

The handsomest cases we've made for years are our new designs with raised gold ornamentation. The ornaments are in *solid gold*, rich in generous elaboration, captivating in their various colors. Some very finely set with diamonds. Every one so finished that they rival the beauty of solid gold cases. Illustrations of these cases in their actual colors may be seen in the colored inserts shown in the different catalogues now going out. Order early for Fall trade and the coming holidays.

## Attleboro.

TRADE CONDITIONS.

"The best Fall and Winter outlook and the best present conditions for years," is a concise summary of the statements of many jewelry manufacturers seen and questioned the past week. Particularly significant as a straw which shows the wind of prosperity has set in to blow this way, is the fact that night power is on in the Robinson estate group of factories for the first time in 10 years. The firms in these factories have done night work scores, perhaps hundreds of times, but the estate has never considered the emergency sufficiently pressing to keep the power plant running for the benefit of its tenants, and they have been limited to bench work. The present pressure of orders flooding in from all over the country has created a demand for night power which could be resisted no more, and the estate has gladly complied with the conditions. The demands for help in the shops, both skilled and unskilled, have been unusual the past two weeks. While ample unskilled help can be secured in this district, even by taking boys and girls from the farming suburbs, the demand for skilled help has caused workers to be sought from outside in some cases. There are jewelers who assert their belief that this Winter will prove the best for a decade. The period devoted to the making and marketing of Summer goods is fully passed and activity at present is devoted to goods of a higher class. The goods made in the Attleboro shops receive this week an advertisement of value in the New England field. This is the week of the annual Brockton (Mass.) Fair, the largest cattle show and race meet in New England, attended by hundreds of thousands. The Brockton retail jewelers have prepared beautiful and costly window decorations in which Attleboro goods figure prominently.

Albert A. Busbee, of A. Busbee & Co., is seriously ill with sciatic rheumatism.

The local Young Men's Christian Association is organizing a class in jewelry engraving for young and ambitious men in the factories.

William Smith, of Smith & Crosby, who sustained fractures of arm and ribs in an automobile accident early in the Summer was able to be out last week.

Ernest J. Qvarnstrom, of Carter, Qvarnstrom & Remington, whose eyes were hurt in an automobile accident in Providence two weeks ago, was able to pay a short visit to his office last Friday.

Automatic sprinklers last week extinguished a fire started by spontaneous combustion in oily waste in the Frank Mossberg Co.'s factory, owned by James E. Blake, of the James E. Blake Co. The damage was trifling.

C. O. Sweet, Son & Co., J. M. Fisher & Co., F. W. Weaver & Co., F. D. Hall, Sykes & Strandberg, J. T. Inman & Co., Marble, Forrester & Co., D. A. White & Co., Cummings & King, Smith & Crosby, F. L. Torrey & Co. and Smith & Richardson are the firms in the Robinson estate factories where night power is being employed now, for the first time in 10 years.

A group of prominent local residents, including business and professional men, presented, last week, to Col. S. O. Bigney, of S. O. Bigney & Co., a testimonial document. The occasion for so doing was to indorse his undoubtedly successful candidacy for the Governor's Council. His work in Attleboro and Washington to preserve the present tariff protection for the jewelry industry was made a subject of flattering mention in the testimonial.

A check for $12 received from a Boston bank, one day last week, was pronounced a forgery at the First National Bank by George J. Kelley, of W. H. Saart & Co., whose name was signed to it. The check

as protested and was returned to-day. rom appearances it had been negotiated n Providence. From the indorsements on ie back it was evident that the check had een passed at the Outlet Co., in Provi- ence, and then taken to a Providence bank. t was initialed "O. K." in one place and ore a stub number which did not corre- ond with any number in Mr. Kelley's heckbook.

Carl M. Wendelstein has re-entered the e-cutting business, having taken the part ership of William Seekamp in the firm of worbel & Seekamp. The new firm will be nown as Wendelstein & Sworbel, and will e located in the Bushee building on Coun- St. Mr. Wendelstein conducted a die- itting establishment in this town for four ears prior to Jan. 1 of this year. John worbel, with whom Mr. Wendelstein will e associated, gained his education and aining in Germany. He has held posi- ons with large concerns in this country, nd his most important work was done with lversmiths in Brooklyn, when he modeled nd chased a $10,000 trophy for the inter- ational chess tournament.

E. L. Sawyer, a drummer for a jewelry rm, living in Lawrence, had a narrow es- ape from asphyxiation in a Taunton Mass.) boarding house, last Wednesday ight. He was taken to the Taunton Emer- ency Hospital suffering from dislocations f the right hip and shoulder and from ie inhalation of fumes from a smoking mp. He fell asleep while reading a paper nd as he slept the wick of the lamp went p and filled the room with smoke. When e awoke he was almost suffocated with oot. He tried to attract the attention f the people in the house, but failed. Weak nd dazed, he crawled from the bed, stag- ered and fell. He lay there unconscious ntil the morning, when his condition was iscovered and he was quickly taken to the pen air. He was then sent to the Emer- ency Hospital and the discovery made iat he was suffering from dislocations and ie smoke in the lungs.

In the Superior Court yesterday a jury n the case of William H. Hodde, Jr., *vs.* ie Attleboro Mfg. Co., jewelry manufac- irers, brought a verdict in favor of the laintiff for $16,000. Suit was entered for 5,000 by Judge F. B. Byram, North At- eboro, and J. J. Feeley, Boston. The plain- ff is a boy and about two years ago was arrying some fluid of an acid nature, when spattered and he received some of the ontents of the vessel on the face. The ght of one eye was destroyed and there ere other injuries received. This is the eaviest verdict for damages ever brought gainst an Attleboro firm. It was learned iat the case could have been settled before ie trial for $4,000, but the insurance com- any in which the Attleboro Mfg. Co. is nrolled for insurance against payment of amages amended and which guarantees to ontest such cases as this, declined to be esponsible for the payment of the entire mount, declining to pay more than $2,500 nd asked that the Attleboro Mfg. Co. pay ie remainder. This was refused.

---

## New Stores and Enterprises.

M. L. Hartszog has started in business in Hazlehurst, Miss.

J. B. Tary has just begun business on Main St., Benwood, W. Va.

John Rosendahl has begun business on his own account in Mapleton, Minn.

H. L. Stoltz contemplates opening a retail jewelry store in Bellwood, Pa.

S. L. Levy has just engaged in the jewelry and clothing business in Lexington, Mo.

Harris & Co., will open a store in the Adams block, S. Front St., Marquette, Mich., Oct. 10.

Ignatius Fried recently opened a new store in the Dacovitch building, 8 N. Royal St., Mobile, Ala.

A new watch and jewelry repairing establishment has been opened in St. Jacob, Ill., by John J. Gaffner.

J. L. Williams has opened a jewelry repairing shop in the McElmurry building, near the post-office, Wickliffe, Ind.

Nathan Sloves and Isaac Cohen have registered as wholesale manufacturing jewelers, in Montreal, Can., under the style of Sloves & Cohen.

Edward Sohm, Jr., for several years with Trask & Plain, Quincy, Ill., has started in business on his own account at 509 Main St., that city.

B. Newman and W. Newman Cotti, for some time with D. R. Dingwall, Ltd., Winnipeg, Man., have formed a partnership to go into business in Owen Sound, Ont.

Hughes & Zahnke have leased quarters at the corner of N. Main and Meadow Sts., Bristol, Conn., where they will open a store Oct. 15. The firm will deal in imported watches and clocks, jewelry and other lines.

"Uncle Joe, Diamond Broker," is the suggestive title of a pawnbrokerage business which has just been incorporated in Seattle, Wash., with a capital stock of $50,000. The incorporators are Joseph, Amelia and Emanuel Hoeslech.

The Newcomb Jewelry Co. is a new concern which was recently incorporated in Harrison, Westchester County, N. Y., with a capital stock of $400,000. The directors are: W. A. Newcomb, J. C. Mooney and T. H. Terry, all of New York.

W. J. Eroe has opened a new store on Washington St., New Castle, Pa. The fixtures are all new and the store is one of the handsomest in that section of the country. Mr. Eroe was formerly a member of the firm of Hanna & Eroe, New Castle.

John F. Bescher, formerly with the Edwards & Sloane Jewelry Co., and the Dorst Co., Cincinnati, O., and Jeff Alveston, also with the latter firm at one time, have established a plant for the repairing of watch cases in the Missouri building, Kansas City, Mo.

Brownell & Brumbaugh recently began business in the Whittaker-Stametz building, Goshen, Ind. Besides dealing in jewelry, the concern will carry a line of second-hand furniture, etc. The members of the concern are A. P. Brownell and N. M. Brumbaugh.

The National Badge & Button Co. is the name of a new concern which was recently incorporated in Baltimore, Md., with a capital stock of $5,000, to be divided into 100 shares of $50 each, to make all kinds of badges, buttons and medallions. The incorporators were: John J. Funk, G. J. Hauptman, G. J. Stedman, G. H. Alford and John G. Schlipp.

HAYDEN W. WHEELER & CO.,
IMPORTERS AND CUTTERS,
TWO MAIDEN LANE, NEW YORK.

## St. Louis.

E. S. Weidlich, of William Weidlich & Bro., has gone to Kansas City on a short trip.

T. Znrbrugg, president of the Keystone Watch Case Co., spent several days in St. Louis last week.

W. F. Kemper, secretary of the Retail Jewelers' Association, has returned from a visit to Colorado.

J. J. Gaffney, who has just started a new store at St. Jacob's, Ill., was here last week buying his opening stock.

Goodman King, president of the Mermod Jaccard & King Jewelry Co., is expected to return home from Europe this week. The Mermod, Jaccard & King Jewelry Co. furnished the programmes and souvenirs for the Veiled Prophet's Ball.

Charles A. Mauch, of Mauch & Adam, Marshall, Mo., was here last week attending the session of the Grand Lodge of Masons of Missouri. He is a brother of Herman Mauch, president of the Retail Jewelers' Association, of this city, whose guest he was while here.

Mark Eiseman, who represents the Bauman Mfg. Co. in the south, has returned to his headquarters at Birmingham, so as to be prepared to start out over his territory as soon as the quarantine restrictions have been removed. His firm expects to do a big business despite the existence of the yellow fever.

Among the jewelers visiting in St. Louis last week were: J. F. Mitchell, Morrisonville, Ill.; J. R. Spradling, Flat River. Mo.; F. Penezit, Perryville, Mo.; M. E. Buer, Paris, Mo.; M. C. McMillen, of McMillen & Millsap, Lebanon, Mo.; H. S. Lillus, Hattiesburg, Mo.; E. Bowden, Ripley, Tenn.; Frank Hartmiller, of Hartmiller Bros., Lebanon, Mo.; H. S. Lillius, Hattiesburg, Mo.; E. Bowden, Ripley, Tenn.; C. Gieseke, Trenton, Ill.; Jos. M. Goldberg, Alexandria, La.

## Newark.

Damage amounting to $500 was caused on Sunday in the cellar of the jewelry factory of Charles Schuetz & Son, at 213 Mulberry St. by fire.

United States Referee in Bankruptcy Edwin G. Adams last week received a letter from Thomas J. Bradley, who was formerly in the jewelry business at 372 Broad St., Newark, and whose business affairs are now in the bankruptcy courts. An order is out for his arrest because of his refusal to pay alimony to his wife. In his letter Bradley said that he wishes the referee to know that the claim of Mrs. Helen McConville against his estate is legitimate.

Miss Edwina Zurhellen, daughter of E. W. Zurhellen, Natchez, Miss., and Audley Stone were united in marriage last week.

## National Monthly Import and Export Statistics.

WASHINGTON, D. C., Oct. 3.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for August, 1904, and 1905, and for the eight months ending Aug. 31, 1905:

IMPORTS.

| | | | —8 Months Ending— | |
|---|---|---|---|---|
| | *Aug.*, 1904. | *Aug.*, 1905. | *Aug.*, 1904. | *Aug.*, 1905. |

## News Gleanings.

T. W. Roe, Pratt, Kans., has sold out to O. J. Weseman.

A. F. Leffler has succeeded Bush & Leffler, Iola, Kans.

S. C. Hone, Osceola, Wis., has sold his business to C. H. Olson.

L. M. Bond has purchased the business of H. P. Lewis, Gravett, Ark.

N. Stainінger has purchased the stock of R. H. McCormick & Co., Vail, Ia.

A. L. Butler has succeeded to the business of Chas. R. Hare & Co., Ansley, Nebr.

Walter E. Dean, Jr., has purchased the business of Paine & Hardy, Forsyth, Mont.

P. Ruedigo has purchased the jewelry and drug business of C. A. Winn, Snyder, Okla.

J. H. Anderson recently purchased the business of Stoddard & Halstead, Madison, S. Dak.

T. W. & J. W. Butcher have been succeeded in business in Marion, Kans., by Butcher & Butcher.

W. L. Pegg, Thomasville, N. C., has moved his stock into larger quarters in the Postoffice building.

The stores of L. W. Suter and H. A. Miller were among the business establishments consumed by the recent $300,000 fire in Nome, Alaska.

The retail jewelry store of Chas. S. Rutledge, St. Joseph, Mich., was considerably damaged by fire Monday. The amount of the loss is unknown.

The Memphis Jewelry Mfg. Co. recently moved its factory and office from 81 W. Court St. to 164 S. Main St., Memphis, Tenn., where it now has larger and more commodious quarters than ever before.

The store of J. O'Brien, Oshkosh, Wis., was entered recently by thieves, who stole nine watches from a rack. A burglar alarm was set off and a policeman caught sight of the man, but was unable to catch him. The loss will not exceed $50.

F. W. Juengling, who for several years had been in charge of the silver-plated ware and clock department of King & Eisele, the wholesale and manufacturing jewelers of Buffalo, N. Y., severed his connection with this firm to accept a position with the Sessions Clock Co., Forestville, Conn., recently. Fellow employes of the office presented him with a gold fob.

Mrs. Flora E. Rowell, St. Johnsbury, Vt., has sold out to Harry Randell, Montpelier. The business was established in 1855 by T. M. Howard, who took a partner in 1870, when the style was changed to Howard & Rowell. Mr. Howard retired in 1887 and the business was conducted by Mr. Rowell until his death in 1893, since which time Mrs. Rowell had charge of the store.

In the account of the career of the late William H. Best, which appeared in the issue of THE CIRCULAR-WEEKLY Sept. 20 it was stated that Mr. Best had succeeded the firm of H. Best & Sons at Dayton, O. This was erroneous, as the concern has been controlled by Edwin Best since the death of Henry Best in 1873. Wm. H. Best, the deceased, in 1873 worked for the firm for two or three years, but never had any interest in the firm.

Under an execution on a judgment for $209 in favor of a St. Louis jewelry firm Constable Crump at Jefferson City, Mo., recently took charge of the stock of the Wood Jewelry House, on Madison St. The concern, which dealt in jewelry and music, was owned by M. Wood, the wife of C. Wood, who has been in Jefferson City since the early part of the year. They carried a stock of $3,500, and were believed to have a surplus.

The first reports of the robbery which recently took place at the store of A. E. Henry, Rockford, Ill., were somewhat incorrect in regard to the details of the goods stolen, which were valued between $300 and $400. The correct list of the stolen property includes: One No. 900 18 size Rockford 24-jewel open face watch movement, No. 535308; one No. 905 18 size Rockford 21-jewel open face watch movement, No. 519675; one 545 16 size Rockford 21-jewel open face watch movement, No. 550715; two 18 size 17-jewel Rockford watch movements; one 16 size 15 jewel Rockford watch movement; about 24 plain oval rings, of which 16 were stamped "A. E. H. 18-K" on the inside, and about eight or 10 were stamped "solid gold" on the inside.

## Gems that have Permanent Value.

When gems are cut according to mathematical principles, the true angle of light is secured.

Such cutting means a greater loss in weight, but the increased brilliancy far outweighs this loss, and the result is perfection.

## Optical Notes and Briefs.

F. W. Binford, Los Angeles, Cal., is arranging to open an optical store at Santa Barbara, Cal.

O. O. Osborne, Lodi, Cal., has fitted up optical parlors in the First National Bank building at that place.

Chas. M. Hanf, San Bernardino, Cal., accompanied by his wife and son, spent a few days of last week in San Francisco, Cal.

G. G. Schneller, Walla Walla, Wash., has moved to larger quarters at 18 E. Main St., where he has installed additional optical apparatus.

J. C. Huteson, manager of J. C. Huteson & Co., Omaha, Nebr., received a telegram last week from New York, announcing the arrival from Europe of Trafford Huteson and wife on the steamer *Oceanic*. Trafford Huteson is a brother of J. C. Huteson and interested in the firm of J. C. Huteson & Co. He is now deeply interested in Egyptian lands.

The Oregon State Board of Examiners in Optometry has completed the work of preparing certificates for opticians, and these are now being mailed to all parts of the State. Owing to an error of the engraver the work of issuing the certificates was delayed. The board has secured an opinion from the Attorney-General of the State, declaring that the Oregon Optical law applies to optometrists residing outside of the State who visit the State to practice optometry as well as to those residing in the State.

The seventh annual meeting and banquet of the Illinois Optical Society will be held at the Lexington Hotel, Michigan Ave. and 22d St., Chicago, Ill., Oct. 30-31, 1905. The matter of reorganizing, making it obligatory for members and applicants of the society to pass an examination in order to demonstrate their ability to fit eyeglasses, will be taken up. An operation on the eye will be performed by Geo. W. McFatrich, M.D., secretary of the Northern Illinois College of Ophthalmology and Otology. A paper will be read by H. Lindlahr, M.D., entitled "Diagnosis from the Appearance of the Eye." An exhibit will be made which will include spectacles and eyeglasses manufactured in all parts of the world.

INTERIOR OF A CUTTING MILL.

# THE GORHAM BUILDING

## AN INVITATION.

¶ The Gorham Building is the largest and most architecturally notable of any in the world devoted to the display and sale of the products of one concern.

¶ The aggregation of the Gorham Manufactures contained in it is by far the most extensive and most comprehensive showing of sterling silverware ever gathered together under one roof.

¶ But the fact upon which the Gorham Mfg. Co. desire to lay particular stress is rather the cordiality of the invitation extended to the Jewelers of the United States to make the Building their headquarters whenever they visit New York.

¶ The Wholesale Sales Room occupies the entirety of the Fourth Floor.

### Importance of Salesmen in Export Trade.

A PERUSAL of the export figures published from time to time shows that the watch, clock and jewelry industries, together with allied lines, are paying more and more attention to export trade. This export trade has made giant strides in the last few years, but there is still plenty of room for expansion, and this leads us to remark that a factor in foreign trade upon which too much stress cannot easily be placed is the salesman. However excellent the product may be, and however reasonable the price, it is, after all, the seller who puts it upon the market. The traveling man is the real pioneer of trade. Well located general agencies, good advertising, willingness on the part of the manufacturer to expend money in extending his market, and an efficient consular service, are all important, but all may fail if the experienced, energetic salesman is wanting. This may be accepted as an axiom of trade which is universal in application, and of which the history of our own trade, domestic and foreign, furnishes abundant proof. For instance, in Germany evidence is not wanting that an agency at Hamburg or Berlin, however well equipped, cannot hope to secure an important trade in other parts of the empire except through capable salesmen, who thoroughly canvass the territory.

It is no reflection on foreign salesmen to say that, as a rule, American salesmen, or salesmen thoroughly familiar with American methods, probably succeed best with American goods. The foreign salesman is likely to have preconceived notions of how sales should be made for a great business concern. In fertility of resource to avoid delays in forwarding goods, in fulfilling contracts, etc., the American salesman has no superior.

The American manufacturer who is really in earnest in his efforts to secure foreign business should so organize his selling department abroad as to avoid delays as much as possible. Failure on his part or that of his general agent to answer correspondence or to forward goods promptly may cripple the efforts of the best salesman. The plan adopted by some large manufacturers of meeting their salesmen in foreign fields seems to yield good results. If this cannot be done by the manufacturer himself, he can have his general agent do so and report to him.

The rapid extension of our avenues of trade into foreign lands should stimulate a large body of our young men in the learning of additional modern languages and in other preparation for a career in this branch of our trade. In no other field of endeavor is higher business talent required and in none other are the rewards more certain to the capable man.

### Precious Stone Importations During September.

THE importations of precious stones and gems into the Port of New York are again unusually large, the figures for last month, as reported by Gen. Mindil, the jewelry examiner at the Public Stores, being the greatest on record for any September, namely, a total of $3,250,880.32. This is very much over $1,000,000 more than the total importations for September, 1904, which held the record for the month until now. Of this total, the value of the cut precious stones and pearls was $2,240,-987.68, which is almost twice the normal figures for the month. The amount of the uncut stones, principally diamonds, was $1,-009,892.64, which was a little less than in September of last year.

An idea of the value of the precious stones imported during September in the past 10 years may be had from the following table, the amounts being taken from the official figures of the jewelry examiner at New York.

| *Sept.* | *Cut.* | *Uncut.* | *Total.* |
|---|---|---|---|
| 1905.... | $2,240,987.68 | $1,009,892.64 | $3,250,880.32 |
| 1904.... | 1,018,053.66 | 1,174,550.49 | 2,192,603.16 |
| 1903.... | 1,099,860.03 | 862,524.91 | 1,962,384.94 |
| 1902.... | 1,235,051.67 | 818,473.05 | 2,053,524.72 |
| 1901.... | 978,611.97 | 384,345.50 | 1,362,957.47 |
| 1900.... | 754,930.76 | 202,799.30 | 957,730.06 |
| 1899.... | 1,123,628.12 | 325,916.75 | 1,449,544.87 |
| 1898.... | 858,601.26 | 257,884.26 | 1,116,485.52 |
| 1897.... | 852,476.36 | 219,510.09 | 1,071,986.45 |
| 1896.... | 57,673.96 | 88,447.20 | 146,121.16 |

### Death of Frank H. Fry.

PHILADELPHIA, Pa., Oct. 1.—Frank H. Fry, one of the best known retail jewelers in the communities adjacent to Philadelphia, died at his home in Burlington, N. J., Friday. Mr. Fry was a long sufferer with heart disease. Although his death was not unexpected by his family, it came as a shock to the trade of this city, where Mr. Fry had long been well known. He was out Tuesday, but took to his bed Wednesday, and sank until his death, Friday. He was 77 years old.

Mr. Fry was a native of Germantown, this city, and lived and was educated there until the outbreak of the Civil War, when he enlisted in Baxter's Fire Zouaves. After his discharge from the army he went to Burlington, N. J., and opened a retail jewelry store. This was in 1867. Mr. Fry had conducted the store at the same location ever since. He was active in Methodist Church affairs in Burlington, and was a charter member of Hope Lodge, Knights of Pythias. He was a Mason and a member of half a dozen fraternal societies. He took some part in politics and served two years as City Tax Collector.

Mr. Fry was highly thought of both in business and social circles in Burlington. The funeral services were held yesterday under Masonic rites.

### Jewelers Gold Bars Withdrawn and Exchanged at New York.

*Week Ended Sept. 30, 1905.*

The U. S. Assay Office reports:

| | |
|---|---|
| Gold bars exchanged for gold coin.... | $441,339.25 |
| Gold bars paid depositors..... | 90,945.85 |
| Total ..... | $532,285.10 |

The gold bars exchanged for gold coin are reported as follows:

| | |
|---|---|
| Sept. 25..... | $52,060.61 |
| " 26..... | 91,924.04 |
| " 27..... | 119,337.57 |
| " 28..... | 116,507.45 |
| " 29..... | 10,219.19 |
| " 30..... | 51,290.39 |
| Total ..... | $441,339.25 |

A plate glass window in the store of Wm. Andrews, Saint Marys, Ont., was recently broken with a stone, which was hurled through it. It is not known whether the act was the result of an accident or a contemplated robbery.

## New York Notes.

L. H. Green and J. T. Scott are no longer with Schickerling Bros. & Co.

Col. J. L. Shepherd, of the Keystone Watch Case Co., has returned from a road trip.

Lee Reichman, of Joseph H. Fink & Co., returned from Europe last week on the *Lucania*.

Paul Durand, 43 W. 4th St., returned last week on *La Lorraine* from a trip to Baccarat, France.

At 699 Broadway, a New York office was opened this week by the C. H. Eden Co., Attleboro, Mass.

C. C. Wakefield, traveling salesman for the Aikin-Lambert Jewelry Co., is in the city for a few days.

Dr. George F. Kunz, of Tiffany & Co., who took a brief vacation last week, is again back at the store.

A new store with a jewelry department will be opened by H. W. Schreiber & Co., at Broadway and Ralph Ave., Brooklyn.

Among the signers of the petition renominating District Attorney Jerome were Nathan Straus and Lee Kohns, of L. Straus & Sons.

Woods & Chatellier, manufacturers of silver and gold novelties, at 36 E. 22d St., have incorporated their business with a capital of $100,000.

Mail privileges have been denied the International Jewelry Co., 346 Broadway, said to have operated the old game of shipping "prizes" for the cost of packing.

Arthur Reichman, 65 Nassau St., starts this week on a trip to the pearl fisheries on the Wabash, Arkansas and Mississippi Rivers, to be gone several weeks.

H. K. Smith, 267 Central Ave., Far Rockaway, N. Y., is selling his stock of jewelry and bric-à-brac at auction, preliminary to making some changes in his business.

"Trade Marks" will be the subject of discussion at Thursday night's session of the Polytechnic Association, a section of the American Institute, in its hall at 19 W. 44th St.

An execution for $1,033 against Charles Augustus Seton, who was in business as a broker at 43 Exchange Pl., was issued last week in favor of the International Silver Co. The Sheriff found nothing on which to levy.

F. H. Underhill, formerly with Fishel, Adler & Schwartz, and with Camerden & Forster, and for a time in business at Newport, R. I., is now connected with the Mermod, Jaccard & King Jewelry Co., 400 Fifth Ave.

Six expert lens grinders were recently imported in violation of the Contract Labor law and are working in one of the largest factories in the country, according to a story published in a daily paper, which mentions no names.

Announcement is made of the engagement of Miss Lilian Holbrook, Stamford, Conn., to Count Guillaume de Balincourt, Paris, France. Miss Holbrook is the daughter of Edward Holbrook, the president of the Gorham Mfg. Co.

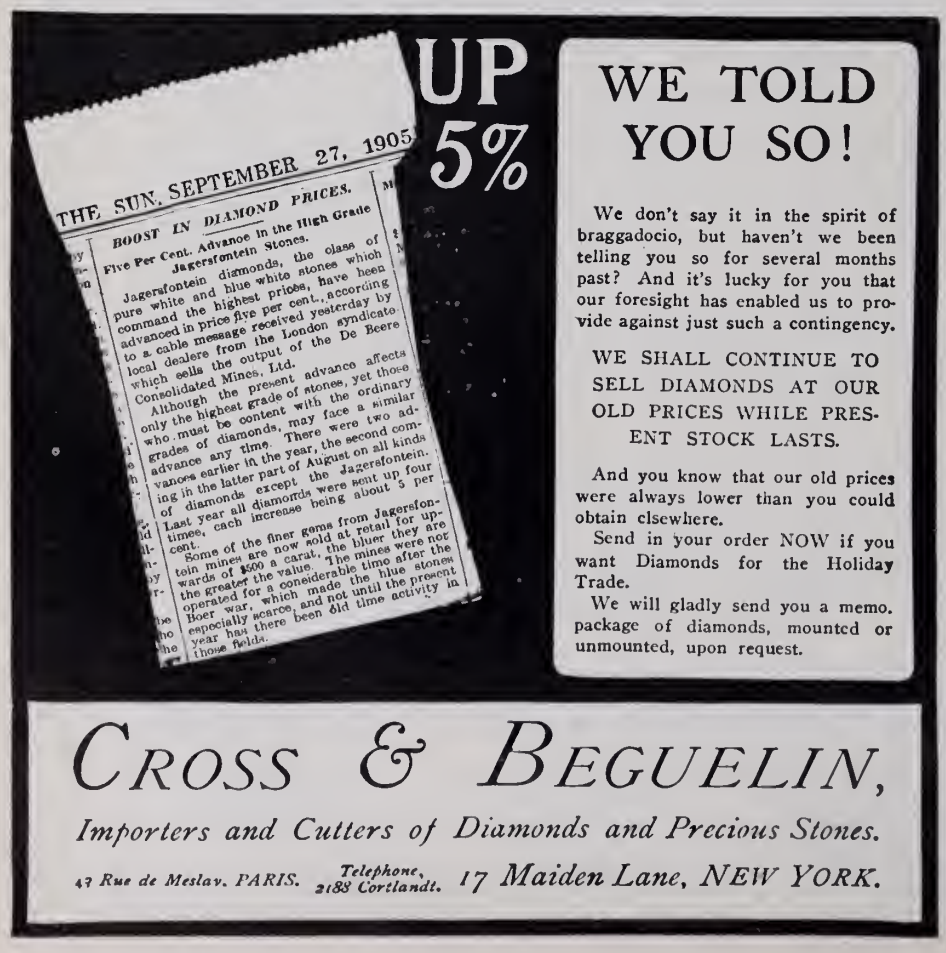
Joseph Rott, pawnbroker, 9 Columbus Ave., was called last week to a police court to explain the shooting in his office of Vincenzo Muccini. The pawnbroker said that Edward Merry, a negro, did the shooting, and the latter was arrested.

An illuminated clock with a dial 28 feet in diameter is to be placed in the tower of the new 28-story building to be constructed at West, Cedar and Albany Sts., for the West St. Improvement Co. The building with the tower, will have a total height of 404 feet.

An order was filed last week in Special Term of the Supreme Court permitting the defendant in the case of the International Silver Co. against Mrs. Rose Shanley to open a judgment taken by default on the payment of costs, the judgment standing as security.

Sampson & Co. is the name of a new corporation engaging in the retail jewelry business in New York, a certificate having been filed last week at Albany. The directors are Henry Wilkens, New York; Gustav Bostheim and S. A. Sampson, Pittsburg, Pa. The authorized capital is $5,000.

Marsellus, Pitt & Co., 170 Broadway, recently obtained a judgment for $3,7[illegible] against J. M. Gimbernat, 79 W. 89th St., who is said to be heir to a $200,000 estate. The young man made an assignment some time ago, as a result of which about $11,000 trust funds are tied up and considerable litigation has followed.



Lindley J. Higham, Fifth Ave. and 39th St., has sent a notice to the trade that the business will in the future be conducted by the Lindley J. Higham Co. Mr. Higham is the president of the company and will give it his attention, as usual. His son, Lindley M. Higham, will be vice-president, and Harry D. Baker will be secretary and treasurer.

A burglar was seen by a maid in one of the upper rooms in the home of August Goldsmith, of Stern Bros. & Co., at 36 W. 69th St., last Thursday evening, while the family were at dinner. The maid screamed and Mr. Goldsmith rushed upstairs, while the other members of his family summoned the police. The burglar escaped through the scuttle of the roof.

The Optical Union No. 11,381 held a meeting last Thursday night, at which it was voted to surrender the charter and disband as a branch of the American Federation of Labor. It will be recalled that the organization conducted an unsuccessful strike several months ago. Efforts are now being made to reorganize the men as a branch of another central body.

Samuel Berg, who was once a jewelry workman, after completing a year's imprisonment in the penitentiary on Blackwell's Island, was rearrested last Thursday as he left that institution on a new charge of robbery. The detectives say that because of the man's knowledge of the jewelry business he had special skill in disposing of plunder which he obtained in that

David Linder, a salesman, 8 E. 107th St., who sold jewelry, dry goods and other merchandise on the instalment plan, last Thursday filed a petition in bankruptcy with liabilities of $4,450 and nominal assets of $5,349, of which $5,000 was in instalment contracts and $349 in notes. Nathaniel A. Prentice was appointed referee. Among the creditors were Spiro & Hirsch, $250; S. J. Rosenblum, $150; Alois Kohn

WE TOLD YOU SO!

We don't say it in the spirit of braggadocio, but haven't we been telling you so for several months past? And it's lucky for you that our foresight has enabled us to provide against just such a contingency.

WE SHALL CONTINUE TO SELL DIAMONDS AT OUR OLD PRICES WHILE PRESENT STOCK LASTS.

And you know that our old prices were always lower than you could obtain elsewhere.

Send in your order NOW if you want Diamonds for the Holiday Trade.

We will gladly send you a memo. package of diamonds, mounted or unmounted, upon request.

CROSS & BEGUELIN,

*Importers and Cutters of Diamonds and Precious Stones.*

*47 Rue de Meslay, PARIS.* *Telephone, 2188 Cortlandt.* *17 Maiden Lane, NEW YORK.*

.. $25. Most of the ereditors were in dry goods business.

From Jarrilla, N. M., eomes the rt that the turquoise mines purehased a Mr. Tiffany 40 years ago from the lians are to be reopened by a New York idieate, after having been abandoned for ong time. The former owner of these nes was not related in any way to the mbers of Tiffany & Co. This company turquoise mines some distance away m the others.

Shickerling Bros. & Co. will separate ir gold manufaeturing plant from the tinum mounting department. The platim diamond jewelry will be manufaetured er Nov 1 in new quarters at 574 Fifth e, while the gold jewelry will be manietured at the old address, 28 E. 22d , where two entire lofts will be used for purpose The changes are neeessitated the growth of the business.

n the bankruptcy proceedings against rry Levinsohn, jewelry jobber at 30 iiden Lane, hearings were adjourned sevl times of late without taking testimony, l there is said to be a probability of a tlement being reaehed. It is understood t Mr. Levinsohn's attorneys are offering ompromise at 20 per eent. and that a conerable number of the ereditors show a position to aeeept.

Magnifying glasses are dutiable at 45 per nt. ad valorem as manufaetures of glass der Par. 112, Tariff Act of 1897, aecordto a deeision made last week by the ard of United States General Appraisers, staining the aetion of the Collector of the rt of New York in his assessment of ty on merehandise imported by A. Rieman. The importer claimed that the sses should be assessed at 4 per cent. a square foot under Par. 102 as eylinders or ground glass.

Max Zadek, of Felix Zadek & Bro., 51 Maiden Lane, was taken one day last week to the Harlem Hospital with a wound in his left side, and it was said that he had shot himself, at his lodgings, 83 W. 118th St. It was at first supposed that the wound would prove fatal. His brother said yesterday that the injured man is recovering and is now out of danger. No explanation is given as to the cause of the supposed attempt at suicide.

George E. Fahys, of Joseph Fahys & Co., was one of the founders and is the vice-president of the North Shore Horse Show Association, which will hold to-day and to-morrow its third annual exhibition at Piping Rock Field, Locust Valley, L. I. There are 305 entries comprising 175 individual horses, and all indications point to the most sueeessful show yet held by the organization. The hunting horses will be a prominent feature.

G. Ferrara, 212 Johnston Ave., Brooklyn, last week caused the arrest of Louis Gallo, 18 years old, of 900 Jackson Ave., on the charge of lareeny. At the hearing before Magistrate Steers the jeweler said that Gallo entered the store, went behind the eounter, grabbed several articles and ran. The jeweler said that he was in the rear of the store at the time, but before he could get to the door Gallo was outside. After a chase of four bloeks the young man was caught and was taken to the Stagg St. Station. When searched by the poliee a pair of braeelets and two gold watehes, valued at $20, were found in Gallo's stocking. He was held in $500 bail for the Court of Special Sessions.

M. Bolotin, a jewelry manufacturer, 41 Maiden Lane, was at his workbeneh about noon last Thursday, when he heard a noise like the elicking of the knob of his safe. As the elerk in charge was out at luneh, Mr. Bolotin hurried to the outer offiee, where the safe stands inside an enelosure formed by the junction of a eounter with a high metal fence. Standing in front of the safe was a stranger, a man of about 35 years of age, poorly dressed. The man said he was a polisher looking for work. "You are working too near my safe," said Mr. Bolotin, as he opened the door in the wire fence and told the applieant to step outside. The jeweler engaged the man in conversation until Irving Baum walked by and Mr. Bolotin called to him. The stranger pleaded with the jewelers not to eause his arrest, but Mr. Baum stepped outside and sent for Deteetive Sergeant Nugent, who placed the man under arrest. At the Tombs police station he gave the name of William Riordan. The man was held in $500 bail for trial in the Special Sessions. This was not Mr. Bolotin's only exciting experience of late. A few days before his flat at 63 E. 118th St. was entered by a burglar during his wife's absence. The sideboard was broken and silverware valued at $85 was stolen.

Morris, Joseph and Samuel Klein, of the Klein Bros. Co., against whom a petition in bankruptey was filed, as stated in THE CIRCULAR-WEEKLY of Sept. 20, were arraigned, last Thursday, before Magistrate Mayo in the Tombs Court on the charge of grand larceny, made by Eduard Van Dam. Mr. Van Dam, it will be remembered, accused the brothers of receiving from him on memorandum, merchandise valued at $10,000, and disposing of the same, so that none of it was to be found when the bankruptcy pro-

OUR MOTTO is still—NOT HOW CHEAP, BUT HOW GOOD!

This does not mean fancy prices, but it does mean genuine

CUT GLASS.

This Should Interest First-class Jewelers.

Invites the Accounts of Jewelers.

Will extend every facility that good banking will justify.

SAFE DEPOSIT VAULTS.

ceedings were begun. At the hearing Mr. Gleason, of Hastings & Gleason, appeared on behalf of the Jewelers Association and Board of Trade. Assistant District Attorney Van Diver asked for an increase in the amount of bail on which the brothers were held. As a reason for this he said that other charges will be made. It appeared that the other charges have to do with the statement made by the corporation as to its financial condition. It is said that this statement represented the liabilities as being about $10,000, and that they were really not less than $50,000. It is also said that other creditors, besides Mr. Van Dam, will charge the brothers with disposing of jewelry entrusted to them on memorandum. The Magistrate decided that a $3,500 bail bond would be sufficient for Morris and Joseph Klein, and $2,500 for Samuel Klein. The old bonds were $1,000 for each.

E. L. Ostrander, Pitman Grove, N. J., will shortly move his stock into more commodious quarters on Broadway, where a desirable site was recently purchased by Mrs. Ostrander.

Robert L. Ellis, who until recently was engaged in the retail jewelry business in Maquoketa, Ia., committed suicide last week by shooting himself in the right temple with a rifle. Mr. Ellis was only 32 years of age.

## Boston.

E. Bertram Hersey has entered the em- oy of John C. Sawyer as salesman.

The Jewelers' Association of Boston held first Fall meeting Thursday evening, at e American House.

Charles S. Cook, of A. Stowell & Co., companied by his son, Sidney Cook, is en- ying an outing in Maine.

Emory Sweetser, resident representative the Gorham Mfg. Co., has returned from trip through the south and west.

A petition in bankruptcy has been filed in e United States District Court by Joseph . Beverly, Revere, Mass., optician and weler His liabilities are given as $710.92 d assets as $18.

Frank C. Lowell, watchmaker, well own in the Boston trade, who has been Rockland since he finished a course at e horological school in Waltham, has ken a position with the Tilden, Thurber ., Providence.

Maj William P. Shreve, of the Shreve, rump & Low Co., who has been ill with onchitis since his return from a trip road, is convalescent, and his friends hope welcome him back very soon to his ac- stomed quarters in the establishment.

Oct. 18 has been named as the date when e Stillings brothers will be brought into urt from the jail, where they are now rving a year's sentence for contempt of urt, to plead to the indictment originally und against them, charging them with the e of the United States mails with intent defraud.

A. Stowell & Co. have been making some ry important changes in the interior ar- ngements of their store, to adapt it to the owing trade of the concern. A new bal- ny for the bookkeeping department has en constructed, thereby affording more ace for the sales department; a new steel iling has been put in above the first sales- oms, and steel staircases to the second or and the balconies have been built. A sh carrier system has also been adopted.

A diamond and pearl necklace valued at 00 was stolen from the store of William Durkee, of Boylston St., Sept. 30. The eft was committed by a man who had lled at the store and asked to be shown cklaces on several occasions, and who had miliarized himself with the store and the ow window, from which he abstracted the cklace. The clerk was some distance om the window, and turned toward it in me to see the man enter quickly, snatch e necklace and run off with it. She gave e alarm immediately, but the thief made s escape.

George J. Taylor, the West Somerville atchmaker and jeweler who was recently ported missing, after having, it is alleged, awned watches of customers left with him be repaired, was captured by the police riday. He had returned to his former dgings, and was arrested there, although e landlady protested that she did not now his whereabouts. Taylor was in de- ult on Sept. 2, in the Chelsea Police ourt, where a case of non-support, brought y his wife, was pending. The warrant on h ch he was arrested last Friday, however, as issued because of an alleged fraudulent eck transaction. There are several com- laints filed against him.

# THE GIANT OF COLLAR BUTTONS

## IN QUALITY, IN SALES.

The Standard American Collar Button.

**Millions of Krementz One-Piece Collar Buttons made, and are sold all over the world.**

**WHY?** *Because* of their HIGHEST QUALITY, BEST CONSTRUCTION, GIVING THE MOST WEAR AND GREATEST COMFORT and their IRON-CLAD GUARANTEE.

To verify this we invite the trade to read **"The Story of a Collar Button, with Illustrations,"** which may be had FREE for the asking, and to try the experiment suggested on page 5 of that booklet, by which all may easily determine the exact amount of 14 K. gold in Krementz plate.

**Extract from "Printers' Ink," Nov. 23, 1898.**

The Little Schoolmaster now suggests, to every pupil in his class, to send a two-cent stamp to Krementz & Co., 49 Chestnut Street, Newark, N. J., and ask to be favored with a copy of their leaflet. "The Story of a Collar Button." Afterward, if any pupil will send to *Printers' Ink* another leaflet, new or old, that is half as good as this one, or that approaches it in excellence, the deserving student will be rewarded with one of *Printers' Ink's* souvenir spoons as an acknowledgment of his discovery and contribution. "The Story of a Collar Button" is the best piece of advertisement construction that has come to *Printers' Ink's* attention in the year of our Lord 1898.

**Should you wish to utilize this booklet to increase your collar button business, we will, on receipt of your order, print your card upon and send you a quantity of them.**

**The several qualities of Krementz One-Piece Collar Buttons are stamped as follows, ON BACK.**

Patent Sustained by United States Supreme Court.

**Quality and Construction have made Its Reputation.**

All Krementz Collar Buttons—of every quality—
are manufactured by

## Philadelphia.

William Yeager, chaser and engraver, removed last week from 713 to 809 Sansom St.

A shuffleboard tournament among the members of the Philadelphia Jewelers' Club was begun last night.

J. E. Caldwell & Co. have fulfilled a contract to furnish the prize cups and trophies for award at the Bryn Mawr Kennel Show.

C. C. Kayser, watchmaker, 2254 N. Carlisle St., was drawn, last week, to serve on the Grand Jury for the October term of the criminal courts.

Fred. Spellman, Des Moines, Ia., entered the Philadelphia Horological School last week. E. M. Smith, of Vineland, N. J., returned to the school after a few weeks' illness.

J. Borroughs Robertson, of the material department of M. Sickles & Sons, was presented, last week, upon his return from his honeymoon, with handsome presents from friends in the trade.

George S. Katz, Jr., son of a prominent local retailer, has resigned his position with Strawbridge & Clothier to go with the Gorham Mfg. Co. in New York, where he will be connected with the wholesale department.

Fred Barry, with S. O. Bigney & Co., made his initial trip to this city, Washington, Baltimore and cities en route last week. Mr. Barry was cordially welcomed by this city's trade, to whom he is especially well known.

T. S. Hoffman, one time of this city, but now in business at Derry Station, Pa., made his first visit to local jobbers in 10 years, last week, and received a cordial welcome.

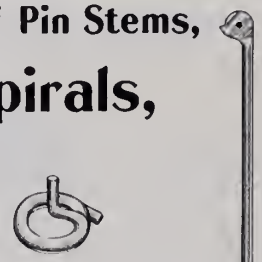
The contract for the golf prizes to be awarded at the invitation tournament of the Philadelphia Cricket Club was last week given to J. E. Caldwell & Co., as well as the contract for the designing and makin of the Lesley trophy cup.

Out-of-town retailers buying here of lo cal jobbers last week included: R. O. Bo tel, Nazareth, Pa.; W. K. Schlottere Schwenkville, Pa.; E. L. Daron, Steelto Pa.; Capt. George Bowen, Bridgeton, N. J and J. Harry Halt, Mt. Holly, N. J

Harburger Bros., 808 Chestnut St opened, last week, a branch store at Clev land, O., under the name of the Harburg Bros. Co. It is in the Citizens' Trust build ing. The store will be conducted along th lines of this city's store by Ralph Ha burger and Edward Green.

M. Sickles & Sons last week added balcony to their salesroom in order to c tain space necessary for the display of Fa goods and for the convenience of patron Such additions to the establishment ar being constantly made with a view to mee ing the requirements of a constantly increa ing volume of business.

I. Bedichimer & Co. occupied their ne store at 1022 Chestnut St. last week. Th store is regarded as one of the prettie of its size in the city. The factory has al been removed to the new store, from th old building at 11th and Sansom Sts. feature of the new store is the placing of watchmaker's bench in the center A though occupied, there are still other add tions and decorative improvements yet be made.



The death last week of Frank Fry, prominent Burlington (N. J.) jeweler, w a shock to the local trade with whom M Fry had been intimately connected durn the last 25 or more years, since he h conducted the Burlington store, and esp cially in Germantown, where he was bor and educated. He was not only wide known in the local trade, but much esteem because of his straightforward, dependab temperament.

G. W. Cann, a "curbstone" dealer, 25 Master St., is under arrest, charged wi obtaining money under false pretenses by W. Klindend. The latter bought of Cann watch chain and a locket purporting have in it a diamond. The purchaser w convinced the stone was genuine when Ca scratched a window with it. He paid $ for the lot, but in trying to pledge them t $50 was told that they were worth $1. Kli dend promptly had Cann arrested.

R. Harris & Co., 400 7th St. N.W., ha sold their entire optical department to A. Leese, optician, 614 9th St. N.W.

W. H. Grovermann, who has had charg of the repair department of Galt & Br 1107 Pennsylvania Ave., recently associate himself with the Berry & Whitmore C 1105 F St. N.W.

News was received here last week the death of G. Fred Conboye, a form jeweler. His demise occurred at his hom For many years Mr. Conboye was co nected with the jewelry establishment R. Harris & Co., but finally was compell to remove to southern California for th benefit of his health. He is survived by h widow and one child.

The Isthmian Canal Commission is inv ing sealed proposals until Oct. 17 for fu

hing a quantity of office clocks and ther-meters. Blanks and full information will furnished intending bidders on applica-n to D. W. Ross, general purchasing ent of the commission, Mills building, shington, or the assisting purchasing nt, 21 State St., New York.

The Castelberg National Jewelry Co., by orneys Wolf & Rosenberg, recently filed uit at law against James W. Boyd, the im clerk of the Marine Hospital Serv-, held recently by United States Commis-ner Taylor for alleged embezzlement. e suit is to recover a balance of $482.23, d to be due the company on the pur-se of jewelry and silverware made by yd. The statement of account filed as an nibit with the declaration shows the total ount of the purchases to have been $1, .73, on which credits were made at vari-s times from Dec. 15, 1904, to Sept. 15, 05, aggregating $533.50.

## Connecticut.

Walter Camp, president of the New Ha-n Clock Co., New Haven, accompanied his wife, returned last week from a three eks' sojourn in the White Mountains.

Alexander Drapeau, a watchmaker of w Haven, died Tuesday, of last week, his residence in Woodbridge, aged 57 ars. The deceased is survived by a dow, one son and a daughter.

J. F. Walters was taken into custody at idgeport on Wednesday on a charge of ddling jewelry without a license. Walters' ck consisted of very cheap jewelry. Judge evenson fined him $25 and costs for vio-ing the city ordinances.

Harry Halpern, who is wanted in Water-ry for the theft of two diamond rings lued at $240 from Morris A. Green, a weler and pawnbroker of that place, was cently arrested in Providence, R. I., for rgery and grand larceny.

A fire, supposed to have originated from arks of a passing locomotive, broke out the factory of J. H. Sessions & Sons' Co., ristol, on Tuesday of last week. The mage done was slight and did not ham-r the operations of the factory.

The first carload of machinery of the ational Self-Winding Clock Co., was ipped from Bristol to Champaign, Ill., on Tuesday of last week. It is expected that the entire machinery of the plant will be moved within the next two weeks.

William F. Lane last week completed the 38th anniversary of his association with factory "E," International Silver Co., Wallingford. During all these years, except for about six months at one time, Mr. Lane has followed the same occupation, that of stamping and wiring table flat ware.

Employes of the New England Watch Co., Waterbury, recently organized a bowling club. The club bears the unique name of "The Mixed Pickles." The members are: J. Reagan, captain; Messrs. Gilbert, McKeeber, Brennan, Mullett, P. Reagan, Monnesatt, Vaughn, W. Cook and A. Jones.

In the Superior Court of New Haven, on Monday of last week, Theodore L. Bristol was continued as receiver for the Phelps & Bartholomew Co., of Ansonia, a clock concern, which has been running under the direction of Mr. Bristol for several months. When the concern's affairs are settled it is believed that creditors will be paid a generous amount.

Before the short calendar session of the Superior Court, in New Haven, Sept. 29, a motion to correct the report of Receiver Woodruff as to the claims against the Housatonic Mfg. Co. was made and granted. The mistake was made in putting down the figures as to the taxes against the concern. They were placed at $1,000, when they should have been $3,000, says Lieut. Gov. Woodruff.

Judge R. A. Lowe, in the Probate Court in Waterbury, last week, reserved decision on the application of N. F. P. Hansen, a jeweler of that place, to sell the property of his late wife, Emily Hansen. In her will Mrs. Hansen left one-half of her property to her husband and the other half to children by a previous husband. Mr. Hansen claims the property is a poor investment, but the children are of the opposite opinion.

Pawnbrokers from different parts of Connecticut met in New Haven, Wednesday, and formed a State association. After adopting a constitution and by-laws the following officers were elected: President, L. S. Knoeck, Hartford; secretary, M. L. Simons, New Haven; treasurer, C. A. Pick, Bridgeport. Among those at the meeting were: L. Jacobs, Waterbury; J. Shanepp, Derby; James Grace, N. Rosenthal, F. N. Sharp and L. S. Knoeck, Hartford; S. Fry, Simons & Co., S. Capasso, I. Goldstein, E. L. Glouskin, H. Silver, L. Levin, New Haven; F. W. Bruce, New Haven; Plaut & Cadden, Norwich; C. A. Peck and W. Glasner, Bridgeport.

Vol. LI. CHICAGO, WEDNESDAY, OCTOBER 4, 1905. Vol. LI. No. 1

## Chicago Notes.

Herbert W. Allen visited the Twin Cities last week.

S. Swartchild and wife have returned to Chicago after a lengthy European trip.

Robert P. Kiep, Joliet, Ill., is holding an auction sale preparatory to moving into his new store.

Paul Morrison, of Gordon & Morrison, has returned, with his family, to this city after spending the Summer at Lake Bluff, Ill.

Henri Gutmann, of Gutmann & Co., manufacturers of Swiss watches at Chaux De Fonds, Switzerland, was a visitor here, last week.

Lester Green and Levi Chinalli, arrested on a charge of selling bogus jewelry, were discharged, last week, when arraigned before Justice Caverly.

The residence of B. R. Fischer in Oak Park was entered by burglars one night last week. The burglars were frightened away before they had gotten anything.

Henry J. Merle, secretary of the Merle & Heaney Mfg. Co., manufacturers of jewelers' store fixtures, while driving his automobile, last week, ran over and killed a woman on Jackson Boulevard. He was charged with manslaughter, but was exonerated by a Coroner's Jury.

George Johnson was arrested here by the police, last week, charged with robbing Anton Stepinski, said to be a jeweler of 1425 St. Louis Ave. When searched Johnson had in his possession a diamond ring valued at $500 and a $200 diamond stud, which were claimed by Stepinski as his property.

Bert Smyth and Louis Mathisen have formed a copartnership under the name of Smyth & Mathisen, as manufacturing jewelers and engravers in the Silversmiths' building, 131-133 Wabash Ave. Mr. Smith was formerly foreman in the jewelry manufacturing department of Sears, Roebuck & Co. Mr. Mathisen has lately been with Martin Hacker, of St. Louis.

H. P. Cutter, western representative of Regnell, Bigney & Co., was severely injured, Sept. 25, in a railroad wreck on the Peré Marquette railroad. Mr. Cutler owns an extensive grape farm near Lake Cora, Mich., and, as the grape harvest is now on, he had made a trip to his farm to look it over. It was while returning to this city that the accident occurred. Friends of Mr. Cutter in this city have received letters stating that Mr. Cutter expects to be able to attend to his duties the latter part of this week.

C. J. Dodgshun, Chicago manager for the Waterbury Clock Co., had a lucky escape, Thursday, from what might have been a serious accident. While crossing Wabash Ave. and Madison St., at noon, he was knocked down by a horse driven by Mrs. Charles White. Mr. Dodgshun was unconscious for an hour, and after being taken care of by a physician was taken to his home. An examination showed that Mr. Dodgshun did not sustain serious injury. He was painfully bruised about the head, and after being confined to his home for a few days is again at his office.

Chris Falkenberg, formerly of Chicago and lately of Alaska, is back in this city after a long stay in the Klondike. Mr. Falkenberg was formerly a watchmaker for C. H. Knights & Co. and about nine years ago went to the far north. He returned about three years ago and then went back to Alaska, making a sledge journey of 800 miles and hauling a loaded boat 400 miles against the stream. Mr. Falkenberg has been all over Alaska prospecting and working at his trade and lately kept a repair shop-store in Rampart City. He is buying stock here and will shortly open a jewelry store in Idaho. He has not yet decided in what city he will locate.

Edward Menken, a lawyer at 101 Washington St., is again sending out letters offering to buy claims against the Marquardt & Scott Co. for 18 cents on the dollar. He has raised his bid three cents, his previous offer being 15 cents. In his last letter Mr. Menken claims the liabilities are $70,000. This is incorrect. The liabilities are not more than $45,000. Mr. Menken prophesies that the expenses of administering the estate will be between $4,000 and $5,000, and as a further inducement to have creditors accept his offer says that, in view of the way things are done in the bankruptcy court now, it will take a year before the estate is wound up. As the estate is expected to pay over 25 per cent. and, as the first dividend will be declared to-day, the majority of the creditors have shown no disposition to accept Mr. Menken's offer.

## Kansas City.

TRADE CONDITIONS.

The jobbers were rushed with orders, last we which was Carnival Week. The result was t there were many delays in shipments and m duplicates of recent orders were wired to east manufacturers. Jobbers insist that if retailers w good service for the holiday trade, orders be pla early. It is usually very difficult to han[illegible] hol orders satisfactorily, and this year, on account the unprecedented prosperity in the southwest, bers expect to meet with many vexatious and laying mishaps.

The stock of E. G. Albert at 1319 Gra Ave., has been purchased by J. Appen

F. H. Woods, credit man for the Edwa & Sloane Jewelry Co., surveyed the Jop Mo., and Galena, Kans., business fields l week.

The resignation of Dr. S. W. Lane, s retary of the Kansas City Polytechnic stitute, is announced. He has also dispo of his interest in the enterprise.

A. Y. Boswell, Tulsa, Ind. T., was Kansas City visitor last week. In a co paratively short time Mr. Boswell has come one of the leading jewelers of territory.

G. H. Edwards, of the Edwards & Slo Jewelry Co., was in Chicago on a busin mission last week. On the return trip stopped at Princeton, Ill., for a short v with relatives.

W. A. Conklin, a retailer of Table Ro Nebr., paid Kansas City a "pass through" visit last week. He had been Watonga, Okla., to see his cousin, F Conklin, also a jeweler.

Robert Gilbert, manager of the Jacc Jewelry Corporation, celebrated the 2 anniversary of his marriage, last week. workmen of the Jaccard plant gave hi handsome silver plate, suitably inscribe

C. P. Kionka, of Kionka & Stuh turned, last week, from a trip through braska, Minnesota, Michigan, Indiana Missouri. E. Kionka, a brother of C Kionka, has joined forces with the firm its junior member. His home was in P adelphia.

Among the out of town visitors in K sas City last week were: A. Rosenfi Leavenworth, Kans.; Mr. Powell, of P ell & Kreyer, Fort Scott, Kans.; A. E. C don, De Queen, Ark.; Sam Freidberg, peka, Kans.; C. G. Hunt, Polo, Mo.; Hoffman, Leavenworth, Kans.; A. Sie

ekner, Mo.; T. S. Mendenhall, Burr Oak, ns.; S. C. Smith, Excelsior Springs, Mo.; T. Gilbert, Frederick, Okla.; Will Hud- n, Winfield, Kans.; Gail B. Douglas, easant Hill, Mo.; A. W. Howard, Car- ville, Mo.

Two men recently entered the store of red L. Dickman, S. Ohio St., Sedalia, ., when the proprietor was absent, and ile the clerk had gone to get some icles of stock which they requested to , attempted to steal gold watches ich were on display in the rear of a ss case. The clerk caught the would- thieves in their attempt to secure the perty, but they escaped before the ice could be called.

## Minneapolis and St. Paul.

Among the out-of-town visitors to the Twin Cities, last week, were: John Saxine, Prescott, Wis.; John Christine, Bristol, S. Dak.; N. P. Frederickson, Cottonwood, Minn.; H. P. Marx, Shakopee, Minn.

A retail jewelry firm from Joliet, Ill., will open a handsome store at 6th and Minnesota Sts., St. Paul, about Nov. 1. The store is at present occupied by the Smith & Farwell Co., which is conducting a closing out sale.

The wholesale jewelry houses recently received an inquiry from the Retail Jewelers' Association of Minnesota as to their position in the matter of selling at retail. This matter is one which the association seeks to obviate. It will have the answers read at the next meeting.

The business of the Western Mfg. Co., Minneapolis, was sold recently by the heirs of the Roebuck estate to A. C. Swenson, Cedar Rapids, Ia., for a consideration of $50,000. The purchaser will form a corporation with A. T. Swenson, J. J. Smyth, L. S. Swenson, Aaron Bonpenny and A. L. Beeler.

The Anchor Silver Plate Co., whose factory was recently burned, has received letters from a number of cities which that firm is requested to consider when arranging to rebuild. The officers of the company state, however, that the plant will be rebuilt in St. Paul, and they hope to have it completed in time for the Spring trade.

## Omaha.

N. Stainінger, Vail, Ia., has purchased the stock of R. H. McCormick & Co.

A. Edholm has added a handsome new mahogany cut glass cabinet to his store.

W. A. Banks, of Carson & Banks, has returned from a trip to Port Arthur, Can.

Harry Swan, Lincoln, Nebr., has accepted a position with J. L. Jacobson, of this city.

Grover Peterson, with the Sol Bergman Jewelry Co., is confined to his home on account of illness.

Chris Hansen, formerly of St. Paul, Minn., has taken a position with Fred Brodegaard & Co.

George W. Ryan, of the Mawhinney & Ryan Co., spent a few days of last week at Bloomfield, Nebr.

T. J. Bruner and H. H. Fruer, with the A. F. Smith Co., are in from the road during "Ak-Sar-Ben" week.

Mrs. W. C. Price, of the Shook Mfg. Co., has returned from a month's trip through the Rocky Mountains.

Edward A. Shepherd, Clarinda, Ia., has sold his store and moved to Oakland, Ia., where he has purchased a similar business.

Mrs. L. A. Borsheim, wife of L. A. Borsheim, of Brown & Borsheim, has just returned from California, where she spent six weeks.

L. H. Hyde, Burville, Nebr., was a visitor here last week. He is seeking a desirable location for a jewelry store in some part of the State.

O. C. Zinn, Hastings; S. H. Clay, Long Pine; F. E. Holsten, Alliance; Gus Beste, Hardington; Elmer Anderson, Fremont, and John Douglas, Onawa, Ia., were in this city, last week, buying stock.

L. A. Borsheim, of the firm of Brown & Borsheim, who was unfortunate in breaking his leg while recently on his vacation trip and who has been confined to his home for seven weeks, is now able to be at his desk again.

At present the jewelers of Nebraska and Iowa are carefully guarding against an old scheme which is being systematically worked in the southwest. It is believed that the schemers are heading toward these States. The plan is to get a merchant to sign a contract and notes for jewelry on the strength of the statem that the goods may be returned at a time. Later, when the merchant disc ers that the goods are worthless and cides to return them, he finds that he l not lived up to some provision of the c tract, which is inserted for the express p pose of deceiving him and making him full price for a lot of bogus jewelry.

A. P. Smith, Watson, Mo., was Omaha, last week, for the purpose of ganizing a stock company to manufact programme clocks. If he is successfu plant will be started in this city once. The style of the clock is said t different from anything which is made present.

## Pacific Coast Notes.

J. W. Street is preparing to open a st at Quincy, Cal.

H. Melluish, Tucson, Ariz., has mo into newer and larger quarters at 11 Congress St.

Chas. E. Sherman, a turquoise miner Arizona, is spending a short vacation Kingman, in that State.

F. M. Rhomberg, Alamogordo, N. M is now taking a short vacation at Santa accompanied by his wife.

J. H. Hall, Pasadena, Cal., has just c pleted improvements in his store and a a large burglar-proof safe.

P. V. Gardner, Fruitvale, Cal., has made several changes in his place of bu ness which improve the establishment.

C. Schwerer, Pomona, Cal., has instal a line of fancy stationery and art go which he will carry in connection with jewelry business.

H. Hauschildt, Haywards, Cal., is turn his attention to the piano business, wh he is conducting in conjunction with jewelry business.

A. F. Riedel, formerly in business in Bacon Block, Oakland, Cal., died rece after a lingering illness of four years. T business will be continued by Mrs. C Wall, at 607 E. 23d St., Oakland.

The A. A. Handle Co., Berkeley, Cal., just installed a complete manufactur plant in its establishment. The concern put in new show cases and added consid ably to its working force.

## San Francisco.

TRADE CONDITIONS

The jewelry trade of San Francisco may now be
d to be in as thrifty a condition as it has ever
n. The approach of the holiday season finds
busy preparing to handle business on a larger
le than ever before. A large number of coun-
dealers visited the city, during the past week,
all have made large selections of holiday goods.
veling salesmen report good conditions from
coast points, and it now appears that the com
season will be one of unexampled prosperity.

L. Klute, of Tuckey & Kline, 134 Sutter
., is now on a vacation.

W. A. Mosgrove, Angels Camp, Cal., was
recent San Francisco visitor.

Henry Wolff, 120 Sutter St., has just re
rned from his first Fall trip.

Mr. Green, Jr., of George W. Green &
n, Woodland, was in San Francisco, re-
ntly, buying stock.

E. I. Camm, Petaluma, Cal., was here
rly last week, combining business and
easure.

J W. Moomaw has just left this city
r his home in Porterville, Cal., with a
rge stock of new jewelry.

Messrs. Cohn and Wiesenberger, of the
rm of Cohn & Wiesenberger, Los Angeles,
al., were in this city, last week, on a pleas-
re trip

L C. Koberg, Healdsburg, has just left
an Francisco after a trip, during which
e bought heavily for the holiday trade.

H. L. Amstutz, Napa, Cal., was a recent
an Francisco visitor. His time was spent
iamly in visiting the jobbers and selecting
fill in" stocks for his Christmas trade.

John J. Bryan, manager of the silverware
epartment of the W. K. Vanderslice Co.,
as just returned from a trip to the east
nd the south. While in the south he divid-
d his time between Nashville, Tenn., and
ouisville, Ky.

Shreve & Co. have just completed a mag-
ificent solid silver hand-chased punch bowl,
hich will be one of the prizes in the com-
g polo event of the Coronado Country
lub. The bowl is 14 inches in diameter
nd stands 15 inches high.

James Harger, representing Bippart, Griscom & Osborn, has just arrived in San Francisco. He has with him the sample case which he lost in Los Angeles several months ago while attempting to board a moving train. The case was picked up by a railroad employe, who turned it in at the railroad company's office, where Mr. Harger subsequently recovered it.

Forbes & Walsh, who have offices in the *Call* building, where they represent the Dueber Watch Case Mfg. Co. are planning to dissolve partnership. Mr. Walsh will retire from the business, after which he expects to go to Los Angeles and enter the watch material business. Mr. Forbes will continue to represent the Dueber Watch Case Mfg. Co. at the present location.

On account of the illness of Julius Auerbach, the regular traveler for M. Adelsdorfer, who represents the William L. Gilbert Clock Co. and several other manufacturers' lines on the Pacific Coast, Mr. Adelsdorfer has been obliged to abandon one of his regular Fall trips, or, rather, to consolidate both trips. Mr. Auerbach, who is now convalescing from the illness caused by an operation, is expected to be well enough to resume his position within a few days.

Col. A. Andrews' factory recently turned out a solid gold spike, to be driven as the last spike in the newly completed Goldfield and Tonopah Railroad. Considerable ceremony is to attend the driving of the spike, as it is understood that it will complete a work which means much to that section. Goldfield is the richest gold mining district in the world, but has been kept back for the past three years, or since it was first opened up, by the lack of proper transportation facilities. Despite the fact that it was hampered in this respect it has grown at a very rapid pace and is now, in addition to being replete with mining industries, rapidly becoming recognized as a commercial center. The spike is exactly the size of an ordinary railroad spike and weighs 12 ounces. It is in a box 10 inches in length, four inches wide and three inches high.

## Cleveland.

TRADE CONDITIONS.

Although it cannot be said that anything like a rush has marked the opening of Fall business, conditions have been quite satisfactory to most of the larger houses here within the last two weeks, and the smaller ones have done better than usual. Financial and industrial conditions are especially good, and there is no reason why the jewelers should not prosper through the Fall months. Manufacturing centers are usually the best for any line of goods that does not come among the actual necessities, and that is what Cleveland is essentially. The jobbing houses all report a nice increase in business over the same time last year. Their men have not only opened more accounts, but have sold larger bills to old customers, who feel that the year will be a good one.

C. S. Miller, until lately with the Ansonia Clock Co., but now in the insurance business, was in the city calling on his friends in the trade last week.

The Webb C. Ball Watch Co. furnished a handsome cup for the Trolley Baseball League, made up of the employes of the Cleveland & Southwestern Traction Co.

Will Kennon, with the Sigler Bros. Co., has returned from his first trip and reports that he found the retailers in the smaller cities in good spirits and expecting a heavy holiday business.

Among the out-of-town buyers in this city last week, the following were noted: J. G. Davis and wife, Bellefontaine; C. J. Duncan, Massillon; Walter Deuble, Canton; E. E. Critz, Elyria, L. J. Goddard, Ravenna; T. H. Adamson, Carrollton; R. R. Moore, Cuyahoga Falls; Marquart Bros., Crestline, and W. G. Smith, Youngstown.

Through a special arrangement with the iron and steel workers' union, work has been resumed in the Taylor building, where the Webb C. Ball Watch Co. will be located, when completed.

During the week the Ohio Bankers' Association was in session here, H. W. Beattie, 158 Arcade, had in his display window a monogram, "O. B. A.," made of diamonds and other precious stones. Mr. Beattie continues his practice of taking advantage of the events of the day in his displays.

## Cincinnati.

J. C. Miller, of the Miller Jewelry Co., is now in Indiana.

B. S. Newman, of Frohman & Co., has started on a trip to the south.

T. Zurbrugg, of the Keystone Watch Case Co., was a recent visitor to this city.

J. F. Macke, formerly with Joseph Hornback, is now with Oskamp, Nolting & Co.

Mack Hurlbut, Fort Dodge, Ia., spent a few days here with friends the last week.

Max Morris, formerly of Charleston, W. Va., has located at 1205 Central Ave., this city.

Adolph Muehlmatt, Lion building, has improved his factory by installing new, modern machinery.

Rudolph Bentel, Hamilton, O., with Cincinnati friends, is making an automobile tour of Kentucky and Tennessee.

Frank Herschede and Charles W. Lucius, of the Frank Herschede Co., have returned from a buying trip to New York.

E. H. Pudrith, of the E. H. Pudrith Co., Detroit, called on the trade here the past week, as did J. Baehtold, Sioux Falls, S. Dak.

Herman Keek, of the Herman Keek Mfg. Co., expects to sail for Europe this week from New York on the *Kaiser Wilhelm der Grosse.*

D. Jacobs, of D. Jacobs & Co., who has retired from the road, has decided to surprise his customers by making a northern trip.

A. Axman stated to Cincinnati friends, last week, that he had closed out his business at Franklin, O., and will open a store in Asheville, N. C.

C. L. Taylor, formerly with Joseph Lucas at Orange, Tex., was here the last week, before opening a store at his old home in Dennison, O.

Mr. and Mrs. Noterman have left for their home in Hendersonville, N. C., after a visit to their son, Joseph Noterman, of Joseph Noterman & Co.

The Gustave Fox Co. made the 18 badges which are to be presented to the world's championship baseball team. Eac badge is heavily enameled and studde with 20 diamonds. L. J. Fox, of this hous is calling on the trade in Oregon a Washington, and B. Ganz is looking aft business in New York.

Lindenberg & Fox, 7 E. 5th St., are a ranging to add a cut glass department their business. Hugo Lindenberg, of th firm, has left for the south.

Warren Owen, of M. A. Mead & C Chicago, with his family, stopped in Ci cinnati en route to Pittsburg, where th will make their future home.

Max Berkewitz, a diamond setter e ployed by the Dorst Co., who last we stole a small diamond and other sto from this house, is still at large. A w rant for his arrest has been issued. T diamond, which was not as valuable as w stated in the first reports, has been locat by detectives in a local pawnshop.

Sumpter Jackson, who was arrested stealing two diamond rings, one valued $95 and the other at $80, from He Korf's store, 625 Main St., was last we indicted for grand larceny and to t charge he pleaded guilty. The sentence i posed upon him was two years in the pe tentiary. The rings are again in the p session of Mr. Korf.

During the past week two men visi the office of H. J. Huber, diamond setter, Perin building, and after their depart two diamonds were missing. One wa 1⅜ + 3/16 carat stone, valued at $ and the other was a ¾-carat gem, valu at $90. Mr. Huber says he knows who men are, and thinks they have the sto He has given a description of them to police, but as yet they have not been tak into custody.

As recently noted, the Homan Mfg. was incorporated with a capital of $400,0 of which $250,000 is common stock a $150,000 is 6 per cent. preferred stock. latter only is placed on the market. company reserves the right to take up preferred stock in 1920 by paying 106 for Operations now have been begun by wh the company expects to build a new p on Reading Road, but the concern inte to retain the present building at 1214-22 7th St. and convert it into a modern pos building.

Out of town jewelers who replenis their stocks in this city last week includ Frank B. Carey, Lebanon, O.; Will Leive, Aurora, Ind.; E. Sensenbrenner, C cleville, O.; Charles W. Rompel, Louisv Ky.; Horace Fuller and Ed. Miller, Krouse & Co., Columbus, O.; Cha

TRADE CONDITIONS.

f the next three months will hold their own ertainately as well as have the past nine hs, this year will be a banner year for the ry business," said a prominent jeweler, last "With me September sales were 30 per cent. r than the sales of the corresponding month st year, and the bulk of the business up to 1, shows a gain over previous years."

. R. Gray, of Gray, Gribben & Gray, has rned from a week's visit in Chicago.

oy Neighbors, of the Augustus P. Craft has returned to work, after a week's

ess

lbert Berg, watchmaker for Carl L. st, spent part of last week in Pittsburg, former home.

Charles Haseltine, of Haseltine Bros., komo, Ind., and son were greeting nds in this city, last week.

The sympathy of the local trade is ex-ded to C. E. Hodgen, Kokomo, a buyer e, whose mother died recently.

. M. Green, formerly with Sam Prager, re Haute, Ind., was in this city, last ek, looking for a location for a new re.

Because of the illness of his brother, El-r Stokes, watchmaker for Horace Com-ck, has postponed his departure for xas until after the first of the year.

When arrested last week for loitering, se Beard, a 15-year-old boy, had in his session a number of rings, which he mitted stealing from a West Washington jewelry store. The jeweler who lost rings has not been located.

n the Superior Court last week, Judge athers denied the right of Smith & Gray, velers, to claim a ring purchased from m and found in the pawnshop of Emil antel, inasmuch as perfect identification the ring was not established. Ethel appel bought the ring and paid $11 on it. She gave it to C. D. Myers, who decamped. Detectives located the ring in the pawnshop, but neither the Chappel woman nor the jewelers were able to swear that the ring was the one which they had lost.

Among the out of town jewelers who visited the local manufacturers and jobbers last week were: J. Hummel, Jr., Muncie; C. W. Neal, Franklin; H. F. Bennett, Lapel; E. O. Collins, Frankfort; F. C. Sheldon, Shelbyville; P. C. Seaton, Clayton; A. W. Owens, Greenwood; D. S. Whittaker, Lebanon; J. M. Washburn, of the Washburn Jewelry Co., Anderson; A. Pursel, Noblesville; J. E. Meissen, Cicero; George L. Spahr, Lebanon; Bernhart Maier, Edinburg; George W. Clemons, Greenwood; J. Henry Smith, Greenfield, and Leslie E. Heaps, Spencer.

According to J. A. Darragh, a mining engineer from Cambourne, B. C., many precious stones, including diamonds, are to be found in large quantities in Brown County, within 40 miles of Indianapolis. Mr. Darragh has just returned from a long prospecting trip in the Brown County fields. On his way back to his home he called on State Geologist Blatchley and showed several stones that he had picked up, including agates, a few rubies and sapphires and a small diamond. "These stones," said Darragh, "are of glacial origin and they undoubtedly came from the neighborhood of James' Bay, British America. They exist in quantities in the Brown County hills, and I firmly believe that they could be mined with profit."

## Pacific Northwest.

Ira N. Wood, Shelton, Wash., spent last week in Seattle, buying holiday stock.

Clarence Payne, Dayton, Wash., was recently married in Portland, Ore., to Miss Pearl I. Bunch, of Azusa, Cal.

Mr. Segerstrom, of Segerstrom & Hagen, Everett, Wash., has left for Nome, Alaska, where he expects to engage in business with his brother.

A recent fire at Nome, Alaska, destroyed the jewelry store of Mr. Sutter, with a loss of $22,500, and Mr. Muller's store, with a loss of $4,000.

A. Salzman, Roseberg, Ore., has returned home from a short trip to Portland, Ore., where he visited the Lewis and Clark Centennial Exposition.

B. N. Butler, Medford, Ore., has moved his stock into new quarters.

Troyer & Engles, Tekoa, Wash., have added a china department to their store, and will carry a large line of Dresden ware.

## Pittsburg.

TRADE CONDITIONS.

Dealers express themselves as being highly pleased with business conditions locally. Nearly every business man says that the present Fall trade is the best that has been experienced in many years. Wholesale houses are exceedingly busy, and many dealers assert that the present Fall business has, so far, been the best in the history of their houses. The retail stores are doing a splendid business. A number of weddings, scheduled for this month, is materially assisting in increasing sales. The demand for diamonds is said to be especially good.

H. F. Linnenbrink, Freedom, has been drawn on the Grand Jury in the Federal Court, which convenes here next week.

Frederick D. Hoops has opened a store at Somerset, O. He is a son of C. H. Hoops, who for many years was in the jewelry business at Zanesville, O.

W. J. Johnston, the head of the W. J. Johnston Co., 5th and Market Sts., has the sympathy of his friends in the trade in his bereavement due to the death of his father, last week.

The following out of town merchants visited Pittsburg last week. J. Linnenbrink, Rochester; A. C. Graul, Sharpsburg; H. R. Brown, Donora; Edward B. Thekston, Brownsville; William Hunt, Uniontown; W. G. Smith, Youngstown.

J. W. Scott, Cadiz, O., who was recently elected Mayor of that town, was in Pittsburg last week. He jokingly told his friends that he left home so as not to be called on to make a speech at a convention. Mr. Scott does not pose as an orator.

Miss Nellie O'Neill bought a ring on the instalment plan from D. Carter about a year ago, made several payments and then went to Ohio. She was placed in jail last week to answer to a charge of larceny. It is alleged that she disposed of the ring.

J. Alexander Hardy, who spent several days of last week in New York, returning to Pittsburg Wednesday, left Thursday night for the metropolis, where he is busy buying holiday stock. The firm is making preparations to make a big display this season.

The wife of Howard Hall, the burglar convicted of entering the store of Graf & Niemann, 210 6th St., several weeks ago and sent to the penitentiary to serve seven years, called on Mr. Niemann last week and asked if he would sign a petition requesting that her husband be pardoned. Hall's wife, according to her own statement, is but 16 years old. Mrs. Hall and Mr. Niemann had rather an interesting arrangement, but the firm will show no leniency because Hall told Mr. Niemann that if the revolver had been on his person, the officers or Niemann would never have gotten out of the store alive if by shooting them he could have secured his freedom.

The deed conveying the property at 5th Fifth Ave., occupied by E. P. Roberts & Sons, was recorded Wednesday in the name of Mrs. M. J. Hardy, wife of J. Alexander Hardy, of the Hardy & Hayes Co. The purchase price of the property was $25,000. Mr. Hardy, in discussing the sale, said that the title to the property was taken in the name of his wife because the property will be held by her as an investment. Mr. Hardy said that no special improvements to the building are contemplated, and that it is not the intention of his firm to move. The Hardy & Hayes Co.'s store is a few doors west of the Roberts establishment. Mr. Hardy says that his firm has a long lease on its present quarters. There is a four-story building on the lot sold, which has a frontage of 20 feet and a depth of 120 feet.

## Columbus, O.

TRADE CONDITIONS

September trade has been good generally, dealers pronouncing it the best September in history. Some Christmas goods have been sold and the prospects are good for a fine Fall trade exceeding that of last year. Some dealers complain of a scarcity of money. With a fine business money has been tight, they say, and the increase in sales of September over August have not brought in any more cash. All dealers are receiving holiday goods and placing them in stock.

In the matter of the Merchants' Supply Co., bankrupt, Referee Rogers has granted the motion of the North American Watch Co., Mansfield, O., that 106 watch cases be returned to the latter because the sales were made on a false statement of assets and liabilities; and the receiver has been ordered to give up the goods.

The Bancroft Bros.' Co. has just finished extensive improvements in its 10th St. store. Three large wall cases of solid mahogany and glass have been added, besides two fine mahogany counter cases. All old cases, of oak, have been placed on one side of the store, while the other side is all mahogany. The repair room has been removed to the basement, and the diamond room, just at the right of the entrance, has replaced it.

Mighty Men O' The Hammer.

America's Best Known Auctioneers.

# The Man Behind the Gun
## or
# The Men Behind the Flag.

When a firm holds first place for a period of more than twenty years, during which time hundreds of jewelry auctioneers have come and gone, it proves not only their commercial standing, but their qualification as salesmen. The best reply that we can make to some adverse criticism that recently appeared in a Trade Journal relative to auctions, is our list of firms, whom we have made sales for in years past, who to-day are leaders in their various cities. Among the many are the Mermod-Jaccard Jewelry Co., St. Louis, Mo.; Chas. Crankshaw, Atlanta, Ga.; Wm. Beck, Sioux City, Ia.; A. M. Hill, New Orleans, La.; Sigler Bros. Co., Cleveland, O.; G. A. Schlechter, Reading, Pa.; The Parmlee Bros. Co., Los Angeles, Cal.

It is not the business that makes the man, but the man that makes the business. Our methods are to-day as they always have been—to build up a firm's trade and obtain money at the same time by closing out undesirable merchandise on a commission basis. That we have been successful, our credentials speak for themselves. The list below cannot be equaled by all others now engaged in the business combined.

We are in the market with the cash to buy anything and everything you have in the way of merchandise in very large or small lots. Let us know whether you have anything in jobs, discontinued lines or goods that for any cause you are desirous of cleaning up on for cash. We will buy jewelry stores out complete in any part of the country.

We are in a position to make use of anything you have at a better price than you can obtain elsewhere. Send samples, price, etc., or wire us and we will have our buyer call on you.

Have you any specialties in your line that we can use to advantage in making auction sales?

**WANTED AT ONCE, for spot cash, jewelry store in city of not less than 20,000 population; I buy any part of stock, diamonds, etc., and pay better prices than many others. Address the Leading Jewelry Auctioneer of America, Dan I. Murray, 3 Maiden Lane, New York; 151 Wabash Ave., Chicago, Ill.; 512 Race St., Cincin- nati, O.; for personal interview call at New York Office; strictly con- fidential.**

*(Special Notices continued on page 78.)*

¶ The Koy-lo Company, of No. 7 Broadway, New York City, beg to offer to the trade their new *patented*

**KOY-LO REVOLVING SPIRAL HAT PIN.**

¶ The head of the Koy-lo pin is swiveled on to the spiral stem. Thus, when the pin is inserted into the hat, the spiral revolves automatically. There are no hidden springs, and nothing to get out of order. The Koy-lo is used in precisely the same manner as an ordinary straight hat pin. It is as superior to a straight hat pin as a screw is to a nail, or as an automatic screw-driver is to the old kind. It is the only practical device at present in existence which will hold the hat firmly and comfortably. It will not work loose when in the hat.

¶ The Koy-lo pin is made up in a variety of popular styles at from $9.00 per gross to $75.00 per dozen, to retail at from 10c. to $10.00 each. Each pin carded separately. Terms: 1%, 10 days; net, 30 days, f. o. b. New York City.

¶ As the Koy-lo Company's salesmen will not, for the present, call on the trade outside of New York City, out-of-town dealers who desire to see samples should make application by mail to

## Providence.

Theodore W. Foster, accompanied Mrs. Foster, took an automobile trip points of interest outside the State l week.

The interest of Adolph Lederer in t firm of Henry Lederer & Bro. has been p chased by Henry Lederer, the former ret ing from the firm.

Walter B. Frost, well known to local je elers, has been elected as school committ man from the Sixth Ward. Dr. Risk, w held the office, having resigned.

Among the imports at the port of Pr dence last week were six packages of n tation precious stones from Bremen, from Hamburg and one from Havre

Among the buyers in town last week w A. Binswanger, Chicago; J. A. Pitts, M treal; A. L. Pfersich, Philade p a; Friendlich, Baltimore; L. Lamm, Chica

The Gorham Mfg. Co. has decl quarterly dividend of 1¼ per cent on b the preferred and common stock of the c poration, the same being payable to st holders of record last Monday.

The plant of P. Wunderle & Co., suc sors to J. E. Potter & Co., is now loca on the top floor of the building at Friendship St., it having been deemed visable to remove from the former locat on Pine St.

Pembroke S. Eddy has been elected of the members of the committee t range, on behalf of the Providence F men's Association, for the participation that organization in the firemen's muste Brockton this month.

During the past week there have been exhibition at the store of the Tidd Thurber Co. the cups awarded at the cent golf tournament of the Silver Sp Country Club. They are all of sterling ver and of conventional design.

The suit of Elizabeth Wunderlee aga James E. Potter came up in the Supe Court Saturday on the defendant's mot to dismiss the suit because certain dates been left blank in the plaintiff's declarat The matter was held for advisement.

Joseph P. Burlingame, well known n cal jewelry circles, has already taken stump for the campaign, addressing a m ing of the Eighth Ward Republican C one night last week. Mr. Burlingame is Speaker of the House of Represen at and is prominent in politics.

The bowling season has started in wit rush, and although no league has as t been formed among the jewelry shops, eral of them have some excellent te which have met delegations from shops in a series of friendly contests. reported that there is a movement on

ng some of the enthusiasts to organize
lgue similar to the one in New York.
hn H. Nickerson, 30 years of age, who
ome time had been employed in a local
neling establishment, but who for the
a two weeks had worked in a jewelry
olishment in the Lederer building on
art St., committed suicide, Saturday
t. by drinking a solution of cyanide of
ssium. Nickerson, when sober, was a
-hearted man, but when in his cups was
mpered. He had had trouble at home
result, and this caused him to become
ondent. He leaves a widow and one
hter.

## North Attleboro.

r and Mrs. John E. Tweedy have re-
ed from a visit to New York.
bert Totten returned home Tuesday
a two months' vacation spent in Nova
ia.
e O. M. Draper factory commenced to
nights this week.
A. Cummings, of J. F. Sturdy's Sons,
me from a western trip.
Cheever Hudson, of G. C. Hudson &
returned Tuesday from a lengthy west-
trip
dwin E. Hale and Walter C. Sherman
rned Monday from an extended west-
trip in the interests of the estate of O.
Draper.
Payson Bennett, senior member of the
nville Stock Co., is installing an electric
t at his home in Wrentham, for the
ose of lighting the streets of that town.
uis Cassels, who for the past year has
employed by the Paye & Baker Mfg.
entered Tufts College, Monday. He
the recipient of a purse of $25 from his
w employes, and Patrick Dunn, the
man, presented him with a pair of solid
enameled buttons.
oseph Clark, engineer at the factory of the Paye & Baker Mfg. Co., met with a serious accident Friday morning that will incapacitate him for some time. He was standing on a step-ladder repairing some pipes in the boiler-room, when the ladder slipped and he was thrown to the floor. He broke his right arm and dislocated both his ankles.

In the Republican caucus, held here Tuesday evening, for the election of delegates to the State, County, Councillor, Senatorial and Representative conventions, the Representative delegation pledged to Albert Totten, formerly of the firm of Totten Bros., but now retired, was successful, which means that Mr. Totten will be one of the Representatives from this district, which is a double one, in the Legislature of 1906. The following well-known manufacturers were elected on delegations: G. Herbert French, Theron I. Smith and Walter Ballou on the State delegation; Edwin E. Hale on the Councillor delegation; Thomas G. Sandland on the County delegation, and Woodbury Melcher and Herbert J. Straker on the Senatorial delegation. Fred S. Gilbert, Alpin Chisholm, George K. Webster and George G. Wheeler were nominated as members of the Republican Town Committee for 1906.

The tournament of the Jewelers Shop Duckpin Bowling League opened Monday night, and gives promise of being one of the most interesting and hotly contested of the many that have been held during the past five years. Larger scores and averages will result this year, as the league includes some of the best rollers in this section. Following are the results of the games played this week:

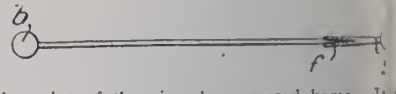
Ser. No. **2,866.** WATCHES, WATCH CA AND WATCH-MOVEMENTS. E. Ho Watch Co., Riverside, N. J., and Walt Mass. Filed April 24, 1905.

*E. Howard Watch Co.*

The letter, words, and abbreviation "E Ho Watch Co."



## BRITISH PATENTS.

**ISSUE OF SEPT. 13, 1905**

(Abridgments of Specifications, 1904, from *Illustrated Official Journal.*)

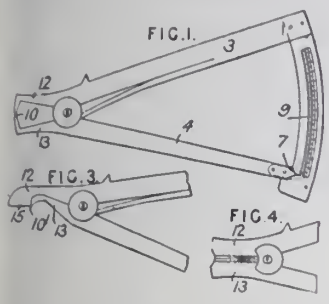
**11,403.** HAT-PINS. J. F. Parker, Dalston, dlesex. May 18.

The tubular fastener *g* is split at *f* and

the point of the pin when pressed home. It have a knob *c*, similar to the knob *b* on th and may be ornamental.

**11,509.** STUDS. P. Chambers-Jones, Bryn Halkyn, near Holywell. May 19

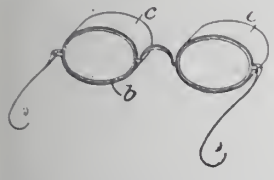
Studs for fastening cuffs to coat sleeves ar



vided with screwed extension *d*, on which supplementary bases *c*, secured by nuts *f* head *a* is passed through the center stud-ho the cuff, the part *d* through a hole in the fold of the sleeve, and the base *c* is replac secured. In a modification, a screw-threade is made from the base up through the st

ordinary stud, and another base is provided h a screw-threaded stem to fit into the hole.

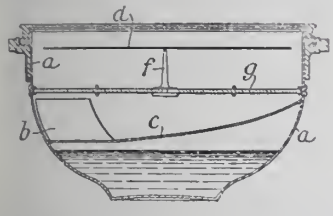
**,598.** GAUGES FOR GEMS. J. Pearson, Little Horton, Bradford. May 20.



he weights of diamonds and other precious nes are deduced from measurements made by liper gauges. Fig. 1 shows a calliper with asuring-arms 12, 13, and indicating-arms 3, 4.

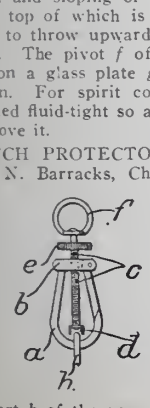
tached to one of these is an arm carrying the ile 9, and upon the other is an indicating-point The breadth and depth of the diamond are asured at the point 10 and the weight found refrom. In the case of irregularly-shaped nes, the measuring-arms are modified as shown Fig. 3, the point $10^1$ being set to the girdle and surface 15 placed upon the table of the stone, the form shown in Fig. 4 is used for obtaining dimensions of the table. For stones of differ- specific gravity, variously graduated scales 9 attached, so that the readings obtained may be ed to find the weight from the same tabulated ts as in the case of the diamond.

**,637.** SPECTACLES AND EYEGLASSES. F. N. Davidson, London. May 20.



Curved "guards" *c*, made of thin sheet metal or her material, are attached to the lens frames *b*,

protect the eyes from the ill effects of the sun ght on snow, etc. The guards may extend round e lenses, or sections of them may be placed at ie sides, top, or bottom, as required.



**,807.** COMPASSES, MAGNETIC. W. D. Whyte, Glasgow. May 24.

Relates to modifications of the means for illu- inating a ship's compass card described in Speci-

cation No. 23,043, A.D. 1903. Windows *b*, which ay be glazed if desired, are made in the sides of he compass bowl *a* above the level of the oil ontained therein. The oil is closed in at the top y a horizontal and sloping or dome-shaped metal artition *c*, the top of which is preferably painted hite in order to throw upwards the light coming n at the sides. The pivot *f* of the compass card is mounted on a glass plate *g* or on the dome- haped partition. For spirit compasses, the glass artition is sealed fluid-tight so as to hold the spirit n the space above it.

**,903.** WATCH PROTECTORS. F. H. Williams, R. N. Barracks, Chatham. May 25.

The upper part *b* of the snap-hook *a* of a watch-chain swivel acts as a nut for the screwed pin *c*. Beneath the loose ring *f*, a milled disc *e* is fixed to the screwed pin *c*, so that the pin can be screwed down until the clamp *d* attached to its lower end is tightened over the watch or other ring *h*.

*Complete specifications accepted Sept.* 6, 1905.

**170.** INKSTAND. Darke.

**10,757.** TIME-RECORDER. Giddins.

COLUMBUS, Ga., Sept. 20, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
We would ask you to kindly furnish us addres of the Eureka Silver Co. K. & P.

ANSWER:—Eureka Silver Co. is a nam used by the Meriden Silver Plate Co., suc ceeded by the International Silver Co., Mer iden, Conn.

BOSTON, Mass., Sept. 20, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Please advise us who carries steel rings, suc as are used for relief of rheumatism, and obl ge D. C. I

ANSWER:—The Franco-German rheu matic ring was sold by O. C. DeLong Syracuse, N. Y. J. B. Bowden & C Maiden Lane, also make such rings

BOSTON, Mass., Sept. 18, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you tell us where we can get large phot graphs or pictures of the Kimberley Mines, abo three by four feet, to hang in our store W think we have seen something of the kind but not know where they can be obtained. Yours, A. S. & Son

ANSWER:—We have made many inquiri for large pictures of these mines, bu have been unsuccessful and are informe that it is impossible to secure anything the sort in the United States. Perhaps picture enlarged from some authentic en graving would be satisfactory. Macmilla & Co. publish a very valuable work, ent tled "The Diamond Mines of South Africa by Gardner F. Williams, in which there ar some good engravings, which could be en larged by a photographer. Another mean to secure a picture would be to purchas lantern slides of just such views as y wish, from which a bromide enlargemen to any size desired could be made at nominal cost. The following are the sub jects of such slides mentioned in a li which we have on hand: "The Floors the De Beers Mine," "Washing Plant the De Beers Mine," "The Sorti Tables of the De Beers Mine," "The Ha age, De Beers Mine," "Kaffirs Separati Mud from the Gravel," "Open Working the De Beers Mine," "One Thousand Fe Level, De Beers Mine;" "Diamond Puls ter, De Beers Mine;" "Sorting the Grav for Diamonds," "Tipping Ground 1,2 Feet Level, Kimberley Mine;" "Washi Gear and Floors," "Searching a Kaffir f Diamonds and a Kaffir Compound," "Th Kimberley Diamond Mines," "The Di mond Mine and Town of Kimberley," "Di mond Office," "Morning Market," etc

# Queries By Our Readers

**Note.**—Questions under this department will be answered as promptly as possible. Some queries require careful investigation before a satisfactory answer can be given; hence such answers are often seemingly delayed. THE CIRCULAR-WEEKLY desires every jeweler to take advantage of this department.

AZTEC, N. M., Sept. 14, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
A customer has the following described watch which some jeweler told him was 300 years old and was valued (probably as a curiosity) at $500. I am doubtful about both statements, and would like to know something about the maker. It is marked "Litherland, Davies & Co., Liverpool," and bears the number, 10646. E. C. W.

ANSWER:—Our records do not show the name of such a firm as Litherland, Davies & Co., but do show a Peter Litherland, who patented a rack lever escapement, numbered 1,830, in the year 1791. We believe that the Litherland in question became a member of Litherland, Davies & Co., later.

WALLINGFORD, Conn., Sept. 19, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Can you obtain for me a correct list of the flower symbolic of each month of the year and accepted flower for each State in the Union? I shall greatly appreciate any information you can give me on this point. S. B.

ANSWER:—The following shows five different lists of the flowers of the month, taken from various authorities:

| | | | | |
|---|---|---|---|---|
| January...Mistletoe. | Crocus. | Snowdrop. | Snowdrop. | Wild Rose. |
| February..Pine Needles. | Fern. | Primrose. | Pink. | Pink. |
| March....Daffodil. | Pansy. | Ipomoea, Violet. | Violet. | Violet. |
| April.....Dandelion. | Daisy. | Daisy. | Easter Lily. | Easter Lily. |
| May.....Iris. | Olive Branch. | Hawthorn. | Lilyof the Valley. | Lily of the Valley. |
| June.....Wild Rose. | Corn. | Honeysuckle. | Rose. | Rose. |
| July.....Pond Lily. | Cowslip. | Water Lily. | Daisy. | Daisy. |
| August....Poppy. | Woodbine. | Poppy. | Water Lily. | Pond Lily. |
| September.Indian Corn. | Oak. | Morning Glory. | Poppy. | Poppy. |
| October...Maple Leaf. | Rose. | Hops. | Cosmus. | Cosmus. |
| November. Chrysanthemum. | Moss. | Chrysanthemum. | Chrysanthemum. | Chrysanthemum |
| December. Holly. | Forget-Me-Not. | Holly. | Holly. | Holly. |

The following are the official flowers of the various States of the Union: Alabama, Golden Rod; Arkansas, *Apple Blossom; California, *Eschscholtzia; Colorado, Colorado Columbine; Delaware, Peach Blossom; Idaho, Syringa; Indiana, Corn; Kansas, *Sunflower; Kentucky, Golden Rod; Louisiana, *Magnolia; Maine, Pine Cone and Tassel; Michigan, Apple Blossom; Minnesota, Moccasin; Mississippi, Magnolia; Montana, Bitter Root; Nebraska, Golden Rod; New York, Rose; North Dakota, Wild Rose and Golden Rod; Ohio, Scarlet Carnation or Golden Rod; Oregon, Oregon Grape; Pennsylvania, Golden Rod; Rhode Island, Violet; South Carolina, Golden Rod; South Dakota, Anemone Patens; Texas, *Buffalo Clover or Blue Bonnet; Utah, Sego Lily; Vermont, Red Clover; Washington, Rhododendron; West Virginia, Rhododendron Maximum. Those marked with a * were adopted by State Legislatures. All others were adopted by vote of public school scholars in each State.

DAVIS, W. Va., Sept. 10, 1905.
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Is a firm responsible for chipping a diamond when mounting it, and can damage be collected of of them for so doing in the State of New York?
L. E. & BRO.

ANSWER:—We can find no case in which this point has been directly decided, and ar informed that the law governing this ques tion is that relating to bailor and baile for hire. Ordinarily a bailee of an articl left with him to have something done to is bound to take reasonable care, and exe cise reasonable skill in doing what is nece sary, and he is not responsible for damag to the article where he has exercised suc reasonable care and skill; that is, provic ing there is no contract between the bailc and bailee wherein the exact amount ar nature of liability on the part of the baile is set forth. But where the bailee unde takes to do work that requires pecu ar unusual care and skill and holds h self out to the bailor as a person possess of the requisite skill to do the work, he then bound to be possessed of the skill ne essary for the proper performing, and is bound to exercise in doing the work t highest degree of skill that is requisite, a the highest degree of care that is necessar and he is then responsible for damage any article left with him for the exercise his skill, which damage is caused by a la of necessary skill or any carelessness wh soever on his part. If he has been neit negligent nor unskilful, and through so unavoidable cause for which he is in way to blame, the article is injured, cannot, in the absence of a special co tract, be held liable for such injury

You will see from the above that in t absence of any agreement between you a the party you would probably not be h liable, unless the splitting of the stone w due to negligence or lack of skill on part of you or your workmen.

PLATTEVILLE, Wis., Sept. 24, 190
*Editor of* THE JEWELERS' CIRCULAR-WEEKLY:
Where can I find out the age of old Eng china? C. H.

ANSWER:—If you consult any or all the following books you will probably such information as you desire: "The China Book," published by Frederick Stokes; "Pottery and Porcelain of United States," published by Barber, P nam & Co., New York; "Cyclopedia Ceramics," by Jarvis, published by Blan ard, New York; "Chats on English Chi published by Stokes; "China Collected America," published by Charles Scribn Sons, New York.

Considerable improvements have been made in the store of Albaugh Son, Hillsdale, Mich. A new steel ing has been erected and the estab ment has been supplied with about incandescent lights. New mirrors h been placed in the show window and show cases have been renovate l.

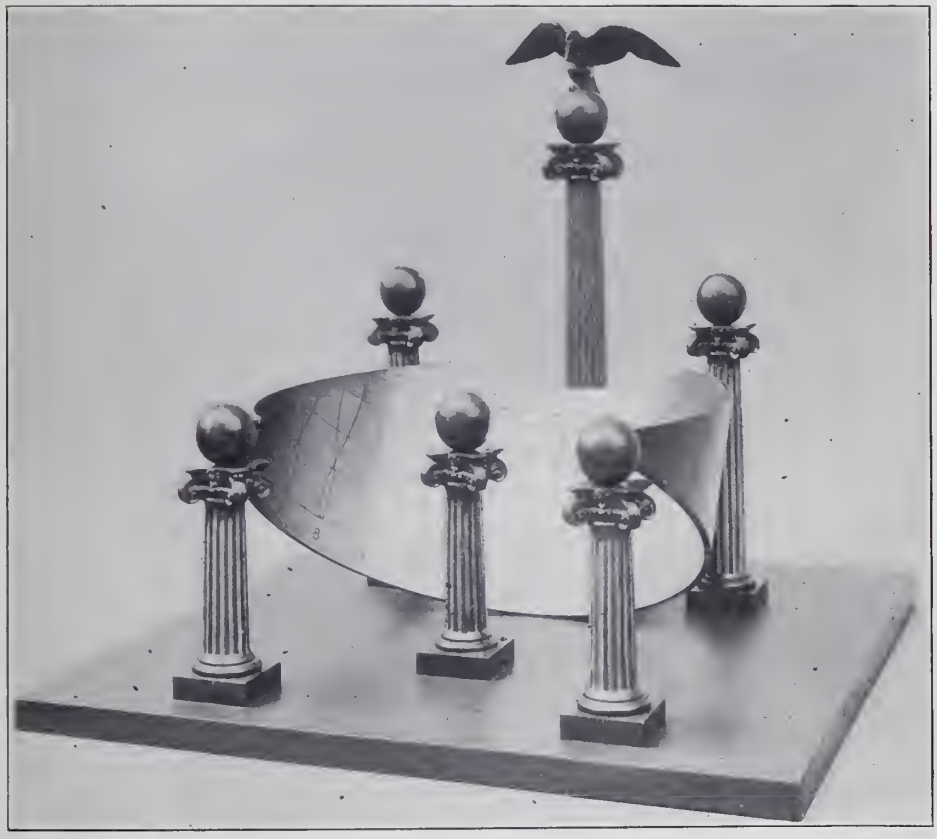
## AMERICAN WALTHAM WATCH CO.

### WALTHAM, MASS.

## A Sun-Dial Which Tells Standard Time.



WITH the recent invention of Albert C. Crehore, of 48 Lincoln Terrace, onkers, N. Y., an improvement has been ade in that primeval time indicator known the sun-dial, which is of unusual interest horologists. Mr. ehore's improved, or, tter, new sun-dial, lls standard time d in such a manner at it may be read by ıy person of average telligence, just as mply as the time is ld by the ordinary ouse clock.

Referring to the un-mplicated construc-on of this new sun-al, Mr. Crehore told representative of HE CIRCULAR-WEEK-Y that one of the orkmen about his esidence, a colored ıan, used a dial hich is erected on is property instead f a watch, in order o learn the time of ay.

The illustration ad-oining was repro-uced from a photo-raph loaned by the ıventor and repre-ents a dial which was ıade for Sir Wm. H. Preece and located t Carnarvon, North Vales. This dial was xhibited by Mr. Preece a short time go at the Conversazione of the Royal Soci-ty, in London, Eng., where it received much avorable comment. The dial illustrated in THE CIRCULAR-WEEKLY, Aug. 9, 1905, which vas presented to the University of Ohio, Columbus, O., by the graduating class, is a eplica of the Preece dial. Mr. Crehore is t present working on portable sun-dials imilar in principle to the above mentioned. He says that he intends to make such dials about six inches in length, so that they may be conveniently placed in a window.

The two line drawings reproduced herewith from the patent specifications, seem to agree in general design with the dial just referred to. The first of these illustrations shows a section, in the plane of the meridian, through the dial, which is one solid piece of bronze except the face (depicted below it), which is an engraved bronze sheet bent to fit the surface of revolution—in the present case a cylindrical one. The axis $N\ S$ is inclined to the horizontal $H\ Z$ at an angle equal to the latitude of the place where the dial is erected, and the whole casting oriented until the axis comes into the plane of the meridian, when the axis $N\ S$ and the line $P\ Q$ will each be parallel to the earth's axis of rotation.

The small bead or "gnomon" $B$, which casts the shadow, is held in position by a bronze wire $W$, extended in an axial line constituting the focus of the cylinder, and kept taut by a spring.

IMPROVED SUN-DIAL RECENTLY MADE FOR SIR WM. H. PREECE.

Mr. Crehore's own explanation of the scientific principle of this instrument, as printed in a recent issue of the *Optical Instrument Monthly*, is as follows:

"The relative motion of the sun and the earth is such that the sun's apparent path in the heavens, when mapped with reference to the horizon plane of some fixed locality, is only completed so that the sun begins to describe approximately the same path once every year. It does not describe quite the same path because of several component motions of a very long period, which are for the present purposes of the second order of magnitude and may be neglected. Considering the sun's path results from two component motions, the rotation of the earth on its axis once per day, and the revolution in its orbit once per year, it will be seen that this path is one continuous curve which is approximately completed only once a year, and will be retraced each succeeding year. Each day the path is almost a complete circle, but the circle is not quite closed, as the path the following day is a similar circle very near the preceding one, so that the path resembles a screw thread except that the pitch of the screw is not uniform through-

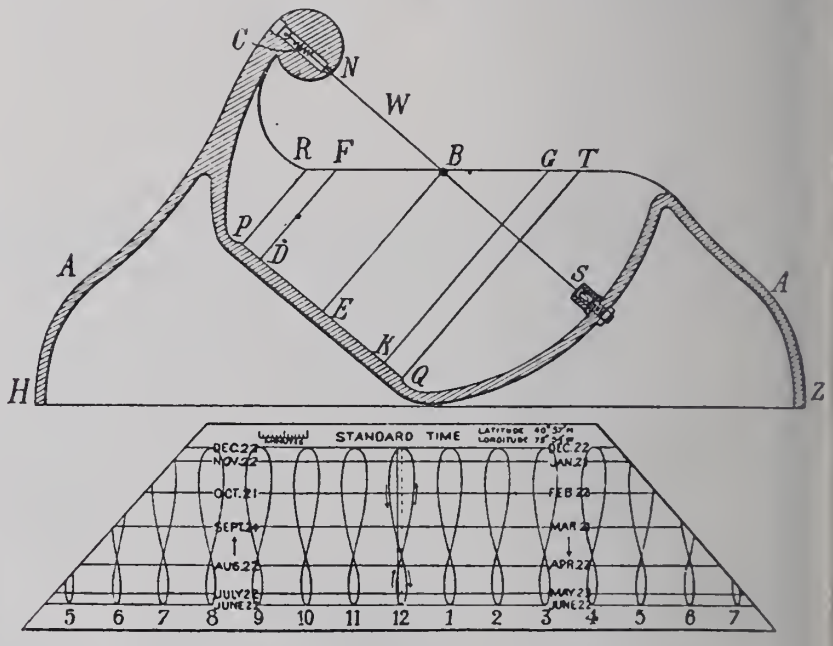
out the year, but changes from its maximum at the time of the equinoxes to zero at the solstices.

"For a sun-dial which is to indicate time it is necessary to know more than the mere path of the sun in the heavens, which is only a geometrical curve described in space. It is necessary to know where the sun is situated on this curve at all times. If a point is marked on the sun's path, as above described, for every hour throughout the year, it will be found that the points made at the same hour, say 3 o'clock, on succeeding days lie very close together as compared with points corresponding to succeeding hours of the same day. At 3 o'clock on the succeeding day the sun will have made a complete revolution in its screw thread path, and will then be at the corresponding point on the next adjacent thread. If it were exactly at the corresponding point for each succeeding day, all the 3 o'clock points, for example, would be located on a portion of a meridian circle, there being 24 such meridians at equal intervals around the equator.

"This would be strictly the case if the earth's orbit around the sun were a perfect circle. Because it is an ellipse, however, the earth travels fastest when nearest the sun in January, and slowest in July, gaining in speed every day from July to January, and losing each day during the other half of the year. This gives rise to the well-known 'equation of time,' which is accurately calculated and may be found in the Ephemeris for every day throughout the year. The change from day to day is very small, but for a considerable portion of the year the effect is cumulative, so that the difference between apparent time and mean time which we use amounts to as much as 16 min. 20.55 sec. on Nov. 4, which is its maximum amount.



"The position of the sun at the hour of 3 o'clock by mean time is not on the meridian, but on a curve somewhat resembling a figure '8' situated almost symmetrically about the meridian already described. The larger loop of the figure '8' is described during the January half of the year, when the earth is moving fastest, and is therefore situated south of the equator.

"Having now formed a picture of the imaginary path of the sun in the heavens with its system of figure '8' curves representing hours, we may calculate how to make a sun dial which will indicate the sun's position at any time throughout the year, or conversely, which will indicate the correct time for every position of the sun throughout the year.

"If we abandon at the beginning the method of letting the shadow of a line (the gnomon in the common form of dial) indicate the time, it will be evident that no point can be shown by having the shadow made by a point or small sphere. The system of curves in the heavens representing the sun's path may be projected through this point upon some material surface upon which the curves may be permanently marked. They may be projected upon a surface of almost any shape, but the first one which naturally be selected is a horizontal plane.

"When the sun is north or south of the equator the imaginary surface described by a straight line from the sun through a fixed point is, during the day, the surface of a cone of revolution having the ecliptic which the sun describes parallel to the equator for its base. This point is cut by the horizontal plane on which the shadow falls, so that the conic section described by the shadow during the day is an hyperbola. Thus each day a different hyperbola is described on the horizontal surface, and we have a system of hyperbolas, those for the half of the year, when the sun is north of the equator, being convex toward the north and for the other half of the year convex toward the south, the line for the date of the equinoxes being a straight east and west line.

"On such a dial the hour curves or figures '8' would each be different from the others, that nearest the noon hour being the least distorted, and it would not be possible

HOW STANDARD TIME IS CALCULATED ON THE CREHORE SUN-DIAL.

# An ELGIN Art Treasure for You

This large "Father Time and Lady Elgin" calendar, because of its matchless beauty and superiority of execution, compels the admiration of the most discriminating lovers of art. Hanging on the walls of any home, it will share attention with the most highly prized masterpiece of painting. It is entirely free from all advertising matter. Size 8x15 inches.

The calendar is the work of Maud Humphrey, the well-known artist. It illustrates in four beautiful pictures the popular periods of English fashion—the fifteenth, seventeenth, nineteenth and twentieth centuries. Its strikingly delicate color effects, combined with remarkable originality of conception, places it among the treasures of art. It is instructive and valuable from a historical point of view as well. Send for sample calendar.

**ELGIN NATIONAL WATCH CO., General Offices, 131 Wabash Ave., CHICAGO.**

follow the shadow very far from noon before it becomes indistinct, due to the increasing distance from the point. A horizontal surface would not be suitable to use in such a dial for another reason. The system of curves would not be the same for any two places on the earth, and the dial would have to be constructed for one place only.

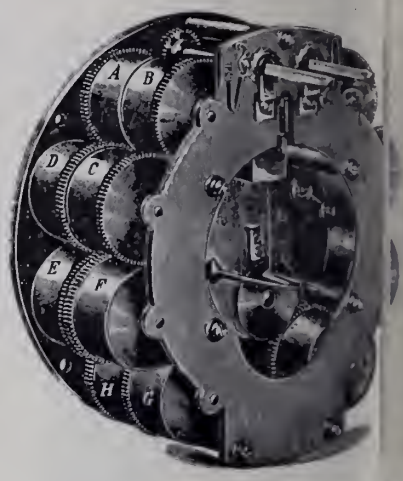
"Another surface which might be considered for a dial is a spherical surface having the point which casts the shadow at its center. This would give an exact reproduction of the curves already described as representing the sun's path in the heavens. This surface has been used in some ancient dials, but they were not arranged to indicate either mean or standard time. The chief disadvantage in this form of dial is that the distance traveled by the shadow for one hour differs at different times of the year, so that there is no fixed linear distance corresponding to an hour throughout the year.

"For these reasons a cylindrical form of surface is adopted, having its axis parallel to that of the earth, and the bead which casts the shadow is on the axis. The circles are then all of the same diameter, and the distance from any point on one figure '8' to the corresponding point on the next is fixed throughout the year so that the same scale may be applied at any time to interpolate between the hour curves.

"If in such a dial it is desired to indicate the time of some other locality it is merely necessary to revolve the cylinder about its axis by an amount corresponding to the difference in time between the two places. This has been done whenever standard instead of local mean time is wanted, or when Greenwich time instead of local mean time is desired."

### Odd Tower Clock in Los Angeles, Cal.

AN unique clock, constructed by A. C. Hunt, Los Angeles, Cal., was recently installed in the tower of the auditorium in Venice, Cal. The clock has a dial which measures five feet in diameter, and is the first of its kind in operation in the west, being the idea of the founder of Venice, Mr. Kinney. The timepiece will indicate the hours between 7 P. M. and 12 midnight only, and by illuminated colored disks. A powerful arc light placed behind the disk will, at 7 P. M., flash through a white glass screen, placed on the four sides of the tower.



Exactly at 8 o'clock, delicate mechanism connected with an ordinary eight-day clock will operate an electric switch, and as a result a green illuminated screen will begin to appear in the circle, and it will cover just half the disk at the half hour. A blue disk will pass over the face of this unique clock between the hours of 9 and 10, yellow from 10 to 11, and red from 11 to 12, at which hour the light will expire, giving a hint to merry-makers that it is time to retire.

Crowder & Spivig, Bessemer, Ala., have just added a new front to their retail jewelry establishment at the corner of Second Ave. and 19th St.

### A Clock with Sixteen Barrels.

68 NASSAU ST., NEW YORK. GENEVA, SWITZERLAND.

which is neither too light nor too heavy f large and strong springs. The slow d velopment of the springs causes them lose their force, as M. Robert has demo strated. The increase in the gearing a pivots intensifies the friction. This is esp cially prejudicial for the striking part, account of the slowness of the passage fr the state of repose to that of action.

At the commencement of the last centu efforts were made to remedy this inconve ence by increasing the number of sprin and barrels, as in the French alarm cloc which have three barrels. The time of g ing was thus increased.

In the case before us there is a v elaborate movement containing 16 barr placed within two plates; eight are desig for the ordinary train and eight f striking part (see illustration).

The collet forms but a single piece w the arbor. It is quite important that pivots should be polished carefully. I better understanding the influence of springs, we will suppose that there are two barrels, A and B. The barrel B i make the clock go, while a wheel enga with the barrel A; the springs are wo by this wheel, which is furnished with c work. Suppose that each spring ma eight turns on its axis; the two spr ing down, the spring A is completely w up, causing the barrel to make eight tu What will now happen under the deve ment of the spring? The spring A wi distended on winding up the spring B u the two springs are energized equally extremity of the spring will make al four turns. The two springs are now wound; to wind them completely, we obliged to give 16 turns to the barrel A

The mechanism is the same when eight springs are working; one barrel c municates its energy to another until eight springs are wound up. The springs at times become disarranged thus prevent a good working, especi when there are as many as eight. It th fore happens frequently that during winding some barrels will stop for a t and then suddenly resume their course.

It is curious to remark that when springs are not entirely wound the ten is experienced only in the extreme bar (the first and the last); the others rem free and can be moved with the hand. winding stem must make 140 turns winding the eight springs. The principal plates are hollowed on e lathe. The movement is fixed in the f plate by means of four screws. In the p which the barrel occupies in French cl there is a wheel of 84 teeth. The arbo the wheel passes through the front p and its pivot works in the very strong on which the dial is placed. Another pi of 36 teeth is fixed on the first wheel, tween the front plate and the dial. A s wheel placed nearer the edge of the gears with the pinion of 36 teeth; its p

turn between the two plates. This wheel is sufficiently outside to engage with the last barrel. For eventual repairing there is a stop wheel for preventing the complete running down of the spring.

Knowing the number of teeth from the barrel to the fourth wheel, and knowing that this barrel makes about 63 turns until the springs are unwound, we can calculate the period of the clock, which is

$$\frac{63 \times 80 \times 84 \times 80}{36 \times 12 \times 8} = 408 \text{ days.}$$

Of course, the clock cannot go so long, the motive force not being great enough, but it is sufficient for one year. The striking mechanism, which also actuates the date wheels, is arranged to go for 560 days, in order to secure good working for one year. The days, months and lunar phases are read on the dial.

The case is a colossal block of marble, which required the construction of a special chimney mantel. It is not probable that it will serve as a model, but it is desirable that modern annual clocks should exhibit a rate as good as that of the clock described.

## Horse-Race Game in a Watch Case.

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from the *Revue Internationale de l'Horlogerie*

THE watch illustrated below was constructed by Nathan Weill, a watch manufacturer of Chaux de Fonds, Switzerland. Six small horses are fixed on the arms or points of a star, which turns with rapidity upon the least pressure upon a button located at the top of the pendant of the watch.

A flag, painted where the figure 2 usually appears, represents the finish, and each horse is provided with a number.

The mechanism is carefully executed

A RECENT NOVELTY MADE IN SWITZERLAND

well protected against all derangement. The simplicity is one of the chief factors and insures reliable results. The star carrying the horses is mounted upon an arbor provided, in the interior of the case, with a fly and a pinion. A toothed rack moved by the push-button puts the fly in rapid motion, which stops after a number of seconds. This requires no winding.

The case is of oxidized steel, size lignes and very low, so that it affords a very convenient form a means of diversion which is both ingenious and amusing.

## The Time in Paris, France.

EVERY one has remarked the lack of uniformity in Paris clocks, said a writer in a daily exchange, recently. It is proverbial, and probably no city in the world has so many different kinds of time as Paris.

"In Paris you can choose your own time" is an old joke. Now it is to be remedied. The Academy of Sciences makes the announcement that 15 clocks in 15 different quarters of Paris will be regulated on Sunday from the Observatory.

The location of these 15 clocks is published, so that all others may get the correct time from them.

PRIZE ESSAY COMPETITION, No. 16.

SUBJECT:

## How and Under What Conditions Should Auction Sales be Conducted?

THE question "How and under what conditions should auction sales be conducted" depends largely upon the circumstances and motives which decide a firm to use this means for the disposal of its stock.

Any firm adopting this method naturally invites the general public to become its patrons, who are, therefore, justified in believing and have a right to expect that all the goods which they may buy are bought with the fullest confidence that the goods so bought are as represented.

It must be remembered that when any firm auctions off its stock, its sales are in the aggregate larger, and its cash receipts greater, but it must be expected that its profits are smaller than when its sales are made in the regular course of business. But it will be asked, can an auction sale be conducted successfully without using the subterfuges commonly practiced at these kinds of sales?

Since auction sales of any class of goods were instituted, the public and patrons were very often imposed upon and deceived in buying in this way, and in consequence all auction sales to-day are looked upon with suspicion.

The success of an auction sale depends largely upon the reputation of the firm which is conducting the sale and the experience and ability of the auctioneer. There are many reasons why these sales are made; some for the purpose of reducing an overabundance of stock; others again are made as the best means of selling off quickly and perhaps more advantageously undesirable stock which accumulates from time to time; dissolution, retiring from business, change of a firm's policy to carry in the future a distinct or different class of merchandise, or for many other good causes, including perhaps the need of ready cash.

To insure, or rather to attain, a better result from the proceeds of an auction sale, it would be advisable to have your stock presentable by cleaning up your goods, recarding and retagging them and classifying this stock in its proper order, *i. e.*, all your loose diamonds, precious and semi-precious stones, diamond-mounted jewelry, watches, chains, charms, lockets, gold card jewelry, silver goods, roll-plated stock, clocks, flat and hollow silver plated ware, optical goods, cut glass, bric-à-brae, etc., should be properly assorted. The cost of such goods should be accordingly recorded, and all sales made during the continuation and up to the end of the sale should likewise be recorded, so that the daily profits or losses can be easily ascertained.

On the other hand, wherever an auction sale is conducted, it would be to the interest of the jewelers of that place to convene for the purpose of ascertaining and taking some action to prevent a false auction sale. It could be suggested that a committee be chosen from its numbers with instructions that the members of the committee should alternatively and at divers times attend some of these sales in question and report the result of their investigation. Should the consensus of its report, backed by unquestionable evidences, prove that these sales are conducted improperly and under false pretenses, the jewelers should combine in defraying the expenses of advertising or otherwise attracting the attention of the public and warning it not to patronize these sales, stating at the same time good reasons for such an announcement. This same committee should also inform the Jewelers Association and Board of Trade of this fact, which in turn should notify all its members.

No firm conducting such a fraudulent auction sale should be able to obtain any more goods for cash or otherwise from any firm which sincerely desires to protect its customers from the evil effects thereof. This act upon the part of the manufacturing or wholesale jewelers of depriving or cutting off the supply of merchandise needed for the continuation of the auction sale, will perhaps check the too frequent and pernicious method of conducting bogus auctions.

It should be impressed upon the minds of any firm which contemplates conducting an improper auction sale, that it would be indeed very short-sighted upon its par[t] do so as the knowledge which it will h[ave] that such methods will be thoroughly s[cru]tinized and investigated, advertised and [re]ported, or, in other words, the publ[icity] which it will receive will make it too r[isky] and dangerous to continue the practice. [In] fact, it would be against its own inter[est] particularly so, if it desires to cont[inue] business at some future time, even at s[ome] other place. A firm surely could not re[gain] the confidence of its former patrons no[r] cure for itself the reliable reputation it [had] established in the past and which it w[ould] necessarily require to possess for its fu[ture] welfare.

In a recent article "On the Trading St[amp] System," written by the writer and [pub]lished in THE CIRCULAR-WEEKLY, he [en]deavored to impress upon the minds o[f] readers the fact that owing to the pecu[liar] nature of the jewelry business, the pu[blic] patronizes the jewelers chiefly becaus[e it] believes it can depend and rely upon t[heir] established reputation. Therefore, it i[s] essential for any firm engaged in this busi[ness] to maintain that reputation by selling [its] goods, whether by auction or otherw[ise] with the same honorable methods it [has] recognized and pursued in the past.

We have endeavored to demonstrate as previously stated, that by adopting and f[ol]lowing certain methods we could elim[in]ate perhaps entirely, or help to decrease, [the] evils of bogus auctions.

There are two essential factors w[hich] should dominate the reasons for cond[uct]ing an auction sale: (1) the circumst[ance]s which make it necessary to use this met[hod], (2) honest representation of all good[s] fered for sale and an adequate prote[ction] to the public and patrons. The tempt[ation] for a firm to do otherwise may be g[reat] but we firmly believe in the adherenc[e] the old adage, "Honesty is the best po[licy]. the pursuance of which will bring wi[th] its own reward. M.

---

An arrangement in a New York flo[rist's] show window attracted much commen[t] other evening. Two tall, dark green [ferns] formed a setting for one big, black [cat] which sat up making a careful toilette. [The] accidental arrangement was artist[ic] quite effective against the backgrou[nd] pure white wall and crimson carpet. [The] many of those who stopped to smi[le] mained to praise.—*N. Y. Sun.*

### Among the Shadows of the Past.

INCIDENT with the existence of "Jewelers' Row," in the Bowery, New k, extending from the early 30's into 30's of the last century, other sections ie metropolis had a fair sprinkling of blishments of the craft, not a whit less chy of remembrance. The interest in elers' Row" grew in a large degree the closeness in which so many s carrying on the same line of trade clustered. But though the Bowery ose days, especially the earlier ones, an eminently respectable shopping oughfare, it never was either a very ntious nor an exceedingly fashionable being rather of the too popular char-

ie beau monde of New York of those was more inclined to patronize the e splendid and imposing shops of dway and its outlets, as they now ne towards the corresponding ones on Ave. and its outlying districts.

will undoubtedly prove of much in- st to the older spirits connected with jewelry and kindred trades to recall the tats of the jewelers of their early ories. Many of them will undoubt- have forgotten most of these, if in- d not their very names. But merely ition them and the veil, which has pped over the memories of the former be torn aside, and will instantly recall old faces and the old places. Nor, it ioped, will these be all who will be in- sted. For the jewelers of that, or ier those days, were, as they are to- , among the most honorable and re- cted of our tradesmen, and even the ngest of the guild will doubtless be in- sted in this more or less incomplete ter of their predecessors.

uppose, then, on a bright Spring day, ng a stranger to New York, you had ssed the Hudson river from your home that foreign land, New Jersey, by the y which landed you at the foot of Bar- y St. Wending your way through shington Market, and not a little con- ed by its noise and seeming chaos, you nd yourself at the corner of Greenwich

Proceeding northward, soon you uld have found yourself before the store W. T. & T. V. Geuder. These brothers re succeeded by James H. Hart & Co., ose main store was in Brooklyn. Pass- on, you soon would have come to the n of George W. Welsh, and but a short tance north that of John H. Welsh. e similarity of name and trade leads to natural inference. Yes, these were thers, and instead of being competitors, now, they had for a time been part- rs. But there had been a falling out, h the result of separation and fierce alry. The former remained in business ariously, very near the location of that y, under the name of Geo. W. Welsh's n, but has even within the past few nths removed to 256 Broadway.

By a flight, perhaps, of the imagination, us seek Wall St. Here we find Samuel . Benedict, the progenitor in part, and edecessor in whole, of the well-known house of Benedict Bros. He is either to be found at No. 5, just off Broadway, or at No. 53, at the corner of William St., both on the south side, under the Merchants' Exchange, which massive building the Government subsequently acquires, and transforms into the Custom House, which it remains, while the new Custom House on Bowling Green is under construction, to this day. From here, the Benedict firm removed to 132 Broadway, and thence to 171 Broadway, at the corner of Cortlandt St., remaining there so long as to practically become a landmark, perhaps the town clock. It is but two years since that they removed to their present quarters, 145 Broadway, corner of Liberty St., one block below. At No. 25 we pass the store of William F. Ladd.

On Wall St. we also find Geo. C. Allen, first at 51, later at 11, and still later at No. 415 Broadway, and Samuel Hammond & Co. The latter concern is also, until driven out when the Government takes possession, in the Merchants' Exchange, removing thence into William, round the corner. But they ultimately return to Wall St., No. 62, and when that is torn down, to their present abode, No. 79.

But let us seek Broadway. Strolling up that ever-delightful cañon, then so comparatively modest, with its, at highest, five-story buildings, the brisk throng is so confusing to mind that it becomes difficult to remember the jewelers in their proper sequence. But first, at the corner of Cortlandt St., 171, we find Henry Salisbury & Co. The edifice is a quaint one, its ground floor being occupied by the firm as a retail store, while its top story, dormer-windowed, is used by them as a shop for the manufacture of gold spectacles. This firm left no successor, but the store, rebuilt and enlarged, is the subsequent home of Benedict Bros.

Thence it is but a step to the sign of F. H. Lockwood & Co., at No. 206, and again another, and we come to the sign of Tiffany, Young & Ellis. Here let us linger a moment. This is No. 259 Broadway, at the southwest corner of Warren St. This house, now the greatest in the line on the continent, surely, perhaps in the world, is the successor to Tiffany & Young. Subsequently it removed to 271 Broadway, southwest corner of Chambers St., and again to 550, subsequently adding next door, 552, on the east side of the street, below Prince. Its subsequent removal was to the spacious palace it later occupied in Union Square, southwest corner of 15th St. But the glory of that location has passed also, and now Tiffany & Co. are occupying another palace, more adapted to modern conceptions of elegance in the now cosmopolitan center of the jewelry trade, on Fifth Ave., at the southeast corner of 37th St. But in our confusion we have failed to notice the store of Ladd & Bigelow, at 207. This later adopts the style, Geo. Ladd, who subsequently removed to 441 Broadway. Still later, he abandoned the business and went to California. But after some years he came back, entered the employ of Tiffany & Co., and remaining with them, dies in their service.

In the neighborhood of Tiffany, and also opposite City Hall Park, are three or four other jewelers, among them Stebbins & Co., No. 254. This concern is the progenitor, too, of one of New York's present leading jewelry firms, for it is succeeded by Alexander Rumrill & Co., who give way to Jacques & Marcus, who in due course become Marcus & Co., now at 542 Fifth Ave., southwest corner of 45th St. Their intermediate removals have been to 1129 Broadway, west side, between 25th and 26th Sts., to 41 Union Sq., southwest corner of 17th St., and thence to the upper corner of the same street. Alexander Rumrill had been the Co. of the earliest concern, and subsequently admitted into copartnership with himself two of his clerks, Geo. B. Jacques and Geo. D. Stevens.

Another of the jewelers opposite City Hall Park was a Scotchman named Robert Rait, No. 261, whose sign was afterward Robert Rait & Co., the company being that of Thomas Kirkpatrick, whose store is now at Fifth Ave., southwest corner of 33d St. Kirkpatrick severed with Rait and embarked in business for himself, first at the corner of Broadway and Duane St.

Then appears the sign of R. Tenney, whose business was conducted by John G. Brown. Brown subsequently did business at 212 Sixth Ave., under his own name.

Then on Broadway, near Franklin St., we come to the old firm of Freeman & Bennett, originally Norman A. Freeman, of 289 Broadway. This concern subsequently at 825 Broadway, is survived by its junior partner, who, under the style of Edwin Bennett, for many years afterwards has a store way uptown on Broadway, at 1294, near 34th St. He is the pioneer jeweler of consequence who ventures so far uptown, and long before Herald Sq. has been called by that name he has gone out of business.

Just before we reach Canal St. we come to the store of William S. Tarbell, who had previously conducted a store at 89 Fulton St. This gentleman has previously been a partner of Andrew C. Benedict, under the firm name of A. C. Benedict & Co., 28 Bowery, the latter's name and sign still to be seen at the stand with which he was identified 70 years ago. Perhaps Mr. Tarbell had best remained with Benedict, for in the end his Broadway venture will have proved unsuccessful.

On the Southwest corner of Spring St., under the old St. Nicholas Hotel, was Osborne, Boardman & Townsend; all of them were bachelors. They originally started with fancy goods, but later carried a good line of jewelry, etc.

J. W. Faulkner was at 459 Broadway, and Granniss & Co. at 533 Broadway. David Rait was originally at 7 Dey St., from there to 381 Broadway, then to 16 Maiden Lane, and finally to 405 Broadway.

THE HISTORIAN.

*(To be continued.)*

---

The retail jewelry establishment of O. M. Varnson, Valley City, N. Dak., was entirely gutted by fire about a week ago. The fire was caused by an explosion of gasoline in the rear of the store. The stock and fixtures were valued at $8,000. The insurance amounts to $2,000.

## Synthesis of Anisometropia and Antimetropia.

BY GUSTAVUS KAHN.

THE condition wherein the difference in refraction between the two eyes exceeds 1.50 diapters and where the ametropia is progeneric in both eyes, is technically termed anisometropia, that is, a material difference of the same kind of refractive error in either eye. The term antimetropia is applied to all conditions where the error of one eye differs from that of the other.

In the former both eyes may be hyperopic or myopic, or may have the same kind of astigmatism, only differing in amount; or one eye may be emmetropic, while its mate is either hyperopic, myopic, or astigmatic. The latter variety embraces, under the name of antimetropia, all cases where one eye is hyperopic and its mate myopic, one eye having one kind of astigmatism, with an opposite kind in the other eye, or when one eye is myopic or hyperopic, while there is considerable astigmatism in the other eye.

Statistics have proven that many eyes slightly differ in refractive errors as well as in visual perceptive power for light, color and form sense, and that a pair of absolutely perfect eyes is exceptional rather than common; again, a pair of equally defective eyes is equally uncommon. Therefore, in a most strict sense, the majority of cases could be classed under the heading of anisometropia.

But it is natural in all such cases that the best visual perception should develop in the dominant eye; that means that it is the visual impression of this eye to which the mind gives the preference, while the other eye, having the most refractive error with less visual strength, only helps to broaden the field in binocular vision, with a slight increase of visual perception binocularly over single vision with the dominant eye. This makes it possible for slight differences in refraction between the two eyes to be tolerated, with or without the correcting lenses, with perfect comfort; for that reason we disregard all such slight differences as unimportant, and each eye may receive the full correction, with perfect results in binocular vision.

There is a limit, however, to the amount of difference that may be prescribed and still be tolerated when both eyes are used in binocular vision. The rule, governing this, however, like all rules, is subject to many exceptions. Some may tolerate an exceedingly great difference in lens power, while others are sensitive to very small differences; but the majority, as a rule, will not accept, comfortably, spherical lens differences of over 1.50 diopters, while cylindrical differences should not exceed one diopter. Nevertheless, experience in that line has developed the fact, that in many cases the eyes are susceptible to a gradual course of training with the final result that they will be able to use the full correction with great comfort and proportionately increased binocular visual perception.

The younger the subject the quicker and more satisfactory will be the results obtained in this gradual training process; the chief difficulty is, in all such cases, to obtain the client's faithful co-operation, owing to the fact that the general public have not yet been trained to appreciate optometrical treatment. The opinion largely prevails among the laity that glasses must be perfectly fitted in one sitting, and if not it is considered a bungling job, of which many optometrists dread to be accused, and for that reason fail to make suggestions in that direction, and instead prescribe lenses which give the most comfortable vision for the time being without regard to the future.

Should dentists do their work on that principle but very few decaying teeth would be saved by filling, and as with them in the past, when all troublesome teeth were without discrimination extracted, so is it with the optometrist at present. When, however, this calling is fully established as a separate profession, like dentistry, various kinds of optometrical treatments will be introduced, greatly enhancing and widening the narrow limits in which the average optometrist labors at the present day.

The causes usually assigned for the intolerance of full corrections for both eyes are: First, the difference in the retinal images produced with lenses of unequal power; second, the disturbance of the old habit produced by compelling equal accommodation for both eyes with full corrections, where unequal accommodation previously existed; third, prismatic action created by lenses of unequal power, especially in distant vision; fourth, muscular imbalances created artificially are corrected by the prismatic effort of unequal power lenses; fifth, disturbing the function of the dominant eye by compelling the most ametropic eye to share equally in producing the visual perception in the mind.

In order therefore to fully appreciate the causes, it is required to review separately each of the five enumerations alleged as causes.

In the first instance the variations in the size or shape of the retinal images cannot be received as the principal cause, although it may help in a measure to create an intolerance of full corrections; yet there are many exceptions to the rule, for some will at once accept, with comfort, the grea inequality in lens power, and then we h those few cases which cannot tolerate smallest difference.

In the second instance there may be sc thing in the alleged cause with regar the accommodation, but for a similar son as in number one it must be re also.

Experiments have been conducted many leading optometrists in regard to matic disturbances of the unequal lens ers and the results confirm the fact this, too, is inadequately assigned as a cipal cause. It was contended that o to this prismatic power created when vi is directed through the lens margin w account for it, while the exceptional c which tolerate the lenses, were said t a muscular imbalance which the p power created by decenteration neutral Experiments, however, with lenticular cal lenses for the eye of greatest refra error, as well as with prisms in ge have utterly failed to establish this th

Muscular imbalances, either natural or those artificially created by the un refraction present, or by the corre lenses, have also fallen short of the n because all prisms which had been a cated in connection with the unequal l have not given any definite results, but usually made matters worse. This b us to the last, but not least, alleged c I said not least because, critically exam there is more in it than all the other ca put together.

When the dominant eye, which has t most of the seeing from infancy up to and middle age, suddenly is compelle give up completely or partially its old d neering function we would naturally x pect trouble to follow, and, as a matte fact, we find in all such cases that the d nant eye will yield and share vision portionately with the other eye: th proven by increased binocular vision the full correction, while the happy c are such in which the dominant eye a only assumed temporary power awaiting n provement in vision in its mate in c to give up its temporary habit at a mom notice and share equally with the othe in the work of reporting to the bra visual perception in binocular fixatio

Should, then, both eyes see equally singly and have a proportionately larg crease in vision binocularly, it will be f that there is no dominating eye. Th by which to find whether or not there dominating eye is to give each eye its correction; then direct patient to point, with the right, then with the left hand i

## Optical Department.

r at a distant object (both eyes should pen); then when the finger is in line the object, say, of the right hand, left eye; the finger will remain point- n line with the object, but in covering right eye and uncovering the left the between right finger and object will displaced. The same will take place ld we point with left finger (both eyes ), for the dominant eye will be found in a line with either index finger. This ld prove that the dominant eye has not n up its rule and increased binocular on, and unequal lenses will tend to in- se the discomfort.

### otometry Examinations Held Abroad.

stions and answers of the general examin- on held recently by the Worshipful Company of Spectacle Makers, London, Eng.)

*(Continued from issue of Sept.* 13, 1905.)

.—4. Explain why it is that if an object viewed through a concave (negative) and the lens is moved up and down, the irent movement of the object is the same iat given to the lens.

.—4. When an object is viewed through ncave lens the light proceeding from the ct is rendered divergent, being bent ards the bases of the virtual prisms of ch the lens is formed. Now, an object ved through a prism has its image dis- ed towards the edge, so that with a con- lens the various parts of the object ear to be nearer the axis of the lens n seen through the center of the con- lens. If viewed through the periphery image is deflected in the same way as vould be if viewed through the center the lens and a prism. Then as an ob- is viewed through the lens while the er is moved, say, upwards, the image een to move slowly upwards also, the t entering the eye being successively bent re and more towards the thick part of lens as that is brought between the ob- and the eye.

.—5. Explain why a thick lens has two uivalent points" (sometimes called "opti- centers," or, less correctly, "nodal nts."

uppose a thick lens to have a true focal gth of 1.5 inches, and to have a width of inch between its two equivalent points; that it is placed in front of a circular ct, the object being 1 inch in diameter set at a distance of 4.5 inches from first of the two equivalent points; find the size of the image, and (*b*) the gth along the axis from the object to image.

.—5. Owing to there being two refract- surfaces in a lens, a ray of light directed ards the first equivalent point appears r refraction, to come from the second ivalent point in a direction parallel to its ginal course, the distance between them ng the optical interval. When, however, lens is thin compared with its focal g the optic interval is so small that it be ignored, and the two equivalent may considered co-incident at the optical cen- In the case mentioned the image is at

$\frac{1}{1.5} - \frac{1}{4.5} = \frac{3}{4.5} - \frac{1}{4.5} = \frac{2}{4.5}$ or at 2.25 inches from the second equivalent point.

(*a*) Its size is $\frac{1 \times 2.25}{4.5} = \frac{1}{2}$ inch. (*b*) The total distance between the object and image along the axis is $4.5 + .25 + 2.25 = 7$ inches.

Q.—6. Transpose into the best working formula the following prescriptions:

(*a*) $R \frac{-5.25 \text{ D.S.}}{-5.75, \text{ D.C. axis } 60,}$

together with prism 2° base in.

(*b*) $R \frac{+2.25, \text{ D.C., axis } 90.}{+4.0, \text{ D.C., axis } 180.}$

(*a*) $L \frac{-3.25, \text{ D.C., axis } 70.}{-5.5, \text{ D.C., axis } 160,}$

together with prism 1° base in.

(*b*) $L \frac{+3.25, \text{ D.S,}}{-1.5, \text{ D.C., axis } 60.}$

A.—6. The prismatic effect should be equally divided between the two eyes and that for the right lens of combination (*a*) can be obtained by decentering it for 1.50 prism base in needed. Thus

$$\frac{1.5 \times .9}{11} = .12 \text{ Cm.}$$

The sphero-cylindrical combination is in as good form as can be obtained, so that the formula for this lens would read — 5.25 D. Sph. ⊂ — 5.75 D. Cyl. ax. 90° decentered out .12 cm. The left lens of (*a*) should be converted into the sphero-cylindrical lens thus: — 3.25 D.S. ⊂ — 2.25 D.C. axis 160°, and since the cylindrical axis is oblique it cannot properly be decentered for the prismatic effect desired, and the formula should therefore be the sphero-cylindrical mentioned combined with 1.5° prism base in. The right lens of (*b*) should be transposed into + 4 D.S. ⊂ — 1.75 D.C. ax. 90° and the left lens of *b* should be as given in the question.

Q.—7. Explain what different effects a convex lens will have on a narrow parallel beam of light:—

(*a*) When it passes directly through the center of the lens?

(*b*) When it passes through the periphery of the lens?

(*c*) When the incident ray is oblique?

(*d*) When a diaphragm with a circular aperture is interposed in the path of the incident beam?

(*e*) When a diaphragm with a square aperture is similarly interposed?

A.—7. (*a*) The beam of light will be brought to a focus on the principal axis.

(*b*) The beam, if parallel to the axis before refraction, will be brought to a focus on the principal axis, but nearer to the lens than in the case of (*a*).

(*c*) The beam of light will be, after refraction by the lens, brought to a focus on a secondary axis.

(*d*) The circular diaphragm can be considered to have no effect, since the beam of light is small.

(*e*) Similarly, a square aperture will have no effect on a small beam of light.

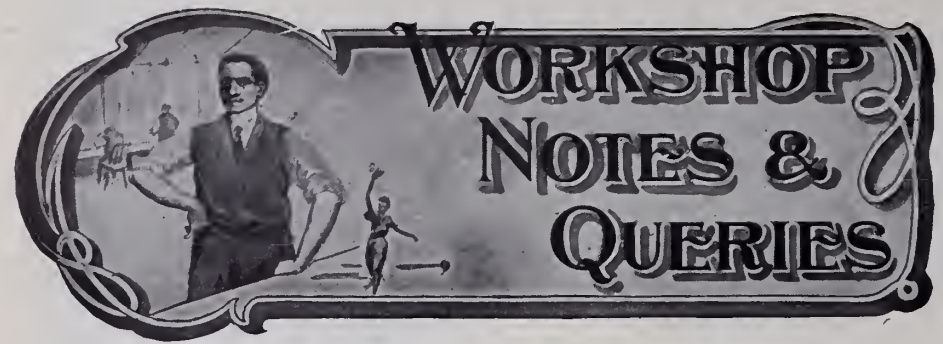
*(To be continued.)*

Lewis T. Rogers, who for 10 years had been with C. Lumsden & Son, Richmond, Va., has engaged in the optical business on his own account at 221 E. Broad St., that city.

## The NEW Standard Prisoptometer.

The above illustration shows the Improved Standard Prisoptometer, an invaluable instrument for diagnosing errors of refraction, without which the equipment of any refractionist's office is not complete. The instrument is handsomely finished and can be attached to any table or stand. Illustrated circulars and directions mailed to any one upon application. The instrument can be obtained of any jobber.

## ANNOUNCEMENT.



A handsomely illustrated 32-page *Catalogue of Machinery* is now ready for distribution.

## QUALITY "STANDARD" QUALITY.

It has been in the past, and is now, our aim to increase the quality and style of our goods whenever circumstances warrant rather than to decrease the price, as is commonly the practice. We make special styles and quality for those of our customers who require something other than the regular styles. Our regular goods are the very best in quality and workmanship that can be turned out by skilled workmen and up-to-date machinery.

If you would be convinced, give us a trial order. The quality of our goods is our best advertisement.

**The Standard Opt. Co.,**
**Geneva, N. Y., U. S. A.**

[*Answers are also solicited from our readers to the questions published on this page.*]

QUESTION No. 1328.—**To Buff Silver-Plated Stock.**—*We do a great deal of silver plating on Britannia ware, which we usually burnish. We want to buff the ware, instead of burnishing it. How should we proceed to obtain good results?* *C. A. & Co.*

ANSWER:—Where silver plated goods are to be finished with the buff it is of importance to have the polished surfaces in perfect condition before the plating. The articles should be free from grease or oil before entering the sand buff room. All the bright parts must be sand buffed and brought to a fine finish, buffed free from all finger marks and stain. If there be any sand left in crevices or other places it should be removed with a dusting brush or cotton waste. The articles are potashed in strong, hot potash and should be perfectly clean when removed, so that no scouring is required. The silver is then deposited in a rich solution with a mild current, so as to produce a bright deposit. If this is carefully done in the plating room the rough buffing can be done without previously scratch-brushing, excepting matted or figured parts.

QUESTION No. 1329.—**Nickel Plating Brass Knobs.**—*How can I get a bright finish on nickel plated knobs? I handle the nickel plating the same as silver. While I finish the silver by burnishing, I finish the nickel by buffing, but cannot obtain a good polish. Can you give me the reason for this?* *A. C.*

ANSWER:—Nickel plating differs somewhat from silver plating, the difference being that for nickel one must have a polished surface before the article is nickeled, while in the case of silver this is not so essential, because the burnishing produces a fine finish after the plating. Take, for instance, a brass knob to be nickeled. First, thoroughly polish all the plain parts and then potash sufficiently to remove all grease. Scouring should be done with whitening and that mostly on the matted or dead surfaces. When the knob enters the bath it should be free from discoloration and stains. After nickeling, the pieces are buffed with cotton flannel buffs and Vienna lime, as they are roughed to a finish.

QUESTION No. 1330.—**To Clean Aluminum.**—*We have a number of aluminum novelties that look shopworn. The frosted parts especially look dull. How can we clean them in order to make them salable? We have tried soap and water, which does not clean them.* *E. B. & Co.*

ANSWER:—Aluminum is best cleaned by washing the pieces in gasoline, using a soft cloth or a sponge. The frosted parts may be freshened up with the brass wire scratch brush on the lathe, after the washing. Aluminum retains its finish for a long time without discoloring. The discoloration will generally be found to be merely dust, which has settled on it.

QUESTION No. 1331.—**To Buff German Silver.**—*What is the best material for buffing and polishing German silver?* *B. A.*

ANSWER:—Powdered pumice mixed with oil is best for buffing German silver. The pumice may be quite coarse, but will soon become fine from the friction with the leather wheels.

QUESTION No. 1332.—**Aluminum Paper.**—*I recently noticed something in the daily papers about aluminum paper and tin foil. Can you furnish me with any information about the same?* *H. B. F.*

ANSWER:—According to United States Consul-General Guenther, at Frankfort, aluminum paper is now manufactured in Germany and recommended as a substitute for tin foil. It is not the so-called leaf aluminum, but real paper coated with powdered aluminum, and is said to possess very favorable qualities for preserving articles of food, for which it is used as a covering. Chemical analysis has proven that aluminum paper contains but few foreign substances. Occasionally it may contain up to two per cent. of iron, but never any arsenic or other poisonous metals. Hence it appears that the powdered aluminum used for the manufactured paper is relatively pure. The paper used is a sort of artificial parchment, obtained through the action of sulphuric acid upon ordinary paper. The sheets are spread out and covered on one side with a thin coating of a solution of resin, alcohol or ether. Evaporation is precipitated through a current of air, and the paper is then warmed until the resin again becomes soft. Powdered aluminum is then sprinkled upon it, and the paper subjected to a strong pressure to fasten the powder thereon.

QUESTION No. 1333.—**Fireproof Bronze.**—*Kindly tell me how I can apply bronze to copper and brass so that it will be nearly fireproof.* *T. L.*

ANSWER:—Dissolve one drachm of crystallized verdigris and an equal quantity of finely powdered salammoniac in 14 ozs. of rain water. Cover the vessel containing the solution and allow it to stand for three or four hours, and then add one and a half pints of water. In bronzing hold the copper or brass article over a coal fire, heat to a uniform heat and color. Then brush it over with the above mixture and dry carefully. In case the article is tinned it must not be heated enough to melt the tin, thus heating the copper five or six ti it acquires a brassy color and after f six to 10 applications a beautiful ye tint will appear. If it is desired to gi copper article a shading from yellow brown, it must be very hot when the r ture is applied. For light brown the o ation must be repeated 20 to 25 times. W the copper has acquired the desired c place it at once in clear water, but do cleanse or dry it immediately after re ing it. In fact, the greatest care is required. It is best to dry the article a moderate coal fire, when the bronze become durable and fireproof.

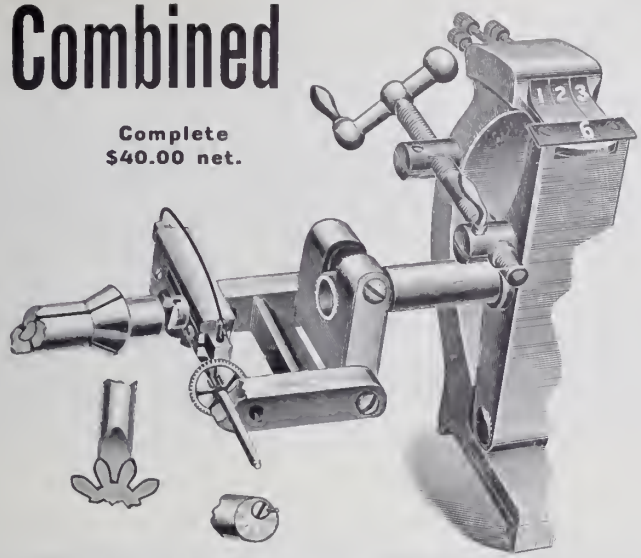
QUESTION No. 1334. — **Chronometer Cleaning and Setting.**—(1) *What sh I use in order to clean the brass parts chronometer?* (2) *How can I set a c nometer on Greenwich time by a We Union clock?* (3) *Is the time sent b Western Union exactly 75°, or what i I have the longitude, and when the strikes 11 in Pensacola I wish to con the time in Greenwich.* *E M.*

ANSWER:—(1) The brass of the ou case, etc., of a chronometer is gene cleaned by a mathematical instrument m or a manufacturer of chronometers. cleaning is done on a lathe, etc., by m of emery paper, and the brass is then c quered. (2) The rating of a chronom requires some knowledge of navigation practice in comparing the beat of a re tor and the beat of the chronometer. Western Union time at New York is for 75° W. longitude, North and South as Pensacola lies within the limits of same civil time district, you have to ship's chronometer to the correct long of Pensacola, which is, for the town, 8 W., and for Pensacola Light, 87° 16' 9 Each degree varying from 0° of G wich is equal to four minutes slow for degree.

QUESTION No. 1335.—**Cement for tation Pearls.**—*Kindly inform me kind of imitation pearl cement the F dence jewelers use for fastening their tation pearls. Where can I purchase s* *S.*

ANSWER:—Cement for fastening may be made of bleached shellac diss in grain alcohol or may be bought watch material dealers, who generally a very fine white cement for sale, wh used by watchmakers and jewelers, a the best cement obtainable.

QUESTION No. 1336.—**French Grey ish.**—*How can I color some silver French grey?* *J.*



ANSWER:—A very good finish is duced by using 5 ozs. of chloride of 5 ozs. of water, 1 oz. of liquid platinu ½ oz. of alcohol. Mix the above we gether and brush the silver pieces over a camel's hair brush. When this is the color is relieved by brushing over a stiff brush, pumice and water. Any to be oxidized should first be treated w sand blast.

---

Brice & Demgen, Green Bay, Wis., dissolved, and the business will be con by Mr. Brice alone. The other partn take a position as traveling represen for a wholesale jewelry concern.
